NEW

NEW INDEX FOR 2010

A new alphabetized index in this catalog lets you locate products faster. An alphabetical listing (by end use) of all Browning products is shown on these two pages. In addition, a quick reference index is located at the beginning of each product section (found on the index page noted in colored header bars).

NEW MOSSY OAK® CAMOUFLAGE FOR 2010

Mossy Oak® and Browning are excited to introduce a new camouflage pattern sure to revolutionize outdoor concealment. New Mossy Oak® Break-Up Infinity™ provides true three-dimensional camouflage with depth and realism that will make you virtually disappear in the woods. This camouflage is so new, sample products could not be produced in time to meet the printing deadlines of this catalog. Look for the Infinity logo and color swatch for the guns and gear available in this new pattern.

2010 HUNTING AND SHOOTING

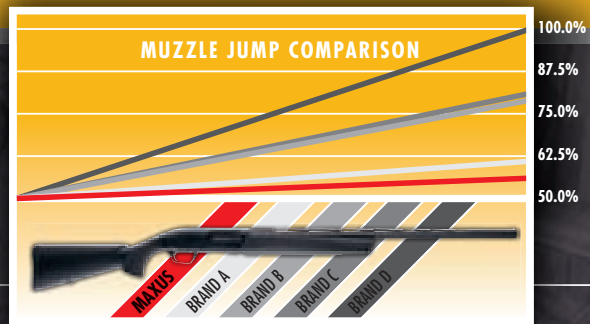

MAXUS®

THE BROWNING MAXUS — MAXIMUM RELIABILITY.

The high performance Browning Maxus is the most exciting autoloading shotgun in decades. Innovative technologies join together and deliver up to 18% less felt recoil for greater comfort, 44% less muzzle jump for more accurate follow-up shots, 19% faster bolt speed and 24% faster locktime than the nearest competitor. Other conveniences like the Speed Lock Forearm and TurnKey Magazine Plug further elevate the Maxus. Shoot a Maxus today and you'll agree it is the finest, most reliable 3½" autoloader ever built.

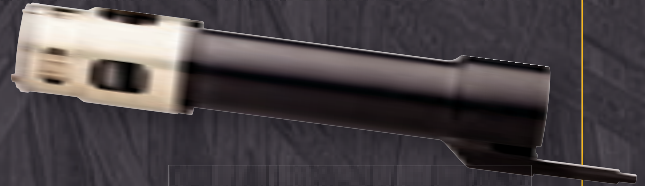

LESS MUZZLE JUMP

Less felt recoil means less muzzle jump and that instantly translates into more birds in your bag. The Power Drive Gas System works perfectly with the Inflex Technology recoil pad to reduce muzzle jump as much as 44% compared to the competition. Feel the performance difference the Maxus makes.

POWER DRIVE GAS SYSTEM

The Power Drive Gas System is the world's finest. Extensive research and testing have resulted in a piston design that's more reliable in all conditions, regardless of heavy or light loads being used. The gas piston features larger exhaust ports that dump gases faster on heavy loads. A patented, enclosed seal design keeps residue out of the action for cleaner operation. The piston has a 20% longer stroke travel to be even more reliable with light loads. Maxus with Power Drive equals outstanding performance.

INFLEX TECHNOLOGY RECOIL PAD

The Inflex Technology recoil pad is the softest pad on any autoloader. More than a mass of recoil absorbing material, it has been engineered with directional deflection to pull the comb down and away from your face with every shot for even greater comfort and faster follow-up shooting.

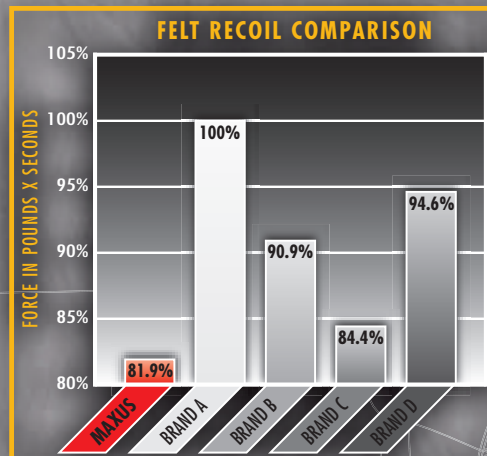

THE SOFTEST SHOOTING AUTOLOADER EVER

Felt recoil is more than just an instantaneous peak force, it is the total energy absorbing experience when you fire a shell. While no recoil reduction system can escape the laws of physics, the Maxus will change your mind about recoil control. The Power Drive Gas System, Inflex Technology recoil pad, Vector Pro™, back-boring and natural Browning balance combine to transfer 18% less total felt recoil force to your shoulder than any autoloader on the market.

SPEED LOCK FOREARM

For the Maxus, our engineers stepped outside the box, then put a target on it. Gone is the traditional bulky screw-on magazine cap, replaced with the patent-pending Speed Lock Forearm. This secure forearm attachment system makes taking down the Maxus for cleaning or storage faster and easier than ever before, and makes attaching or removing a sling a snap.

TOTAL BARREL DYNAMICS

INVECTOR-PLUS™ CHOKE SYSTEM

The proven Invector-Plus interchangeable choke tube system works with Vector Pro™ and back-boring to offer consistent, dense shot patterns with just the constriction needed for the shooting situation. The longer choke taper inside an Invector-Plus choke tube produces consistent patterns with more uniform densities and fewer fliers. The superior design of the Invector-Plus system is far more durable than the choke systems found in our competitors' guns, especially when shooting steel shot. Invector-Plus eliminates gases slipping between the choke tube and barrel that could damage the choke tube and the barrel. See page 124 through 127 for a complete listing of choke tubes.

All Browning firearms are shipped with a free locking device to assist in the safe storage of firearms.

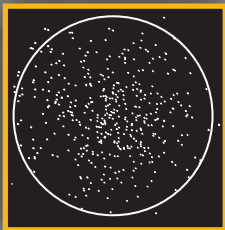

The competition's choke tube is grooved and pitted after shooting 500 rounds of steel shot.

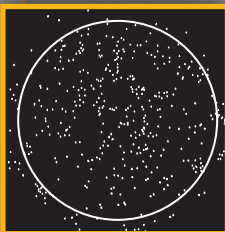

Browning's Invector-Plus choke tube is still flawless after 500 rounds of steel.

Browning pattern with Back-Bored Technology

The competitors' pattern without Back-Bored Technology

VECTORPRO™

VECTOR PRO™ LENGTHENED FORCING CONE

We were the first manufacturer to recognize the advantages of a back-bored barrel and make it a standard feature on shotguns. Now we have gone a step further with Vector Pro, featuring a lengthened forcing cone that is over 2" longer than other systems. This long, gradual taper minimizes shot deformation and maximizes pattern uniformity, consistency and density. Back-boring increases bore diameter to its maximum specification, reducing friction between the shot cup and the barrel to propel the shot pellets to a higher velocity and reduce felt recoil. Reducing constriction from the forcing cone on the shot column results in fewer deformed pellets for more uniform patterns, and keeps more pellets in the central part of the pattern where they need to be to bag birds and targets. Our back-bore specifications represent the ideal bore diameter. A larger bore diameter can let gases slip by the shot cup, resulting in both reduced pellet velocity and blown patterns. A smaller bore diameter means the forcing cone can deform pellets, leading to poor ballistic performance and uneven, spotty pellet coverage on your target.

STEEL SHOT PERFORMANCE

Our barrels are made to handle the punishment of steel shot. Unlike some manufacturers whose guns face an uncertain future after shooting steel, we have long been at the forefront of dependable steel shot performance and durability. Our barrels meet the strictest material and construction quality standards. The barrel blanks are made from rolled and tempered steel bars and are stress relieved to offer the best mechanical properties. The barrel blanks are then precision drilled, reamed and honed to exacting specifications. Browning Maxus barrels will last.

The forcing cone of the competition is pitted and damaged beyond repair after 500 rounds of steel shot.

After 500 rounds of steel shot, the higher-quality Browning barrel shows no wear.

SPEED LOAD PLUS

Speed Loading has been popular on Browning autoloaders for decades. Our patent-pending feeding system sends the first shell loaded into the magazine directly into the chamber. Now, unloading is just as easy with the Maxus. The Speed Unload feature makes emptying the magazine fast and easy, without having to cycle and chamber every shell with the bolt handle.

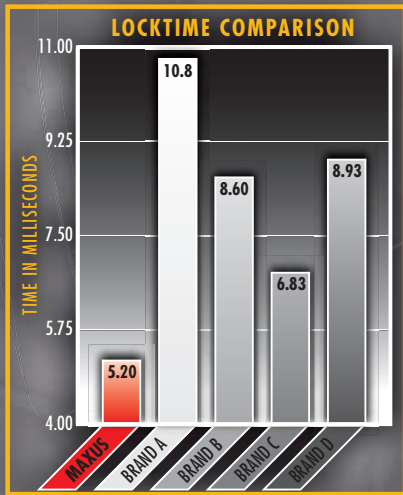

MAGAZINE CUT-OFF

The Maxus is equipped with a magazine cut-off that allows you to easily unload the chamber to change loads without cycling a shell from the magazine.

MAXIMUM GRIP

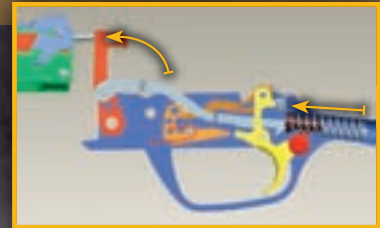

Composite Maxus models combine in-molded textured gripping surfaces and our proven Dura-Touch® Armor Coating for a sure hold and a sleek feel in all climate conditions.

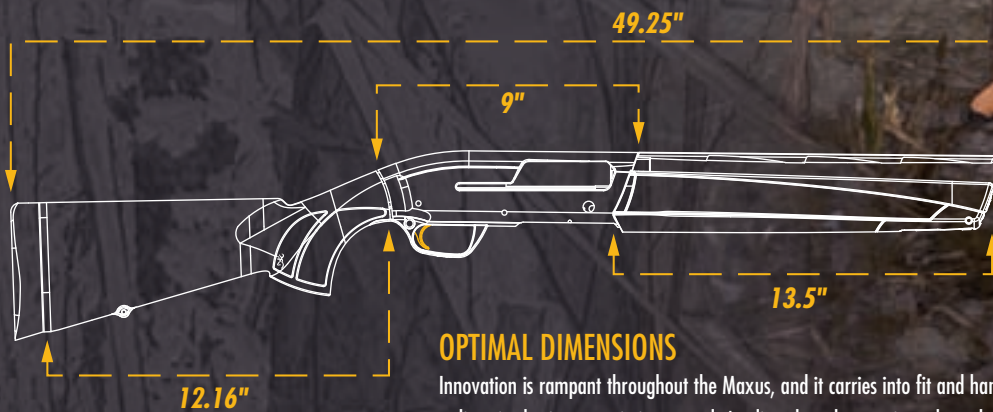

TURNKEY MAGAZINE PLUG

The patent-pending TurnKey Magazine Plug is easily removed in seconds using a vehicle key. Combined with the Speed Lock System, the magazine plug can be removed from the Maxus in mere seconds.

The Lightning Trigger System is the finest ever offered in an autoloading shotgun, designed to offer a smooth, crisp feel with minimal travel. With locktimes averaging .0052 seconds, the Lightning Trigger is 24% faster than the nearest competing autoloader, making every pull perfect. It's also easy to remove for cleaning.

LIGHTNING TRIGGER

OPTIMAL DIMENSIONS

Innovation is rampant throughout the Maxus, and it carries into fit and handling. The Maxus features a trim forearm and close radius pistol grip to maximize control. A relieved steel magazine tube reduces weight allowing a faster swing while maintaining durability. Drop and cast can be tuned using the included stock shim kit. An externally relieved magazine tube reduces weight and adds strength. A low rib is in line with the top of the receiver and translates into a flat point of impact.

Citori

BETTER THAN EVER WITH VECTOR PRO™

The Browning Citori is a legend in the firearms industry. These storied over and unders are the epitome of beauty, strength, performance and reliability. For 2010 the Citori receives a performance upgrade with the addition of Vector Pro lengthened forcing cones in every 12 and 20 gauge model. Once again, the Browning Citori elevates the bar a notch higher for the competition to try and match.

TRIPLE TRIGGER SYSTEM

All Sporting Clays, XT and XS Series Citori shotguns come equipped with the Triple Trigger™ System, which fine-tunes the length of pull. Choose between a wide checkered, a narrow smooth and a wide smooth canted trigger shoe.

LOCKING BOLT AND HINGE PIN

The Citori utilizes a transverse-mounted, full-width tapered locking bolt. The tapered locking bolt engages a full-width tapered recess in the rear barrel lugs. The taper allows the bolt to seat deeper over the years. The hinge pin extends from one side of the receiver to the other for maximum strength. It's the reason people say a Citori wears in, not out.

HAMMERS AND HAMMER EJECTORS

The Citori features hammers powered by stout coil-type mainsprings for positive primer ignition. The convenient barrel selector allows you to choose which barrel fires on the first pull of the single trigger, and the second pull fires the remaining barrel. Ejectors are fired by a sharp hammer blow for more positive ejection than the push imparted by competitors' ejectors. The automatic ejectors eject fired shells when the breech is opened and elevate unfired shells for easy removal.

All Browning firearms are shipped with a free locking device to assist in the safe storage of firearms.

TOTAL BARREL DYNAMICS

VECTOR PRO™ LENGTHENED FORCING CONES — NOW ON ALL 12 AND 20 GAUGE CITORI SHOTGUNS

We were the first manufacturer to recognize the advantages of a back-bored barrel and make it a standard feature on shotguns. Now we have gone a step further with Vector Pro, featuring a lengthened forcing cone that is over 2" longer than other systems. This long, gradual taper minimizes shot deformation and maximizes pattern uniformity, consistency and density.

Back-boring increases bore diameter to its maximum specification, reducing friction between the shot cup and the barrel to propel the shot pellets to a higher velocity and reduce felt recoil. Reducing constriction from the forcing cone on the shot column results in fewer deformed pellets for more uniform patterns, and keeps more pellets in the central part of the pattern where they need to be to bag birds and targets. Our back-bore specifications represent the ideal bore diameter. A larger bore diameter can let gases slip by the shot cup, resulting in both reduced pellet velocity and blown patterns. A smaller bore diameter means the forcing cone can deform pellets, leading to poor ballistic performance and uneven, spotty pellet coverage on the target.

VECTORPRO™

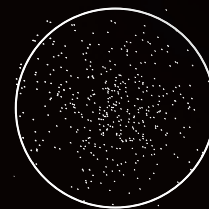

INVECTOR™ CHOKE TUBE SYSTEMS

The proven Invector (28 gauge, .410 bore) or Invector-Plus™ (12, 20 gauge) interchangeable choke tube systems come on every Citori shotgun for consistent, dense shot patterns in the constriction needed for the specific shooting situation. The longer choke taper inside an Invector-Plus choke tube works hand-in-hand with lengthened Vector Pro™ forcing cones and original Back-Bored Technology to produce consistent patterns with more uniform densities and fewer fliers. The superior designs of the Invector systems are far more durable than the choke systems found in competitors' guns, especially when shooting steel shot loads. The Invector systems eliminate gases slipping between the choke tube and barrel that could damage the choke tube and the barrel.

CHROME CHAMBERS

To increase durability, all Citori shotguns feature hard chrome-plated chambers that resist the toll that thousands of shells can take on lesser quality guns. Corrosion resistance is also greatly improved.

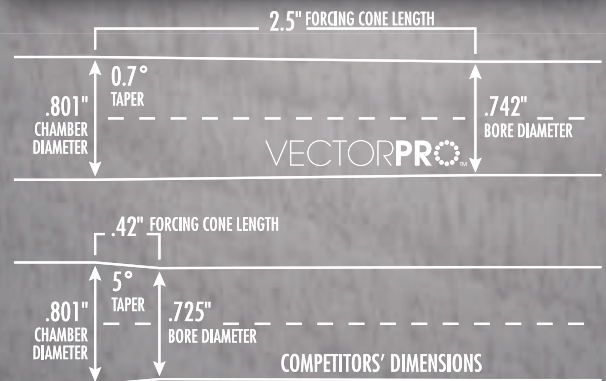

BACK-BORED TECHNOLOGY

Browning pattern with Back-Bored Technology

The competitors' pattern without Back-Bored Technology

STEEL SHOT PERFORMANCE

The strength of a Browning barrel is legendary, and built to handle the punishment of steel shot. Unlike some manufacturers' barrels whose guns face an uncertain future after shooting steel, we have long been at the forefront of dependable steel shot performance and durability. Our barrels meet the strictest material and construction quality standards. The barrel blanks are made from rolled and tempered steel bars and are stress relieved to offer the best mechanical properties. The barrel blanks are then precision drilled, reamed and honed to exacting specifications. With proper care, Browning Citori barrels will last a lifetime.

RECEIVER - Steel · Silver nitride finish · Gold accented, high-relief XS Special engraving
BARREL - Lightweight profile · Ventilated top and side ribs · Tapered, floating low-post top rib · Ported
ACTION - Single selective trigger · Hammer ejectors · Top-tang barrel selector/safety

STOCK - Satin finish walnut stock with right-hand palm swell · Adjustable comb · Semi-beavertail forearm with finger grooves · Ideal for skeet and sporting clays
FEATURES - Vector Pro™ lengthened forcing cones · Five Invector-Plus™ Midas™ Grade choke tubes · Triple Trigger™ System · HiViz® Pro-Comp fiber-optic sight

ENGINEERED FOR YEARS OF PERFORMANCE.

High-quality fit and finish make the Citori one of the most durable, long-lasting guns available. When you open the breech of a Citori, you will experience the smoothness that comes from carefully machined, polished and hand-fit components. A Citori can best be described as elegantly rugged, an over and under shotgun you will be proud to own.

CYNERGY®

A TOTALLY NEW EXPERIENCE IN OVER AND UNDER SHOTGUNS.

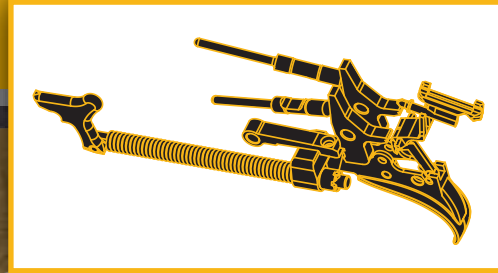

The innovative Browning Cynergy has shown the world a new and better way to build an over and under shotgun. With the lowest-profile, most compact receiver in the industry, a Cynergy is stronger and handles better and faster than the competition. Experience the difference modern design and technology can make.

INFLEX TECHNOLOGY RECOIL PAD

The Inflex Technology Recoil Pad system provides long travel recoil reduction for a massive 25% decrease in felt recoil on 12 gauge guns and makes recoil virtually non-existent on small gauge guns. A slick Parylene coating allows the recoil pad to remain soft, yet prevents the pad from snagging on your clothing. Three pad lengths are available in ½" increments to provide length of pull adjustment to fit a wide variety of shooters. A ¼" spacer is included for customizing. See page 21 for accessories. (Inflex not available on Cynergy Classics.)

INFLEX TECHNOLOGY

MECHANICAL TRIGGER

Cynergy shotguns feature the unique Reverse Striker ignition system, a striker-based, mechanical trigger. A mechanical trigger offers the benefits of a crisp feel, reduced locktime and less overtravel. This innovative, incredibly fast system outperforms the traditional hammer trigger systems found in most over and unders. Cynergy target models are equipped with the Triple Trigger™ System, allowing you to adjust the length of pull and switch between styles of trigger shoes: Wide checkered, narrow smooth and wide smooth canted.

ADJUSTABLE COMB

Composite models include an integrated, adjustable comb system to allow the gun to be easily customized to your individual taste. Drop at comb adjustments are made in ¼" increments. For cast on/cast off customizing, accessory combs can be purchased.

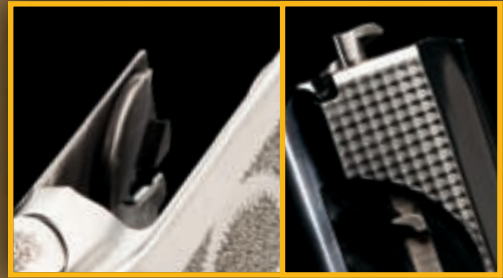

All Browning firearms are shipped with a free locking device to assist in the safe storage of firearms.

SUPERIOR GRIPPING SURFACES

Composite Cynergy models combine molded-in rubberized textured gripping surfaces and our proven Dura-Touch® Armor Coating for a sure hold and a sleek feel in all climate and weather conditions.

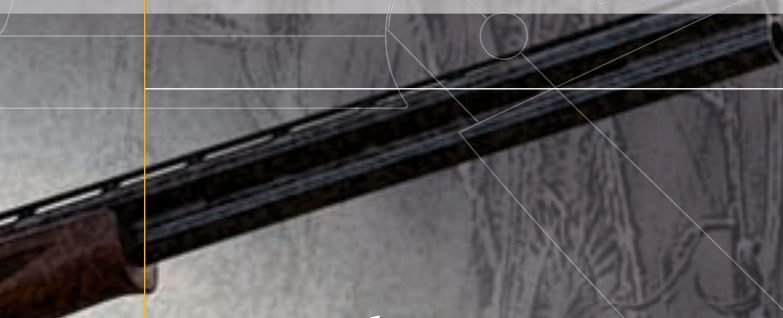

MONOLOCK HINGE The strong MonoLock Hinge is the reason for the Cynergy's low profile receiver. The MonoLock Hinge is the integration of the monobloc and the hinge, and has up to 300% more surface area to pivot on resulting in less wear. Rectangular locking pins provide extra strength and feature a "Wear-In Relief" that allows wear without hindering lock up. For 2010 all Cynergy models feature a jeweled monobloc for a beautiful appearance, smoother function and improved durability.

VECTOR PRO™ LENGTHENED FORCING CONES — NOW ON ALL 12 AND 20 GAUGE CYNERGY SHOTGUNS

We were the first manufacturer to recognize the advantages of a back-bored barrel and make it a standard feature on shotguns. Now we have gone a step further with Vector Pro, featuring a lengthened forcing cone that is over 2" longer than other systems. This long, gradual taper minimizes shot deformation and maximizes pattern uniformity, consistency and density. Back-boring increases bore diameter to its maximum specification, reducing friction between the shot cup and the barrel to propel the shot pellets to a higher velocity and reduce felt recoil. Reducing constriction from the forcing cone on the shot column results in fewer deformed pellets for more uniform patterns, and keeps more pellets in the central part of the pattern where they need to be to bag birds and targets. Our back-bore specifications represent the ideal bore diameter. A larger bore diameter can let gases slip by the shot cup, resulting in both reduced pellet velocity and blown patterns. A smaller bore diameter means the forcing cone can deform pellets, leading to poor ballistic performance and uneven, spotty pellet coverage on the target.

VECTORPRO™

TOTAL BARREL DYNAMICS

CHROME CHAMBERS

To increase durability, all Cynergy shotguns feature chrome-plated chambers that resist the toll thousands of shells can take on lesser quality guns. Corrosion resistance is also greatly improved.

STEEL SHOT PERFORMANCE

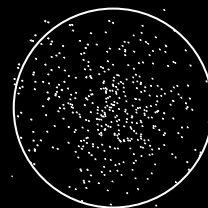

The strength of a Browning barrel is legendary, and built to handle the punishment of steel shot. Unlike some manufacturers' barrels whose guns face an uncertain future after shooting steel, we have long been at the forefront of dependable steel shot performance and durability. Our barrels meet the strictest material and construction quality standards. The barrel blanks are made from rolled and tempered steel bars and are stress relieved to offer the best mechanical properties. The barrel blanks are then precision drilled, reamed and honed to exacting specifications. With proper care, Browning Cynergy barrels will last a lifetime.

IMPACT EJECTORS

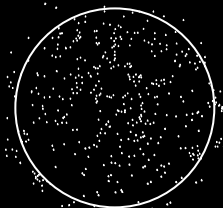

Impact Ejectors ensure solid ejection of empty shells from the chamber. The ejectors are aided by the impact of a second striker spring, which gives more positive ejection than the push imparted by competitors' ejectors. The Cynergy's automatic ejectors positively eject fired shells when the breech is opened. Unfired shells are elevated for easy removal.

BACK-BORED TECHNOLOGY

Composite Model Adjustable Comb

BT-99

DOLLAR FOR DOLLAR, THE BEST THERE IS. There is simply not a better dedicated trap gun than the classic Browning BT-99. Its performance and durability are legendary, with many a BT-99 being the first and only trap gun many competition shooters will ever choose.

VECTOR PRO™ LENGTHENED FORCING CONE

Vector Pro's lengthened forcing cone is more than 2" longer than the competition. This long, gradual taper minimizes shot deformation and maximizes pattern uniformity, consistency and density. Vector Pro takes bore diameter to its maximum specification, reducing friction between the shot cup and the barrel to propel the shot pellets to a higher velocity and reduce felt recoil. Reducing constriction from the forcing cone on the shot column results in fewer deformed pellets for more uniform patterns, and keeps more pellets in the central part of the pattern where they need to be for you to dust more targets.

VECTORPRO™

All Browning firearms are shipped with a free locking device to assist in the safe storage of firearms.

TOTAL BARREL DYNAMICS

INVECTOR -PLUS™ CHOKE TUBE SYSTEM

The Invector-Plus interchangeable choke tube system provides consistent, dense shot patterns in the constriction needed for your shooting situation. The longer choke taper inside an Invector-Plus choke tube works with Back-Bored Technology to produce patterns with more uniform densities and fewer fliers. The superior design eliminates gases slipping between the choke tube and barrel that could damage the choke tube and the barrel. See pages 124 to 127 for a complete listing of choke tubes.

CHROME CHAMBERS

The BT-99 features a chrome-plated chamber to resist the toll thousands of shells can take on lesser quality guns. Corrosion resistance is also greatly improved.

FOREARM

A beavertail forearm helps control recoil and assists hand-eye coordination.

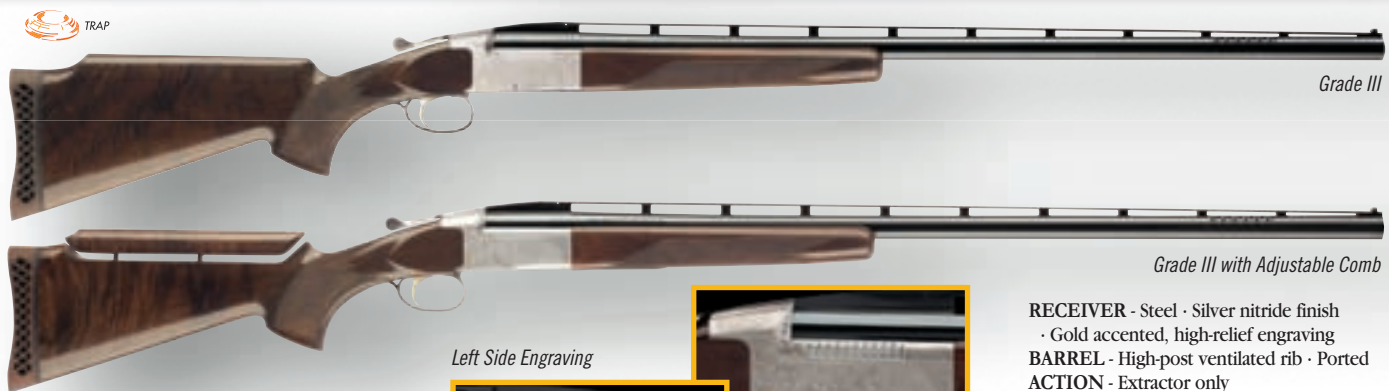

RIB

High-post, 1/32" rib.

EXTRACTOR The BT-99 features an extractor only.

BT-99 GRADE III ▶ GAUGE: 12 | GLOSS FINISH

BROWNING GROWTH INSURANCE PROGRAM

The secret is out, people get bigger. And when they do, they need a shotgun with a longer length of pull to fit their growing frame. Because shotguns are expensive, you might choose a cheaper model or those small of stature are forced to shoot a full-size firearm that will impair performance. That's why we offer the Growth Insurance Program. For a limited time, when you purchase a new BT-99 Micro, Silver Sporting Micro, BPS Micro Trap or BPS Micro you are eligible to purchase a full-size stock down the road at 50% off the retail price. That's a significant savings and allows you to purchase a shotgun of the highest quality that is guaranteed to fit and maximize shooting performance for years to come. Visit browning.com for complete details or to download a coupon for this program.

SILVER — PROVEN RELIABILITY, PERFORMANCE AND LASTING VALUE.

The Silver dutifully honors the tradition of rugged and reliable Browning autoloading shotguns.

The highest levels of craftsmanship, fit and finish, handling, versatility and accuracy go into every Silver. The iconic semi-humpback receiver shape has been a Browning hallmark for more than 100 years.

TOTAL BARREL DYNAMICS

BACK-BORED BARREL TECHNOLOGY

We were the first manufacturer to recognize the advantages of a back-bored barrel. Back-boring increases the bore diameter to reduce friction between the shot cup and the barrel to maximize shot velocity and reduce felt recoil. Through intense research, our back-bore specifications have been perfected and represent the ideal bore diameter needed to minimize shot deformation and maximize pattern uniformity, consistency and density. Any larger and gases slip by the shot cup, resulting in reduced pellet velocity and blown patterns. Any smaller, and the forcing cone will deform pellets and result in poor ballistic performance, fliers and uneven, spotty pellet coverage on the target.

INVECTOR-PLUS™ CHOKE TUBE SYSTEM

The proven Invector-Plus interchangeable choke tube system comes on every Silver shotgun to provide consistent, dense shot patterns in just the constriction needed for your shooting situation. The longer choke taper inside an Invector-Plus choke tube works hand-in-hand with Back-Bored Technology to produce consistent patterns with more uniform densities and fewer fliers. The superior design of the Invector-Plus system is far more durable than the choke systems found in competitors' guns, especially when shooting steel shot loads. Invector-Plus eliminates gases slipping between the choke tube and barrel that could damage the choke tube and the barrel. See pages 124 to 127 for a complete listing of choke tubes.

STEEL SHOT PERFORMANCE

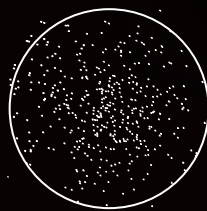

The strength of a Browning barrel is legendary, and built to handle the punishment of steel shot. Unlike some manufacturers' barrels whose guns face an uncertain future after shooting steel, we have long been at the forefront of dependable steel shot performance and durability. Our barrels meet the strictest material and construction quality standards.

The barrel blanks are made from rolled and tempered steel bars and are stress relieved to offer the best mechanical properties. The barrel blanks are then precision drilled, reamed and honed to exacting specifications. With proper care, Browning Silver barrels will last a lifetime.

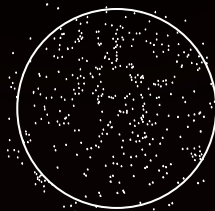

Silver

BACK-BORED TECHNOLOGY

Browning pattern with Back-Bored Technology

The competitors' pattern without Back-Bored Technology

LOAD VERSATILITY The Active Valve-equipped gas piston efficiently adjusts to reliably fire a wide range of loads. 12 gauge 3" models fire everything from light, 1 oz., 2¾" target loads to the heaviest 3" magnums. The larger 3½" version is built to handle a similar range, from 1½ oz., 2¾" field loads up to hard-hitting 3½" magnums. Competitors' guns can't match this versatility.

LESS RECOIL WITH THE ACTIVE VALVE

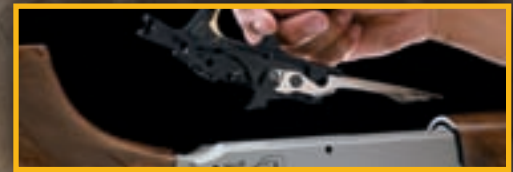

The self-adjusting Active Valve gas system in Silver autoloaders uses gases from fired shells to operate the action instead of contributing to recoil. When shooting light loads, most of the gases operate the action. With magnum loads, only a small amount of gas is necessary to operate the action, while the remaining gases are vented through the Active Valve and out the top of the forearm and away from the receiver for clean, reliable operation. The gas piston and Active Valve operate independently, putting less pressure on the gas piston for greater longevity and more efficient operation than the competitions' gas-operated autoloaders. Because the Active Valve expels unnecessary gases, it reduces recoil before it ever reaches the shoulder — without the need for heavy hydraulic recoil dampers, sticky gel pads and gimmicky gel stock inserts. Superior recoil reduction from the Active Valve also equals faster, more accurate follow-up shots and all-day shooting comfort regardless of the loads used.

Light Load (1 oz.)

Heavy Load (2 oz.)

TRIGGER

The trigger guard is large and has carefully rounded edges to accommodate gloved fingers. Additionally, the Silver's entire trigger assembly can be removed in just seconds for thorough cleaning.

MAGAZINE CAPACITY

2¾": Four in magazine, one in chamber.

3": Three in magazine, one in chamber.

3½": Three in magazine, one in chamber.

(A three-shot magazine adapter plug is included.)

All Browning firearms are shipped with a free locking device to assist in the safe storage of firearms.

MAXIMUM GRIP

Composite Silver models combine checkered gripping surfaces and proven Dura-Touch® Armor Coating for a sure hold and a sleek feel in all climate conditions.

BPS® THE FINEST PUMP SHOTGUN AVAILABLE.

You won't find a more rugged, faster handling pump shotgun than the stalwart Browning BPS. The BPS has proven itself reliable in the rain, snow, dust and mud. They've seen tough duty in marshes, cornfields and on trap ranges. Through it all, count on the BPS to load and eject shells with ease in spite of the conditions.

BPS

TOTAL BARREL DYNAMICS

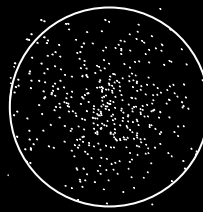

BACK-BORED BARREL TECHNOLOGY

We were the first manufacturer to recognize the advantages of a back-bored barrel. Back-boring increases the bore diameter to reduce friction between the shot cup and the barrel to maximize shot velocity and reduce felt recoil. Through intense research, our back-bore specifications have been perfected and represent the ideal bore diameter needed to minimize shot deformation and maximize pattern uniformity, consistency and density. Any larger and gases slip by the shot cup, resulting in reduced pellet velocity and blown patterns. Any smaller, and the forcing cone will deform pellets and result in poor ballistic performance, fliers and uneven, spotty pellet coverage on the target.

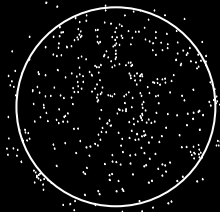

INVECTOR™ CHOKE TUBE SYSTEMS

The proven Invector™ (28 gauge, .410 bore) and Invector-Plus™ (12, 20 gauge) interchangeable choke tube systems come on every BPS shotgun for consistent, dense shot patterns in just the constriction needed for your shooting situation. The longer choke taper inside an Invector-Plus choke tube works hand-in-hand with Back-Bored Technology to produce consistent patterns with more uniform densities and fewer fliers. The superior design of the Invector systems are far more durable than the choke systems found in competitors' guns, especially when shooting steel shot loads. The Invector systems eliminate gases slipping between the choke tube and barrel that could damage the choke tube and the barrel. See pages 124 to 127 for a complete listing of choke tubes.

BACK-BORED TECHNOLOGY

Browning pattern with Back-Bored Technology

The competitors' pattern without Back-Bored Technology

STEEL SHOT PERFORMANCE

The strength of a Browning barrel is legendary, and built to handle the punishment of steel shot. Unlike some manufacturers' barrels whose guns face an uncertain future after shooting steel, we have long been at the forefront of dependable steel shot performance and durability. Our barrels meet the strictest material and construction quality standards. The barrel blanks are made from rolled and tempered steel bars and are stress relieved to offer the best mechanical properties. The barrel blanks are then precision drilled, reamed and honed to exacting specifications. With proper care, Browning BPS barrels will last a lifetime.

BOTTOM EJECTION AND LOADING

Unique bottom ejection provides operating convenience by throwing empty shells straight down, out of your line of sight, making the BPS the best pump shotgun choice for both right- and left-handed shooters.

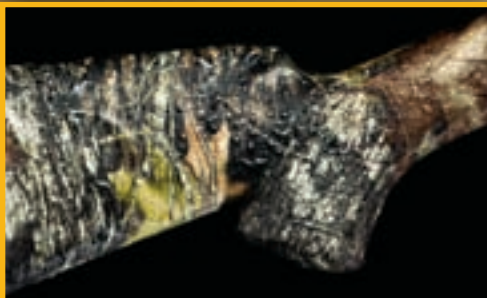

SAFETY

The thumb-operated, top-tang safety on the BPS can easily be operated with the right or left hand, even with gloved fingers.

MAGAZINE CAPACITY

2¾": Four in magazine, one in chamber.
 3": Three in magazine, one in chamber.
 3½": Three in magazine, one in chamber.
 (A three-shot magazine adapter plug is included.)

MAXIMUM GRIP

Camo composite BPS models combine in-molded checkered gripping surfaces and our proven Dura-Touch® Armor Coating for a sure hold and a sleek feel in all climate conditions.

RELIABLE PUMP-ACTION

The proven pump-action design of the BPS is sound and reliable. All components are durably constructed of solid steel and housed inside a receiver machined from a solid block of forged steel. Rigid double slide bars are made from heat-treated steel and eliminate twisting and binding for faster, more efficient operation. The BPS offers smooth operation in all conditions and gives you the ability to stay on target while delivering rapid follow-up shots. A convenient serrated slide release is located at the rear of the trigger guard.

BPS HUNTER ▶ GAUGE: 12 (SHOWN), 16, 20, 28, .410 | SATIN FINISH

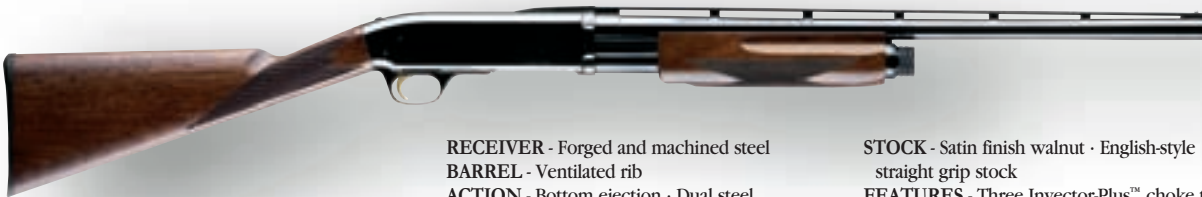

RECEIVER - Forged and machined steel
 BARREL - Ventilated rib
 ACTION - Bottom ejection · Dual steel action bars · Top-tang safety

STOCK - Satin finish walnut
 FEATURES - Three Invector-Plus™ choke tubes with 12 and 20 · Three Standard Invector™ with 16, 28 and .410 · Recoil pad on 12 gauge model · Brass front bead sight

BPS UPLAND SPECIAL ▶ GAUGE: 12, 16, 20 (SHOWN) | SATIN FINISH

RECEIVER - Forged and machined steel
 BARREL - Ventilated rib
 ACTION - Bottom ejection · Dual steel action bars · Top-tang safety

STOCK - Satin finish walnut · English-style straight grip stock

BROWNING GROWTH INSURANCE PROGRAM

The secret is out, people get bigger. And when they do, they need a shotgun with a longer length of pull to fit their growing frame. Because shotguns are expensive, you might choose a cheaper model or those small of stature are forced to shoot a full-size firearm that will impair performance. That's why we offer the Growth Insurance Program. For a limited time, when you purchase a new BT-99 Micro, Silver Sporting Micro, BPS Micro Trap or BPS Micro you are eligible to purchase a full-size stock down the road at 50% off the retail price. That's a significant savings and allows you to purchase a shotgun of the highest quality that is guaranteed to fit and maximize shooting performance for years to come. Visit browning.com for complete details or to download a coupon for this program.

IMPORTANT: DO NOT ATTEMPT THE USE OF 3½" CHAMBERED BARRELS WITH 3" RECEIVERS NOR 3" CHAMBERED BARRELS WITH 3½" RECEIVERS.

X-BOLT™

AWARD-WINNING INNOVATION. Winning the National Rifle Association's prestigious 2009 Golden Bullseye Award for Rifle of the Year confirmed that the Browning X-Bolt is destined for greatness. Designed for total accuracy, the X-Bolt is an integrated system of features that push the limits of factory bolt-action rifle performance, reliability and shooting comfort.

60° BOLT LIFT Short 60° bolt lift is fast cycling and allows you to work the bolt quickly without the scope getting in the way. The bolt is machined from solid steel bar stock for strength and custom rifle precision. Three locking lugs provide exceptional bolt strength.

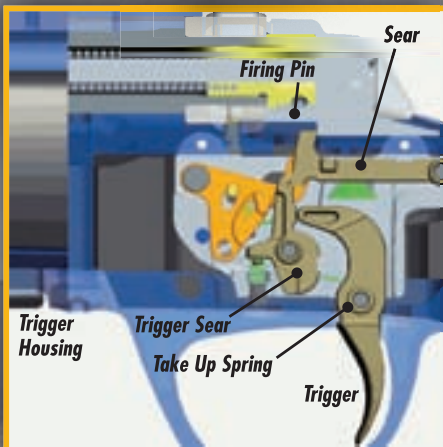

BOLT UNLOCK BUTTON Conveniently located on top of the bolt lever, the bolt unlock button allows the bolt to be unlocked and opened with the safety in the on safe position. The bolt unlock button works in conjunction with the top-tang safety to provide an extra margin of safety when checking and unloading the chamber. The safety blocks the trigger sear and features a firing pin block for added safety.

X-BOLT™

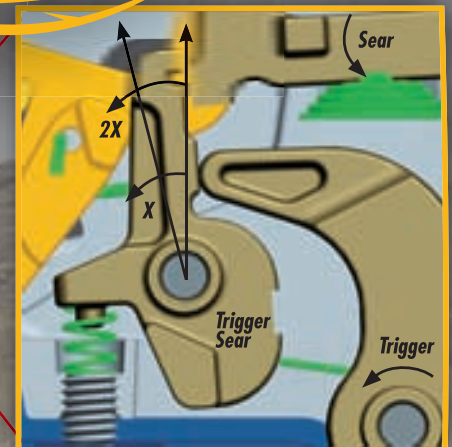

FEATHERTRIGGER™

Full sear engagement (Ready to fire)

Unseared (Fired)

Close-up of unseared (Fired)

For precise shooting there is absolutely no substitute for a crisp, predictable trigger. The X-Bolt's three-lever Feather Trigger™ provides a clean, crisp pull with no take-up or creep and minimal overtravel. The trigger is screw adjustable from 3 to 5 lbs. and factory pre-set at approximately 3½ lbs. An alloy trigger housing contains the hard chromed steel components that are highly polished on all critical contact surfaces. Precise engagement angles mean the X-Bolt Feather Trigger feels light and right and stays that way through many thousands of rounds. Unlike competitors' triggers that rely on a secondary fingerpiece lever, the Feather Trigger is designed right, from the very start.

X-LOCK™ SCOPE MOUNTING SYSTEM

Securely mounted optics are essential for accuracy and precision on any rifle. To ensure the X-Bolt has the most stable scope mounting system possible, the X-Lock mounts feature an all new four screw per base design that replaces the traditional two screw system. The benefits are obvious, with the bases secured at all four corners, rather than only attached at the center of the base for more accurate placement on the receiver. See page 129 for more details on the new X-Lock Scope Mounting System.

All Browning firearms are shipped with a free locking device to assist in the safe storage of firearms.

INFLEX TECHNOLOGY RECOIL PAD

The Inflex Technology recoil pad is standard on every X-Bolt rifle. This ultra soft pad offers the best recoil absorption available on any rifle. The proprietary construction and material promote a directional deflection of recoil forces, pulling the stock comb away from your face to reduce felt recoil and muzzle climb.

MAXIMUM GRIP

Composite X-Bolt models combine in-molded textured gripping surfaces and Browning's proven Dura-Touch® Armor Coating for a sure hold and a sleek feel in all climate conditions.

MAGAZINE

A detachable rotary magazine is incorporated into the X-Bolt. Constructed from a durable lightweight polymer, the magazine is designed to feed cartridges directly in-line with the bolt, instead of offset as with traditional leaf-spring magazines, for a straight shot right into the chamber.

An ergonomic magazine-mounted release lets the magazine rotate directly downward and into your hand. The magazine sits flush with the bottom of the rifle for a sleeker appearance. Additional magazines can be kept loaded and carried for easy access.

BARREL

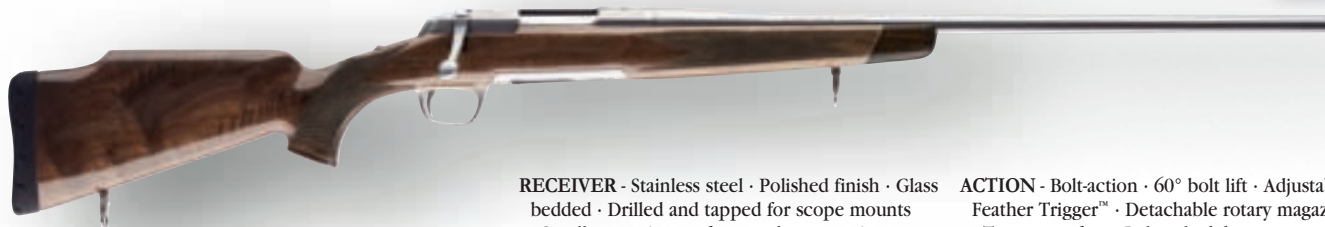

A free-floating barrel is essential for utmost accuracy. The X-Bolt is free-floated by bedding the front and rear of the action for stability. This maintains barrel to stock spacing for consistent accuracy. A recessed muzzle crown helps protect the rifling from damage. Barrels are triple checked for interior finish, straightness and air-gauged for uniformity.

A-BOLT

25TH

ANNIVERSARY

A-BOLT® — THE STANDARD FOR ACCURACY.

With a reputation of outstanding accuracy and reliable performance, the versatile Browning A-Bolt rifle has put a smile on the face of thousands of hunters and shooters. It is this legacy, along with impeccable manufacturing and finish quality, that keeps the A-Bolt going strong. For even greater accuracy pair the A-Bolt with the proven BOSS® System that predictably tunes barrel harmonics to precisely match the ammunition used.

SPECIAL ENGRAVING

To commemorate the 25th anniversary of the introduction of the A-Bolt, select A-Bolt rifles produced in 2010 (in limited quantities) will be adorned with this special engraving on the floorplate.

Script

Block

PERSONALIZED ENGRAVING

The bolt of the A-Bolt rifle can be personalized with your name. Call (800) 333-3288. Not available on the Mountain Ti model.

All Browning firearms are shipped with a free locking device to assist in the safe storage of firearms.

BOLT-ACTION

With a short 60° lift, the bolt incorporates a non-rotating bolt sleeve that runs the full length of the bolt. When unlocked, three guide ribs on the bolt sleeve align with the three locking lugs to allow the bolt to slide smoothly. When locked, these three lugs provide massive bolt strength. The A-Bolt feeds smoothly because of its unique, patented cartridge depressor. This cartridge depressor stays in position, independent of the bolt rotation, as the bolt slides gently over the cartridges in the magazine. The bolt face is recessed, completely surrounding the cartridge base.

MAGAZINE

Hinged floorplate with detachable box magazine makes it simple and fast to load a spare magazine.

MAGAZINE CAPACITY

Three in magazine, one in chamber. Standard calibers: Four in magazine, one in chamber.
223 Rem. : Five in magazine, one in chamber.

THE BOSS® SYSTEM

The Ballistic Optimizing Shooting System is designed to squeeze maximum accuracy from the A-Bolt. The tunable BOSS System easily dials-in barrel harmonics to precisely match the specific ammunition being fired, resulting in amazingly tight groups. The BOSS System is available as an option on the Medallion, Composite Stalker, Stainless Stalker, M-1000 Eclipse and Stainless M-1000 Eclipse. An interchangeable, non-ported BOSS-CR is also included.

BOSS-CR

This accessory is also included with all BOSS-equipped A-Bolt rifles and offers all the accuracy advantages of the original BOSS without the muzzle brake feature.

BEDDED ACTION AND FREE-FLOATED BARREL

The barrel is free-floating and the action is glass bedded at the recoil lug and at the front of the receiver to maintain the proper spacing around the barrel for consistent accuracy. Every A-Bolt features a recessed muzzle crown to protect the rifling. Barrels are hand chambered and triple checked for interior finish, straightness and air-gauged for uniformity.

A-BOLT MOUNTAIN Ti ▶ DURA-TOUCH® ARMOR COATING

NEW FOR 2010
Also available in Mossy Oak Break-Up Infinity camo.

NEW

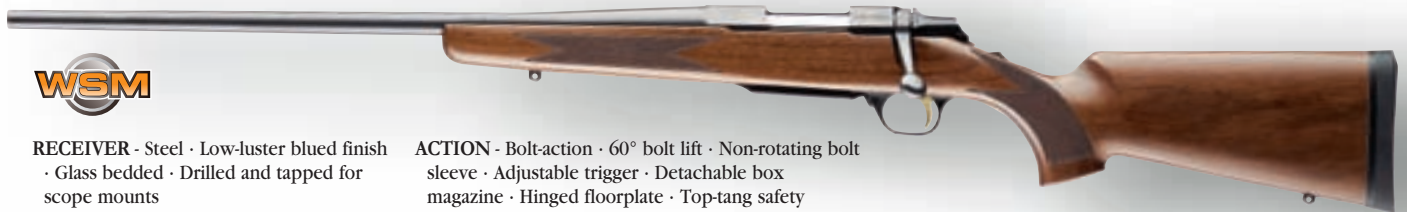

DURA-TOUCH®
Armor Coating

RECEIVER - Titanium · Matte finish · Glass bedded · Drilled and tapped for scope mounts

 · Glass bedded · Drilled and tapped for scope mounts
BARREL - Heavy bull contour · Stainless steel · Low luster finish
 · Free-floating · Hand chambered · Target crown
ACTION - Bolt-action · 60° bolt lift · Non-rotating bolt sleeve
 · Single-set trigger · Hinged floorplate · Top-tang safety

STOCK - Satin finish gray laminate wood · Target style with wide, flat fore-end · Adjustable comb
 · Right-hand palm swell · Checkered
FEATURES - Front sling swivel installed · Recoil pad · Scope and mounts not included

A-BOLT TARGET RIFLES. MAXIMUM ACCURACY RIGHT FROM THE BOX.

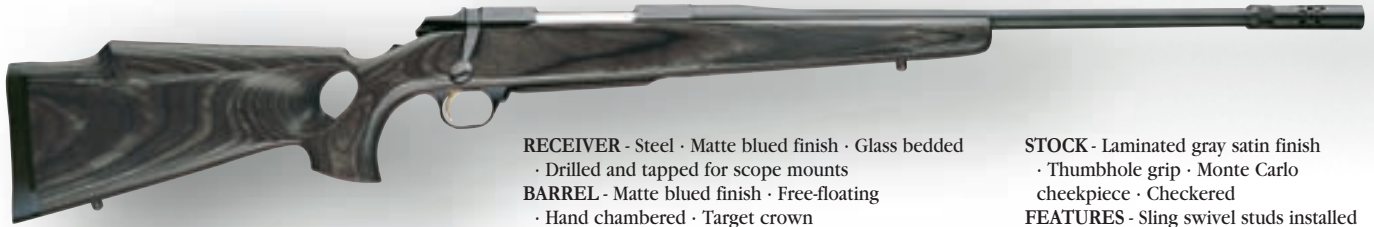

Browning A-Bolt Target models further improve on the already impressive accuracy of the rugged A-Bolt rifle. Target models feature a precise target-style, single-set trigger that is factory-adjusted to approximately 9-14 ounces (250-400 grams) of pull weight in the set mode, and also operates as a conventional trigger with an adjustment range of 4-6 lbs. The action and barrel are carefully bedded in a beautiful laminated stock with a wide fore-end to provide exceptional stability on sandbags or from a bench rest. The adjustable comb allows perfect eye-to-scope alignment, even with large objective target optics. A close-radius pistol grip ensures an easy reach to the trigger and lets you squeeze the most out of an A-Bolt Target rifle's accuracy.

BOSS®-CR ACCESSORY

The BOSS-CR accessory offers all the accuracy and tunable advantages of the original BOSS device without the muzzle brake feature. By simply replacing the original BOSS forward weight and recoil reduction components with the one-piece, no-hole BOSS-CR accessory, only the reduced recoil of the original BOSS is sacrificed. The BOSS-CR accessory is designed to fit only BAR Mark II and A-Bolt centerfire rifles previously factory-fitted with the BOSS.

BLR

BLR® — THE LEVER ACTION FOR TODAY'S MARKSMEN. Most of the famous lever-action rifles in history have the name Browning attached to them. All were ground-breaking designs and lauded for their dependability. The Browning BLR is the modern version of those classics, with a rugged rack and pinion-driven bolt that locks up tight to the barrel making the BLR capable of accuracy other lever actions could only wish for.

ACTION

Advanced, lightning fast, glass-smooth rack and pinion lever-action. Strong rotating head, multiple-lug breech bolt with a recessed bolt face and side ejection.

TRIGGER

Wide groove design trigger with short, smooth pull. The trigger travels with the lever to avoid pinching your fingers when cycling.

MAGAZINE

The flush-mounted detachable box magazine has a capacity of three magnum or four standard rounds in the magazine, plus one in the chamber.

HAMMER The fold-down hammer has two positions at half-cock so the status of the rifle is readily seen. The folding hammer provides an added measure of safety when the hammer is at half-cock. The hammer has four basic positions: full-cock, half-cock, folded hammer position and dropped, or fired position.

RECEIVER Lightweight, sturdy machined aircraft-grade aluminum. Drilled and tapped to accept scope mounts.

SIGHTS Low profile, square notch, screw adjustable rear sight aligns easily with a highly visible gold bead on raised ramp front sight.

TAKEDOWN FEATURES BLR Takedown models are just as accurate and reliable as their unified counterparts but much easier to transport and store. The rifle is easily and quickly assembled without tools by simply sliding the barrel half into the receiver half and locking them together with the flip of a lever. The lever mechanically engages a stout locking lug into a recess in the bottom of the receiver. The system is rugged, precise and blends seamlessly into the styling of the rifle.

SCOPE MOUNTS A scout-style scope mount is available as an accessory for the BLR Takedown models. This one-piece alloy base mounts forward of the receiver and stays attached to the barrel half of the rifle when disassembled to retain the scope's zero. A long eye-relief scope is required (not included). The receiver is also drilled and tapped for conventional scope bases and rings (not included). Three scout-style scope mounts are available for BLR Scout models, depending on the caliber (see chart on page 55).

All Browning firearms are shipped with a free locking device to assist in the safe storage of firearms.

BAR

BAR® — MAGNUM POWER. AUTOLOADER ACCURACY.

The Browning BAR has everything you demand in an autoloader: Accuracy, fast handling and dependability. The multi-lug rotary bolt allows the BAR to fire magnum cartridges with bolt-action accuracy. The slick gas system softens recoil to reduce muzzle climb and improve follow-up shot speed and accuracy. The BAR is simply in a class of its own.

RECEIVER

The Safari model uses a richly blued one-piece ordnance steel receiver with scroll engraving. Stalker, ShortTrac® and LongTrac® models have an aircraft-grade aluminum alloy receiver. All BAR rifles are drilled and tapped for scope mounts. The bolt release lever is incorporated into the receiver.

ACTION

The BAR is a gas-operated autoloader with a high-strength, multiple-lug rotating bolt that locks directly into the barrel. Every cartridge loaded into the chamber of the BAR is surrounded by a recessed bolt face, which is encircled by the barrel and then surrounded by the receiver. A seven-lug bolt and precise breech-to-chamber relationship give the BAR exceptional accuracy and the strength to handle magnum loads. The strong and very rigid action bar/inertia block link-up improves accuracy by reducing barrel vibration. The buffering system reduces wear and stress on the rifle's mechanism.

All Browning firearms are shipped with a free locking device to assist in the safe storage of firearms.

MAGAZINE

Detachable box magazine with a unique hinged floorplate allows you to lower the floorplate, detach the magazine and snap in a full magazine in seconds.

ADJUSTABLE SHIM SYSTEM

ShortTrac® and LongTrac® BAR rifles include six shims that let you customize the drop at comb and cast on/off of the rifle to your ideal dimensions.

MAXIMUM GRIP

Camo composite BAR models combine checkered or overmolded gripping surfaces and Browning's proven Dura-Touch® Armor Coating for a sure hold and a sleek feel in all climate conditions.

THE BOSS® SYSTEM

The Ballistic Optimizing Shooting System is designed to squeeze maximum accuracy from the BAR. The tunable BOSS System easily dials-in barrel harmonics to precisely match the specific ammunition being fired to deliver amazingly tight groups. The BOSS System is available as an option on the BAR MK II Safari.

BOSS-CR

The BOSS-CR offers all the accuracy advantages of the original BOSS without the muzzle brake feature.

BAR LONGTRAC® ▶ OIL FINISH

BAR LongTrac, Left-Hand

THE BROWNING BAR. THE AUTOLOADER HUNTERS WANT.

With more than ten calibers and ten models to choose from, there is a flat-shooting Browning BAR autoloader to fit your needs. From models with an elegant satin nickel receiver finish to utilitarian models that are fully camouflaged for additional concealment, all retain the same rugged and reliable reputation that has made the BAR a favorite for decades.

T-BOLT

T-BOLT™ — QUALITY RIMFIRE ACCURACY. Unique and fun to shoot, the Browning T-Bolt is one of the highest-quality rimfire rifles you can buy. The straight-pull bolt cycles fast and locks-up solidly for unmatched accuracy. The T-Bolt is a gem that exceeds expectations with a level of fit and finish seldom found in a rimfire rifle, translating into impressive performance with each squeeze of the trigger.

STOCK

Available in both right- and left-hand models, T-Bolt rifle stocks are full-size to comfortably fit adults. Durable Composite models feature a Monte Carlo comb and include magazine storage in the buttstock. Walnut stocked Sporter models feature trim dimensions with a satin finish and cut checkering. Walnut Target/Varmint models feature a Monte Carlo comb and wide forearm for stability on the bench. All models include dual action screws for solid attachment, sling swivel studs and a synthetic buttplate.

TRIGGER

The three-lever trigger design combined with a short-travel firing pin give a crisp break, quick lock time, no take-up and minimal overtravel. It is also externally adjustable for pull weight.

ACTION

Receiver is machined from steel barstock. Features crossbolt lockup and an enlarged bolt handle pivot point moved forward for smoother action. The mainspring runs directly through the massive pivot pin. Cocking effort is split between opening and closing for ease of operation. The bolt features dual extractors and a red cocking indicator band. Right-side ejection on both right- and left-hand models.

SAFETY

Top-tang, thumb operated two-position safety can be operated without changing from a shooting grip.

BARREL

Target/Varmint models feature a 22" heavy varmint profile. T-Bolt Sporter models feature a 22" medium sporter profile. All are free-floating and have a semi-match chamber and target muzzle crown.

SIGHTS

Receiver is drilled and tapped for scope mounts (scope not included). See page 128 for scope rings and bases for T-Bolt rifles.

All Browning firearms are shipped with a free locking device to assist in the safe storage of firearms.

BL-22

BL-22™: A RIMFIRE FOR EVERY GENERATION.

There isn't a better built, more versatile lever-action rimfire rifle than the BL-22.

All Browning firearms are shipped with a free locking device to assist in the safe storage of firearms.

- ACTION** Short-throw lever-action travels through an arc of only 33° and carries the trigger with it. This prevents finger pinch between lever and trigger on the upward swing.
- RECEIVER** Forged and milled from solid steel. The grooved receiver accepts most grooved or tip-off type mounts or receiver sights.
- SIGHTS** Precision, adjustable folding leaf rear sight and raised bead front sight.
- BARREL** Recessed muzzle to preserve accuracy.
- TRIGGER** Clean and crisp without creep. Grade II models have a gold colored trigger.
- SAFETY** A disconnect system is designed to prevent firing until the lever and breech are fully closed.
- MAGAZINE** Designed to handle 22 caliber rimfire ammunition in any combination in the tubular magazine. Magazine capacity is 15 Long Rifle or up to 22 Short cartridges.
- STOCK AND FOREARM** Forearm and straight-grip buttstock are shaped from American walnut. Cut checkering featured on Grade II models.

BL-22 FULL LINE DEALER, GRADE II OCTAGON ▶ SATIN FINISH

SA-22

ACTION

Takedown autoloader with bottom ejection.

RECEIVER

Grade I is engraved with scroll design and a polished, blued finish. Grade VI models are available in polished blued or satin grayed finish.

ENGRAVING

Grade VI models are deeply engraved with game scenes. Game figures are 24 karat gold-plated.

SIGHTS

Gold bead front and adjustable, folding leaf rear.

TRIGGER

Blued on Grade I. Gold on Grade VI.

BARREL

Drilled and tapped to accept a scope mount.

SAFETY

Manual trigger-blocking safety is mounted on the trigger guard.

MAGAZINE

Tubular. Capacity: 11 Long Rifle cartridges.

STOCK AND FOREARM

Select American walnut is checkered with a polished gloss finish.

A TRIBUTE TO THE GENIUS OF JOHN M. BROWNING.

The Browning SA-22 is a timeless firearm from the most famous gun maker that ever lived. The genius of John M. Browning lay in his elegantly simple and straightforward design philosophy. An SA-22 allows you to experience his ingenuity firsthand.

All Browning firearms are shipped with a free locking device to assist in the safe storage of firearms.

BUCK MARK RIFLE

SIGHTS The Sporter model features a TRUGLO®/Marble's® fiber-optic sight system.

BARREL Sporter model features lightweight, tapered sporter-weight barrel. Target models feature a steel bull barrel. The chambers in every Buck Mark Rifle barrel are hand-reamed and muzzle crowns are recessed to protect them from damage that could degrade accuracy.

SAFETY

Large manual thumb safety.

MAGAZINE RELEASE

Positioned adjacent to the trigger guard for convenient operation.

MAGAZINE

Magazines are interchangeable with the Buck Mark pistol. The magazine body is heat-treated for long-term feeding reliability and long life. Our coil spring provides a consistent follower angle. 10-round capacity.

TRIGGER

The trigger is light, crisp and has less creep before it breaks and far less overtravel after breaking than other rimfires.

ACTION

The straight blowback design offers enhanced simplicity and reliability.

FRAME

Machined to exacting tolerances from a solid billet of 7075-T6 aluminum. The stock structure is a part of the pistol frame, reducing weight and the number of parts.

SLIDE

Built-in recess and raised side panels for an improved cocking grip. The convenient manual slide release is easily operated with the shooting or support hand.

All Browning firearms are shipped with a free locking device to assist in the safe storage of firearms.

BUCK MARK® RIFLES. EASY HANDLING RIMFIRES.

Quick to your shoulder and fun to shoot, the compact Browning Buck Mark Rifle is based on the popular pistol that shares its name. These lightweight rifles are easy to load and shoot for every member of the family. A Buck Mark Rifle is equally adept hunting squirrels or plinking swinging targets. The Buck Mark Rifle is still made in the USA.

NOTE: *Total capacity includes one round in the chamber. **Weights listed are approximate. ***Measured from centerline of bore.

ACTION

The straight blowback design offers enhanced simplicity and reliability.

SLIDE

Built-in recess and raised side panels for improved cocking grip. The convenient manual slide release is easily operated with your shooting or support hand.

BARREL

Most models have bull barrels for improved stability. The Challenge model has a tapered barrel, while the Lite model has a steel liner inside an ultralight aluminum sleeve. Each chamber is hand-reamed and muzzle crowns are recessed to protect them from damage that could degrade accuracy.

REAR SIGHT

16-click per revolution adjustable Pro-Target™ sight is standard on all models. This sight provides a finer range of adjustment over the industry's standard of 12-clicks per revolution.

FRONT SIGHT

Plus models feature a TRUGLO®/Marble's® fiber-optic front sight. The 5.5 Target includes hooded target sights.

FRAME

While many popular 22 pistols are cast or fabricated from sheet metal stampings, each Buck Mark frame is CNC machined from 7075-T6 aluminum to exacting tolerances.

MAGAZINE

The magazine body is heat treated for long-term feeding reliability. Coil spring provides more consistent follower angle. 10-round capacity.

MAGAZINE RELEASE

Positioned adjacent to the trigger guard for convenient operation.

TRIGGER

Compare it to the competition and feel its light, crisp break with less creep and overtravel.

SAFETY

Large, manual thumb safety. The trigger is disconnected when the magazine is removed for added safety.

GRIPS

Several wood, laminate and composite styles are available. Soft nitrile rubber Ultragrip RX® (URX) and wood Ultragrip Deluxe® (UDX) ambidextrous grips have ergonomic finger grooves for enhanced control.

BUCK MARK® PISTOLS. BUILT TO HIGHER STANDARDS FOR EXCEPTIONAL ACCURACY.

Still made in the USA, the Browning Buck Mark sets the bar high for rimfire handguns with a machined aluminum frame, precision barrel, smooth trigger and fully adjustable sights. Quality, accuracy and long-term dependability are all features you will come to appreciate from a Buck Mark.

BUCK MARK PISTOL

The straight blowback design and hand-reamed chamber of the Buck Mark contribute to its legendary reliability and accuracy.

Ultragrip RX® adds control and comfort.

Pro-Target rear sight offers finer adjustment clicks for greater accuracy.

OF THE BROWNING HI POWER

Shown: Hi Power Standard

See page 77 for Anniversary Edition specifications.

SPECIAL ENGRAVING

To commemorate this historic event for 2010 all Hi Power pistols will be adorned with this special engraving on the top of the slide.

NEW

THE 75TH ANNIVERSARY OF A LEGEND.

In 1923 the French Ministry of War called upon Fabrique Nationale® of Belgium to provide a high-capacity 9mm handgun for military trials. Within months, John M. Browning answered the call with two pistols, the last handguns he designed before his death in 1926. One pistol, designated the Model 1922, was entered and performed admirably at the trials. Though not chosen, it would undergo continuous refinement for the next 14 years by FN's chief firearms technician, the legendary Dieudonne J. Saive. The culmination of the combined efforts of two of the greatest minds the firearms industry has ever known resulted in the FN Model 1935, better known as the Browning Hi Power, one of the greatest firearms ever produced. This legendary sidearm has performed admirably in the hands of military, law enforcement and sport shooters worldwide, and continues to be revered as one of the finest handguns ever produced. 2010 represents the 75th anniversary of the Hi Power. Now is the time to own a legend.

HI POWER™. 75 YEARS OF BEING THE BEST THERE IS.

The solid heft of steel and wood in your hand is not easily replicated with today's polymer pistols, and it's one of the reasons the Hi Power is still so sought after. Its magazine capacity, durability, accuracy and perfect ergonomics have made the Hi Power the sidearm of choice for military, law enforcement and civilians worldwide for seventy-five years.

HI POWER PISTOL

All Browning firearms are shipped with a free locking device to assist in the safe storage of firearms.

SAFETY

A large, ambidextrous manual thumb safety is conveniently located on the frame just above the grip.

SIGHTS

Hi Power pistols are available with fixed, low-profile three-dot sights. The Hi Power Standard is also available with optional low-profile target sights that are adjustable for windage and elevation.

MAGAZINE CAPACITY

Double-stack magazine design. A 13-round magazine is standard in 9mm, and a 10-round magazine is standard in 40 S&W. 10-round models in 9mm are available where required by law. Follow state and local laws regarding magazine capacity when ordering.

TRIGGER

The light single-action trigger breaks clean and crisp. This is the system preferred by professionals around the world.

FRAME AND SLIDE

The frame and slide are built from solid steel, yet remain lightweight. The heft of the Hi Power keeps recoil light and manageable for accurate firing, even at a rapid rate. The Hi Power's balance in your hand is impeccable.

HI POWER MARK III (FIXED SIGHTS)

RECEIVER - Steel · Black epoxy finish
BARREL - 4 $\frac{5}{8}$ " · Black epoxy on slide
 · Low profile fixed sights
ACTION - Locked breech · Single-action trigger
 · Ambidextrous thumb safety
GRIPS - Composite panels · Thumb rest
FEATURES - Extra magazine

HI POWER STANDARD (FIXED OR ADJUSTABLE SIGHTS)

RECEIVER - Steel · Polished blued finish
BARREL - 4 $\frac{5}{8}$ " · Polished blued finish on slide · Low profile fixed or adjustable rear sights with ramped front post
ACTION - Locked breech · Single-action trigger · Ambidextrous thumb safety
GRIPS - Select walnut · Cut checkering
FEATURES - Extra magazine

CUSTOM SHOP

A CUSTOM BROWNING. A LIVING PIECE OF BROWNING HISTORY.

John M. Browning's legacy as the world's greatest firearms inventor lives on in hand-crafted firearms from the Browning Custom Shop in Belgium. Hand assembled and embellished to your discriminating tastes, a custom Browning utilizes time proven designs such as the legendary Superposed, BAR® and Hi Power,™ and traditional hands-on manufacturing methods to ensure your investment in custom work, and the memories made with it, will be enjoyed and shared for generations. For information, call (801) 876-2711 or visit browning.com/custom and download the Custom Shop brochure to see all of the options available.

B25 SUPERPOSED

B25 SP Duck

The most requested Custom Shop model is the legendary Superposed, the last project undertaken by John M. Browning before his death in 1926 and the culmination of his firearms ingenuity and wisdom. The Superposed is the finest and most respected over and under design ever. As in all of Browning's work, the Superposed delivers with perfect balance, economy of proportion and eye-appealing design. As beautiful as a custom Superposed is, it begs to be carried in the field, just as Mr. Browning intended.

The Browning Hi Power is one of the greatest pistol designs of all time. A custom Hi Power offers all the engineering genius of John M. Browning embellished with the beauty and craftsmanship provided by the Browning Custom Shop. A Hi Power Luxus pistol must be held to be fully appreciated.

CUSTOM MADE IN BELGIUM

The Custom Gun Shop of Fabrique Nationale and the Herstal, Belgium Engravers' Cooperative, will make available on special order many different custom enhancements.

These firearms will be fully assembled, fitted and engraved in Belgium to your personal designs and specifications.

PRICE

Prices for the basic firearm, before custom enhancement, are available from the sales department at Browning in Morgan, Utah by calling (801) 876-2711. All prices are subject to change due to changing world currencies.

BROWNING

BROWNING.COM/CUSTOM

HOW TO ORDER

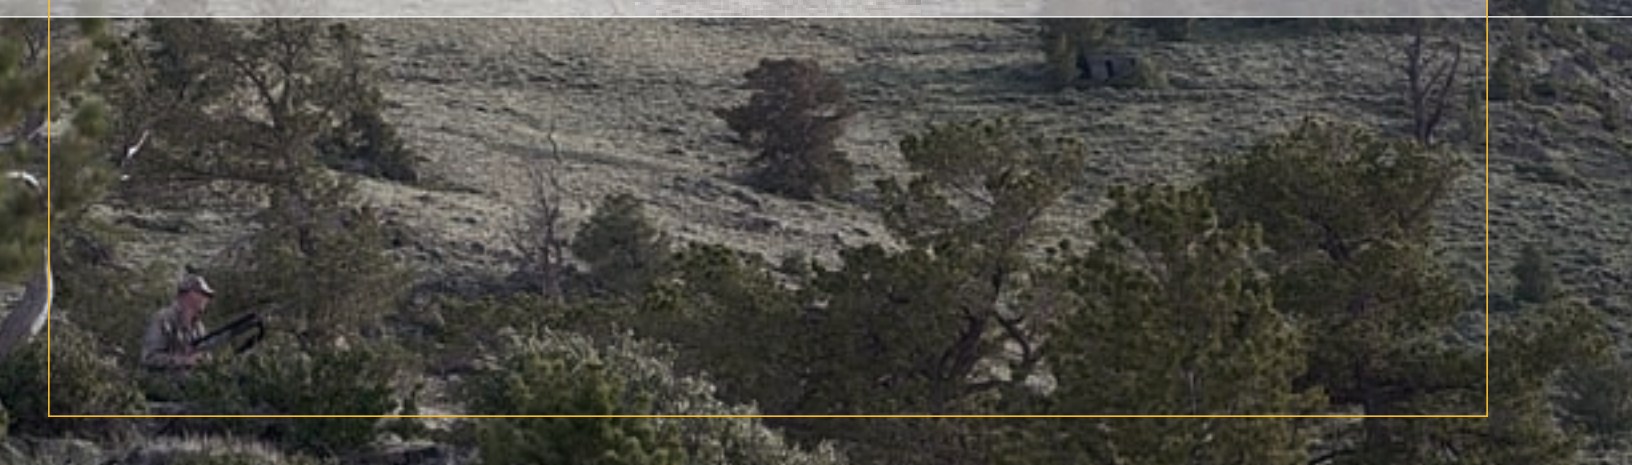

All inquiries for Custom Gun Shop products will be submitted to headquarters in Morgan, Utah. Once the basic specifications have been determined, a written order should be placed with the Morgan office. The specifications will be reviewed with the Custom Shop in Belgium, and a price and delivery date will be determined.

HOW TO BUILD A CUSTOM GUN

Visit browning.com/custom to view or download the Browning Custom Shop brochure. In addition to showcasing the firearms available, this brochure displays and explains the many grades, engraving patterns, checkering patterns, stock and forearm designs and personal touches available to the customer.

DELIVERY

Actual production time will be based on the complexity and detail of the custom order. An approximate delivery date will be furnished with the factory cost quotation.

----------	-----

Browning ProSteel Safes are the most innovative, best constructed gun safes in the industry. We constantly strive to make improvements to security, fire protection, storage and convenience to keep them ahead of the competition. You can be confident that your Browning ProSteel Safe will give you the latest and most important features available.

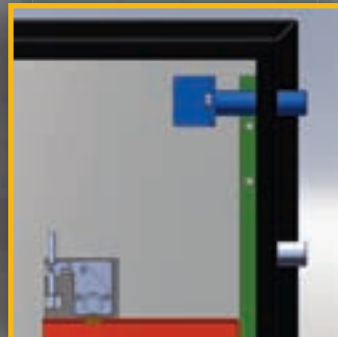

For 2010, we have added an array of anti-pry features for additional protection against this type of attack. Our innovative Pry-Stop Corner Bolts and Pry-Stop End Bolts make it extremely difficult to break into a Browning ProSteel Safe by prying. We have also improved convenience in most safes with the addition of the new Quick Access DPX® door rack that makes it even easier to get long guns in and

out of safes, and DPX Handgun Pouches that allow you to store more handguns than ever before without taking up valuable shelf space.

Whatever level of protection you need, there is a Browning ProSteel Safe that will fit your needs and budget, each with the added security, fire protection and storage extras offered only by The Best There Is® in the safe industry.

SAFE FEATURE ICONS

The icons below highlight key features of Browning ProSteel Safes, and help you quickly identify and compare the features of different safe models.

FIRE/SECURITY RATINGS

Fire and Security thermometers make it easier to compare the level of protection Browning ProSteel Safes provide in these two important areas. The "F" indicates fire protection and the "S" indicates security level. Higher numbers mean better protection.

	<p>FORCE DEFLECTOR™ LOCKING SYSTEM – The Force Deflector Locking System (patent pending) prevents bolt or handle forces from reaching the lock by using a rotating cam device. It prevents energy transfer to the lock better than most systems used in the safe industry.</p>		<p>PRY-STOP CORNER BOLTS – Pry-Stop Corner Bolts provide better protection than other pry-defense designs. Innovative long locking bolts extend diagonally from a reinforced support at the corners of the door to protect against pry attack at the vulnerable corner areas.</p>
	<p>UNI-FORCE™ LOCKING SYSTEM – Our finest safe locking mechanism uses robust cam locks and a large, multiple diversion bar system to prevent bolt or handle pressure from reaching the lock. Forces go to the cams and diversion bars, not the lock, for protection unmatched by other locking systems.</p>		<p>PRY-STOP END BOLTS – Superior to other bolt designs which allow the locking bolt support bar to bend. Pry-Stop End Bolts are over 2½ times longer and attach to a high-strength steel angle iron which prevents the locking bolt support bar from bending in a pry attack. The top and bottom locking bolts on the door side secure the critical door corners.</p>
	<p>1" FORMED DOOR – The 1" Formed Door is engineered with a rugged steel face, back and reinforcement panels to provide excellent strength and attack protection compared to the competition.</p>		<p>LOCKING BOLTS (VARIABLE SIZE) – The rugged steel pieces that move behind the door frame to actually hold the safe door locked and closed. Bigger bolts, and more of them, provide greater security.</p>
	<p>DUO-FORMED® DOOR – The best safe door we offer is formed from multiple layers of steel, carefully formed together to provide superior strength, pry-resistance and attack protection. Full second panel for outstanding strength. The door face is 1½" thick.</p>		<p>BOLT DIRECTION – Better safes have locking bolts extending from all four sides of the door for extra resistance to pry attack. Safes with bolts on three sides have them on both sides of the door and on the top edge.</p>
	<p>OMNIBARRIER® LOCK PROTECTION SYSTEM – A carefully engineered structure of steel hard plate and steel components designed to protect the safe lock from drill, punch and push attacks.</p>		<p>BODY THICKNESS (VARIABLE MEASURE) – The thickness of the steel that comprises the safe body. A smaller gauge number means thicker steel, which provides more security than thinner steel. The thickest Browning ProSteel Safe body is ¾" (on Platinum Plus) and this specification is not shown in gauge measurement.</p>
	<p>FIRE RATING (VARIABLE TIME) – A laboratory measurement of time and temperature (in Fahrenheit) used to compare the relative amount of fire-resistance provided by a safe. Safes with a longer fire rating time provides more fire protection than a safe with a shorter time.</p>		<p>DRILL-RESISTANT DEFLECTOR PLATE – A hardened steel plate strategically positioned at an angle in the door which causes drill bits to bend or break, providing additional protection for the lock.</p>
	<p>LAYERS OF INSULATION – The most important factor in fire protection is the total thickness of the insulation in the safe. More insulation means more protection from fire. Our safes use ½" thick gypsum panels, so the number of layers multiplied by ½" shows the total insulation thickness in inches.</p>		<p>LIGHT PACKAGE / MIRROR – The interior light package includes two light modules to illuminate the safe interior. A mirror covers the top half of the rear wall of the safe. Combined, they make it easier for you to find items inside the safe.</p>
	<p>REINFORCED DOOR FRAME – The door opening of the safe is strengthened by a U-shaped steel channel around the entire perimeter to create added pry and attack resistance.</p>		<p>DPX® SYSTEM – The patented Duo-Plus Extra Storage System is our most versatile our safe interior. It includes a rack to store long guns on the door back. There is also a variety of pouches and pockets to store other valuables on the door back. See page 87 for a complete description.</p>
	<p>180° HEAVY DUTY HINGES – Rugged hinges are machined from solid steel bar stock for strength. The hinges allow the door to swing open 180° for unhindered access to the safe interior. Hinge-side locking bolts maintain full security even if the hinges are cut off. The door is removable to simplify moving of the safe.</p>		<p>DUO-PLUS™ – This patent-pending safe interior increases long gun capacity and makes access to long guns easier with an innovative door-mounted rack.</p>
	<p>UL® SECURITY CONTAINER RATING – The industry standard test and rating for home/personal safes. Requires minimum construction specifications and passing a laboratory attack test. Our premium safes far exceed the minimum requirements for the UL Residential Security (Tool Attack) listing.</p>	<h2>WHY STEP UP?</h2> <p>Starting with the flagship Platinum Plus Series, there is a "Why Step Up?" section at the top of the description area for each series. This section is a list of just the features that distinguish that series from the series below (to the next page or pages) in the safe line up. "Why Step Up?" is an easy comparison between Browning ProSteel Safe series.</p>	

WHAT YOU SHOULD KNOW BEFORE BUYING A GUN SAFE.

Not all gun safes are the same. Different safes offer more or less protection, depending on the features included in the safe. This quick guide helps explain different feature areas and the comparative

protection offered by individual features. You can determine the level of protection you want and need, and choose a safe that best meets those needs.

SECURITY

LOCKING SYSTEM

The locking system connects the lock with the handle and the locking bolts. Better systems are engineered to protect against differing types of criminal attack.

BEST – Uni-Force™ System — Ultimate protection against pry and side bolt attacks. Includes the OmniBarrier® System to encase the lock in steel and hard plate, protecting it against drill and punch attack.

BETTER – Force Deflector™ System — Better than most industry systems protecting against side bolt attack. Includes a secondary re-locker, hard plate and hardened pin lock protection to defend against attacks on the lock.

GOOD – Standard Locking System — Does not provide protection against side bolt attack. All Browning ProSteel Safes feature either the Uni-Force or Force Deflector Systems to defend against side bolt attack.

DOOR THICKNESS

A thicker, more rigid door is better able to resist pry attacks. A door formed from multiple pieces of steel is more rigid because strategic bends in the metal add strength. A formed door also includes fire insulation, and therefore provides more fire protection.

BEST – Duo-Formed® Door — 1 $\frac{1}{8}$ " thick door face. Full steel interior panel.

BETTER – 1" Formed Door — 1" thick door face. Steel reinforcement panels.

GOOD – Plate Door — $\frac{3}{8}$ " thick solid steel door face. All Browning ProSteel Safes have a Best or Better type door.

STEEL THICKNESS

Thicker steel means more protection from any type of criminal attack and from fire.

BEST – $\frac{3}{8}$ " Steel — Equivalent to about 6.5 gauge, 0.1875" thick.

BETTER – 10 gauge or 11 gauge — 0.135" or 0.12" thick.

GOOD – 12 gauge — 0.105" thick.

LOCKING BOLT DESIGN, NUMBER AND PLACEMENT

Better designed locking bolt structures and bigger bolts provide more pry resistance. Top, bottom and corner placement also improve protection against prying.

BEST – Pry-Stop Corner Bolts, four-sided coverage — $\frac{1}{2}$ " or $\frac{1}{4}$ " bolts.

BETTER – Pry-Stop End Bolts, three- or four-sided coverage — $\frac{1}{4}$ " or 1" bolts.

GOOD – Standard Locking Bolts, two-sided coverage — 1" bolts.

FIRE PROTECTION

INSULATION THICKNESS

More insulation means more protection. Insulation acts as a barrier and has a cooling effect. Thicker insulation is a better barrier.

BEST – Five layers of $\frac{1}{2}$ " thick insulation — So thick it is very visible.

BETTER – Three or four layers of $\frac{1}{2}$ " insulation.

GOOD – One or two layers of $\frac{1}{2}$ " insulation.

DOOR SEAL

The door seal activates during a fire to seal the interior of the safe from the fire on the outside. It prevents heat from getting in around the perimeter of the door and keeps the inside cooler. Works by expanding intumescent action in response to heat.

BEST – Premium 3-in-1 Palusol® seal — Palusol is the industry standard expanding door seal. Includes triple-fin protection for a tighter seal and protection against cold smoke damage.

BETTER – Palusol® seal — Industry standard expanding door seal. Expands from five to nine times its original size.

GOOD – Simple rubber seal — All Browning ProSteel Safes use a Palusol® seal for better protection.

CONVENIENCE

INTERIOR CONFIGURATION

A safe should allow maximum storage within its interior, and make it easy for the owner to access the items stored inside.

BEST – DPX® Storage System — Store long guns, handguns and many small items on the door back in a system of pouches, pockets and loops. Long gun and shelf storage inside the safe, convertible to all long gun.

BETTER – Duo-Plus™ Interior — Store long guns on the door back. Long gun and shelf storage inside the safe, convertible to all long gun.

GOOD – Convertible long gun/shelf storage inside the safe — No long gun storage on the door back. All Browning ProSteel Safes designed for long gun storage have a Best or Better type interior.

OTHER IMPORTANT FEATURES

All Browning ProSteel Safes also include: 180° Opening External Hinges for easy access to safe interior (except Compact Series). A steel reinforced door frame for superior pry resistance. Industry-standard Sergeant & Greenleaf® mechanical or electronic locks. All Browning ProSteel Safes carry the UL® Residential Security Container rating.

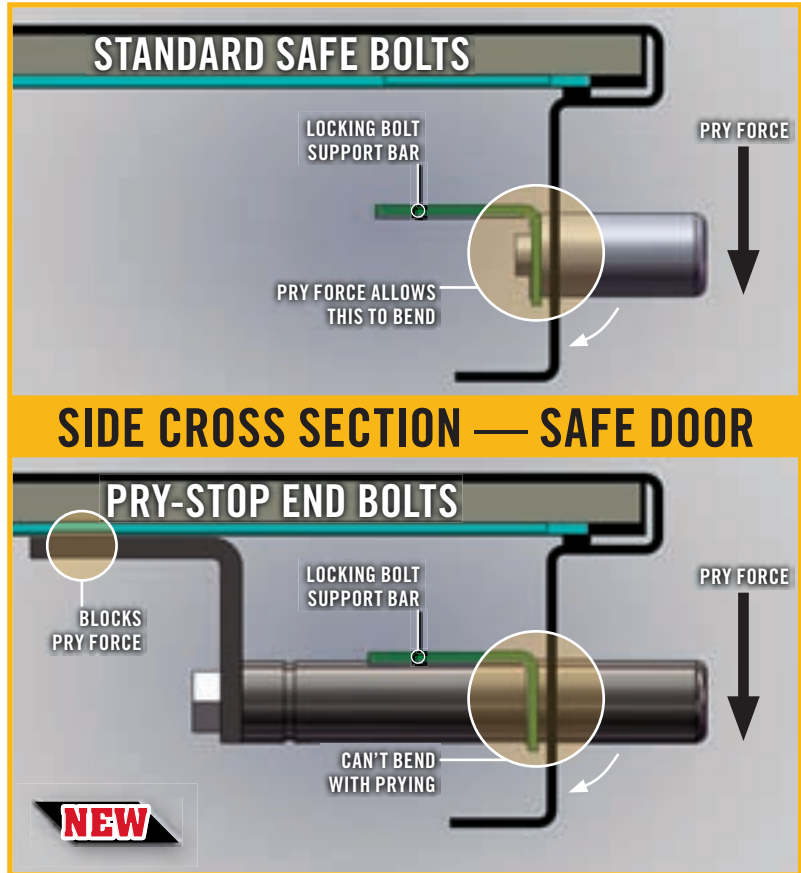

SECURITY BUILT ON MANY LEVELS — INCLUDING ANTI-PRY.

When it comes to innovative security features, Browning ProSteel Safes are the industry leaders. For decades we have held a reputation for being particularly strong in resistance to side bolt, drill and punch

attacks. For 2010 extensive testing, scientific analysis and advanced engineering have produced even more features to defend against pry attacks better than ever before.

Four key design areas contribute to superior pry-resistance: (1) A rigid door, (2) a rigid safe body, (3) a stiff locking bolt assembly and (4) superior bolt engagement in the door frame. All four have been designed into Browning ProSteel Safes for better protection against pry attacks.

Safe corners are weak spots for a pry attack, and great efforts have gone toward addressing the corners to make them nearly impenetrable to pry attack. Our new Pry-Stop Corner Bolts (Platinum Plus, Gold and Medallion Series safes) and Pry-Stop End Bolts (Silver, Bronze, Select, Tactical) plus Anti-Pry Tabs and extension arms in the Uni-Force™ Locking System make corners and crucial moving parts more pry-resistant. Tight-tolerance door fit makes it more difficult to get a prying tool into the door gap, while thicker doors make it harder to get a pry tool behind the door. The number of safes with three and four side locking bolt coverage has grown for additional pry-resistance.

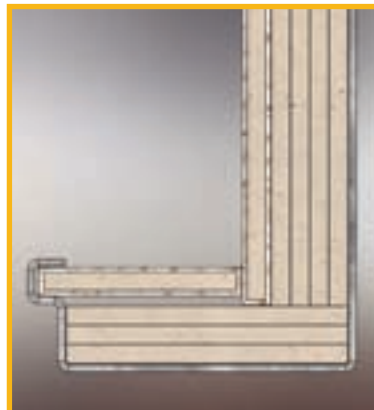

FIRE-RESISTANCE.

When comparing gun safe fire ratings, you will notice that they vary widely. That is because there is no industry standard for fire protection. Therefore, we follow a very stringent test specification — our own. We hold Browning ProSteel Safes to a higher standard for fire-resistance than much of the competition, and label our safes with a credible fire protection rating. After all, the Browning reputation is

on the line. The overall thickness of the insulation is the most important element in fire protection, and more insulation means better protection. Be confident that Browning ProSteel Safes offer excellent fire protection to protect your valuables in case of fire. Different ratings are useful for comparing fire protection in each Browning ProSteel safe series.

WHAT MAKES A SAFE FIRE-RESISTANT?

The amount of insulation, placement of insulation, steel thickness, fire seal and other design elements (rigid door, external hinges, formed door design) are all crucial factors.

In a fire, the welds on a safe often pop due to safe body deformation from the extreme heat. The welds, along with other problems, allow heat to enter the safe and ultimately damage firearms and valuables beyond repair. Extensive testing, industry-leading engineering and decades of experience go into building Browning ProSteel Safes that provide excellent fire-resistance.

Since there is no industry standard test for fire-resistance, consumers are left to simply take the word of the company selling a gun safe. There isn't another safe company out there that has proven its trustworthiness by providing quality products for over 100 years. A Browning ProSteel safe backs up your trust with advanced fire protection features.

BROWNING PROSTEEL SAFES — TRUSTED SECURITY.

Browning is one of the most respected names in the firearms industry and symbolizes a tradition of high quality, innovative products. Those same values carry over into the Browning ProSteel line of safes. Browning safes not only look fantastic on the outside, the security and fire protection features inside of the safes are equally as impressive.

After all, looks add nothing to the real protection a safe provides. Only intelligent design and the highest quality construction will protect your belongings from fire damage and break in. In reality, a safe is a long-term investment in safety and protection. Make sure you invest in a Browning, The Best There Is®.

COMPETITIVE COMPARISON

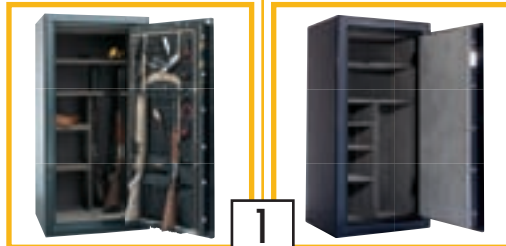

When comparing a Browning ProSteel safe to the competition, it's clear to see that there really is no comparison. Here's why Browning is The Best There Is®:

BROWNING PROSTEEL SAFES

LESSER SAFES

1 ▶ STORAGE SYSTEM

The inside of Browning ProSteel Safes are outfitted with a Storage System to help you store more valuables, and get to them easier. Instead of just a simple gun rack and shelves, every model has a system designed to better utilize the space in the safe. The pockets, pouches and racks mounted on the back of the door provide amazing flexibility to store a variety of items.

1

2 ▶ SAFE LOCKING MECHANISM

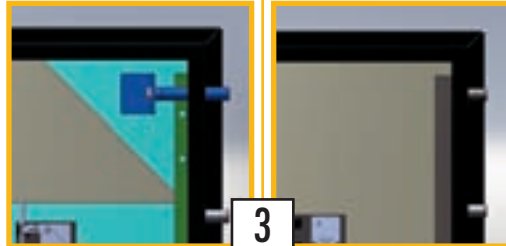

Uni-Force™ Locking System – Our premier locking mechanism (shown) uses robust cam locks and a large, multiple diversion bar system to prevent bolt or handle pressure from reaching the lock. Forces go to the cams and diversion bars, not the lock, creating protection unmatched by any other locking system.

2

3 ▶ DOOR CONSTRUCTION

For better security, the door must be designed and built to protect against multiple types of attack, and must engage the safe body in a manner that prevents break-in. Browning ProSteel safe doors provide extra protection in the areas most susceptible to attack and are more resistant to pry, drill and punch attacks.

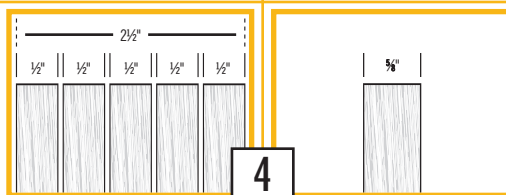

3

4 ▶ FIRE INSULATION / PALUSOL® FIRE SEAL

Browning ProSteel Safes have up to five layers of 1/2" insulation. Thickness of insulation is the most important factor in fire protection.

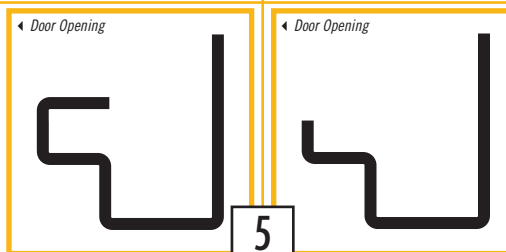

The Palusol seal used on Browning ProSteel fire-resistant safes extends around the door so it is completely sealed in case of a fire. When heated, the Palusol expands to seal the door frame.

4

5 ▶ REINFORCED DOOR FRAME

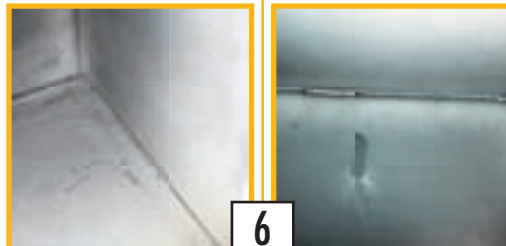

Browning ProSteel Safes have an integrated reinforcement bent into the door frame of every model. The reinforcement is the actual steel thickness of the body with no welds for superior strength and makes the safes more pry-resistant.

5

6 ▶ CONTINUOUS WELDS

Browning ProSteel Safes are constructed with continuous welds for optimal strength.

6

1 ▶ INTERIOR

Other safes simply come with an "interior" that doesn't maximize the storage capacity of the safe. The door back is wasted space. In some cases you must even assemble the shelves yourself. Interior hinges may only allow door to open part way.

2 ▶ SAFE LOCKING MECHANISM

A lesser locking mechanism allows force from the bolts or handle to reach the critical lock. The only protection for the lock is an after-the-fact relocking device.

3 ▶ DOOR CONSTRUCTION

Other safe doors may have weak points at the corners, and the locking bolts may be attached to a bar that is easily bent, both making the safe easier to pry open.

4 ▶ FIRE INSULATION / FIRE SEAL

Some manufacturers claim high temperature or long duration fire ratings with as little as 1/2" of insulation, and they may not want to tell you how much (or little) insulation is in the safe. Lesser safes have gaps in the insulation and the fire seal, and may use a lesser quality fire seal. Internal hinges may create large gaps in the insulation.

5 ▶ NON REINFORCED DOOR FRAME

Some safe manufacturers cut costs by not reinforcing the door frame. This fails to protect against prying or pounding, making the door itself a prime target for attack.

6 ▶ INTERMITTENT WELDS

Some lesser safes have intermittent welds, which create weak points in the safe body. Gaps in welds can also create the perfect pry point for a burglar. Gaps filled with auto body putty and painted over are weak, even if you can't see them.

STORAGE SOLUTIONS

Our versatile safe Storage Systems are designed to maximize not just gun and valuable storage in a safe, but allow you to store and organize odds and ends you never would have thought about keeping in a safe. Knives, GPS units and hunting and shooting gear can all find a home

in the pockets and pouches on the back of the door. More than just an “interior” like other safes, Browning safes have a comprehensive Storage System to help you store more valuables and allow easier access to all the safe’s contents.

DUO-PLUS™ STORAGE SYSTEMS

Many safe brands include a convertible interior, which allows the storage configuration inside the safe to be changed over time as your needs evolve. Browning ProSteel Safes introduced a concept that goes one step further: the Duo-Plus Interior (patent pending). The Duo Interior is Browning’s convertible interior, and the “Plus” is to utilize the inside of the safe door to easily and efficiently store more in the safe. Hence the “Duo-Plus” system includes a convertible interior shelving/rack arrangement, and innovative solutions to fully utilize the valuable space on the back of the door to hold more valuables.

The Duo-Plus concept is used in several different versions to create flexible and easy-access storage. The Duo-Plus Extra (DPX®) offers totally flexible storage of many types of items on the door back, while the Duo-Plus stores just long guns on the door back. No other safe company offers you as many versatile storage options on so many of their safe models.

CAPACITY COMPARISON — Up to 30% more than other safes

	Browning ProSteel 26 Cu. Ft. Model	Other Brand 25-28 Cu. Ft. Safe
Long Gun Capacity with Side Shelves in place	17 guns	11-14 guns
Fast Access Guns	9 guns	2 guns
Gun Locations	Interior and door back	Interior only

DPX STORAGE SYSTEM

QUICK ACCESS DPX® BARREL RACKS

The new Quick Access DPX Barrel Rack allows a long gun to be removed from the rack simply by pulling it straight out from the door back. Flexible polymer wings hold the barrel in place, yet bend to allow guns to easily be pushed into or pulled out of the rack. It’s standard on Platinum Plus, Gold and Medallion Series safes. With the standard DPX Barrel Racks long guns are slid out from under the barrel rack to remove them from the door back storage.

STORAGE SYSTEM DESCRIPTIONS

Each safe series has a standard interior/storage system. The specifications for each model include the type of interior and the long gun capacity for that particular model. Usable capacity depends on the types and configurations of guns stored.

The gun capacity description is a series of three numbers, for example 11/22+7. The first number is the long gun capacity of the interior portion of the safe with part of the space used for shelves (11 in the example). The second number is the interior long gun capacity if the shelves are removed (22 in the example). The "Plus" number (+7 in the

example) is the long gun capacity on the back of the door. The door back capacity can be used to store long guns whether or not shelves are used in the interior. With shelves in place, the safe in this example would have a total long gun capacity of 18 guns.

Different safe models in the same Series (Medallion for example) will have a different size interior of the standard configuration for that series. Photos below show a sample of each type of interior, but not each size. The actual interior size/capacity is shown in the specifications by model.

DPX® STORAGE SYSTEM

The patented (U.S. Patent # 7,409,790) Duo-Plus Extra (DPX) Storage System includes:

- Long gun storage on the door back
- A system of pouches and pockets to store small valuables on the door back
- DPX Handgun Pouches to store handguns on the door back or inside the safe
- A convertible Duo Interior system inside the safe with both shelves and long gun capacity

The DPX System is standard on the following safe series:

- Platinum® Plus
- Silver™
- Select™
- Gold®
- Bronze® (top half only)
- Tactical
- Medallion®

DUO-PLUS™ INTERIOR

The Duo-Plus Interior (patent pending) includes the following:

- A long gun rack mounted on the door
- A convertible Duo Interior system inside the safe with both shelves and long gun capacity
- The door back is finished in the same material as used inside the safe and the long gun rack is coated steel
- The Duo-Plus Interior is standard on TheftGard® safes

INTERIOR OPTIONS

ULTIMATE INTERIOR

ULTIMATE INTERIOR

The Ultimate Interior creates complete flexibility in the interior configuration. It can be factory-installed on Gold, Medallion or Silver Series safes. The Ultimate Interior adds extra shelves so that the entire interior portion of the safe can be used for small items on the shelves. The long gun rack from the DPX® remains on the door, so some long gun storage remains in the Ultimate Interior, even when the interior is all shelves.

The Ultimate Interior is available only as a factory-installed option on Gold, Medallion and Silver Series safes.

DPX® CAMO

DPX® MOSSY OAK® BREAK-UP® CAMO

If your favorite color is camo, then you will love the Mossy Oak Break-Up DPX Storage System. With a background of Break-Up and complementary color pouch and strap materials, the Camo DPX is an outdoor lover's dream. Available only to replace the DPX Storage System used standard on Platinum Plus, Gold, Medallion and Silver Series models. (Not available on Bronze, Tactical or Select.)

OPTIONAL INTERIORS	SUGG. RETAIL

HERITAGE GRAPHICS

Now it is possible to show your allegiance to these great organizations that work to preserve our rights and hunting heritage. The Heritage Graphics option can be ordered to replace the game scene on many safes. You can support your favorite organization by proudly showing its logo and graphics on a gorgeous Browning ProSteel Safe.

Browning makes a donation to the respective organization for each Heritage Graphics option sold. Available only on Hunter Green Metallic or Gloss Black safes in the Platinum® Plus, Gold®, Medallion® and Silver™ Series models.

DUCKS UNLIMITED®

For more than seventy years, Ducks Unlimited has been the leader in waterfowl and wetlands conservation in North America • Metallic *Mallards* scene by David Jackson bonded to surface of safe door

ROCKY MOUNTAIN ELK FOUNDATION®

The mission of the Rocky Mountain Elk Foundation is to ensure the future and conservation of elk and their habitat through education • Metallic *Pass It On* scene bonded to surface of safe door

NATIONAL WILD TURKEY FEDERATION®

Since the inception of the National Wild Turkey Federation in 1973, the number of wild turkeys in the United States has more than tripled. The NWTF is dedicated to conserving wild turkeys and their habitat • Metallic *Struttin' Grounds* scene bonded to surface of safe door

NATIONAL RIFLE ASSOCIATION®

No single group has done more to protect the Second Amendment rights of the American citizen "to keep and bear arms" than the National Rifle Association • Metallic *Eagle* scene by Brent Evans bonded to the surface of the safe door

Vault Door	645 lbs.	22	10-gauge/12-gauge	\$3,079.00	\$2,849.00

NOTE: The vault door is manufactured with an electronic lock which provides an internal lock release. Vault Door is not available with mechanical lock. Universal "L" frame design fits all wall thicknesses from 5½" and larger. Vault door back panel has gray carpet. Game scenes are optional with gloss finish Vault Doors — specify desired scene or scroll on order. Scenes are not available in Sand Metallic colored vault doors.

Black Cherry and Silver Metallic finish safes feature silver/chrome handle, dial ring and graphics. The handle, dial ring and graphics for all other finish colors are gold-colored.

SECURITY DOOR

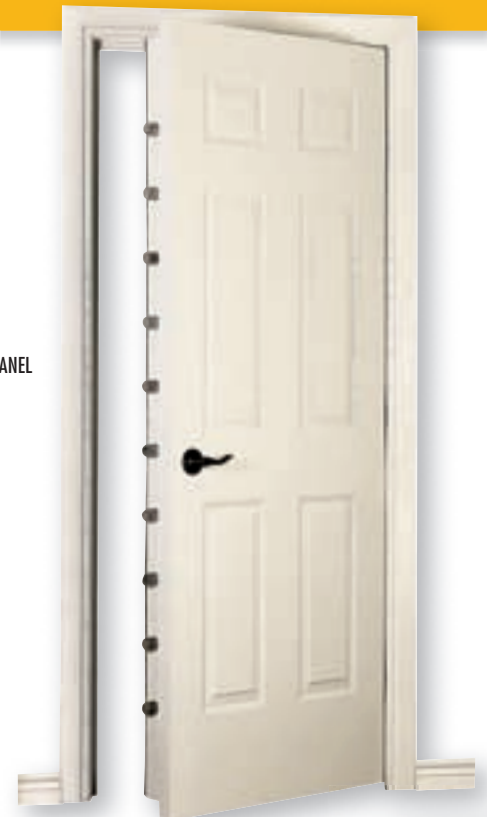

BUILT-IN CONCEALMENT AND SECURITY

The Browning ProSteel Security Door has taken in-home security to a new level. With the appearance of a standard residential door, the Security Door is the perfect option if you prefer to be more discreet about the presence and location of your valuables. The Security Door includes a UL® Listed S & G® Type I Electronic Lock with a keypad that can be mounted and concealed up to seven feet from the vault to further hide the true nature of the door. The Security Door features a six-panel door style to help blend in with other residential doors and can be painted to match. The minimum rough door opening for the Security Door is 83" x 36".

SECURITY DOOR FEATURES

- 1⅝" thick Duo-Formed® type door
- 1¼" chromed locking bolts
- 1" of fire-resistant insulation in the door face
- Residential interior straight brass handle
- UL® Listed S & G® Type I Electronic Lock
- Concealed hinges
- Internal lock release to open the door from within the vault
- Door swings out a full 180° when open

USER-INSTALLED ACCESSORIES

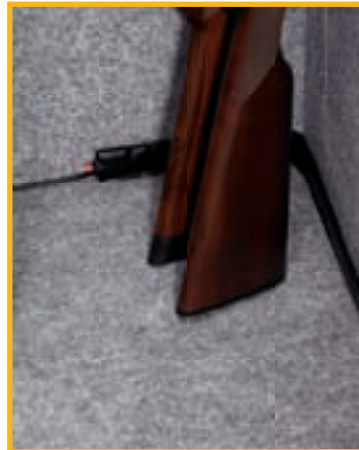

The safe accessories shown on this page are easily installed. New Browning ProSteel Safes are shipped pre-drilled with a molded fire-resistant electrical pass-through sleeve installed in the safe to accommodate the power cord for a light kit or dehumidifier.

EVERDRY™ ELECTRIC DEHUMIDIFIER

The EverDry Electric Dehumidifier removes humidity from the interior of a safe and protects against rust. The 18" long EverDry should be used on safes 30" wide and larger. Cord is removable for installation.

Suggested Retail: \$29.95

FLEXIBLE EVERDRY™ ELECTRIC DEHUMIDIFIER

The Flexible EverDry is flat and easily bends to take up less space and makes installation easier, especially in small safes. Removes humidity from the interior of a safe and protects against rust. Plug is removable for installation. LED indicates unit is operating.

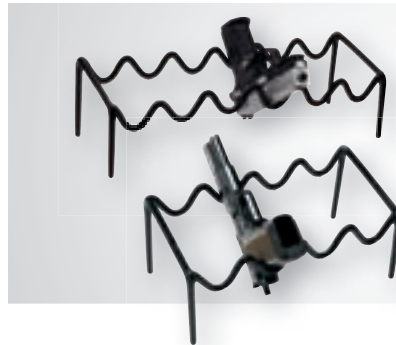

Suggested Retail: \$39.95

DRY-ZONE

Absorbs moisture without electricity, and is rechargeable in an oven. It can be reactivated indefinitely. One 500-gram box protects up to 37 cubic feet of enclosed space, about the volume of a standard 30" wide safe.

Suggested Retail: \$19.95

PISTOL RACK

Store handguns more efficiently and increase storage space on shelves. Access to handguns is made easier by placing them in an upright position. 4 or 6 capacity gun models available.

Suggested Retail: \$24.95 — 6-Gun
Suggested Retail: \$18.95 — 4-Gun

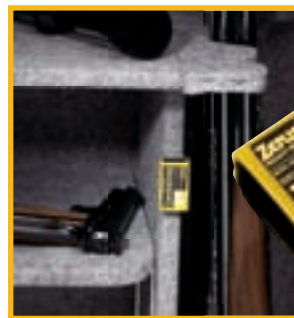

NEW

DPX® HANDGUN POUCHES

Store more handguns in your safe with the versatile new DPX Handgun Pouches. These versatile pouches include snap-straps to allow use on the MOLLE System used on the DPX and also hook and loop fasteners for use on carpeted interior surfaces. Set of two. Not intended for use as a holster.

Suggested Retail: \$24.95

ZERUST® PROTECTANT

Small capsule emits an invisible vapor that forms a corrosion- and rust-resistant barrier on metal surfaces. Volatile Corrosion Inhibitors (VCIs) have been used for years to protect metal parts in industrial and commercial applications. One capsule protects a standard 30" wide safe for one year.

Suggested Retail: \$7.99

VCI GUN SOCKS

Browning's VCI (Vapor Corrosion Inhibitor) Gun Sock seals out moisture. VCI penetrates into the smallest crevices where oils cannot reach, driving out moisture. Provides full protection by forming a vapor enclosure around your firearm from muzzle to butt. The VCI Sock, when used in a safe or cabinet, will offer additional protection to all metal items in the enclosed area. One size fits most firearms.

Suggested Retail: \$14.95

FACTORY-INSTALLED ACCESSORIES

NEW

JEWELRY BOX

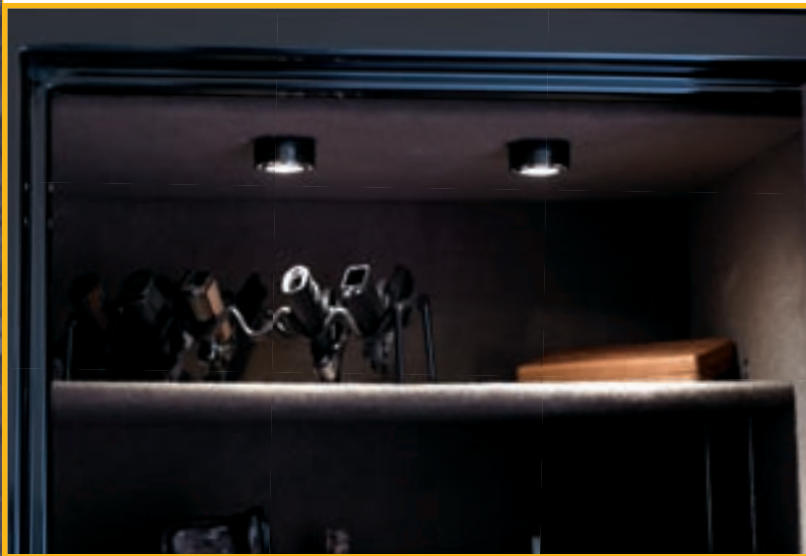

The new Jewelry Box option makes storing and finding jewelry inside a safe much easier and more convenient. The elegant Jewelry Box conveniently holds jewelry and small items inside the safe in an organized, protected manner. Exterior is synthetic leather; interior is lined with jeweler's velvet. Mounted on half shelf below gun rack on most safe models.

Optional on Gold®, Medallion® and Silver™ Series safes.

Standard on Platinum® Plus Series safes.

Factory installed only

Suggested Retail: \$59.95

MEDALLION/SILVER SERIES LIGHT PACKAGE OPTION

This integrated lighting package makes locating objects on shelves or identifying the right firearm convenient and easy. The two included light modules are wired to a door activated switch and illuminate when the door is opened. Factory installation adds a seamless look with no exposed wiring.

Optional on Medallion and Silver Series safes.

Standard on Platinum Plus and Gold Series safes.

Factory installed only

Suggested Retail: \$129.00

MEDALLION/SILVER SERIES MIRROR OPTION

Located on the top half of the back wall, the mirror option looks great and brightens the interior of the safe to make objects, especially those on the rear of the shelves, easier to find. Constructed of break-resistant material for durability.

Optional on Medallion and Silver Series safes.

Standard on Platinum Plus (full length) and Gold Series safes.

Factory installed only

Suggested Retail:

Regular (Fits 28 or 26 cubic foot models)	\$49.00
Wide (Fits 39 or 35 cubic foot models)	59.00
Wide/Tall (Fits 56 or 42 cubic foot models)	89.00

LOCK OPTIONS

The locks below are available as factory-installed options. Availability by series is described in the information for each lock.

S & G® ELECTRONIC LOCK

The S & G Electronic Lock is an advanced security system manufactured by the leader in the lock industry. Includes many technical security features.

Available on all models.

SECURAM™ BIOMETRIC LOCK

The SecuRam Biometric Lock uses the uniqueness of an individual fingerprint as the combination in this advanced security solution. The lock opens with either a fingerprint or a multi-digit code. It is highly secure and operates very quickly. Simple programming instructions. LCD Screen.

Not available on TheftGard, Bronze, Compact Series safes and the Security Door

GUN SAFE WARRANTY

ProSteel offers a Gun Safe Warranty equal to the best in the industry. Browning ProSteel Safes manufactured after January 1, 2006 include a generous warranty that covers:

- ATTEMPTED BREAK IN • BREAK IN • FIRE

If a safe has one of these situations and your homeowner's insurance policy does not cover the damage to the safe, ProSteel will repair or replace the safe. Contents are not covered. Shipping costs for new safe, if necessary, are included.

Some restrictions apply. See Safe Owner's Manual or Browning.com for complete warranty information. Workmanship warranty information is included.

BRUISER CASES

Bruiser Gun Cases offer exceptional protection for your valuable firearms during airline travel and transportation. The high-density double wall polyethylene construction makes this case one tough "Bruiser." For added protection, foam inserts can be extended outward to keep guns separated or pushed inward if not needed.

An O-ring sealed tongue and groove lid provides excellent weather resistance. Recessed wheels offer easy mobility. Corrosion-inhibiting Zerust® inserts are added to each case to help protect your firearms from rust. Bruiser Gun Cases are offered in double gun or single takedown models.

Foam inserts protect guns from each other

VCI Gun Sock	Two-Piece	149986	\$14.95
VCI Gun Sock	One size	149985	14.95

CLOSURE - Drawstring

The VCI (Vapor Corrosion Inhibitor) Gun Sock seals out moisture. VCI penetrates into the smallest crevices where oils cannot reach, to drive out moisture. Provides full protection by forming a vapor enclosure around firearm from muzzle to butt. The VCI Sock, when used in a gun safe or cabinet, will offer additional protection to all metal items in the enclosed ar One size fits most firearms.

SAWTOOTH MOUNTAIN BAGS

Sawtooth Mountain bags are built for rugged adventures. From the Ballistic Nylon and heavy-duty 900 denier poly shell fabric, to the oversized zippers, durable molded bottoms and reinforced stress points, these bags are designed to withstand the abuse of traveling to hunting camps with heavy loads. The anvil-style openings on both duffel bags provide a wide mouth to quickly pack or locate clothing, while the separate bottom compartments are perfect for separating dirty boots and other gear. The conveniently-sized Gear Bag is ideal for knives, flashlights and ammo and the zip open top makes everything fast and easy to grab. Each bag has been designed by the famed Fishpond® company to be The Best There Is®.

LARGE DUFFLE

- Anvil-style opening
- Cavernous main compartment
- Two huge side compartments
- Two pockets under buckle-down flap
- Large bottom pocket for boots or parkas
- Hidden pocket for a handgun
- Mossy Oak® New Break-Up®
- Dimensions: 26" L x 16" W x 16" D

MEDIUM DUFFLE

- Anvil style opening
- Big main compartment
- Two side pockets
- Two pockets under buckle-down flap
- Large bottom compartment for boots or a parka
- Mossy Oak® New Break-Up®
- Dimensions: 18" L x 12" W x 12" D

GEAR BAG

- Ideal for ammo, flashlights, knives and other small items
- Slick dual-entry top for quick access to ammo or gear
- Accessory pocket on the end
- Removable dividers to customize interior
- Hard molded bottom
- Mossy Oak® New Break-Up®
- Dimensions: 15" L x 7" W x 7" D

SALT CREEK WATERFOWL BAGS

SALT CREEK
waterfowl

Large Duffle

Medium Duffle

Gear Bag

Luggage Tag

NEW

The Salt Creek meanders through some of the West's finest waterfowl marshes, so it's only fitting that the Browning waterfowl bags that bear its name are the finest on the market. As any duck hunter knows, waterfowl gear must stand up to the harshest conditions. Salt Creek bags are built out of the finest and most rugged materials like wear-resistant Ballistic Nylon and heavy-duty 900 denier poly, rust-proof pewter zipper pulls, oversized heavy-coil zippers, reinforced stitching, rigid foam liners and molded waterproof bottoms. These are just some of the construction features that make these bags the top-of-the-line gear for waterfowl hunting. Couple the durable construction with functional design and handsome aesthetics and it's hard to imagine a better built, better looking, more functional line of waterfowl bags anywhere. Designed and engineered by the famed Fishpond® company, these bags are built with the sole purpose to be the finest waterfowl bags on the market.

LARGE DUFFLE

- Cavernous main compartment
- Large outer lid pocket
- Two end pockets, one rear pocket
- Rigid lid has buckle, zippered and magnetic closures for easy access and protection from the elements

INVECTOR-PLUS™ CHOKE TUBES

The Speed Wrench allows for quick and easy choke removal. Fits most Browning choke tubes.

The T-Wrench allows greater leverage to be applied when tightening a tube.

Invector-Plus Choke Tube

- Invector-Plus™ tubes are available in constrictions ranging from Cylinder to Extra-Full
- Longer choke taper inside Invector-Plus choke tubes for use with back-bored barrels
- Produces excellent patterns with uniform densities

- All Browning tubes are set to industry constriction standards
- Flush fit tubes do not extend beyond end of barrel
- Constructed of highly polished, 17-4 stainless steel for the ultimate in performance and durability

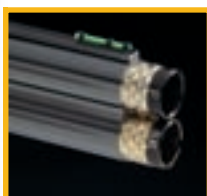

INVECTOR-PLUS™ EXTENDED CHOKE TUBES

- Invector-Plus™ extended tubes are constructed of highly polished, 17-4 stainless steel for the ultimate in performance and durability
- Available in constrictions ranging from Skeet to Full
- Knurled portion extends beyond the end of the barrel for easy removal and installation
- Longer choke taper inside Invector-Plus choke tubes for use with back-bored barrels
- Produces excellent patterns with uniform densities
- All Browning tubes are set to industry constriction standards

30mm Intermediate Height — per pair	Matte Finish	12347	84.99
30mm High Height — per pair	Matte Finish	12348	84.99
1" Rimfire Standard Height — per pair	Matte Finish	12365	49.99

- Ultra-rigid vertically split rings use oversize hardware for extra strength and ease of installation
- Standard, Intermediate and High rings are available for both 1" and 30mm diameter scopes
- Compatible with the two-piece Scope Bases for A-Bolt, BAR, BLR shown above and the X-Lock bases for X-Bolt rifles shown on page 129

THE HEIGHT IS DETERMINED BY MEASURING FROM THE TOP OF THE BASE TO THE BOTTOM OF THE SCOPE RING.*

STANDARD (.300")

For scopes with an objective up to 44mm and a standard barrel contour

INTERMEDIATE (.400")

For scopes with an objective up to 50mm and a standard barrel contour

HIGH (.500")

For scopes with an objective up to 56mm and a standard barrel contour

* Barrel contour, optic size and preferred eye relief all affect the fit of the scope on a rifle.

X-LOCK™ MOUNTING SYSTEM SCOPE RINGS AND BASES FOR X-BOLT™ RIFLES

- Integrated Scope Mounts unitize the ring and base into a single unit
- Machined from 7000 series aluminum
- Eliminates alignment problems and loose connections between bases and rings
- Choose from integrated mounts in Standard, Intermediate and High rings
- Will accommodate both 1" and 30mm diameter scopes in gloss, matte and nickel finishes
- X-LOCK™ bases also use standard Browning rings (See page 128)

SOLID X-LOCK™ MOUNTS

Securely mounted optics are essential to the accuracy and precision of any rifle. To ensure the X-Bolt has the most stable mount possible, it features the X-Lock scope mounting system that uses four screws per base, replacing the traditional two-screw standard. The benefits mean the scope bases are secured at all four corners rather than only held at the center of the base, and more accurate placement of the bases on the receiver. The revolutionary X-Lock system holds the base tighter to the rifle than any other system.

X-BOLT EXTRA MAGAZINES

The X-Bolt uses a detachable rotary magazine constructed from a durable lightweight polymer. The magazine is designed to feed cartridges directly in line with the bolt, instead of offset as with traditional leaf-spring magazines, for a straight path right into the chamber. An ergonomic magazine-mounted release lets the magazine rotate directly downward and into the hand. The magazine sits flush with the bottom of the rifle for a sleeker appearance. Additional magazines can be kept loaded and carried in your pocket or pack for easy, safe access.

BOSS®-CR ACCESSORY

The BOSS-CR accessory offers all the accuracy and tunable advantages of the original BOSS device without the muzzle brake feature. By simply replacing the original BOSS forward weight and recoil reduction components with the one-piece, no-hole BOSS-CR accessory, only the reduced recoil of the original BOSS is sacrificed. The BOSS-CR accessory is designed to fit only BAR Mark II and A-Bolt centerfire rifles previously factory-fitted with the BOSS.

HEARING PROTECTION.

Sustained or sharp, loud sounds can damage your hearing. Rifle or shotgun blasts (impulse noises) affect the delicate nerve endings in the inner ear and are cumulative, meaning that increased damage to hearing can be sustained over a period of time. In the early days of competitive shooting, hearing protection was not worn. Shooters did not know that the sharp report or muzzle blast could affect their hearing, since it was only temporary, and any damage sustained would dissipate, given the time between shoots. Many old-time shooters now wish they had worn hearing protection during their days of active competition.

All of today's hearing protection devices come with a noise reduction rating (NRR). The higher the number, the greater amount of protection. The NRR scale runs from 0 to about 34.

Sound is measured in decibels (dB) and most commonly in A-weighted decibels (dBA) that measure sound as it is heard by the human ear. Here are some examples of decibel levels: Rainfall is about 50 dBA. A rock concert measures 120 dBA. A power lawn mower is 90 dBA, and a 22 Short cartridge report is 143.5 dBA, with a 458 Win. Mag. at 174.4 dBA. Exposure to sustained levels above 85 dBA can damage hearing. Browning offers several models of comfortable, high-quality hearing protection and strongly recommends that shooters always wear hearing protection; preferably, doubling up with earplugs in the outer ear canal and earmuffs over the ears.

BUCKMARK HEARING PROTECTOR

NEW

- Unobtrusive low-profile design
- Soft, comfortable foam ear cups
- Foldable padded headband
- NRR 34dB

COMPACT HEARING PROTECTOR

- Ultimate in lightweight comfort
- Weighs nearly 50% less than standard hearing protectors
- Can be folded for easy storage
- NRR 21dB

MIDAS™ ELECTRONIC HEARING PROTECTOR

- Sharp noises are reduced while normal speech and sounds are amplified
- On/off volume controls
- Fast reaction time: 6 milliseconds
- Operates on two AA batteries (not included)
- 100-120 hours per set of batteries with LED battery life indicator
- NRR 33dB

Runs on 2 AA Batteries

KNIVES

KNIVES — THE MOST ESSENTIAL OF GEAR

A solid knife is the most basic of tools and an essential part of your outdoor gear. From knives that are ideal for working on the ranch and dressing out a trophy buck to historic commemoratives and limited edition models that will add sparkle to any collection, we offer a wide selection of blades.

WHITETAIL LEGACY KNIVES

No deer species in North America is more respected or sought after than the whitetail. This special Whitetail Legacy Limited Edition knife honors this cagey deer and makes an excellent gift for those dedicated hunters who pursue them. The handsome handles are shaped from exquisite mesquite burl and feature finger grooves for a more secure feel. The highly polished, hollow ground fixed blade is carefully

crafted from high-quality Swedish Sandvik® steel with a tapered tang and dovetailed bolsters. A beautiful whitetail deer lithograph is included and suitable for framing. This deluxe limited edition knife includes a felt-lined, hand-crafted walnut presentation box for display. Only 3,000 of the Whitetail Legacy Limited Editions will be made. This knife is sure to be very popular, so be sure to get yours early.

BACKDRAFT ASSISTED OPENING KNIVES

A sharp blade is always fast at hand with an assisted opening Backdraft Knife. These two knives feature a manual locking system that locks the blade in the closed position with no danger of inadvertently releasing the assisted opening blade. Backdraft knives feature 6061 T6 aircraft grade anodized aluminum scales, which make them look and feel rock solid. Carry a Backdraft Knife for a ready and reliable blade.

SCRIMSHAW KNIVES

When ships with sails ruled the waves, ivory carving was a popular pastime for sailors who spent months at sea with little to do. While not cut from actual ivory, Browning Scrimshaw Knives harken back to the days of yore with finely wrought game scenes skillfully crafted into replica handles.

MODEL	DESCRIPTION	BLADE LENGTH	CODE #	SUGG. RETAIL

Hard Core Hunter Series
designed by Russ Kommer

438
Mossy Oak®
New Break-Up® Combo

Hard Core Hunter — The name says it all. After years of extensive research we have the ultimate three-piece hunting set for demanding hunters. The 4¾" hand saw features a comfortable handle shape that minimizes hand fatigue. The push/pull design of the high carbon steel blade makes fast work of sawing wood or dressing game. The knife has a drop point main blade and a unique handle shape with Dura-Touch® Armor Coating for complete comfort and control. A small caping knife offers the precision for delicate field chores from caping a hide to peeling an apple. All blades fit into a slim, compact carry system with a unique swivel belt clip that makes the saw and knives easily accessible.

ESCALADE SERIES KNIVES

Escalade Series Knives are built with rugged, edge-holding Sandvik® 12C27 or 440-C stainless steel blades in either a functional skinner type or versatile drop point style. Excellent balance and extremely functional blade shapes make quick work of field dressing and skinning game. If you prefer the warmth and beauty of wood, a fine box elder burl has been selected to perfectly offset the polished steel blade and mirror-like bolsters. If function is chosen ahead of form, models with durable Krayton® rubber handles ensure a positive grip. Fixed blades include a heavy leather sheath.

For nearly 30 years Russ Kommer has earned his living as a highly respected big game hunting guide in Idaho and the wilds of Alaska. The work of a guide doesn't end with leading clients to trophy game animals, it starts there. Once the animal is on the ground the real work begins. Over the years Russ used many knives to dress and skin countless animals, yet found each knife lacking in performance. He drew upon his wealth of hands-on experience and started designing and producing his own knives. It turns out that Russ has a knack for this art and has become a talented, award-winning knifemaker. What started as a hobby and the search for a better blade has led to numerous best-in-show awards. Russ creates and personally field tests his designs to ensure they meet the toughest standards — his own. Browning is honored to team with Russ to produce many of the knives throughout this catalog.

OUTDOORSMAN FILLET KNIVES

NEW

While a truly skilled individual can properly fillet a fish with a dull hatchet, most folks require the aid of a sharp, properly flexible fillet knife. The new Outdoorsman Fillet Knives fill the bill. The blade easily fillets both small and larger fish with equal ease. The razor-

sharp German X50CrMoV15 steel blade provides just the amount of flex and feedback needed to glide over bones and carve perfect fillets every time. Tough molded handles provide a non-slip grip even with a handful of wet scales.

SERIES FEATURES
TYPE - Fixed blade fillet

FEATURES - 326: Top-grain leather sheath · 327: Ballistic Cloth™ nylon sheath

The bird and trout knife is a time-tested, century-old design used by wingshooters and fishermen alike. It has endured because of the unique blade and ease of handling, enabling intricate cuts in tight places. Browning's Woodsmen Bird and Trout Knives carry on this

tradition with a choice of a Micarta® handle with mirror-polished blade or a Mossy Oak® Duck Blind® handle with satin finished blade for comfort and sure control. Sandvik® 12C27 stainless steel is used in the blade production.

SILVERTIP FOLDER SERIES KNIVES

Carrying a specially designed Silvertip folder is good thinking. This series is compact, lightweight and built tough, featuring carbon fiber or G-10 handles with blades of 440-C stainless steel. The unique blade design has an anti-skid thumb ramp and a hollow ground blade with a big belly to make fast work out of skinning game with minimal hand fatigue. Adorned with anodized colored bolsters, these are handsome knives suitable for most any skinning chore.

MICARTA® BIG GAME SERIES KNIVES

Micarta® Big Game Knives are designed with special features unlike any other. The extreme drop point and big belly, hollow ground blades are designed to prevent fatigue from creeping into hands and lower arms when skinning large big game animals such as elk and moose. The guthook design funnels the skin into the cutting edge without bunching up the hide and will make field dressing large animals without puncturing the paunch a breeze. The maintenance

free, mirror polished 440-C stainless steel blades mean there are no jobs these knives can't handle. With finger grooves for safety and comfort, rugged Micarta handles for durability, and tapered tangs for balance, these knives will easily take care of any heavy duty task requiring a sharp knife. The high-quality leather sheath features a uniquely simple lock that helps prevent the knife from falling out of the sheath.

EXTREME MOUNTAIN HUNTERS

The next level of hunting knives is here. Extreme Mountain Hunters are designed to perform in extreme climates — from Alaskan tundra to New Mexico deserts — for those who push themselves and their gear to the limit. The handles provide a secure grip with comfortable, rounded edges and are easy to clean after dressing game. Four models include two different sized drop point blades, one with a modified

drop point and one with a deep belly, semi-skinner shape. Each blade is tough Sandvik® 12C27 stainless steel with a Rockwell hardness of 58c-59c for the edge-holding ability hunters demand. Each knife comes complete with a lightweight, injection molded sheath that complements the knives' rugged, no-nonsense construction.

NEW

SERIES FEATURES

TYPE - Fixed blade

BLADES - Sandvik® 12C27 stainless steel

HANDLES - Genuine stag or highly grained burl wood

ACCESSORIES - Top-grain sheath included (stag models) · Nylon sheath included (burl)

Designed by experienced guide Russ Kommer, the new Packer Series knives were born on the rugged frontier of Alaska. The unique handle design and modified drop point blade are designed to maximize the blade cut to reduce wrist fatigue. The Packer series comes in three different blade designs: The multi-use modified drop point, the big belly semi-skinner and a modified drop point with a guthook. The knives feature genuine stag handles and a beautiful leather sheath. Browning has also teamed up with the Rocky Mountain Elk Foundation to offer knives with highly figured burl handles and a laser engraved RMEF logo on the bolsters.

CLASSIC FOLDER KNIVES

High quality knives similar to the Classic Folder Series first appeared in the 1969 Browning catalog. The Classic Folders include all the features and more that made the originals so popular, including fancy scroll etching on the handy single blade embellished with a gold Buckmark. Each blade locks open with a snap. Thin enough to hardly notice in a pocket or purse, they make excellent gifts. Select from a variety of handle materials including stainless, wood, stag or mother-of-pearl scales.

CROWELL/BARKER COMPETITION KNIFE

James Crowell

This unique knife is a joint design effort between James Crowell and Reggie Barker, the only two men to have won an American Bladesmith Society (ABS) World Cutting Championship. Jim Crowell is well known in the knife industry and the first to win the ABS World Championship. Reggie Barker is known as "The Sharpest Man in Texas," and won the ABS World Champion title for the third time at the 2007 BLADE Show. He's also won the 2004 and 2005 ABS World Championship Cutting Competition. The Browning Crowell/Barker Competition Knife includes a top-grain leather sheath and a Certificate of Authenticity, signed by both Jim Crowell and Reggie Barker.

Reggie Barker

This knife is approved for select International Cutting Competition Trail (ICCT) events. To learn more about this exciting new action sport, visit cuttingcompetition.com.

- TYPE - Fixed blade competition
- BLADE - Heavy drop point, made from high-carbon steel with a .142 satin finish · Laser-etched on one side
- HANDLE - Micarta® laminate with three rivets and wrist lanyard
- FEATURES - Custom-made top-grain leather sheath

Master Bladesmiths are trained professionals. Caution should be heeded when using sharp objects. Browning assumes no responsibility for misuse of its products.

CHINOOK KNIVES

Versatile, rugged and razor sharp, Chinook Knives are designed to be clipped to a pocket or belt so they are always at the ready. The handle shape comfortably fits in your hand and the contrasting finish on the handle and bolster offers lasting good looks. The liner lock adds excellent security and is easy to operate with your thumb.

OUTDOORSMAN STEAK KNIVES AND KITCHEN CUTLERY SET

Nothing is used more in the kitchen than a good set of sharp knives. Kitchen knives must be durable, have a variety of blade shapes for specific tasks and remain sharp, especially when used for processing wild game. The 14-piece Outdoorsman Kitchen Cutlery set has everything necessary for the home, cabin or camp, including a hollow-ground boning knife that holds a razor edge, game shears and a sharpening steel. The set also includes standard kitchen cutlery and a uniquely designed carving fork with a pigtail twist so it won't bend when taking a 10-pound roast from the pan. The set has a standard chef's knife with an innovative scalloped blade to reduce friction for carving meat, and six elegant steak knives for table use. Another favorite will be the bread knife, with large serrations, to make slicing warm homemade bread easy. The knives are made from quality German steel to ensure the Outdoorsman Set will last. A metal Browning Buckmark is set in the durable injection molded handles.

Part of the enjoyment of cutting into a hot, juicy steak is doing so slowly with a sharp, well-balanced steak knife. Being a savored ritual, fine dining cannot be appreciated without sharp table knives. The Outdoorsman Steak Knife set is one worthy of display and complements every dining experience. Imagine this set as elegant wedding or anniversary gift. The set includes a sleek black wood storage block enhanced with the Buckmark logo.

Camp Saws designed by Russ Kommer

There are many folding camp saws on the market, but none can match a Browning. The rubber handle is grooved and has a large tail radius to ensure a rock solid grip and comfort in your hand. The high-carbon stainless steel push/pull blade maximizes cutting efficiency on both wood and when dressing game. The unique sheath can be worn in both horizontal and vertical positions. Compact, lightweight and durable, this saw is the ultimate at a price that can't be beat. The Camp Saw Combos include a folding knife with a secure liner lock and thumbstud.

LIGHTS

HOW TO CHOOSE A FLASHLIGHT

Browning is a leading manufacturer of portable battery-powered lighting. For 2010, there are over 50 different styles. So, how do you choose the light that best meets your individual needs?

SIZE, WEIGHT AND POWER

Smaller and lighter is better. New high-output LEDs from manufacturers like Luxeon® and Cree® are incredibly powerful and efficient, and don't require the size and weight of the old C and D battery lights to achieve the same output. Our Alpha and Alpha Max flashlights, with a single AA battery, are brighter than the flashlights of the past and are no bigger than a shotgun shell.

LED VS. XENON BULBS

LEDs are now preferred over Xenon and other types of filament bulbs for most uses. LEDs use batteries more efficiently, illuminate at equal distance, emit a clean white versus a dull yellow beam and will not burn out under normal use. LEDs are also nearly unbreakable.

HAND-HELD OR HANDS-FREE

Headlamps and cap lights allow the use of both hands for other tasks like dressing a deer, fixing the truck or finding a path through the woods. With modern technology many headlamps are as powerful as a larger hand-held flashlight. Several Browning headlamps, such as MicroBlast, Phantom, and Summit, can be worn either as a headlamp or clipped to the brim of a hat.

BATTERIES

Lithium batteries are used in many of our highest-performing lights, such as the Catalyst, Hunt Master and Nitro. Lithium batteries pack about twice the power of alkaline batteries for their weight, and operate at very cold temperatures. Convenient AA and AAA alkaline batteries are also used extensively because they cost less than lithium and are more readily available. The latest integrated circuit designs in our Hi Power, Zeta and Alpha Max flashlights boost the performance of alkaline batteries to approach the performance of lithium batteries.

SWITCH SETTINGS

Single-action switches (on/off) are preferred for self-defense and tactical applications. Multiple switch settings (high, low and in-between) preserve battery life and allow selecting between colors and flashing options. Lock-out switches on all Tactical Hunter lights keep the light from accidentally turning on.

RED, GREEN AND BLUE

Colored LEDs help preserve night vision, are great for map reading and are less obvious than white light to many types of game animals when walking to a tree stand in the dark.

BROWNING ENDORSES ANSI FL-1 PERFORMANCE STANDARDS

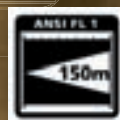

Beginning in 2010, many top flashlight manufacturers have agreed to use the same standards (ANSI-FL1) for measuring performance, so you can make an apples-to-apples comparison between models. We are proud to endorse and participate in these new standards for portable lighting.*

Lumens = Brightness. A traditional 2D flashlight is approximately 15 - 20 lumens.

Battery Life (Run Time) is defined as the time elapsed when the batteries are new to when the light reaches 10% of the original brightness.

Maximum Distance is measured as the distance in meters from the light to where it decreases in brightness to 0.25 lux — about the brightness of the full moon on a clear night.

* For Browning lights with multiple settings, the Lumens, Battery Life, and Distance are stated in the specifications at the highest setting (100% power), unless indicated otherwise.

HI POWER FLASHLIGHTS

NEW

With fantastic new looks and the ability to squeeze every last drop of energy from a pair of AA alkaline batteries, the powerful new Hi Power Flashlights blend innovative technology with a striking appearance. Hi Power Flashlights feature the very latest circuitry to provide the brightest AA-powered LED flashlight available. Protecting this leading-edge technology is a precision-machined aluminum housing available with

tough resin inlays or the same American walnut used for our firearms set into the grip for a great new look. The push-button switch is fast, easy to operate and includes a lock-out to keep the switch from accidentally turning on. One thing is for certain, when it comes to looks, battery life and sheer light output the new Hi Power light is sure to be the first light you reach for.

- All-aluminum construction with walnut or black resin handle inlays
- Latest generation Cree® XPE LED is rated for 50,000 hours use
- High-low electronic switch with lock-out
- O-ring sealed for water-resistance
- Includes lanyard and two AA batteries
- Length: 5.25"
- Brightness: 145 lumens
- Effective distance: 150 meters

TACTICAL HUNTER FLASHPOINT FLASHLIGHTS

NEW

The new Browning Flashpoint is the most powerful two battery flashlight we've ever offered. This wonder combines the latest Luxeon® LED with a pair of 3V Lithium batteries and advanced electronics, for a flashlight that outperforms all others.

Aside from tremendous light output and great battery life, what really stands out are the three brightness levels available (high [100%], medium

[60%], low [10%]) and two flashing modes (fast strobe and S.O.S.). A rotating selector switch on the tailcap controls the electronics and a tactical, push button on-off switch on the end of the light makes it easy to turn the light on in a momentary function. Try a new Flashpoint and it is easy to see why this light will outshine the rest of the contenders in the portable lighting market.

NITRO HEADLAMP

Our brightest, most-powerful headlamp
 · Luxeon® Rebel LED shines 100 meters on high setting; plus two red and two green LEDs
 · Lock-out switch with settings for high and low
 · LEDs are unbreakable and are rated for 100,000 hours use
 · CR123A battery operates to -40° F
 · Includes headstrap, or use with hat clip
 · Glass-fiber reinforced polycarbonate housing with aluminum lens ring
 · Silent Hinge™ for stealth
 · Brightness: 110 lumens
 · Effective distance: 100 meters

Martin Buser and his Happy Trails Kennels sled dog teams have won the grueling 1,161 mile Iditarod Trail Sled Dog Race an impressive four times. Their 1997 victory still holds the course record for the fastest finish time. During the 2008 and 2009 race, Martin relied on the Browning Nitro headlamp to steer his team through the darkest Alaskan nights. "I am always searching for durable, unique products to give me an edge. The long-reaching, focused beam of the Nitro stretches past 80 feet of the sled team and makes finding trail markers easier. The lithium batteries are great because they last longer and are less affected by the cold than alkaline batteries."

ALPHA, ALPHA MAX AND ZETA FLASHLIGHTS

Browning flashlights are more powerful for 2010 with innovative new LED bulbs that provide more illumination. Compact and powerful, these flashlights use standard AA alkaline batteries and fit easily in a pocket. A lock-out tailcap switch features a momentary function, and single-action on-off for simplicity and maximum control. Rugged

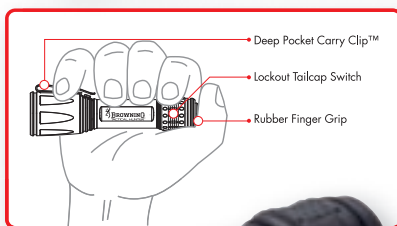

aircraft aluminum construction protects the high-tech circuitry and the unbreakable LEDs. The Deep Pocket™ carry clip holds the light securely in your pocket where it's easy to find. The Deep Pocket carry clip is removable when it's not needed. Check out the latest innovations in handheld lighting technology, available from Browning.

- One Nichia® 0.5 Watt LED for distance illumination
- Two green LEDs for night vision, safety and stealth
- Wear on the brim of a cap, as a pocket light or on a pack strap
- LEDs are rated for 100,000 hours use
- Water-resistant
- Brightness: 20 lumens
- Effective distance: 35 meters

5081

NIGHT SEEKER CAP LIGHT

- Adjustable tilt allows the light to pivot up and down to aim the light where it is needed
- Two white LEDs are ideal for all-purpose use; one red LED for night vision and stealth
- Wear on the brim of a cap, as a pocket light or on a pack strap
- LEDs are rated for 100,000 hours use
- Water-resistant
- Brightness: 15 lumens
- Effective distance: 20 meters

Night Seeker™
PRO Cap Light

Cap lights are one of the best ideas ever, and we have the best executed designs available. Night Seeker™ Cap lights are durably constructed from a lightweight polymer to keep weight to a minimum. An integrated clip swivels to allow the light to be directed easily. The unique clip is also highly versatile. In addition to attaching to the brim of a cap, the clip can be attached to your shirt pocket, backpack strap or folded out to allow the light to stand on its own.

BLACK ICE HEADLAMPS

When it comes to portable lighting, there is no more versatile choice than a good headlamp. We offer a wide selection of compact, durable headlamps ready to tackle virtually any task. All headlamps feature powerful, unbreakable LEDs connected to advanced circuitry that maximizes light output and battery life. Our headlamps utilize the highest quality LEDs to ensure long-lasting reliability. All headlamps include a comfortable, fully-adjustable headband, and three models also have a handy clip to attach the light to the brim of your cap.

BUCKMARK 6D LANTERN

NEW

There isn't a better camp lantern than the new Buckmark 6D. The primary light source is a replaceable fluorescent bulb which puts out 350 lumens for 12 hours, perfect for use around camp and general purpose lighting. The second light source is a 0.5 watt white LED that will run for 168 hours (7 days) when long-term lighting, such as in an emergency situation, is needed. The third light source is a pair of 5mm red LEDs that will run for 264 hours (11 days) for stealth lighting or reading a map and long-term use as a marker, a night light, or hanging in the tent. The red LEDs can also be set to blinking mode in an emergency.

- Bright fluorescent and LED lantern
- Steady on and flashing modes
- Durable polymer and metal construction with rubber accents for durability
- Brightness: 350 lumens (Fluorescent)
- Height: 9.25"

HATE BEING SWEATY, STINKY, WET AND COLD?

TRANSITIONS®
base · insulation · protection

The innovative Transitions® Series is the solution!

Look for the tags shown on the opposite page to identify Browning Transitions Series clothing, and the specific layers of protection you need to optimize comfort in the conditions you hunt in.

«NTS»
NEXT TO SKIN

BASE layer

Base layers like the NTS Pro Shirt shown utilize fabrics to wick perspiration away from the skin and keep you warm and dry, not cold and clammy, even when moving. Antimicrobial technology is added to Big Game garments to control the growth of odor-causing bacteria to reduce human scent.

LOOK FOR THESE BASE LAYER MODELS:

NTS (NEXT TO SKIN) | ENDURANCE FLEECE | COMFORT FLEECE

700
FILL POWER

INSULATION layer

A variety of insulation layers are available to meet specific needs based on weather conditions and activity level. In dry weather all of these Layer 2 garments make excellent outer pieces. A variety of insulation layers ranging from proven goose down to fleece fabrications like the 4X Microfleece™ Vest shown are offered.

LOOK FOR THESE INSULATION LAYER MODELS:

4X MICROFLEECE™ | 700 FILL POWER™ DOWN

PROTECTION layer

The Protection layer is the first line of defense against driving wind, rain and snow. Layer 3 garments are specifically designed to maximize protection with minimal bulk. Choose the water- and wind-resistant Pursuit™ soft shell parka to stay warm and dry or one of several other styles featuring Gore-Tex® and Windstopper®.

TRANSITIONS®
base · insulation · protection

NTS™ BASE LAYER — THE FOUNDATION OF COMFORT.

Featuring VisaEndurance® antimicrobial fabric, NTS (Next To Skin) Base Layer gear with OdorSmart™ technology is designed to provide you with advanced scent control. OdorSmart features patented encapsulated silver ion technology that inhibits the growth of odor-causing bacteria to eliminate body odors. The encapsulated silver ions work for the life of the garment, with no loss of effectiveness even after repeated washings. The wicking fabric effectively transports moisture away from the body where it quickly evaporates to keep you dry and comfortable. A lighter weight fabric under the arm enhances breathability. NTS is a solid foundation for controlling human odor and maintaining comfort on your next hunting adventure.

NTS PRO SHIRT

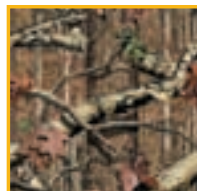

Midweight 100% microdenier polyester fabric · Trim fabric under the arms and down the sides is constructed of bird's-eye mesh for added breathability · OdorSmart™ technology featuring VisaEndurance® silver ion anti-microbial fabric that kills odor-causing bacteria to control human odor · Perfect when odor control is a must · Excellent moisture transfer · Dries quickly · Loose fit · Double-stitch neck for comfort · Sizes: S-2XL

700 FILL POWER DOWN — LIGHT-WEIGHT WITH SUPERIOR WARMTH.

Generations of hunters have relied on Goose down to keep them warm in the coldest conditions. The reason is simple, Goose down has the highest warmth-to-weight ratio of any insulation — natural or synthetic. Our Transitions® 700 fill power goose down is specially selected for optimum loft and maximum warmth with minimal weight. The high thread count, down-proof nylon fabric features additional baffles to maintain loft and prevent down migration. Extremely breathable, layer 700 Fill Power down under any Transition outer shell for maximum protection from the elements or wear them alone as outerwear in cold, windy, dry weather.

Quest™

GORE-TEX® SOFT SHELL TECHNOLOGY

QUEST™ — MAXIMUM PROTECTION FROM THE ELEMENTS.

Quest Gore-Tex® Soft Shell garments are the ultimate all-weather protection in the field. Unlike most soft shell garments, even those that claim to be waterproof, every seam is sealed using a patented taping process that makes these garments totally waterproof, honoring the famous Gore “Guaranteed to Keep You Dry” promise. With Quest as the Protection layer, you’ll stay warm and dry in driving rain and high winds. Only bitter cold requires the addition of another insulating layer. Prepare for whatever weather comes with Quest.

QUEST GORE-TEX® SOFT SHELL JACKET

Famous waterproof Gore-Tex® soft shell three-layer fabric with patented fully taped seams provide waterproof, windproof, breathable performance · Backpack friendly design eliminates bulk and weight and provides easy access to pockets · Duplex handwarmer pockets feature upper and lower sections separated by internal zipper · Lightweight laminated tricot cuffs with molded hook and loop adjustment tabs · Roll-away hood is constructed from Gore-Tex Paclite® fabric for compact protection · Zip side vents · Water-resistant zippers · Inside security pocket with zipper closure · Bottom drawcord adjusts from inside pockets · Contrasting side stripe · Sizes: S-3XL · Weight: 2 lb. · Center Back Length (L) 30"

ESCAPE™

TRANSITIONS®
base · insulation · protection

ESCAPE™ — PROVEN PROTECTION FROM THE ELEMENTS.

A chill wind steals away your body heat fast, and being damp from perspiration compounds the problem. The Escape Windstopper® technical fleece jacket and pant solve both problems by being totally windproof and extremely breathable, keeping you dry and warm. This remarkable three-layer fabric features a Windstopper membrane between an outer layer of quiet but rugged knit, and an insulating fleece layer on the inside.

TRANSITIONS WATERFOWL. THE ULTIMATE SYSTEM FOR WATERFOWL HUNTERS.

TRANSITIONS®
base · insulation · protection

The TRANSITIONS Waterfowl Series is the best way to stay dry and comfortable in the coldest, nastiest weather you hunt in. Transitions' easy to understand, three-tier layering system makes it easy to get the most out of this time-honored idea, and is tailored to the specific needs of waterfowl hunters.

Unlike other manufacturers, we do more than simply put a marsh-style camo pattern on a big game jacket and market it to waterfowlers. We take advantage of the very latest fabric technology and our own testers to maximize the performance of technical outerwear. From the generous fit, to the seam locations, to the fabrics themselves, Browning waterfowl gear is built to allow an unrestricted swing on fast-moving birds. Gone are bulky insulating layers and stiff, heavy fabrics, all replaced with modern fabrics that offer the ultimate performance with the least amount of weight. Trusted Gore-Tex® fabrications are guaranteed to keep you warm and dry in the coldest, wettest environments.

No matter what the weather: Warm and humid, cold and rainy or anything in between, Transitions will get the job done.

ENDURANCE FLEECE™. COMFORT OVER THE LONG HAUL.

Comfort and warmth starts with the right foundation. Base Layer fleece garments maximize warmth with minimum bulk for superior freedom of movement even under a heavier, weather-resistant shell. Endurance Fleece fits this description perfectly. The stretchy material moves easily for unrestricted mobility and protection from the cold. Comfort Fleece uses a traditional 200 gram fleece for a familiar feel and trusted performance.

700 FILL POWER DOWN — NATURE'S INSULATION.

For pure warmth nothing beats goose down. We select only the finest 700 fill power goose down because it provides optimum loft and warmth with minimal weight. The shell is a high thread count, down-proof fabric that maintains both loft and compactness. No coatings or laminations are added for maximum breathability. Down garments function well as insulation layer garments, easily compressing to comfortably wear under a waterproof parka for maximum warmth and protection, and are great when used alone as outerwear in cold, windy, dry weather.

MAXUS®

TRANSITIONS®
base · insulation · protection

MAXUS™ GORE-TEX® JACKET WITH COMFORT MAPPING TECHNOLOGY.

The Maxus Jacket is the most advanced waterfowl protection available. It brings the latest developments in design and technology to satisfy demanding waterfowl hunters. Utilizing Gore-Tex® "Comfort Mapping" technology to break-down the human body into different climatic zones, the Maxus Jacket greatly improves comfort and performance by strategically placing different Gore-Tex fabrics in specific locations to maximize mobility, breathability and protection from the elements. Rugged, warm Gore-Tex soft shell fabric is placed in areas requiring more protection such as the shoulders. Lightweight Paclite® fabric is used in the lower torso and under the arms where less weight and bulk are preferred and flexibility must be maximized. Both soft shell and Paclite are constructed from a revolutionary low shine nylon fabric for more realistic camo print quality and improved concealment. Add a host of extra features and the end result is a garment that revolutionizes comfort and protection in the marsh.

Heating System

ADDHEAT.™

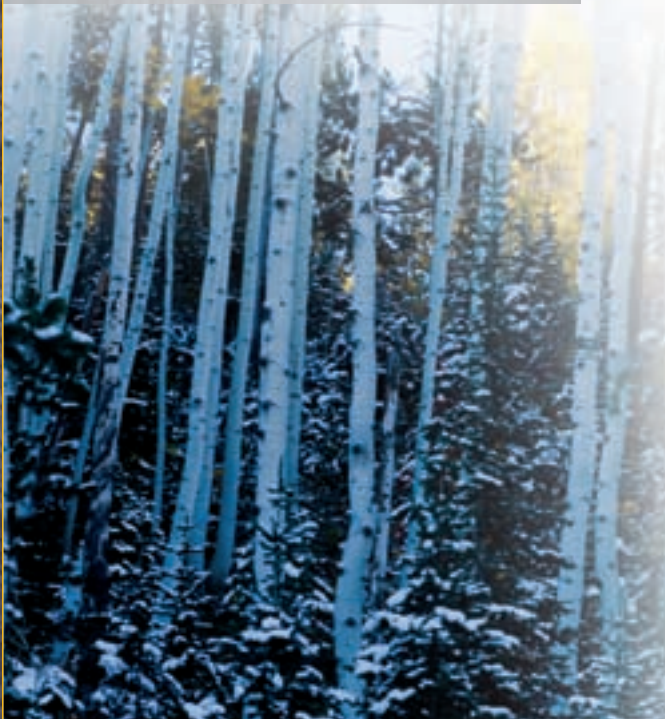

The days of heavy battery packs, clumsy controllers and short battery life are over. Heated clothing technology for avid hunters has come of age with the AddHeat system.

The AddHeat system is available in four different Browning garments. In the vest, the heating element is strategically placed in the upper back where it maintains core body temperature. In the jacket and parkas, the heating elements are located in the lower handwarmer pockets to provide warmth to your hands and fingers.

The AddHeat system is made up of a flexible, lightweight, washable heating element found in the garment and the AddHeat Power Pack. The Power Pack includes a compact, rechargeable Li-ion battery that provides up to 5.5 hours of continuous body-warming heat, a simple to use "intelligent" Micro-CPU controller and 110-220V AC charger. The system is conveniently recharged with either a 110-220V AC charger or with an optional 12V DC vehicle charger. Additional batteries are available for longer stays afield. The battery weighs a mere 4.23 ounces and can be recharged up to 500 times.

Care of an AddHeat garment is simple. Just remove the battery and controller, hand wash and line dry the garment as often as necessary. No worries and no hassle.

Note that the Power Pack is not included with AddHeat garments and must be purchased separately. This allows you to purchase a single Power Pack to use with multiple AddHeat garments without having a separate AddHeat System for each. Long waits in tree stands and duck blinds just became more bearable with the added comfort and convenience of AddHeat.

A ▶ Vest, Olive

THE HEATING ELEMENT IS LOCATED IN THE UPPER BACK AREA OF THE VEST TO MAINTAIN CORE BODY TEMPERATURE (THE HEATING ELEMENTS IN THE JACKET AND PARKAS ARE LOCATED IN THE LOWER HANDWARMER POCKETS)

XPO™ — EXCEPTIONAL COMFORT AND PERFORMANCE.

Rely on Browning XPO (eXtended Performance Outerwear). It is designed to be tough, comfortable and functional in all types of weather conditions. XPO features Pre-Vent®, a waterproof, windproof, breathable laminate that ensures protection from the most severe conditions Mother Nature can send, yet remains breathable to let perspiration escape. Importantly, Pre-Vent does all this at a very competitive price, without skimping on other features that matter like abundant pockets, quality zippers and rugged construction.

XPO™ FOR HER/XPO™ JUNIOR OUTDOOR WEAR FOR YOUR WHOLE FAMILY.

Now every member of your family can enjoy the same warm, dry experience in the field with XPO For Her and XPO Junior outerwear. XPO For Her and XPO Junior addresses the distinct size differences between men, women and kids to maximize comfort, warmth and mobility without the performance downgrades common in the other makers' hunting clothes. Make the outdoors more comfortable and more fun for everyone with XPO For Her and XPO Junior.

**HELL'S CANYON™
RUGGED OUTERWEAR THE TOUGHEST HUNTS.**

When the going gets tough, the tough reach for Hell's Canyon outerwear. Once you try it on, you'll understand why this rugged line of gear has quickly become a best seller, appreciated for its comfort, features and durability. The three-layer construction starts with an abrasion-resistant fleece outer shell that is almost silent in the brush. Next is a windproof, breathable and highly water-resistant membrane to combat the elements. Finally, a soft OdorSmart™ fleece lining provides warmth, controls human odor and wicks away perspiration. This three-layer fabric covers all the bases in a single lightweight, comfortable garment that easily goes the distance.

HELL'S CANYON™ AND THE RMEF.

Elk are incredibly adaptable creatures, able to not only survive, but thrive in rugged, seemingly inhospitable country. Still, without help from conservation organizations like the Rocky Mountain Elk Foundation, these majestic animals and their habitat might face a more uncertain future. With every purchase of Hell's Canyon RMEF clothing, Browning is proud to donate a portion of the proceeds to this noble organization.

HELL'S CANYON™ FULL THROTTLE.

Lighter weight Full Throttle gear brings a new level of performance to the Hell's Canyon line-up. The new fabric is a two-layer construction featuring a rugged water- and wind-resistant woven outer shell bonded to moisture-wicking OdorSmart™ featherweight fleece on the inside. Because there is no lamination layer, there is less resistance to airflow through the fabric for increased breathability. You will stay dry and comfortable in warmer weather and higher activity levels as perspiration is quickly moved away from your body. Crank up the intensity of your next hunt with Hell's Canyon Full Throttle.

WING-SET JACKET.
SOFT SHELL PERFORMANCE FOR THE MARSH.

Weighing in at an ultralight 26 oz., the Wing-Set Soft Shell Jacket provides heavyweight protection. The three-layer fabric combines a rugged nylon outer shell, waterproof, windproof and breathable Pre-Vent® lamination plus a soft inner fleece layer to provide warmth and protection over a broad temperature range. Unlike other soft shell jackets that claim to be waterproof, the Wing-Set jacket truly is, with external taping on every seam. Freedom sleeve construction and articulated elbows allow unrestricted movement to swing and follow through on fast flying birds. Discover how comfortable hunting can be with the light weight, minimal bulk and mega protection of the Wing-Set Jacket.

DRY-LITE® — STAY DRY.

Dry-Lite has proven its worth time and again in the field when the weather takes a sudden turn for the worse. Ultra lightweight Pre-Vent® fabric and the simple design make Dry-Lite easy to stow and carry in a pack, golf bag or vehicle and go completely unnoticed until the rain starts to fall or a chill wind starts to blow. Dry-Lite is always ready to provide complete protection.

SANTA FE DOWN — HEAVY DUTY WARMTH.

Santa Fe down jackets are designed to withstand the use and abuse that might destroy a lesser down garment. The heavy-duty, highly-constructed Repel-Text™ fabric is treated with a revolutionary new wax finish that sheds water and makes Santa Fe jackets extremely water-resistant. This new treatment adheres to the jacket significantly better than traditional waxing and remains unchanged over time and multiple washings. Santa Fe jackets are also cut longer to give you additional protection from the cold. Knit cuffs seal out drafts. Check out the next generation of down with new Santa Fe jackets.

THE STAPLE FOR EVERY HUNTER — 650 DOWN.

Down is the ultimate insulator. It is light, compact and extremely warm. For these reasons you should have down as a staple in your gear collection, and you need look no further than Browning. 650 Down jackets and vests make ideal layering garments in frigid, damp conditions and are excellent as a stand-alone piece as well. Their stylish look also makes them suitable to wear around town when the temperatures drop.

FULL CURL™ WOOL — THE EVOLUTION OF NATURE'S MOST FUNCTIONAL FABRIC.

First there was wool, supremely versatile yet itchy. Then came non-itch wool blends that were just as versatile but more comfortable to wear. Now, we have taken wool to an even higher level with Full Curl Wool, and this wonder fabric has never been more comfortable and effective against the elements. Full Curl combines a durable 7 oz. wool blend outer fabric with the latest technologies like a proven Windcutter™ windproof and water-resistant lamination and soft tricot liner for the ultimate wool fabrication. Fleece side panels are added to increase breathability. The 3-in-1 Parka relies upon another of nature's wonders, down, to provide insulation in the removable liner. The rugged, time-honored performance of wool makes the new Full Curl ideal for nearly all conditions, terrains and activity levels.

HIGHLANDS II™ — THE BEST GETS BETTER.

The insulating advantages of wool in cold, wet weather are well known. For time-proven performance combined with today's technology, look to Browning's new Highlands II wool. Highlands II offers additional versatility by taking a wool blend and adding a soft tricot lining for extra warmth and comfort, without the itch usually associated with wool. These versatile products are also machine washable. For 2010, an 11 oz. wool blend makes up the parka and bib, offering the same rugged performance in cold weather. The shirt and pant feature lighter weight 7 oz. wool blend to increase their versatility in warmer temperatures and as layering pieces. There is no substitute for the performance of Highlands II wool.

HIGHLANDS II AND THE RMEF.

Elk hunters know what it takes to track down and harvest a big bull. It takes scouting, planning, solid gear and a little luck. Of course, it also takes the help of the Rocky Mountain Elk Foundation. Thanks to the efforts of the RMEF, millions of acres of elk habitat remain viable to sustain these magnificent creatures. As a non-profit organization, the RMEF relies on donations for operation, and Browning is proud to be counted among the companies that support their cause. With each RMEF version of Highlands II wool sold, Browning proudly donates a portion of the proceeds to the RMEF and the mission of supporting the majestic elk.

PHEASANTS FOREVER® — JOIN THE CAUSE.

Without the conservation efforts of Pheasants Forever, millions of acres of prime pheasant habitat would be lost. Pheasants Forever chapters all over the United States work to protect, restore and enhance wildlife habitat by establishing and maintaining local and regional projects. From encouraging farmers to leave longer wheat stubble, to the purchase of upland habitat land, Pheasants Forever continues to work to preserve America's favorite game bird. To become a member or volunteer, please call toll free (877) 773-2070. With every purchase of a Browning Pheasants Forever product, Browning proudly makes a contribution to this most worthy conservation organization.

GORE-TEX® UPLAND — GET OUT AND HUNT.

Now upland hunters can rely on the waterproof, windproof and breathable protection of Gore-Tex® outerwear. The Gore-Tex Upland Jacket and Pant are designed to keep hardcore hunters in the field and in total comfort, regardless of the weather conditions. The lightweight shell fabric is far from light duty, easily resisting the briars and tugging branches encountered in the field, yet it remains comfortable and flexible to maximize mobility when shouldering a shotgun. The pants feature rugged overlays that make them impervious to the snags that can ruin other waterproof gear. Serious clothing for serious hunters, only from The Best There Is®.

UPLAND SHIRTS COMFORTABLE FIT FOR DAY-LONG PERFORMANCE.

Countless hours in the field have yielded a line-up of shirts designed to take comfort and durability to the next level. Browning Upland shirts provide you with easy mobility and a bind-free fit when shouldering a shotgun and swinging on game. Of course, these shirts are also stylish enough to look great when worn at your range or club.

UPLAND SWEATERS — TRADITION STARTS HERE.

Along with a fine over and under shotgun, a wool sweater should be an integral part of every upland game hunter's wardrobe. Traditional style aside, wool is still one of the most durable and rugged materials available. It also keeps you warm, even if it gets wet. These sweaters are modern versions of old favorites. High wear areas are protected by tough cotton twill overlays. Soft microfleece is strategically placed in the collar area for itch-free comfort. For additional protection both sweaters are available with a protective Windcutter™ laminate to stave off cold winds.

REACTAR PAD AND SHOOTING HARNESS

REACTAR Shooting Pad: Browning's exclusive REACTAR™ pad (REcoil ACTION ARrestor) absorbs recoil. On the inside of vest, jacket or shirt without altering appearance or increasing length of pull. Only 8.5mm thick. Lightweight. Flexible to form to the body. Uses patented Beta Gel which reduces peak recoil up to 49%. Dimensions: 3¾" W x 7" L.

Harness: Updated for better fit. Includes REACTAR pad. Heavy-duty 500 denier Cordura®. Reversible for use by right- or left-handed shooters. Elastic strap with buckle size adjustment. Sizes: One size fits most.

BROWNING PRO STAFF

JOHNNY MEITZEN started shooting competitively in 1987 and is currently a NSCA Level III instructor. He has won a number of shooting titles including: Two-time NSCA Nationals Vet Champion, two-time NSCA Nationals FITASC Vet Champion. Johnny is also a six-time All-American Sporting Team member, two-time Team USA Sporting member and two-time Team USA FITASC member. He also has many state and zone championship titles to his credit. Johnny is a die-hard Citori® man. His current model of choice is the Citori 625 Sporting.

RICK CAMUGLIA is a long-time Browning shooter with multiple sporting clays titles, nearly all won with Browning autoloading shotguns. A short list of his victories includes multiple National and Regional FITASC Championships, nine-time New Mexico State Champion, two-time HOA Arizona State Champion and two-time HOA Colorado State Champion. He is also an eight time NSCA All-American Team member. Rick prefers to shoot the new Maxus® autoloader.

DEEANN MASSEY was introduced to sporting clays shooting by her husband Jeff, who taught her to shoot in their backyard. She shot in her first tournament in the summer of 1996. In 1997, ten days before the Sporting Clays National Championship, she purchased her first 12 gauge Browning Gold. She used the Gold to tie for Ladies High Overall. Since then she has won two National Championships and has been a five-time runner-up. She has been on the 1st All American Team twelve times and Team USA seven times. She has also won the Michigan State Ladies Championship twelve times, the Zone Three Ladies Championship ten times and has numerous other wins in local and regional competition. She has been a member of the Browning Pro Staff Team for eleven years. DeeAnn currently shoots the Cynergy over and under.

BROWNING PRO STAFF

ROBBIE PURSER started shooting skeet at the tender age of six. Over the years he has accumulated an impressive list of shooting titles including: 1980 World Skeet Champion, 1991 and 1998 NSCA Champion, Zone 4 Champion, Quail Unlimited Champion, four-time Ducks Unlimited Champion, 2002 Sportsman Team Challenge Champion and an ESPN Great Outdoor Games gold medalist. He is also a twelve-time All-American Team member, a member of Team USA and a ten-time Georgia State Champion. All told, Robbie has more than 200 tournament wins to his credit — all with Browning autoloaders.

When **ZAC COOPER** was born, his parents decided that instead of giving up hunting for a while, they would take Zac with them. So at four months of age, Zac was on a plane to Iowa for a whitetail hunt. He took his first deer at an early age, accompanied by his father and hunting has since become a way of life for Zac. Now thirteen, Zac has gained national recognition for his speaking ability. He has been a guest speaker at such events as the 2009 QDMA National Convention, the University of Florida's Field Day, the Sportsman's Spectacular, and Florida's National Field Day. Zac is also a leader in school, serving in student government while maintaining straight-A grades. Zac has two long-term goals: To be a positive influence on today's youth and to help get them into the sport of hunting. See him in his debut hunting DVD titled "Little Man, Big Dreams."

Pound for pound, **MATT HUGHES** is the toughest fighter in the Ultimate Fighting Championship® ranks. Since entering the UFC in 1996, Matt has amassed a record of 44 wins with a mere seven defeats, and is a nine-time Welterweight World Champion with the most title defenses in UFC history. He is also a long-time fan of Browning firearms. When he's not in training for his next fight or working on his Illinois farm, you'll find Matt hunting birds and winning shooting competitions with his Citori® or chasing deer and wild hogs with his A-Bolt® and X-Bolt® rifles.

STEPHEN LEBLANC is a man of many talents. He has a degree in wildlife biology, is a master taxidermist, an award-winning wildlife sculptor and an avid hunter. His impressive list of talents, coupled with an easy going, personable demeanor made him the perfect candidate to host our new television program "Browning Expeditions." His impressive hunting résumé includes a North American Grand Slam of sheep and the Africa Big Five that consists of elephant, rhino, cape buffalo, lion and leopard.

SPORTSMAN® XP
 BROWNING® LIMITED EDITION

Browning makes The Best There Is® and only partners with the best. Which is why Browning and Polaris® came together to make the Sportsman XP Browning Limited Edition. With hand and thumb warmers, 3.0 winch, and a Lock & Ride® gun scabbard, plus its standard 70 horsepower* and 360-lb. rack capacity, it's built for Xtreme Performance. In other words, it's built like a Sportsman. Visit browningoffroad.com.

Vehicle shown with optional equipment. *850 EFI model. WARNING! ATVs can be hazardous to operate. For your safety, always wear a helmet, eye protection, and protective clothing and never carry passengers unless the adult ATV has been designed by the manufacturer specifically for that purpose. Polaris adult models are for riders aged 16 and older. Be sure to take a safety training course. For safety and training information in the U.S., call the SVIA at (800) 887-2887. You may also contact your Polaris dealer or call Polaris at (800) 342-3764. For safety and training information in Canada, contact your local Polaris dealer. ©2009 Polaris Industries Inc.
