**ALPHABETICAL INDEX**

The index in this catalog lets you locate products faster. An alphabetical listing (by end use) of all Browning products is shown on these two pages. In addition, a quick reference index is located at the beginning of each product section (found on the index page noted in colored header bars).

**MOSSY OAK® BREAK-UP® INFINITY™ CAMOUFLAGE**

Mossy Oak® Break-Up® Infinity™ provides true three-dimensional camouflage with depth and realism that will make you virtually disappear in the woods. Look for the Infinity logo and color swatch for the guns and gear available in this pattern.

HUNTING AND SHOOTING

# MICRO MIDAS

## MICRO MIDAS — TOP QUALITY, COMPACT SIZES.

In the past, finding a high-quality firearm built for younger or smaller shooters was difficult. Those days are over thanks to the new line of Browning Micro Midas guns. Micro Midas guns are sized to fit smaller shooters in every way — they are slimmer, lighter and have shorter lengths of pull. They are also built to the same high standard of quality you trust from Browning. When you buy a new Micro Midas firearm, you are eligible to participate in the Growth Insurance Program that allows the shotgun to grow with the shooter.

All Browning firearms are shipped with a free locking device to assist in the safe storage of firearms.

**BROWNING GROWTH INSURANCE PROGRAM** It's a fact, kids grow. Which makes purchasing a firearm for them a difficult decision. Should you buy an inexpensive "youth" model with questionable quality that they will soon grow out of? Or should you buy a well-made, but ill-fitting, full-size firearm that won't let them shoot to their potential because of poor fit? Fortunately, Browning offers the perfect solution for both now and later with the Growth Insurance Program. For a limited time, with the purchase of a new Browning Micro Midas or Micro firearm, you are eligible to purchase a full-size stock at 50% off the retail price. That's a big savings for you, and allows them to enjoy a firearm of the highest quality that is sure to fit and maximize their shooting performance and enjoyment for years to come. Visit [browning.com](http://browning.com) for complete details.

**A-BOLT SHOTGUNS — RUGGED AND ACCURATE.** Since many areas prohibit the use of rifles, the popularity of shotguns for deer hunting continues to rise. If you prefer the feel of a bolt-action, our accurate A-Bolt shotguns look, handle and feel like an A-Bolt rifle, and feature the same fast-cycling 60° bolt lift, easy-to-reach top-tang safety, and the sweet trigger feel as the rifles you know. An adjustable rear sight is included, and the receiver is tapped and ultra stable for scope mounts. Want pinpoint groups at 100 yards with sabots? Get an A-Bolt shotgun today.

All Browning firearms are shipped with a free locking device to assist in the safe storage of firearms.

**STOCK** The rugged composite stock features the familiar close radius pistol grip of the A-Bolt rifle. Textured surfaces and Dura-Touch® Armor Coating provide a secure grip.

**BARREL** The A-Bolt shotgun features a fully rifled 1 in 28" twist barrel designed exclusively for use with sabot-type slugs. You can expect superb accuracy with the A-Bolt shotgun with 1½" groups or better at 100 yards.

### PERFORMANCE

The smooth, anti-bind performance of our A-Bolt centerfire rifles is also found in the A-Bolt shotgun action.

**DETACHABLE MAGAZINE** A detachable magazine on a hinged floorplate allows you to quickly reload. 2 + 1 capacity. Extra magazines can be carried for fast reloading.

# MAXUS®

## THE BROWNING MAXUS — MAXIMUM RELIABILITY.

The high performance Browning Maxus is the most exciting autoloading shotgun in decades. Innovative technologies join together and deliver up to 18% less felt recoil for greater comfort, 44% less muzzle jump for more accurate follow-up shots, 19% faster bolt speed and 24% faster locktime than the nearest competitor. Other conveniences like the Speed Lock Forearm and TurnKey Magazine Plug further elevate the Maxus. Shoot a Maxus today and you'll agree it is the finest, most reliable 3½" autoloader ever built.

### LESS MUZZLE JUMP

Less felt recoil means less muzzle jump and that instantly translates into more birds in your bag. The Power Drive Gas System works perfectly with the Inflex Technology recoil pad to reduce muzzle jump as much as 44% compared to the competition.

### POWER DRIVE GAS SYSTEM

The Power Drive Gas System is the world's finest. Extensive research and testing have resulted in a piston design that's more reliable in all conditions, regardless of heavy or light loads being used. The gas piston features larger exhaust ports that dump gases faster on heavy loads. A patented, enclosed seal design keeps residue out of the action for cleaner operation. The piston has a 20% longer stroke travel to be even more reliable with light loads. Maxus with Power Drive equals outstanding performance.

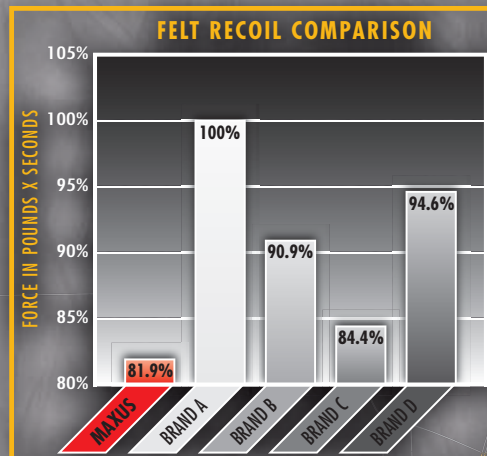

### INFLEX TECHNOLOGY RECOIL PAD

The Inflex Technology recoil pad is the softest pad on any autoloader. More than a mass of recoil absorbing material, it has been engineered with directional deflection to pull the comb down and away from your face with every shot for even greater comfort and faster follow-up shooting.

### THE SOFTEST SHOOTING AUTOLOADER EVER

Felt recoil is more than just an instantaneous peak force, it is the total energy absorbing experience when you fire a shell. While no recoil reduction system can escape the laws of physics, the Maxus will change your mind about recoil control. The Power Drive Gas System, Inflex Technology recoil pad, Vector Pro™ back-boring and natural Browning balance combine to transfer up to 18% less total felt recoil force to your shoulder than other autoloaders on the market.

### SPEED LOCK FOREARM

For the Maxus, our engineers stepped outside the box, then put a target on it. Gone is the traditional bulky screw-on magazine cap, replaced with the patented Speed Lock Forearm. This secure forearm attachment system makes taking down the Maxus for cleaning or storage faster and easier than ever before, and makes attaching or removing a sling a snap.

# TOTAL BARREL DYNAMICS

## INVECTOR-PLUS™ CHOKE SYSTEM

The proven Invector-Plus interchangeable choke tube system works with Vector Pro™ and back-boring to offer consistent, dense shot patterns with just the constriction needed for the shooting situation. The longer choke taper inside an Invector-Plus choke tube produces consistent patterns with more uniform densities and fewer fliers. The superior design of the Invector-Plus system is far more durable than the choke systems found in our competitors' guns, especially when shooting steel shot. Invector-Plus eliminates gases slipping between the choke tube and barrel that could damage the choke tube and the barrel. See page 146 through 149 for a complete listing of choke tubes.

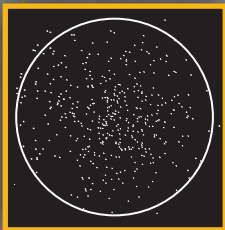

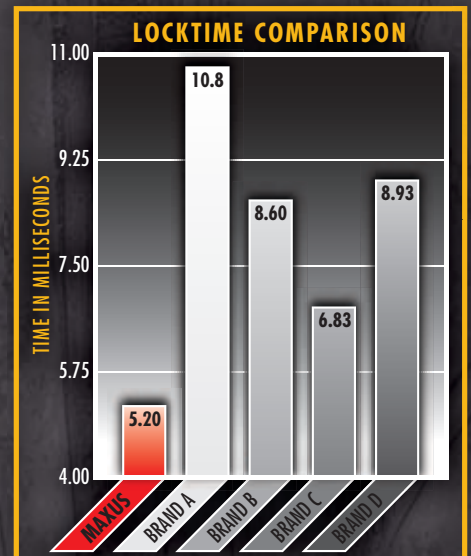

All Browning firearms are shipped with a free locking device to assist in the safe storage of firearms.

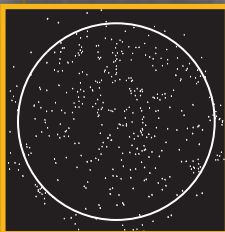

The competition's choke tube is grooved and pitted after shooting 500 rounds of steel shot.

Browning's Invector-Plus choke tube is still flawless after 500 rounds of steel.

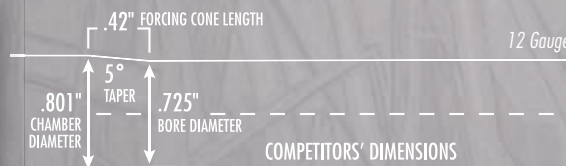

Browning pattern with Back-Bored Technology

The competitors' pattern without Back-Bored Technology

## VECTORPRO™

## VECTOR PRO™ LENGTHENED FORCING CONE

We were the first manufacturer to recognize the advantages of a back-bored barrel and make it a standard feature on shotguns. Now we have gone a step further with Vector Pro, featuring a lengthened forcing cone that is over 2" longer than other systems. This long, gradual taper minimizes shot deformation and maximizes pattern uniformity, consistency and density. Back-boring increases bore diameter to its maximum specification, reducing friction between the shot cup and the bore to propel the shot pellets to a higher velocity and reduce felt recoil. Reducing constriction from the forcing cone on the shot column results in fewer deformed pellets for more uniform patterns, and keeps more pellets in the central part of the pattern where they need to be to bag birds and dust targets. Our back-bore specifications represent the ideal bore diameter. A larger bore diameter can let gases slip by the shot cup, resulting in both reduced pellet velocity and blown patterns. A smaller bore diameter means the forcing cone can deform pellets, leading to poor ballistic performance and uneven, spotty pellet coverage on your target.

## STEEL SHOT PERFORMANCE

Our barrels are made to handle the punishment of steel shot. Unlike some manufacturers whose guns face an uncertain future after shooting steel, we have long been at the forefront of dependable steel shot performance and durability. Our barrels meet the strictest material and construction quality standards. The barrel blanks are made from rolled and tempered steel bars and are stress relieved to offer exceptional mechanical properties. The barrel blanks are then precision drilled, reamed and honed to exacting specifications. Browning Maxus barrels will last.

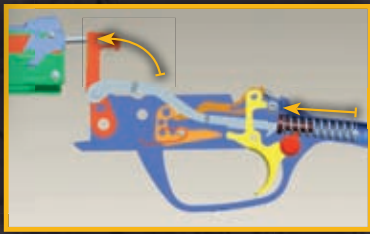

The forcing cone of the competition is pitted and damaged beyond repair after 500 rounds of steel shot.

After 500 rounds of steel shot, the higher-quality Browning barrel shows no wear.

## LIGHTNING TRIGGER

The Lightning Trigger System is the finest ever offered in an autoloading shotgun, designed to offer a smooth, crisp feel with minimal travel. With locktimes averaging .0052 seconds, the Lightning Trigger is 24% faster than the nearest competing autoloader, making every pull perfect. It's also easy to remove for cleaning.

## OPTIMAL DIMENSIONS

Innovation is rampant throughout the Maxus, and it carries into fit and handling. The Maxus features a trim forearm and close radius pistol grip to maximize control. A relieved steel magazine tube reduces weight allowing a faster swing while maintaining durability. Drop and cast can be tuned using the included stock shim kit. An externally relieved magazine tube reduces weight and adds strength. A low rib is in line with the top of the receiver and translates into a flat point of impact.

## MAGAZINE CUT-OFF

The Maxus is equipped with a magazine cut-off that allows you to easily unload the chamber to change loads without cycling a shell from the magazine.

## TURNKEY MAGAZINE PLUG

The patented TurnKey Magazine Plug is easily removed in seconds using a vehicle key. Combined with the Speed Lock System, the magazine plug can be removed from the Maxus in mere seconds.

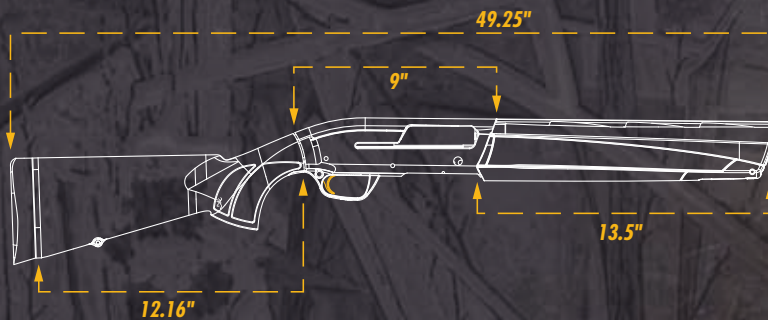

## MAXIMUM GRIP

Composite Maxus models combine in-molded textured gripping surfaces and our proven Dura-Touch® Armor Coating for a sure hold and a sleek feel in all climate conditions.

## SPEED LOAD PLUS

Speed Loading has been popular on Browning autoloaders for decades. Our patented feeding system sends the first shell loaded into the magazine directly into the chamber. Now, unloading is just as easy with the Maxus. The Speed Unload feature makes emptying the magazine fast and easy, without having to cycle and chamber every shell with the bolt handle.

# Citori

## EXCEEDING ITS REPUTATION.

There simply isn't another over and under made today

that can boast the reputation of a Browning Citori. Regarded by many as having the toughest action available, these gorgeous guns are precision built and hand assembled to outlast the competition. Quick to the shoulder and fast to swing, a Citori offers all of this quality and performance at a price tag often thousands less than other premium shotguns.

### STEEL SHOT PERFORMANCE

The strength of a Browning barrel is legendary, and built to handle the punishment of steel shot. Unlike some manufacturers' barrels that show pitting after shooting steel, Browning has pioneered construction that maximizes steel shot performance and barrel durability. Browning barrels meet the strictest material and construction quality standards. The barrel blanks are made from rolled and tempered steel bars and are stress relieved to offer exceptional mechanical properties. The barrel blanks are then precision drilled, reamed and honed to exacting specifications. With proper care, Browning Citori barrels will last a lifetime.

### TRIPLE TRIGGER SYSTEM

All Sporting Clays, XT and XS Series Citori shotguns come equipped with the Triple Trigger™ System, which fine-tunes the length of pull. Choose between a wide checkered, a narrow smooth and a wide smooth canted trigger shoe.

### LOCKING BOLT AND HINGE PIN

The Citori features a heavy-duty, transverse-mounted, full-width tapered locking bolt that engages a full-width tapered recess in the rear barrel lugs. Tapering the bolt and recess allows the bolt to seat deeper, accommodating for wear. The hinge pin extends across the width of the receiver for maximum strength. Engineering like this ensures the Citori wears in, not out.

### HAMMERS AND HAMMER EJECTORS

For positive primer ignition, Citori hammers are driven by powerful coil-type mainsprings. The convenient barrel selector allows a shooter to choose which barrel fires on the first pull of the single trigger, and the second pull fires the remaining barrel. Ejectors are fired by a sharp hammer blow for more positive ejection than the push imparted by competitors' ejectors. The automatic ejectors eject fired hulls when the breech is opened and elevate unfired shells for easy removal.

All Browning firearms are shipped with a free locking device to assist in the safe storage of firearms.

**TOTAL BARREL DYNAMICS**

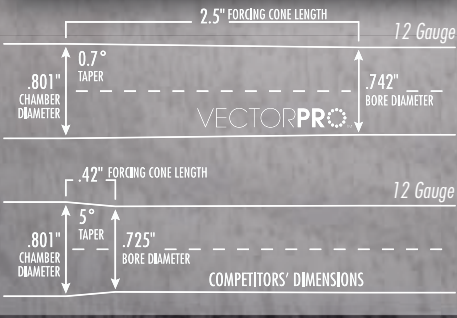

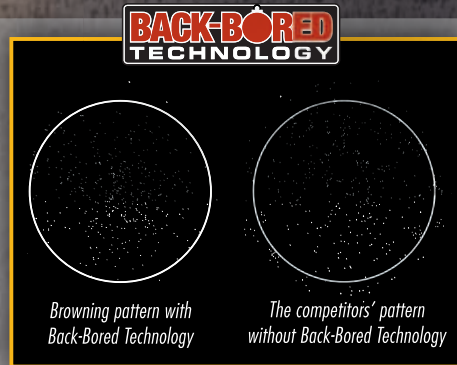

**VECTOR PRO™ LENGTHENED FORCING CONES ON 12 AND 20 GAUGE CITORI SHOTGUNS**

**VECTORPRO™**

Back-boring reduces friction between the shot cup and the bore for increased shot pellet velocity, minimized pellet deformity for more uniform patterns and reduced felt recoil. Browning was the first manufacturer to put back-boring and its advantages into production shotguns. Now we've made the next big leap with Vector Pro. More than 2" longer than the competitors' forcing cone dimensions, Vector Pro's gradual taper minimizes shot deformation for maximum pattern uniformity, consistency and density and more shot right where it needs to be to bring down birds and smoke clays. Vector Pro back-bore specifications are the ideal bore diameters. Any larger and gases blow past the shot cup, resulting in reduced pellet velocity and blown shot patterns. If the bore is smaller, pellets are smashed into the forcing cone, leading to poor ballistic performance and uneven patterning.

**INVECTOR™ CHOKE TUBE SYSTEMS**

The proven Standard Invector (28 gauge, .410 bore) or Invector-Plus™ (12, 20 gauge) interchangeable choke tube systems are featured on every Citori shotgun and provide consistent, dense shot patterns in the constriction needed for the specific shooting situation. The longer choke taper inside an Invector-Plus choke tube works with Vector Pro™ lengthened forcing cones to produce dense patterns with uniform densities and fewer fliers. The superior designs of the Invector systems are far more durable than the choke systems found in competitors' guns, especially when shooting steel shot loads. The Invector systems eliminate gases slipping between the choke tube and barrel that could damage both the choke tube and the barrel.

**CHROME CHAMBERS**

For increased durability and corrosion resistance, all Citori shotguns feature hard chrome-plated chambers to resist the toll that thousands of shells can take on lesser quality guns.

# CYNERGY®

## A TOTALLY NEW EXPERIENCE IN OVER AND UNDER SHOTGUNS.

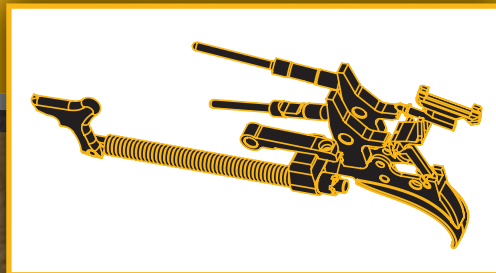

Unlike other “new” over and under shotguns, the innovative Browning Cynergy is not just a twist on old technology. The Cynergy is a completely new experience in over and under shotguns, with handling, felt recoil control, speed and reliability that you must shoot to fully appreciate.

### INFLEX TECHNOLOGY RECOIL PAD

The Inflex Technology Recoil Pad system provides long travel recoil reduction for a massive 25% decrease in felt recoil on 12 gauge guns and makes recoil virtually non-existent on small gauge guns. A slick Parylene coating prevents the pad from snagging on clothing and allows the recoil pad to remain soft. Three pad lengths are available in ½" increments to provide length of pull adjustment to fit a wide variety of shooters. A ¼" spacer is included for customizing. See page 27 for accessories. (Inflex not available on Cynergy Classics.)

**INFLEX**  
TECHNOLOGY

### MECHANICAL TRIGGER

Cynergy shotguns feature the innovative Reverse Striker ignition system, a striker-based, mechanical trigger that offers the benefits of a crisp feel, reduced locktime and less overtravel than any other over and under available. And because inertia is not needed for the hammers to set, the design eliminates the possibility of the second barrel not firing. Cynergy target models are equipped with the Triple Trigger™ System, allowing you to adjust the length of pull and switch between styles of trigger shoes: Wide checkered, narrow smooth and wide smooth canted.

### ADJUSTABLE COMB

Composite models include an integrated, adjustable comb system that allows the gun to be easily customized to your individual needs. Drop at comb adjustments are made in ⅛" increments. For cast on/cast off customizing, accessory combs are available.

*All Browning firearms are shipped with a free locking device to assist in the safe storage of firearms.*

### SUPERIOR GRIPPING SURFACES

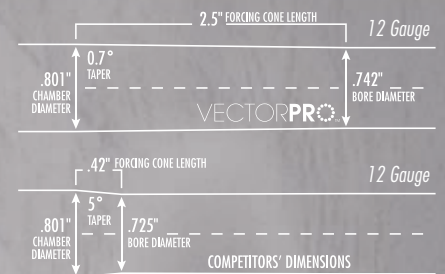

Composite Cynergy models combine molded-in rubberized textured gripping surfaces and our proven Dura-Touch® Armor Coating for a sure hold and a sleek feel in all climate and weather conditions.

**MONOLOCK HINGE** The strong MonoLock Hinge design is the engineering behind the Cynergy's low profile receiver. The MonoLock Hinge is the integration of the monobloc and the hinge, and has up to 300% more surface area to pivot on than traditional trunnion-style hinges. Rectangular locking pins provide extra strength and feature a "Wear-In Relief" that keeps the action tight. Jeweling adds a beautiful appearance, smoother function and improved durability.

### VECTOR PRO™ LENGTHENED FORCING CONES ON 12 AND 20 GAUGE CYNERGY SHOTGUNS

Back-boring reduces friction between the shot cup and the bore for increased shot pellet velocity, minimized pellet deformity for more uniform patterns and reduced felt recoil. Browning was the first manufacturer to put back-boring and its advantages into production shotguns. Now we've made the next big leap with Vector Pro. More than 2" longer than the competitors' forcing cone dimensions, Vector Pro's gradual taper minimizes shot deformation for maximum pattern uniformity, consistency and density and more shot right where it needs to be to bring down birds and smoke clays. Vector Pro back-bore specifications are the ideal bore diameters. Any larger and gases blow past the shot cup, resulting in reduced pellet velocity and blown shot patterns. If the bore is smaller, pellets are smashed into the forcing cone, leading to poor ballistic performance and uneven patterning.

VECTORPRO™

## TOTAL BARREL DYNAMICS

### CHROME CHAMBERS

For increased durability and corrosion resistance, all Cynergy shotguns feature hard chrome-plated chambers to resist the toll that thousands of shells can take on lesser quality guns.

### STEEL SHOT PERFORMANCE

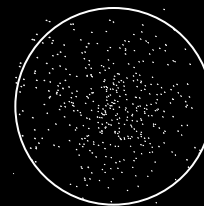

The strength of a Browning barrel is legendary, and built to handle the punishment of steel shot. Unlike some manufacturers' barrels that show pitting after shooting steel, Browning has pioneered construction that maximizes steel shot performance and barrel durability. Browning barrels meet the strictest material and construction quality standards. The barrel blanks are made from rolled and tempered steel bars and are stress relieved to offer exceptional mechanical properties. The barrel blanks are then precision drilled, reamed and honed to exacting specifications. With proper care, Browning Cynergy barrels will last a lifetime.

### IMPACT EJECTORS

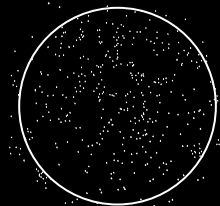

Impact Ejectors are aided by the punch of a secondary striker spring for more positive, reliable ejection of fired hulls from the chambers. Unfired shells are elevated for easy removal.

### BACK-BORED TECHNOLOGY

Browning pattern with Back-Bored Technology

The competitors' pattern without Back-Bored Technology

Composite Model Adjustable Comb

# BT-99

TOTAL BARREL DYNAMICS

## INVECTOR-PLUS™ CHOKE TUBE SYSTEM

The Invector-Plus interchangeable choke tube system provides consistent, dense shot patterns in the constriction needed for your shooting situation. The longer choke taper inside an Invector-Plus choke tube works with Back-Bored Technology to produce patterns with more uniform densities and fewer fliers. The superior design eliminates gases slipping between the choke tube and barrel that could damage the choke tube and the barrel. See pages 146 to 149 for a complete listing of choke tubes.

## CHROME CHAMBERS

The BT-99 features a chrome-plated chamber to resist the toll thousands of shells can take on lesser quality guns. Corrosion resistance is also greatly improved.

**BROWNING QUALITY AT ITS BEST.** When it comes to performance and durability, dollar-for-dollar there isn't a better single-barrel trap gun than the rugged BT-99. These no-nonsense guns are built for the long haul, and are always ready to put you at the top of your game.

## VECTOR PRO™ LENGTHENED FORCING CONE

Back-boring reduces friction between the shot cup and the bore for increased shot pellet velocity, minimized pellet deformity for more uniform patterns and reduced felt recoil. The Vector Pro forcing cone is over 2" longer than the competitor's. Vector Pro's gradual taper minimizes shot deformation for maximum pattern uniformity, consistency and density and more shot right where it needs to be to smoke clays.

VECTORPRO™

All Browning firearms are shipped with a free locking device to assist in the safe storage of firearms.

### FOREARM

A beavertail forearm helps control recoil and assists hand-eye coordination.

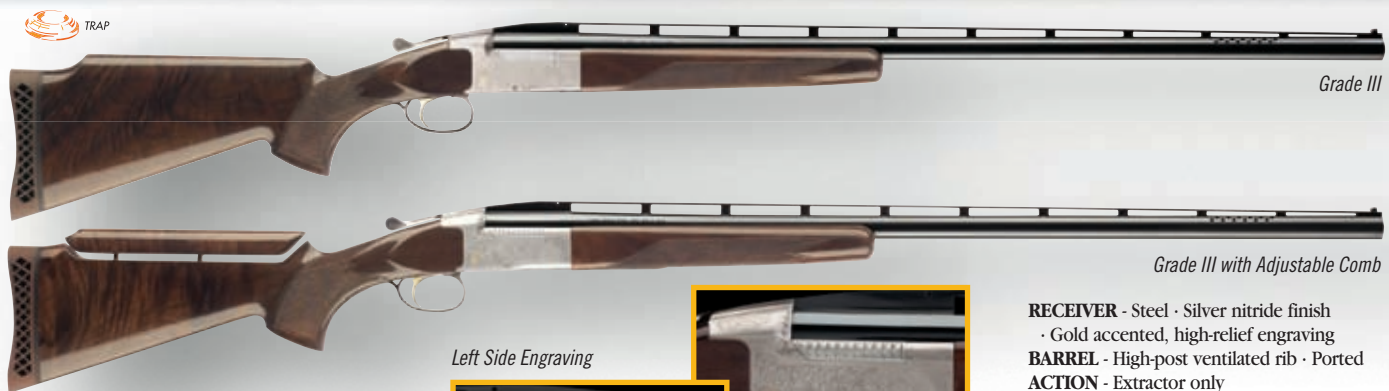

### RIB

High-post, 1/32" rib.

**EXTRACTOR** The BT-99 features an extractor to lift hulls.

**BROWNING GROWTH INSURANCE PROGRAM**

It's a fact, kids grow. Which makes purchasing a firearm for them a difficult decision. Should you buy an inexpensive "youth" model with questionable quality that they will soon grow out of? Or should you buy a well-made, but ill-fitting, full-size firearm that won't let them shoot to their potential because of poor fit? Fortunately, Browning offers the perfect solution for both now and later with the Growth Insurance Program. For a limited time, with the purchase of a new Browning Micro Midas or Micro firearm, you are eligible to purchase a full-size stock at 50% off the retail price. That's a big savings for you, and allows them to enjoy a firearm of the highest quality that is sure to fit and maximize their shooting performance and enjoyment for years to come. Visit [browning.com](http://browning.com) for complete details.

# Silver

## BROWNING QUALITY AND LASTING VALUE.

The name Browning will forever be associated with the best autoloading shotguns you can buy. Dollar-for-dollar, there is not a better deal than a Silver. These value-added guns give you the highest levels of craftsmanship, handling and versatility and are priced within everyone's budget.

## TOTAL BARREL DYNAMICS

### BACK-BORED BARREL TECHNOLOGY

Back-boring reduces friction between the shot cup and the bore for increased shot pellet velocity, minimized pellet deformity for more uniform patterns and reduced felt recoil. Browning was the first manufacturer to put back-boring and its advantages into production shotguns. Through intense research, our back-bore specifications have been perfected and represent the ideal bore diameter needed to minimize shot deformation and maximize pattern uniformity, consistency and density. Any larger and gases slip by the shot cup, resulting in reduced pellet velocity and blown patterns. Any smaller, and the forcing cone will deform pellets and result in poor ballistic performance, fliers and uneven, spotty pellet coverage on the target.

### INVECTOR-PLUS™ CHOKE TUBE SYSTEM

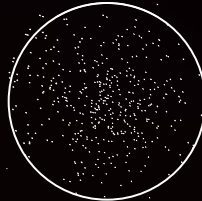

The proven Invector-Plus interchangeable choke tube system comes on every Silver shotgun to provide consistent, dense shot patterns in just the constriction needed for your shooting situation. The longer choke taper inside an Invector-Plus choke tube works hand-in-hand with Back-Bored Technology to produce consistent patterns with more uniform densities and fewer fliers. The superior design of the Invector-Plus system is far more durable than the choke systems found in competitors' guns, especially when shooting steel shot loads. Invector-Plus eliminates gases slipping between the choke tube and barrel that could damage the choke tube and the barrel. See pages 146 to 149 for a complete listing of choke tubes.

### STEEL SHOT PERFORMANCE

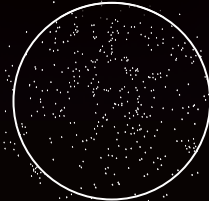

The strength of a Browning barrel is legendary, and built to handle the punishment of steel shot. Unlike some manufacturers' barrels that show pitting after shooting steel, Browning has pioneered construction that maximizes steel shot performance and barrel durability. Browning barrels meet the strictest material and construction quality standards. The barrel blanks are made from rolled and tempered steel bars and are stress relieved to offer exceptional mechanical properties. The barrel blanks are then precision drilled, reamed and honed to exacting specifications. With proper care, a Browning Silver barrel will last a lifetime.

### BACK-BORED TECHNOLOGY

Browning pattern with Back-Bored Technology

The competitors' pattern without Back-Bored Technology

### TRIGGER

The trigger guard is large and has carefully rounded edges to accommodate gloved fingers. Additionally, the Silver's entire trigger assembly can be removed in just seconds for thorough cleaning.

### MAGAZINE CAPACITY

2¾": Four in magazine, one in chamber.

3": Three in magazine, one in chamber.

3½": Three in magazine, one in chamber.

(A three-shot magazine adapter plug is included.)

### MAXIMUM GRIP

Composite Silver models combine checkered gripping surfaces and proven Dura-Touch® Armor Coating for a sure hold and a sleek feel in all climate conditions.

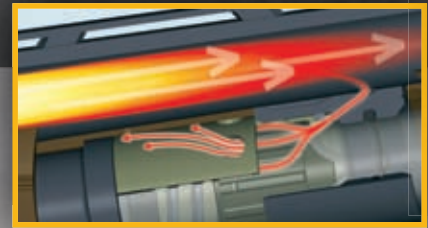

### LESS RECOIL WITH THE ACTIVE VALVE

The self-adjusting Active Valve gas system in Silver autoloaders diverts gases from fired shells to operate the action instead of adding to recoil. When shooting light loads, most of the gases operate the action. With magnum loads, only a small amount of gas is necessary to operate the action, while the remaining gases are vented through the Active Valve and out the top of the forearm and away from the receiver for clean, reliable operation. The gas piston and Active Valve operate independently, putting less pressure on the gas piston for greater longevity and more efficient operation than the competitors' gas-operated autoloaders. Because the Active Valve expels unnecessary gases, it reduces recoil before it ever strikes your shoulder — without the need for heavy hydraulic recoil dampers, sticky gel pads and gimmicky gel stock inserts. Superior recoil reduction from the Active Valve also equals faster, more accurate follow-up shots and all-day shooting comfort regardless of the loads you shoot.

All Browning firearms are shipped with a free locking device to assist in the safe storage of firearms.

Light Load (1 oz.)

Heavy Load (2 oz.)

**LOAD VERSATILITY** The Active Valve-equipped gas piston efficiently adjusts to reliably fire a wide range of loads. 12 gauge 3" models fire everything from light, 1 oz., 2<sup>3</sup>/<sub>4</sub>" target loads to the heaviest 3" magnums. The larger 3<sup>1</sup>/<sub>2</sub>" version is built to handle a similar range, from 1<sup>1</sup>/<sub>8</sub> oz., 2<sup>3</sup>/<sub>4</sub>" field loads up to hard-hitting 3<sup>1</sup>/<sub>2</sub>" magnums. Competitors' guns can't match this versatility.

**SILVER HUNTER MICRO MIDAS** ▶ GAUGE: 12 (SHOWN), 20 | SATIN FINISH STOCK AND FOREARM

## BPS® EVERYTHING YOU NEED IN A SHOTGUN ... AND MORE.

You won't find a more rugged, faster handling pump shotgun than the stalwart Browning BPS. The BPS has proven itself reliable in the rain, snow, dust and mud. They've seen tough duty in marshes, cornfields and on trap ranges. Through it all, count on the BPS to load and eject shells with ease in spite of the conditions.

# BPS

## TOTAL BARREL DYNAMICS

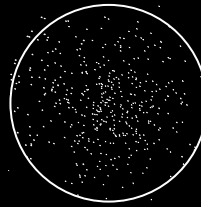

### BACK-BORED BARREL TECHNOLOGY

We were the first manufacturer to recognize the advantages of a back-bored barrel. Back-boring increases the bore diameter to reduce friction between the shot cup and the bore to maximize shot velocity and reduce felt recoil. Through intense research, our back-bore specifications have been perfected and represent the ideal bore diameter needed to minimize shot deformation and maximize pattern uniformity, consistency and density. Any larger and gases slip by the shot cup, resulting in reduced pellet velocity and blown patterns. Any smaller, and the forcing cone will deform pellets and result in poor ballistic performance, fliers and uneven, spotty pellet coverage on the target.

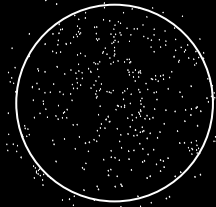

### INVECTOR™ CHOKE TUBE SYSTEMS

The proven Invector™ (28 gauge, .410 bore) and Invector-Plus™ (12, 20 gauge) interchangeable choke tube systems come on every BPS shotgun for consistent, dense shot patterns in just the constriction needed for your shooting situation. The longer choke taper inside an Invector-Plus choke tube works hand-in-hand with Back-Bored Technology to produce consistent patterns with more uniform densities and fewer fliers. The superior design of the Invector systems are far more durable than the choke systems found in competitors' guns, especially when shooting steel shot loads. The Invector systems eliminate gases slipping between the choke tube and barrel that could damage the choke tube and the barrel. See pages 146 to 149 for a complete listing of choke tubes.

### BACK-BORED TECHNOLOGY

*Browning pattern with Back-Bored Technology*

*The competitors' pattern without Back-Bored Technology*

### STEEL SHOT PERFORMANCE

The strength of a Browning barrel is legendary, and built to handle the punishment of steel shot. Unlike some manufacturers' barrels whose guns face an uncertain future after shooting steel, we have long been at the forefront of dependable steel shot performance and durability. Our barrels meet the strictest material and construction quality standards. The barrel blanks are made from rolled and tempered steel bars and are stress relieved to offer exceptional mechanical properties. The barrel blanks are then precision drilled, reamed and honed to exacting specifications. With proper care, Browning BPS barrels will last a lifetime.

### BOTTOM EJECTION AND LOADING

Unique bottom ejection provides operating convenience by throwing empty shells straight down, out of your line of sight, making the BPS the best pump shotgun choice for both right- and left-handed shooters.

### SAFETY

The thumb-operated, top-tang safety on the BPS can easily be operated with the right or left hand, even with gloved fingers.

### MAGAZINE CAPACITY

2¾": Four in magazine, one in chamber.  
 3": Three in magazine, one in chamber.  
 3½": Three in magazine, one in chamber.  
 (A three-shot magazine adapter plug is included.)

### MAXIMUM GRIP

Camo composite BPS models combine in-molded checkered gripping surfaces and our proven Dura-Touch® Armor Coating for a sure hold and a sleek feel in all climate conditions.

### RELIABLE PUMP-ACTION

The proven pump-action design of the BPS is sound and reliable. All components are durably constructed of solid steel and housed inside a receiver machined from a solid block of forged steel. Rigid double slide bars are made from heat-treated steel and eliminate twisting and binding for faster, more efficient operation. The BPS offers smooth operation in all conditions and gives you the ability to stay on target while delivering rapid follow-up shots. A convenient serrated slide release is located at the rear of the trigger guard.

**BPS HUNTER** ▶ GAUGE: 12 (SHOWN), 16, 20, 28, .410 | SATIN FINISH STOCK AND FOREARM

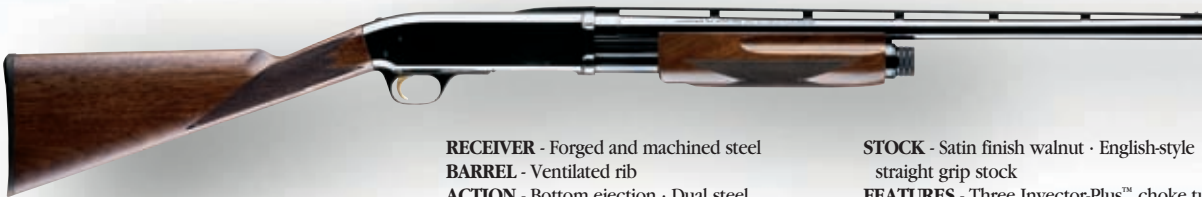

**RECEIVER** - Forged and machined steel

**BROWNING GROWTH INSURANCE PROGRAM**

It's a fact, kids grow. Which makes purchasing a firearm for them a difficult decision. Should you buy an inexpensive "youth" model with questionable quality that they will soon grow out of? Or should you buy a well-made, but ill-fitting, full-size firearm that won't let them shoot to their potential because of poor fit? Fortunately, Browning offers the perfect solution for both now and later with the Growth Insurance Program. For a limited time, with the purchase of a new Browning Micro Midas or Micro firearm, you are eligible to purchase a full-size stock at 50% off the retail price. That's a big savings for you, and allows them to enjoy a firearm of the highest quality that is sure to fit and maximize their shooting performance and enjoyment for years to come. Visit [browning.com](http://browning.com) for complete details.

**IMPORTANT: DO NOT ATTEMPT THE USE OF 3½" CHAMBERED BARRELS WITH 3" RECEIVERS NOR 3" CHAMBERED BARRELS WITH 3½" RECEIVERS.**

# X-BOLT™

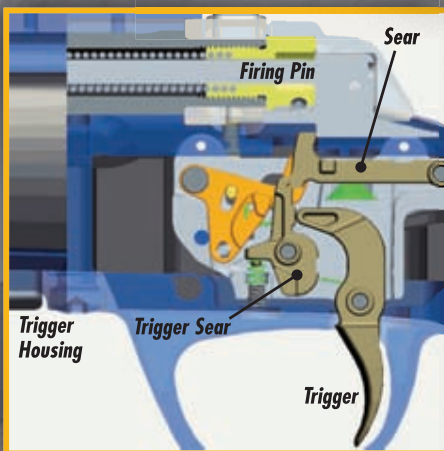

**TOTAL ACCURACY.** There are scores of bolt-action rifles available, yet none match the Browning X-Bolt in terms of innovative features, quality and straight-from-the-box accuracy. Unlike competitors' rifles, the X-Bolt is designed as an integrated system of features that come together to deliver the most important aspect of any rifle — total, dependable, pinpoint accuracy.

**60° BOLT LIFT** Short 60° bolt lift is fast cycling and allows you to work the bolt quickly without the scope getting in the way. The bolt is machined from solid steel bar stock for strength and custom rifle precision. Three locking lugs provide exceptional bolt strength.

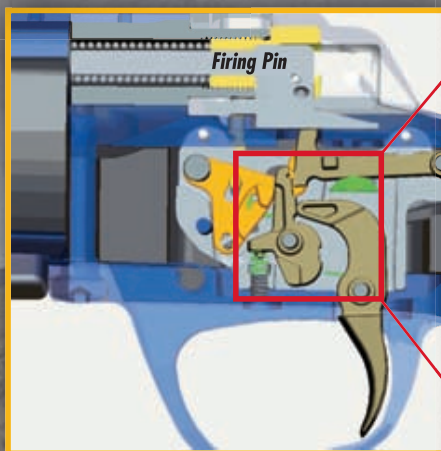

**BOLT UNLOCK BUTTON** Conveniently located on top of the bolt handle, the bolt unlock button allows the bolt to be unlocked and opened with the safety in the on safe position. The bolt unlock button works in conjunction with the top-tang safety to provide an extra margin of safety when checking and unloading the chamber. The safety blocks the trigger sear and features a firing pin block for added security.

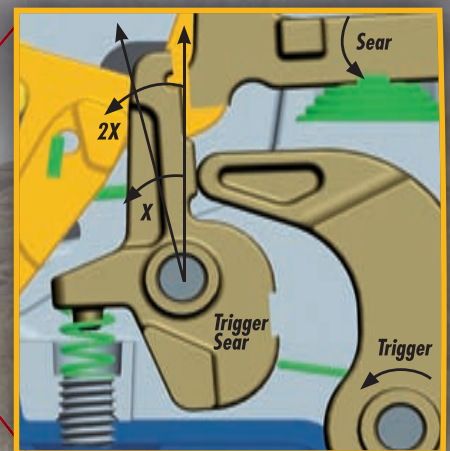

## FEATHERTRIGGER™

Full sear engagement (Ready to fire)

Unseared (Fired)

Close-up of unseared (Fired)

For precise shooting there is absolutely no substitute for a crisp, predictable trigger. The X-Bolt's three-lever Feather Trigger™ provides a clean, crisp pull with no take-up or creep and minimal overtravel. The trigger is screw adjustable from 3 to 5 lbs. and factory pre-set at approximately 3½ lbs. An alloy trigger housing contains hard chromed steel components that are highly polished on all critical contact surfaces. Precise engagement angles mean the X-Bolt Feather Trigger feels light and stays that way through many thousands of rounds. Unlike competitors' triggers that rely on a secondary fingerpiece lever, the Feather Trigger is designed right, from the very start.

### X-LOCK™ SCOPE MOUNTING SYSTEM

Securely mounted optics are essential for accuracy and precision on any rifle. To ensure the X-Bolt has the most stable scope mounting system possible, X-Lock mounts feature a four screw per base design that replaces the traditional two screw system. With the bases secured at all four corners of the base you get more accurate placement and more secure attachment to the receiver. See page 137 for more details on the new X-Lock Scope Mounting System.

*All Browning firearms are shipped with a free locking device to assist in the safe storage of firearms.*

### INFLEX TECHNOLOGY RECOIL PAD

The Inflex Technology recoil pad is standard on every X-Bolt rifle. This ultra soft pad offers the best recoil absorption available on any rifle. The proprietary construction and material promote a directional deflection of recoil forces, pulling the stock comb away from your face to reduce felt recoil and muzzle climb.

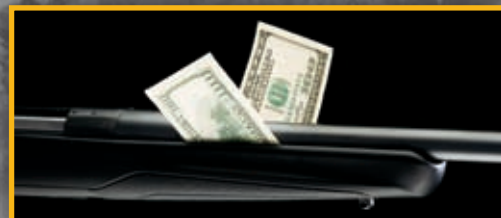

### MAXIMUM GRIP

Composite X-Bolt models combine in-molded textured gripping surfaces and Browning's proven Dura-Touch® Armor Coating for a sure hold and a sleek feel in all climate conditions.

### MAGAZINE

The X-Bolt is fed from a detachable rotary magazine constructed from a durable, lightweight polymer. Cartridges are picked up from the center of the magazine, directly in-line with the bolt, instead of offset as with traditional leaf-spring magazines, for a straight shot right into the chamber. An ergonomic magazine-mounted release lets the magazine rotate directly downward and into your hand. The magazine sits flush with the bottom of the rifle for a sleek appearance. Additional magazines can be kept loaded and carried for easy access.

### BARREL

A free-floating barrel is essential for utmost accuracy. The X-Bolt is free-floated by bedding the front and rear of the action for stability. This maintains barrel to stock spacing for consistent accuracy. A recessed muzzle crown helps protect the rifling from damage. Barrels are triple checked for interior finish, straightness and air-gauged for uniformity.

**THE STAR OF THE SHOW**

The Browning X-Bolt is proven to be reliable and accurate in far-flung destinations around the globe. Just ask Stephen LeBlanc, host of "Browning Expeditions" and Kristy Lee Cook, host of "Goin' Country." Here, Kristy shows off a monster red stag taken with her X-Bolt in New Zealand.

# A-BOLT

## A REPUTATION OF DEPENDABILITY.

Outstanding accuracy and reliable performance are within your reach with a versatile Browning A-Bolt rifle. These proven rifles include groundbreaking features like an easy-to-reach tang safety and 60° bolt lift, both of which allow for faster, more convenient shooting. The A-Bolt is also available with the BOSS® System that dials-in barrel harmonics to precisely match the ammunition used for unequalled accuracy on the range or from your stand.

## THE BOSS® SYSTEM

The Ballistic Optimizing Shooting System is designed to squeeze maximum accuracy from the A-Bolt. The tunable BOSS System easily dials-in barrel harmonics to precisely match the specific ammunition being fired, resulting in amazingly tight groups. The BOSS System is available as an option on the Medallion, Composite Stalker, Stainless Stalker, M-1000 Eclipse and Stainless M-1000 Eclipse. An interchangeable, non-ported BOSS-CR is also included.

## BOSS-CR

This accessory is also included with all BOSS-equipped A-Bolt rifles and offers all the accuracy advantages of the original BOSS without the muzzle brake feature.

*All Browning firearms are shipped with a free locking device to assist in the safe storage of firearms.*

### BOLT-ACTION

With a fast 60° lift that doesn't have you banging your hand on the scope, the bolt incorporates a non-rotating sleeve that runs the full length of the bolt. When unlocked, three guide ribs on the bolt sleeve align with the three locking lugs to allow the bolt to slide smoothly. When locked, the three lugs provide massive bolt strength. The A-Bolt feeds smoothly because of its unique, patented cartridge depressor. This cartridge depressor stays in position, independent of the bolt rotation, as the bolt slides gently over the cartridges in the magazine. The bolt face is recessed, completely surrounding the cartridge base.

### MAGAZINE

Hinged floorplate with detachable box magazine makes it simple and fast to load a spare magazine.

### MAGAZINE CAPACITY

Three in magazine, one in chamber. Standard calibers: Four in magazine, one in chamber. 223 Rem.: Five in magazine, one in chamber.

### BEDDED ACTION AND FREE-FLOATED BARREL

The barrel is free-floating and the action is glass bedded at the recoil lug and at the front of the receiver to maintain the proper spacing around the barrel for consistent accuracy. Every A-Bolt features a recessed muzzle crown to protect the rifling. Barrels are hand chambered and triple checked for interior finish, straightness and air-gauged for uniformity.

*Script*

*Block*

### PERSONALIZED ENGRAVING

The bolt of the A-Bolt rifle can be personalized with your name. Call (800) 333-3288. Not available on the Mountain Ti model.

**A-BOLT TARGET RIFLES. TACK-DRIVING ACCURACY STRAIGHT FROM THE BOX.**

Producing nothing short of jaw-dropping performance, Browning A-Bolt Target rifles feature a precise target-style, single-set trigger that is factory-adjusted to approximately 9-14 ounces (250-400 grams) of pull weight in the set mode, and also operates as a conventional trigger with an adjustment range of 4-6 lbs. Fitted with a 28" target barrel, the action is carefully bedded into a beautiful laminated stock with a wide fore-end for exceptional stability on sandbags or from a bench rest. A fully adjustable comb allows you to dial-in perfect eye-to-scope alignment, even with large objective target optics. Lastly, a close-radius pistol grip ensures an easy reach to the trigger, so you squeeze the most out of an A-Bolt Target rifle's accuracy.

**BOSS®-CR ACCESSORY**

The BOSS-CR accessory offers all the accuracy and tunable advantages of the original BOSS device without the muzzle brake feature. By simply replacing the original BOSS forward weight and recoil reduction components with the one-piece, no-hole BOSS-CR accessory, only the reduced recoil of the original BOSS is sacrificed. The BOSS-CR accessory is designed to fit only BAR Mark II and A-Bolt centerfire rifles previously factory-fitted with the BOSS.

BOSS-CR, stainless	39.99

# BLR

**A MODERN TWIST ON A CLASSIC STYLE.** John M. Browning designed many of the best lever-action rifles ever made. We're certain that the modern Browning BLR would have his nod of approval. The BLR features a rugged rack and pinion-driven bolt that locks tight to the barrel and gives the BLR accuracy potential that rivals many bolt-actions. A reliable box magazine protects bullet tips and gives the BLR magnum ability.

## ACTION

Advanced, lightning fast, glass-smooth rack and pinion lever-action. Strong rotating head, multiple-lug breech bolt with a recessed bolt face and side ejection.

## TRIGGER

Wide groove design trigger with short, smooth pull. The trigger travels with the lever to avoid pinching your fingers when cycling.

## MAGAZINE

The flush-mounted detachable box magazine has a capacity of three magnum or four standard rounds in the magazine, plus one in the chamber.

**TAKEDOWN FEATURES** BLR Takedown models are just as accurate and reliable as their unified counterparts but much easier to transport and store. The rifle is easily and quickly assembled without tools by simply sliding the barrel half into the receiver half and locking them together with the flip of a lever. The lever mechanically engages a stout locking lug into a recess in the bottom of the receiver. The system is rugged, precise and blends seamlessly into the styling of the rifle.

*All Browning firearms are shipped with a free locking device to assist in the safe storage of firearms.*

**HAMMER** The fold-down hammer has two positions at half-cock so the status of the rifle is readily seen. The folding hammer provides an added measure of safety when the hammer is at half-cock. The hammer has four basic positions: Full-cock, half-cock, folded hammer position and dropped, or fired position.

**RECEIVER** Lightweight, sturdy machined aircraft-grade aluminum. Drilled and tapped to accept scope mounts.

**SIGHTS** Low profile, square notch, screw adjustable rear sight aligns easily with a highly visible gold bead on raised ramp front sight.

**SCOPE MOUNTS** A scout-style scope mount is available as an accessory for the BLR Takedown models. This one-piece alloy base mounts forward of the receiver and stays attached to the barrel half of the rifle when disassembled to retain the scope's zero. A long eye-relief scope is required (not included). The receiver is also drilled and tapped for conventional scope bases and rings (not included). Three scout-style scope mounts are available for BLR Scout models, depending on the caliber (see chart on page 63).

**BLR LIGHTWEIGHT STAINLESS WITH PISTOL GRIP ▶ GLOSS FINISH STOCK AND FOREARM**

# BAR

## BAR MEANS AUTOLOADER ACCURACY.

There was a time when accuracy was often marginal from autoloading rifles. Those days ended the day the Browning BAR was introduced. The accurate, fast handling and dependable BAR features a multi-lug rotary bolt that secures the bolt to the barrel for superb accuracy and offers the strength to fire magnum cartridges. The piston-operated gas system softens felt recoil and reduces muzzle climb.

## RECEIVER

The Safari model uses a richly blued one-piece ordnance steel receiver with scroll engraving. Stalker, ShortTrac® and LongTrac® models have an aircraft-grade aluminum alloy receiver. All BAR rifles are drilled and tapped for scope mounts. The bolt release lever is incorporated into the receiver.

## ACTION

The BAR is a gas-operated autoloader with a high-strength, multiple-lug rotating bolt that locks directly into the barrel. Every cartridge loaded into the chamber of the BAR is surrounded by a recessed bolt face, which is encircled by the barrel and then surrounded by the receiver. A seven-lug bolt and precise breech-to-chamber relationship give the BAR exceptional accuracy and the strength to handle magnum loads. The strong and very rigid action bar/inertia block link-up improves accuracy by reducing barrel vibration. The buffering system reduces wear and stress on the rifle's mechanism.

*All Browning firearms are shipped with a free locking device to assist in the safe storage of firearms.*

### MAGAZINE

Detachable box magazine with a unique hinged floorplate allows you to lower the floorplate, detach the empty magazine and snap in a full magazine in seconds.

### ADJUSTABLE SHIM SYSTEM

ShortTrac® and LongTrac® BAR rifles include six shims that let you customize the drop at comb and cast on/off of the rifle to your ideal dimensions.

### MAXIMUM GRIP

Camo composite BAR models combine checkered or overmolded gripping surfaces and Browning's proven Dura-Touch® Armor Coating for a sure hold and a sleek feel in all climate conditions.

### THE BOSS® SYSTEM

The Ballistic Optimizing Shooting System is designed to squeeze maximum accuracy from the BAR. The tunable BOSS System easily dials-in barrel harmonics to precisely match the specific ammunition being fired to deliver amazingly tight groups. The BOSS System is available as an option on the BAR MK II Safari.

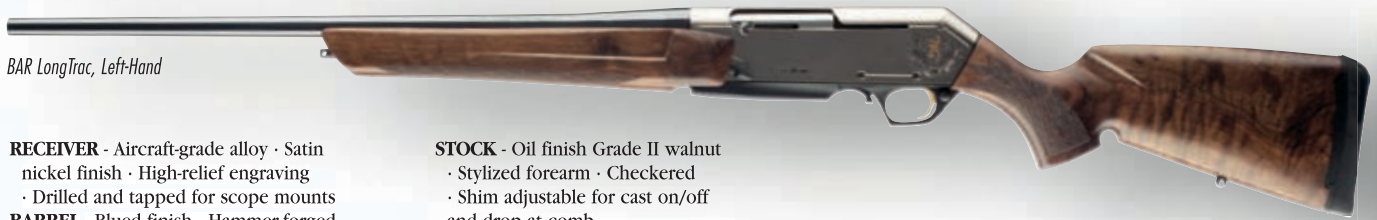

### BOSS-CR

The BOSS-CR offers all the accuracy advantages of the original BOSS without the muzzle brake feature.

# T-BOLT

**TOP RIMFIRE PERFORMANCE.** The T-Bolt is a one-of-a-kind rifle that is elegant and fun to shoot. Built to the highest standards of quality, these flat-shooting rimfires feature a slick straight-pull bolt that cycles fast and locks-up snug to the barrel for unmatched accuracy. Experience a higher level of rimfire performance with each squeeze of the trigger from the Browning T-Bolt.

## STOCK

Available in both right- and left-hand models, T-Bolt rifle stocks are full-size to comfortably fit adults. Durable Composite models feature a Monte Carlo comb and include magazine storage in the buttstock. Walnut stocked Sporter models feature trim dimensions with a satin finish and cut checkering. Walnut Target/Varmint models feature a Monte Carlo comb and wide forearm for stability on the bench. All models include dual action screws for solid attachment, sling swivel studs and a synthetic buttplate.

## TRIGGER

The three-lever trigger design combined with a short-travel firing pin give a crisp break, quick lock time, no take-up and minimal overtravel. It is also externally adjustable for pull weight.

## ACTION

Receiver is machined from steel barstock. Features crossbolt lockup and an enlarged bolt handle pivot point moved forward for smoother action. The mainspring runs directly through the massive pivot pin. Cocking effort is split between opening and closing for ease of operation. The bolt features dual extractors and a red cocking indicator band. Right-side ejection on both right- and left-hand models.

## SAFETY

Top-tang, thumb operated two-position safety can be operated without changing from a shooting grip.

## BARREL

Target/Varmint models feature a 22" heavy varmint profile. T-Bolt Sporter models feature a 22" medium sporter profile. All are free-floating and have a semi-match chamber and target muzzle crown.

## SIGHTS

Receiver is drilled and tapped for scope mounts (scope not included). See page 136 for scope rings and bases for T-Bolt rifles.

*All Browning firearms are shipped with a free locking device to assist in the safe storage of firearms.*

# BUCK MARK RIFLE

**SIGHTS** The Sporter model features a TRUGLO®/Marble's® fiber-optic sight system.

**BARREL** Sporter model features lightweight, tapered sporter-weight barrel. Target models feature a steel bull barrel. The chamber in every Buck Mark Rifle barrel is hand-reamed and the muzzle crown is recessed to protect it from damage that could degrade accuracy.

**SAFETY**

Large manual thumb safety.

**MAGAZINE RELEASE**

Positioned adjacent to the trigger guard for convenient operation.

**ACTION**

The straight blowback design offers enhanced simplicity and reliability.

**FRAME**

Machined to exacting tolerances from a solid billet of 7075-T6 aluminum. The stock structure is a part of the pistol frame, reducing weight and the number of parts.

**SLIDE**

Built-in recess and raised side panels for an improved cocking grip. The convenient manual slide release is easily operated with the shooting or support hand.

**MAGAZINE**

Magazines are interchangeable with the Buck Mark pistol. The magazine body is heat-treated for long-term feeding reliability and long life. Our coil spring provides a consistent follower angle. 10-round capacity.

**TRIGGER**

The trigger is light, crisp and has less creep before it breaks and far less overtravel after breaking than other rimfires.

*All Browning firearms are shipped with a free locking device to assist in the safe storage of firearms.*

**Made  
in the USA**

**COMPACT RIMFIRE FUN.**

The Buck Mark Rifle is Made in the USA and always ready for an afternoon hunting squirrels, rabbits or X-rings. These handy rifles are lightweight, easy to shoot and always reliable. They look neat, too. The proven coil spring magazine feeds ten cartridges and makes reloading a cinch. Get your hands on a Buck Mark rifle today.

# 1911 & 22

## AFTER 100 YEARS, YOUR WAIT IS FINALLY OVER.

In celebration of the 100th anniversary of the classic 1911, Browning is pleased to introduce a scaled-down, 22 L.R. version of this great firearm. The new Browning 1911-22 is proudly made in the USA and will include a special first year of production collector's certificate plus a free limited edition commemorative canvas and leather zippered pistol case (a \$49.99 retail value) with 1911-22 pistols shipped during 2011.

### 1911-2011 COMMEMORATIVE LIMITED EDITION ZIPPERED PISTOL RUG – INCLUDED FREE!

It's durably constructed with a supple waxed cotton canvas shell, top-grain leather trim, plush green flannel lining and a nylon coil zipper, along with John M. Browning's signature and a special 1911-2011 logo adorning the outside. A solid brass hanging ring and a keyed brass padlock are included. This special commemorative pistol rug is a \$49.99 retail value and will only be available with the purchase of the new Browning 1911-22 made during 2011.

### COLLECTOR'S CERTIFICATE

Each pistol made during the first year of production will include a beautiful collector's certificate of authenticity that commemorates the 100th anniversary of the US Military's adoption of the Browning 1911, the world's most legendary autoloading pistol.

All Browning firearms are shipped with a free locking device to assist in the safe storage of firearms.

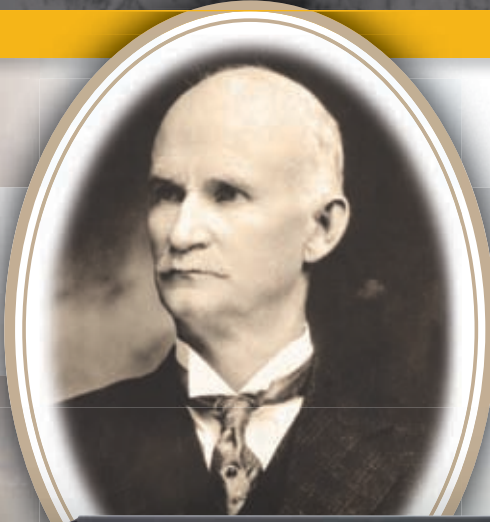

1911-22 PISTOL

**NEW**

You will find a familiar friend in the 1911-22 pistol. All controls operate just as those on the original John M. Browning-designed Model 1911.

*Made in the USA*

MODEL	CALIBER	FINISH	GRIPS	BARREL LENGTH	CODE NUMBER	UPC #	*AVG. WEIGHT	OVERALL LENGTH	SIGHT RADIUS	SUGG. RETAIL
<b>NEW</b> A1 (shown)	22 L.R.	Matte Black	Brown Composite	4¼"	051802490	023614072003	15½ oz.	7⅞"	5½"	\$599.99
<b>NEW</b> Compact	22 L.R.	Matte Black	Brown Composite	3¾"	051803490	023614072010	15 oz.	6½"	4⅞"	599.99

**ACTION**

The straight blowback design offers enhanced simplicity and reliability.

**SLIDE**

Built-in recess and raised side panels for improved cocking grip. The convenient manual slide release is easily operated with your shooting or support hand.

**BARREL**

Most models have bull barrels for improved stability. Lite models have a steel barrel liner inside an ultralight aluminum sleeve. The chamber is hand-reamed and the muzzle crown is recessed to protect it from damage that could degrade accuracy.

**REAR SIGHT**

16-click per revolution adjustable Pro-Target™ sight is standard on all models. This sight provides a finer range of adjustment over the industry's standard of 12-clicks per revolution.

**FRONT SIGHT**

Plus models feature a TRUGLO®/Marble's® fiber-optic front sight. The 5.5 Target models include hooded target sights.

**FRAME**

While many popular 22 pistols are cast or fabricated from sheet metal stampings, each Buck Mark frame is CNC machined from 7075-T6 aluminum to exacting tolerances.

**MAGAZINE**

The magazine body is heat treated for long-term feeding reliability. Coil spring provides more consistent follower angle. 10-round capacity.

**MAGAZINE RELEASE**

Positioned adjacent to the trigger guard for convenient operation.

**TRIGGER**

Compare it to the competition and feel its light, crisp break with less creep and overtravel.

**SAFETY**

Large, manual thumb safety. The trigger is disconnected when the magazine is removed for added safety.

**GRIPS**

Several wood, laminate and composite styles are available. Soft nitrile rubber Ultragrip RX® (URX) and wood Ultragrip Deluxe® (UDX) ambidextrous grips have ergonomic finger grooves for enhanced control.

**MADE IN THE USA TO A HIGHER STANDARD OF QUALITY.**

Precision, accuracy, reliability and pure enjoyment are all features you get in the Browning Buck Mark. These affordable pistols are Made in the USA and offer plenty of bang for your buck with a machined aluminum frame, precision rifled barrel, smooth trigger and fully-adjustable sights.

# BUCK MARK PISTOL

Made in the USA

*The straight blowback design and hand-reamed chamber of the Buck Mark contribute to its legendary reliability and accuracy.*

*Ultragrip RX® adds control and comfort.*

*Pro-Target rear sight offers finer adjustment clicks for greater accuracy.*

**THE BEST OF THE BEST.**

More than a decade in development and refinement, the ground-breaking Browning Hi Power was the product of two of the greatest gun designers ever — John M. Browning and FN's Dieudonne Saive. Its magazine capacity, durability, accuracy and perfect ergonomics have placed the Hi Power on a pedestal, revered as one of the finest firearms ever produced.

# HI POWER PISTOL

**SAFETY**

A large, ambidextrous manual thumb safety is conveniently located on the frame just above the grip.

**SIGHTS**

Hi Power pistols are available with fixed, low-profile three-dot sights. The Hi Power Standard is also available with optional low-profile target sights that are adjustable for windage and elevation.

**MAGAZINE CAPACITY**

Double-stack magazine design. A 13-round magazine is standard in 9mm. 10-round models in 9mm are available where required by law. Follow state and local laws regarding magazine capacity.

*All Browning firearms are shipped with a free locking device to assist in the safe storage of firearms.*

**TRIGGER**

The light single-action trigger breaks clean and crisp. This is the system preferred by professionals around the world.

**FRAME AND SLIDE**

The frame and slide are built from solid steel, yet remain lightweight. The heft of the Hi Power keeps recoil light and manageable for accurate firing, even at a rapid rate. The Hi Power's balance in your hand is impeccable.

**HI POWER MARK III (FIXED SIGHTS)**

# CUSTOM SHOP

## OWN A PIECE OF BROWNING HISTORY. STRAIGHT FROM THE BELGIAN CUSTOM SHOP.

John M. Browning's relationship with Fabrique Nationale began in the late 1800s, with the factory turning many of the fabled designer's most famous firearms. Today, hand-crafted firearms from the Browning Custom Shop in Belgium are revered as functional pieces of art, embellished to your preferences. Choose from time-honored Browning designs such as the legendary Superposed, BAR® and Hi Power™, carefully manufactured and hand-assembled to ensure your investment will be enjoyed and shared for generations. For information, call (801) 876-2711 or visit [browning.com/custom](http://browning.com/custom) to download the Custom Shop brochure to view the options available.

### B25 SUPERPOSED

B25 SP Duck

The most requested Custom Shop model is the legendary Superposed, the last design undertaken by John M. Browning before his death in 1926 and the culmination of his firearms ingenuity and wisdom. The Superposed is the finest and most respected over and under design ever. As in all of Browning's work, the Superposed delivers perfect balance, economy of proportion and eye-appealing design. As beautiful as a custom Superposed is, it demands to be carried afield and used, just as Mr. Browning intended.

The Browning Hi Power is one of the greatest pistol designs of all time. A custom Hi Power offers all the engineering genius of John M. Browning embellished with the beauty and craftsmanship provided by the Browning Custom Shop. A Hi Power Luxus pistol must be held to be fully appreciated.

**CUSTOM MADE IN BELGIUM**

The Custom Gun Shop of Fabrique Nationale and the Herstal, Belgium Engravers' Cooperative, will make available on special order many different custom enhancements. These firearms will be

fully assembled, fitted and engraved in Belgium to the personal designs and specifications of the shooting enthusiast.

**PRICE**

Prices for the basic firearm, before custom enhancement, are available from the sales department at Browning in Morgan, Utah by calling (801) 876-2711. All prices are subject to change due to changing world currencies.

**BROWNING**

BROWNING.COM/CUSTOM

**HOW TO ORDER**

All inquiries for Custom Gun Shop products will be submitted to headquarters in Morgan, Utah. Once the basic specifications have been determined, a written order should be placed with the Morgan office. The specifications will be reviewed with the Custom Shop in Belgium, and a price and delivery date will be determined.

**DELIVERY**

Actual production time will be based on the complexity and detail of the custom order. An approximate delivery date will be furnished with the factory cost quotation.

# SAFES

## BROWNING PROSTEEL SAFES — SECURITY AND CONVENIENCE.

For nearly 30 years, owners of Browning ProSteel safes have slept well knowing that their most prized possessions are safe and secure from fire, theft and untrained hands. In addition to security, Browning ProSteel safes lead the way in convenience, with more gun storage and easier access to safe contents than the competition. This tradition continues in 2011 — just take a look inside to see why Browning is The Best There Is.

**AXIS ADJUSTABLE SHELVING SYSTEM**

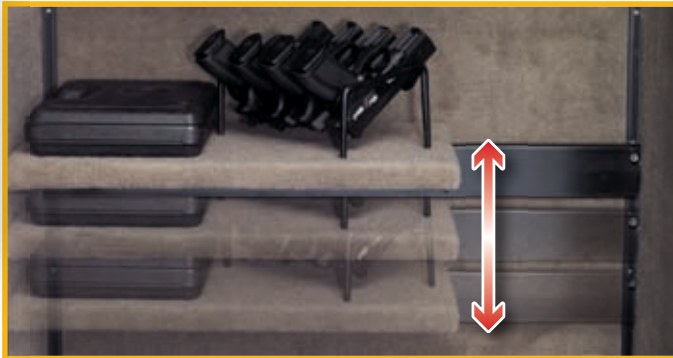

**NEW**

**THE MOST VERSATILE SAFE INTERIOR. EVER.**

A safe is capable of securing more than firearms. Jewelry, documents, cameras, coin collections and other valuables — plus shooting gear — can easily fit inside a safe. The trick is maximizing storage capacity to accommodate many different items of varying size. Browning ProSteel Safes have led the industry for years in terms of safe storage solutions, and for 2011 we take the concept to the highest level yet with our innovative Axis Adjustable Shelving (patent pending). Unlike shelves in other safes that are either

fixed in position or only offer vertical adjustment, Axis shelves can be adjusted both vertically and horizontally to accommodate nearly any size item while working around long guns. The new Axis Adjustable Shelving comes standard on all Platinum Plus® and Gold® Series safes. It is also available as a factory installed option on Medallion® and Silver® Series safes. Check it out today and see how much more you can store in your Browning ProSteel safe.

A vertical track mounted to the back of the safe interior allows the horizontal rail to be repositioned up or down along the vertical axis.

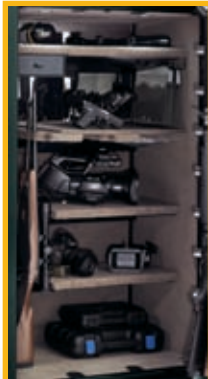

The cantilevered design of the Axis Adjustable Shelving can be placed anywhere left or right along the horizontal axis. Shelving can also be combined to make one long shelf.

From all gun to all shelves and all points in between, Axis Adjustable Shelving offers more versatility than any safe shelving available.

Arrangement Option #1

Arrangement Option #2

Arrangement Option #3

**AXIS ADJUSTABLE SHELVING FACTORY INSTALLED OPTION**

Axis Adjustable Shelving comes standard on all Platinum Plus and Gold Series safes. It is also available as a factory-installed option on Medallion and Silver Series safes.

Suggested Retail: \$149.00

**DPX STORAGE SYSTEM**

**OFTEN IMITATED. NEVER DUPLICATED.**

It is said that imitation is the sincerest form of flattery. When it comes to the Browning ProSteel patented DPX® storage system (U.S. patent #7,409,790), consider us flattered. While other safe companies have begun adding storage options that make better use of unused space on the back of their safe doors, none can match the convenience, versatility, or style of our original DPX® Storage System. In addition to being able to store

items in the pouches and pockets, long guns can be stored on the door back giving you two, three, even four times the number of quickly accessible long guns compared to the competition. Up to four handgun pouches (included) can also be positioned using the loop system. No other safe company offers as many versatile storage options on so many of their safe models.

DPX STORAGE SYSTEM

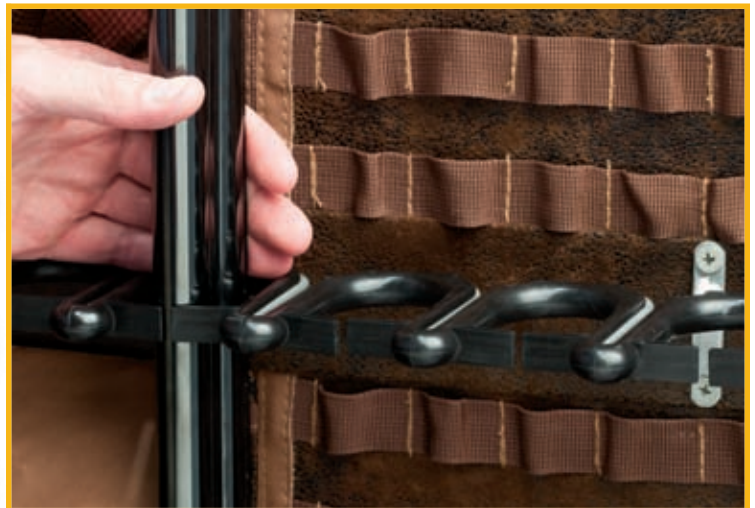

The patented Duo-Plus Extra (DPX) Storage System includes:

- Long gun storage on the door back
- A system of pouches and pockets to store small valuables on the door back
- DPX Handgun Pouches to store handguns on the door back or inside the safe
- A convertible Duo Interior system inside the safe with both shelves and long gun capacity

The DPX System is standard on the following safe series:

- Platinum® Plus
- Silver®
- Select™
- Gold®
- Bronze®
- Tactical
- Medallion®
- Theftgard® (top half only - select models)

CAPACITY COMPARISON Up to 30% more than other safes	Browning ProSteel 26 Cu. Ft. Model	Other Brand 25-28 Cu. Ft. Safe
Long Gun Capacity with Side Shelves in place	17 guns	11-14 guns
Fast Access Guns	9 guns	2 guns
Gun Locations	Interior and door back	Interior only

QUICK ACCESS DPX BARREL RACKS

Flexible polymer wings on the Quick Access DPX Barrel Rack hold the barrel in place, yet bend to allow the firearm to easily be pushed into or pulled out of the rack. It's standard on Platinum Plus, Gold, Medallion and Silver Series safes.

HOW MANY GUNS CAN I STORE IN MY BROWNING PROSTEEL SAFE?

The gun capacity description is a series of three numbers, for example 11/22+7. The first number is the long gun capacity of the main interior portion of the safe, with part of the space used for shelves (11 in the example). The second number is the interior long gun capacity if the shelves are removed for an all gun interior (22 in the example). The "plus" number (+7 in the example) is the long gun capacity on the back of the door. The door back capacity can be used to store long guns whether or not shelves are used in the interior. Since capacity is determined by safe size and features, each safe will have different interior capacities.

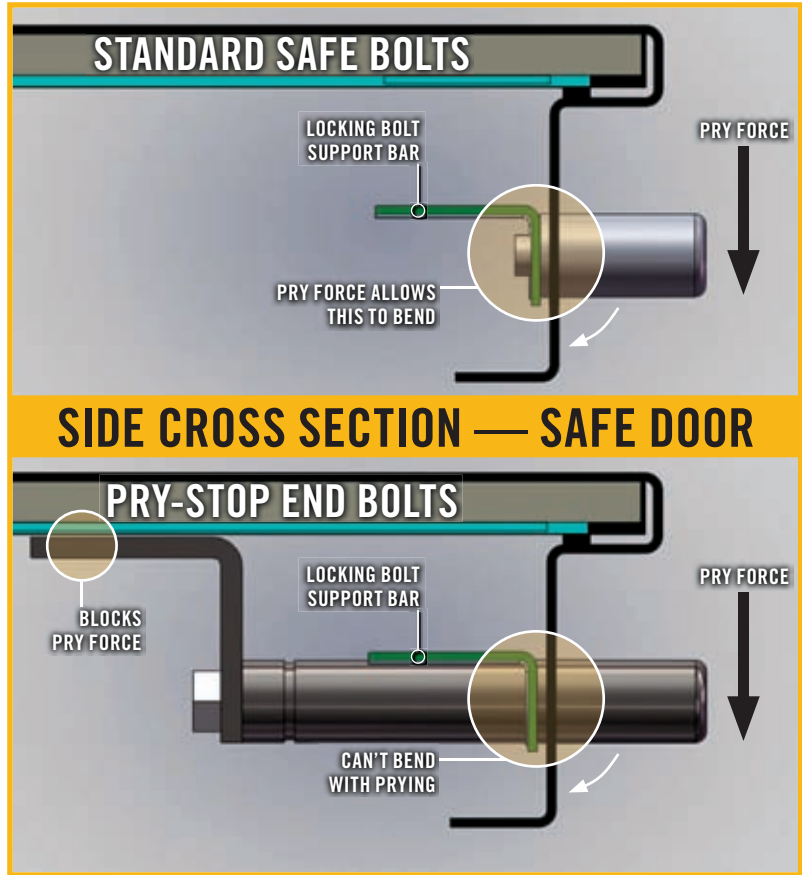

## FAIL-SAFE SECURITY.

For fail-safe security, look no further than the leaders in the safe industry, Browning and ProSteel. Our safes are manufactured with innovative, reinforced design features that ensure strength, security

and protection for your firearms and valuables. It's good to have a back-up plan. That's why you'll find anti-pry bolt supports, diversion bars and extra lock protection on every safe we build.

Four key design areas contribute to superior pry resistance: (1) A rigid door, (2) A rigid safe body, (3) A stiff locking bolt assembly and (4) Superior bolt engagement in the door frame. All four have been designed into Browning ProSteel Safes for better protection against pry attacks.

Safe corners are vulnerable to a pry attack, and great efforts have gone toward addressing the corners to make them nearly impenetrable to pry attack. Our Pry-Stop Corner Bolts (Platinum® Plus, Gold® and Medallion® Series safes) and Pry-Stop End Bolts (Silver®, Bronze®, Select™ and Tactical) plus Anti-Pry Tabs and extension arms in the Uni-Force™ Locking System make corners and crucial moving parts more pry-resistant. Tight-tolerance door fit makes it more difficult to get a prying tool into the door gap, while thicker doors make it harder to get a pry tool behind the door.

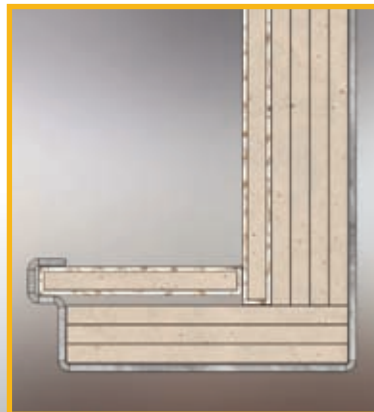

## FIRE RESISTANCE.

There are no industry standards for rating gun safe fire protection. This leads to confusing ratings that vary by manufacturer, and you are left to trust the manufacturers' claims. A Browning ProSteel safe backs up your trust with advanced fire protection features and a proven record of providing quality products for over 100 years. Browning

ProSteel Safes are tested for fire resistance beyond much of the competition, only then a label is applied with an honest fire protection rating. Extensive testing, industry-leading engineering and decades of experience go into building Browning ProSteel Safes in order to provide excellent fire resistance.

### WHAT MAKES A SAFE FIRE-RESISTANT?

The amount of insulation, placement of insulation, steel thickness, fire seal and other design elements (rigid door, external hinges, formed door design) are all crucial factors.

When comparing fire ratings, remember, the overall thickness of the insulation is the most important element in fire protection, and more insulation means better protection. Be confident that Browning ProSteel Safes offer excellent fire protection to protect your valuables in case of fire. Different ratings are useful for comparing fire protection in each Browning ProSteel safe series.

# PROTECTION YOU CAN RELY ON.

With a reputation for quality, innovative, reliable and beautiful firearms, Browning is one of the most respected names in the outdoor industry. Browning ProSteel Safes uphold those same values by offering high-quality attack- and fire-resistant safes designed to protect your possessions, and look good doing it. Our safes not only look

fantastic on the outside, the security and fire protection features inside of the safes are equally as impressive. While the looks of a safe matter, they only accent the features and construction that protect your belongings. A safe is a long-term investment, so be sure to invest in a Browning, The Best There Is®.

## COMPETITIVE COMPARISON

### BROWNING PROSTEEL SAFES

When comparing a Browning ProSteel safe to the competition, it's clear to see that there really is no comparison. Here's why Browning is The Best There Is®:

### LESSER SAFES

#### 1 ▶ STORAGE SYSTEM

Every Browning ProSteel Safe includes a Storage System to maximize capacity, organization and location of your valuables. The pockets, pouches and racks mounted on the back of the door provide amazing flexibility to store a variety of items.

#### 1 ▶ INTERIOR

Other safes simply come with an "interior" that doesn't maximize the storage capacity of the safe. The door back is wasted space. In some cases you must even assemble the shelves yourself. Interior hinges may only allow the door to open part way.

#### 2 ▶ SAFE LOCKING MECHANISM

##### Uni-Force™ Locking System –

Our premier locking mechanism (shown) uses robust cam locks and a large, multiple diversion bar system to prevent bolt or handle pressure from reaching the lock. Forces go to the cams and diversion bars, not the lock, creating protection unmatched by any other locking system.

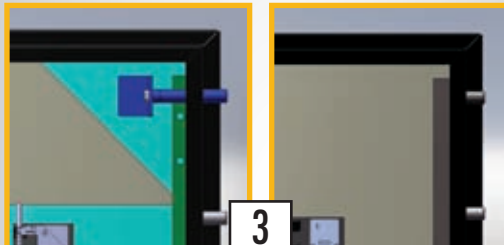

#### 2 ▶ SAFE LOCKING MECHANISM

A lesser locking mechanism allows force from the bolts or handle to reach the critical lock. The only protection for the safe is an after-the-fact relocking device.

#### 3 ▶ DOOR CONSTRUCTION

For better security, the door must be designed and built to protect against multiple types of attack, and must engage the safe body in a manner that prevents break in. Browning ProSteel safe doors provide extra protection in the areas most susceptible to attack and are more resistant to pry, drill and punch attacks.

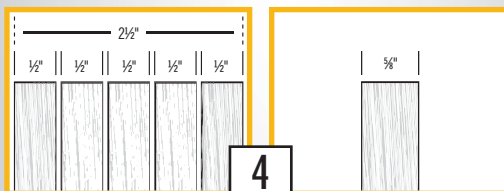

#### 3 ▶ DOOR CONSTRUCTION

Other safe doors may have weak points at the corners, and the locking bolts may be attached to a bar that is easily bent, both making the safe easier to pry open.

#### 4 ▶ FIRE INSULATION / PALUSOL® FIRE SEAL

Browning ProSteel Safes have up to five layers of 1/2" insulation. Thickness of insulation is the most important factor in fire protection.

The Palusol seal used on Browning ProSteel fire-resistant safes extends around the door so it is completely sealed in case of a fire. When heated, the Palusol expands to seal the door frame.

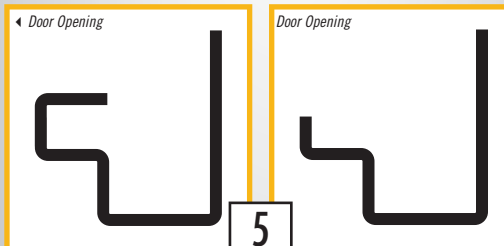

#### 4 ▶ FIRE INSULATION / FIRE SEAL

Some manufacturers claim high temperature or long duration fire ratings with as little as 1/2" of insulation, and they may not want to tell you how much (or little) insulation is in the safe. Lesser safes have gaps in the insulation and the fire seal, and may use a lesser quality fire seal. Internal hinges may create large gaps in the insulation.

#### 5 ▶ REINFORCED DOOR FRAME

Browning ProSteel Safes have an integrated reinforcement bent into the door frame of every model. The reinforcement is the actual steel thickness of the body with no welds for superior strength and makes the safes more pry-resistant.

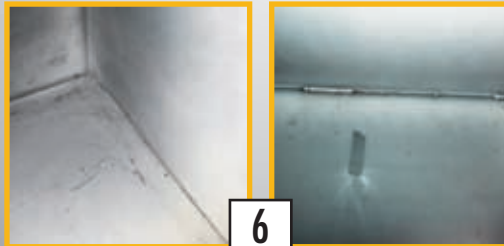

#### 5 ▶ NON REINFORCED DOOR FRAME

Some safe manufacturers cut costs by not reinforcing the door frame. This fails to protect against prying or pounding, making the door itself a prime target for attack.

#### 6 ▶ CONTINUOUS WELDS

Browning ProSteel Safes are constructed with continuous welds for optimal strength.

#### 6 ▶ INTERMITTENT WELDS

Some lesser safes have intermittent welds, which create weak points in the safe body. Gaps in welds can also create the perfect pry point for a burglar. Gaps filled with auto body putty and painted over are weak, even if you can't see them.

## SAFE FEATURE ICONS

The icons below highlight key features of Browning ProSteel Safes, and help you quickly identify and compare the features of different safe models.

## FIRE/SECURITY RATINGS

Fire and Security thermometers make it easier to compare the level of protection Browning ProSteel Safes provide in these two important areas. The “F” indicates fire protection and the “S” indicates security level. Higher numbers mean better protection.

	<p><b>FORCE DEFLECTOR™ LOCKING SYSTEM –</b> The Force Deflector Locking System (patent pending) prevents bolt or handle forces from reaching the lock by using a rotating cam device. It prevents energy transfer to the lock better than most systems used in the safe industry.</p>		<p><b>PRY-STOP CORNER BOLTS –</b> Pry-Stop Corner Bolts provide better protection than other pry-defense designs. Innovative long locking bolts extend diagonally from a reinforced support at the corners of the door to protect against pry attack at the vulnerable corner areas.</p>
	<p><b>UNI-FORCE™ LOCKING SYSTEM –</b> Our finest safe locking mechanism uses robust cam locks and a large, multiple diversion bar system to prevent bolt or handle pressure from reaching the lock. Forces go to the cams and diversion bars, not the lock, for protection unmatched by other locking systems.</p>		<p><b>PRY-STOP END BOLTS –</b> Superior to other bolt designs which allow the locking bolt support bar to bend. Pry-Stop End Bolts are over 2½ times longer and attach to a high-strength steel angle iron which prevents the locking bolt support bar from bending in a pry attack. The top and bottom locking bolts on the door side secure the critical door corners.</p>
	<p><b>1" FORMED DOOR –</b> The 1" Formed Door is engineered with a rugged steel face, back and reinforcement panels to provide excellent strength and attack protection compared to the competition.</p>		<p><b>LOCKING BOLTS (VARIABLE SIZE) –</b> The rugged steel pieces that move behind the door frame to actually hold the safe door locked and closed. Bigger bolts, and more of them, provide greater security.</p>
	<p><b>DUO-FORMED® DOOR –</b> The best safe door we offer is formed from multiple layers of steel, carefully formed together to provide superior strength, pry-resistance and attack protection. Full second panel for outstanding strength. The door face is 1⅛" thick.</p>		<p><b>BOLT DIRECTION –</b> Better safes have locking bolts extending from all four sides of the door for extra resistance to pry attack. Safes with bolts on three sides have them on both sides of the door and on the top edge.</p>
	<p><b>OMNIBARRIER® LOCK PROTECTION SYSTEM –</b> A carefully engineered structure of steel hard plate and steel components designed to protect the safe lock from drill, punch and push attacks.</p>		<p><b>BODY THICKNESS (VARIABLE MEASURE) –</b> The thickness of the steel that comprises the safe body. A smaller gauge number means thicker steel, which provides more security than thinner steel. The thickest Browning ProSteel Safe body is ⅜" (on Platinum® Plus) and this specification is not shown in gauge measurement.</p>
	<p><b>FIRE RATING (VARIABLE TIME) –</b> A laboratory measurement of time and temperature (in Fahrenheit) used to compare the relative amount of fire resistance provided by a safe. Safes with a longer fire rating time provide more fire protection than a safe with a shorter time.</p>		<p><b>DRILL-RESISTANT DEFLECTOR PLATE –</b> A hardened steel plate strategically positioned at an angle in the door which causes drill bits to bend or break, providing additional protection for the lock.</p>
	<p><b>LAYERS OF INSULATION –</b> The most important factor in fire protection is the total thickness of the insulation in the safe. More insulation means more protection from fire. Our safes use ½" thick gypsum panels, so the number of layers multiplied by ½" shows the total insulation thickness in inches.</p>		<p><b>LIGHT PACKAGE / MIRROR –</b> The interior light package includes two light modules to illuminate the safe interior. A mirror covers the top half of the rear wall of the safe. Combined, they make it easier for you to find items inside the safe.</p>
	<p><b>REINFORCED DOOR FRAME –</b> The door opening of the safe is strengthened by a U-shaped steel channel around the entire perimeter to create added pry and attack resistance.</p>		<p><b>DPX® SYSTEM –</b> The patented Duo-Plus Extra Storage System includes a rack to store long guns on the door back. There is also a variety of pouches and pockets to store other valuables on the door back. See page 91 for a complete description.</p>
	<p><b>180° HEAVY DUTY HINGES –</b> Rugged hinges are machined from solid steel bar stock for strength. The hinges allow the door to swing open 180° for unhindered access to the safe interior. Hinge-side locking bolts maintain full security even if the hinges are cut off. The door is removable to simplify moving of the safe.</p>		<p><b>AXIS™ –</b> New Axis Adjustable Shelving is the most versatile on the market. By combining multiple, moving shelves and an array of tracks, small and large items alike now fit in the safe and take up only the minimum amount of shelf space. See page 90 for a complete description.</p>
	<p><b>UL® SECURITY CONTAINER RATING –</b> The industry standard test and rating for home/personal safes. Requires minimum construction specifications and passing a laboratory attack test. Our premium safes far exceed the minimum requirements for the UL Residential Security (Tool Attack) listing.</p>	<div data-bbox="771 1785 1461 1837" style="background-color: #FFD700; padding: 5px;"><b>WHY STEP UP?</b></div> <p>Starting with the flagship Platinum Plus Series, there is a “Why Step Up?” section at the top of the description area for each series. This section is a list of just the features that distinguish that series from the series below (to the next page or pages) in the safe line up. “Why Step Up?” is an easy comparison between Browning ProSteel Safe series.</p>	

## WHAT YOU SHOULD KNOW BEFORE BUYING A GUN SAFE.

Not all gun safes are the same. Different safes offer more or less protection, depending on the features included in the safe. This quick guide helps explain different feature areas and the comparative

protection offered by individual features. You can determine the level of protection you want and need, and choose a safe that best meets those needs.

### SECURITY

#### LOCKING SYSTEM

The locking system connects the lock with the handle and the locking bolts. Better systems are engineered to protect against differing types of criminal attack.

**BEST** – **Uni-Force™ System** — Ultimate protection against pry and side bolt attacks. Includes the OmniBarrier® System that encases the lock in steel and hard plate, protecting it against drill and punch attack.

**BETTER** – **Force Deflector™ System** — Better than most industry systems protecting against side bolt attack. Includes a secondary re-locker, hard plate and hardened pin lock protection to defend against attacks on the lock.

**GOOD** – **Standard Locking System** — Does not provide protection against side bolt attack. All Browning ProSteel Safes feature either the Uni-Force or Force Deflector Systems to defend against side bolt attack.

#### DOOR THICKNESS

A thicker, more rigid door is better able to resist pry attacks. A door formed from multiple pieces of steel is more rigid because strategic bends in the metal add strength. A formed door also includes fire insulation, and therefore provides more fire protection.

**BEST** – **Duo-Formed® Door** — 1½" thick door face. Full steel interior panel.

**BETTER** – **1" Formed Door** — 1" thick door face. Steel reinforcement panels.

**GOOD** – **Plate Door** — ¾" thick solid steel door face. All Browning ProSteel Safes have a Best or Better type door.

#### STEEL THICKNESS

Thicker steel means more protection from any type of criminal attack and from fire.

**BEST** – ¾" Steel — Equivalent to about 6.5 gauge, 0.1875" thick.

**BETTER** – 10 gauge or 11 gauge — 0.135" or 0.12" thick.

**GOOD** – 12 gauge — 0.105" thick.

#### LOCKING BOLT DESIGN, NUMBER AND PLACEMENT

Better designed locking bolt structures and bigger bolts provide more pry resistance. Top, bottom and corner placement also improve protection against prying.

**BEST** – **Pry-Stop Corner Bolts, four-sided coverage** — 1½" or 1¼" bolts.

**BETTER** – **Pry-Stop End Bolts, three- or four-sided coverage** — 1¼" or 1" bolts.

**GOOD** – **Standard Locking Bolts, two-sided coverage** — 1" bolts.

### FIRE PROTECTION

#### INSULATION THICKNESS

More insulation means more protection. Insulation acts as a barrier and has a cooling effect. Thicker insulation is a better barrier.

**BEST** – **Five layers of ½" thick insulation** — So thick it is very visible.

**BETTER** – **Three or four layers of ½" insulation.**

**GOOD** – **One or two layers of ½" insulation.**

#### DOOR SEAL

The door seal activates during a fire to seal the interior of the safe from the fire on the outside. It prevents heat from getting in around the perimeter of the door and keeps the inside cooler. Works by expanding intumescent action in response to heat.

**BEST** – **Premium 3-in-1 Palusol® seal** — Palusol is the industry standard expanding door seal. Includes triple-fin protection for a tighter seal and protection against cold smoke damage.

**BETTER** – **Palusol® seal** — Industry standard expanding door seal. Expands five to nine times its original size.

**GOOD** – **Simple rubber seal** — All Browning ProSteel Safes use a Palusol® seal for better protection.

### CONVENIENCE

#### INTERIOR CONFIGURATION

A safe should allow maximum storage within its interior, and make it easy for the owner to access the items stored inside.

**BEST** – **AXIS™ with DPX® Storage System** — New Axis Adjustable Shelving combined with the DPX Storage System provides the most versatile safe interior available, allowing you to customize your safe to meet your specific and always changing storage needs.

**BETTER** – **DPX® Storage System** — Store long guns, handguns and many small items on the door back in a system of pouches, pockets and loops. Long gun and shelf storage inside the safe, convertible to all long gun.

**GOOD** – **Convertible long gun/shelf storage inside the safe** — No long gun storage on the door back.

### OTHER IMPORTANT FEATURES

All Browning ProSteel Safes also include: 180° Opening External Hinges for easy access to safe interior (except Compact Series). A steel reinforced door frame for superior pry resistance. Industry-standard mechanical or electronic locks. All Browning ProSteel Safes carry the UL® Residential Security Container rating.

THE HEIGHT OF PROTECTION AND QUALITY

WHY STEP UP TO A PLATINUM PLUS SERIES SAFE?

- Heavy 3/16" steel body
- 1200°F/120 min. fire protection
- Grade VI interior package

ANTI-PRY FEATURES

- Ultra-heavy 3/16" steel body
- Pry-Stop Corner Bolts at all four corners of the door
- 1½" chromed locking bolts, four-sided door coverage
- Extended throw locking bolts
- Uni-Force™ Locking System with Anti-Pry Tabs and extension arms
- Fully reinforced integrated door frame
- Tight-tolerance door fit
- 1½" thick Duo-Formed® door

ADDITIONAL SECURITY FEATURES

- Uni-Force Locking System with four cams (three on PP39F)
- OmniBarrier® Lock Protection System
- Drill-resistant deflector plate
- UL® tool attack listed
- S & G® Group II lock with key lock dial and five-year limited warranty

INTERIOR/CONVENIENCE AND APPEARANCE FEATURES

- New Axis™ Adjustable Shelving
- Premium DPX® Storage System
- Quick Access DPX Barrel Rack
- Four DPX Handgun Pouches
- Integrated Jewelry Box
- Knurled five-spoke Buckmark handle
- Metallic Elk scene bonded to the safe door
- Elevated floor makes removing guns easier
- Baked-on, high-gloss finish

GRADE VI INTERIOR FEATURES

- Premium DPX Storage System with simulated leather trim
- Quick Access DPX Barrel Rack
- Interior cedar sides and ceiling
- Interior light package and full length mirror
- Worn leather look microfiber interior covering

1200° F/120 MIN. STANDARD FIRE PROTECTION

- 1200° F/120 min. fire protection
- Five layers of ½" fire-resistant insulation in the body
- Four layers of ½" fire-resistant insulation in the door
- Premium 3-in-1 Palusol® fire seal for added fire protection

SELECT SERIES FULL LINE DEALER

To combat drill attacks, some Browning ProSteel safes feature Hardened Steel Pin Lock Protection strategically placed directly in front of the locking mechanism. The smooth, rounded edges of the hardened steel pins are more difficult to drill through than additional steel plate reinforcement. The pins also rotate freely and, should an attack attempt be made, are likely to bend or break drill bits.

GREAT VALUE FROM PREFERRED DEALERS

KEY FEATURES

- Exclusively available from Browning Full Line and Medallion Dealers
- Interior light package and mirror
- Whitetail Buck/Doe scene or scroll graphics

ANTI-PRY FEATURES

- 12-gauge steel body

### HERITAGE GRAPHICS

Now it is possible to show allegiance to these great organizations that work to preserve our rights and hunting heritage. The Heritage Graphics option can be ordered to replace the game scene on many safes. You can support your favorite organization by proudly showing its logo and graphics on a gorgeous Browning ProSteel safe.

Browning makes a donation to the respective organization for each Heritage Graphics option sold. Available on all safes in the Platinum® Plus, Gold®, Medallion® and Silver™ Series models (except Sand Metallic finishes).

## SECURITY DOOR

### BUILT-IN CONCEALMENT AND SECURITY

The Browning ProSteel Security Door has taken in-home security to a new level. With the appearance of a standard residential door, the Security Door is the perfect option for the consumer who prefers to be more discreet about the presence and location of valuables. The Security Door includes a UL® Listed S & G® Type I Electronic Lock with a keypad that can be mounted and concealed up to seven feet from the vault to further hide the true nature of the door. The Security Door features a six-panel door style to help blend in with other residential doors and can be painted to match. The minimum rough door opening for the Security Door is 83" x 36".

### SECURITY DOOR FEATURES

- 17⁄8" thick Duo-Formed® type door
- 1¼" chromed locking bolts
- 1" of fire-resistant insulation in the door face
- Residential interior straight brass handle
- UL® Listed S & G® Type I Electronic Lock
- Concealed hinges
- Internal lock release to open the door from within the vault
- Door swings out a full 180° when open

SECURITY DOOR SIX-PANEL

**USER-INSTALLED ACCESSORIES**

**EVERDRY™ ELECTRIC DEHUMIDIFIER**

The EverDry Electric Dehumidifier removes humidity from the interior of a safe and protects against rust. The 18" long EverDry should be used on safes 30" wide and larger. Cord is removable for installation.

Suggested Retail: \$29.95

The safe accessories shown on this page are easily installed by the user. New Browning ProSteel safes are shipped pre-drilled with a molded fire-resistant electrical pass-through sleeve installed in the safe to accommodate the power cord for a light kit or dehumidifier.

**FLEXIBLE EVERDRY™ ELECTRIC DEHUMIDIFIER**

The Flexible EverDry is flat and easily bends to take up less space and makes installation easier, especially in small safes. Removes humidity from the interior of a safe and protects against rust. Plug is removable for installation. LED indicates unit is operating.

Suggested Retail: \$39.95

**DRY-ZONE**

Absorbs moisture without electricity, and is rechargeable in an oven. It can be reactivated indefinitely. One 500-gram box protects up to 37 cubic feet of enclosed space, about the volume of a standard 30" wide safe.

Suggested Retail: \$19.95

**PISTOL RACK**

Store handguns more efficiently and increase storage space on shelves. Access to handguns is made easier by placing them in an upright position. 4 or 6 capacity gun models available.

Suggested Retail: \$24.95 — 6-Gun  
Suggested Retail: \$18.95 — 4-Gun

**DPX® HANDGUN POUCHES**

Store more handguns in your safe with the versatile DPX Handgun Pouches. These versatile pouches include snap-straps to allow use on the MOLLE System used on the DPX and also hook and loop fasteners for use on carpeted interior surfaces. Set of two. Brown box package. Not intended for use as a holster.

Suggested Retail: \$24.95

**ZERUST® PROTECTANT**

Small capsule emits an invisible vapor that forms a corrosion- and rust-resistant barrier on metal surfaces. Volatile Corrosion Inhibitors (VCIs) have been used for years to protect metal parts in industrial and commercial applications. One capsule protects a standard 30" wide safe for one year.

Suggested Retail: \$7.99

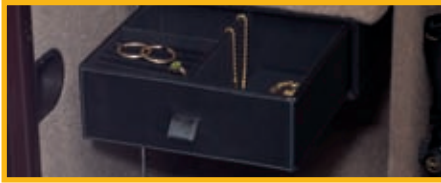

**VCI GUN SOCKS**

Browning's VCI (Vapor Corrosion Inhibitor) Gun Sock seals out moisture. VCI penetrates into the smallest crevices where oils cannot reach, driving out moisture. Provides full protection by forming a vapor enclosure around firearm from muzzle to butt. The VCI Sock, when used in a safe or cabinet, will offer additional protection to all metal items in the enclosed area. One size fits most firearms.

Suggested Retail: \$14.95

**FACTORY-INSTALLED ACCESSORIES**

**JEWELRY BOX**

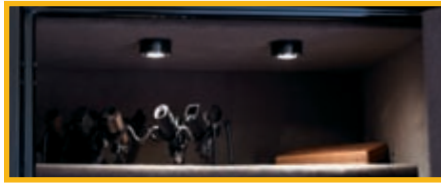

The Jewelry Box option makes storing and finding jewelry inside a safe much easier and convenient. The elegant Jewelry Box conveniently holds jewelry and small items inside the safe in an organized, protected manner. Exterior is synthetic leather; interior is lined with jeweler's velvet. Mounted on half shelf below gun rack on most safe models.

Optional on Gold®, Medallion® and Silver® Series safes.

Standard on Platinum® Plus Series safes.

Factory installed only.

Suggested Retail: \$59.95

**MEDALLION/SILVER SERIES LIGHT PACKAGE OPTION**

This integrated lighting package makes locating objects on shelves or identifying the right firearm convenient and easy. The two included light modules are wired to a door activated switch and illuminate when the door is opened. Factory installation adds a seamless look with no exposed wiring.

Optional on Medallion and Silver Series safes.

Standard on Platinum Plus and Gold Series safes.

Factory installed only.

Suggested Retail: \$129.00

**MEDALLION/SILVER SERIES MIRROR OPTION**

Located on the top half of the back wall, the mirror option looks great and brightens the interior of the safe to make objects, especially those on the rear of the shelves, easier to find. Constructed of break-resistant material for durability.

Optional on Medallion and Silver Series safes.

Standard on Platinum Plus (full length) and Gold Series safes.

Factory installed only.

Regular (Fits 28 or 26 cubic foot models)  
Suggested Retail: \$49.00

Wide (Fits 39 or 35 cubic foot models)  
Suggested Retail: \$59.00

Wide/Tall (Fits 56 or 42 cubic foot models)  
Suggested Retail: \$89.00

**FILE HANGER**

The file hanger attaches easily to the side of any shelf allowing you to store documents. Can even be mounted above gun storage to take advantage of unused space. Includes one file hanger and 2 box-bottom hanging file folders.

Suggested Retail: \$19.95

**LOCK OPTIONS**

The locks below are available as factory-installed options. Availability by series is described in the information for each lock.

**S & G® ELECTRONIC LOCK**

The S & G Electronic Lock is an advanced security system manufactured by the leader in the lock industry. Includes many technical security features.

Available on all models.

**SECURAM BIOMETRIC LOCK**

The SecuRam Biometric Lock uses the uniqueness of an individual fingerprint as the combination in this advanced security solution. The lock opens with either a fingerprint or a multi-digit code. It is highly secure and operates very quickly. Simple programming instructions. LCD Screen.

Not available on TheftGard, Bronze, Compact, Tactical Series safes and the Security Door.

**INTERIOR OPTIONS**

**ALL SHELF INTERIOR**

The All Shelf Interior adds extra shelves so that the entire interior portion of the safe can be used for small items on the shelves. The long gun rack from the DPX® remains on the door, so some long gun storage remains even when the interior is all shelves. **The All Shelf Interior is available only as a factory-installed option on Gold, Medallion and Silver Series safes.**

Suggested Retail: \$65.00

**DPX® MOSSY OAK® BREAK-UP® CAMO**

If your favorite color is camo, then you will love the Mossy Oak Break-Up DPX Storage System. With a background of Break-Up and complementary color pouch and strap materials, the Camo DPX is an outdoor lover's dream. Available only to replace the DPX Storage System used standard on Platinum Plus, Gold, Medallion and Silver Series models. (Not available on Bronze, Tactical or Select.)

Suggested Retail: \$49.00

FOR AXIS™ ADJUSTABLE SHELVING, SEE PAGE 90

**GUN SAFE WARRANTY**

ProSteel offers a Gun Safe Warranty equal to the best in the industry. Browning ProSteel safes manufactured after January 1, 2006 include a generous warranty that covers:

- ATTEMPTED BREAK IN • BREAK IN • FIRE •

If a safe has one of these situations and your homeowner's insurance policy does not cover the damage to the safe, ProSteel will repair or replace the safe. Contents are not covered. Shipping costs for new safe, if necessary, are included.

Some restrictions apply. See Safe Owner's Manual or Browning.com for complete warranty information. Workmanship warranty information is included.

**BRUISER CASES**

Bruiser gun cases offer exceptional protection for your valuable firearms during airline travel and transportation. The high-density, double wall polyethylene construction makes this case one tough "Bruiser." For added protection, foam inserts can be extended outward to keep guns separated or pushed inward if not needed.

An O-ring sealed tongue and groove lid provides excellent weather resistance. Recessed wheels offer easy mobility. Corrosion-inhibiting Zerust® inserts are added to each case to help protect your firearms from rust. Bruiser gun cases are offered in double gun and single takedown models.

Foam inserts protect guns from each other

Zerust insert protects all metal surfaces from rust

Recessed wheels

Purge valve

**VCI GUN SOCKS**

VCI (Vapor Corrosion Inhibitor) Gun Sock

Two-piece VCI Gun Sock

**CLOSURE** - Drawstring

The VCI (Vapor Corrosion Inhibitor) Gun Sock seals out moisture. VCI penetrates into the smallest crevices where oils cannot reach, to drive out moisture. Provides full protection by forming a vapor enclosure around firearm from muzzle to butt. The VCI Sock, when used in a gun safe or cabinet, will offer additional protection to all metal items in the enclosed area. One size fits most firearms.

**SAWTOOTH MOUNTAIN BAGS**

Sawtooth Mountain bags are built for rugged adventures. From the Ballistic Nylon and heavy-duty 900 denier poly shell fabric, to the oversized zippers, durable molded bottoms and reinforced stress points, these bags are designed to withstand the abuse of traveling to hunting camps with heavy loads. Anvil-style openings on both duffel bags provide a wide mouth to quickly pack or locate clothing, while the separate bottom compartments are perfect for separating dirty boots and other gear. The conveniently-sized Gear Bag is ideal for knives, flashlights and ammo and the zip open top makes everything fast and easy to grab. Each bag has been designed by the famed Fishpond® company to be The Best There Is®.

**LARGE DUFFLE**

- Anvil-style opening
- Cavernous main compartment
- Two huge side compartments
- Two pockets under buckle-down flap
- Large bottom pocket for boots or parkas
- Hidden pocket for a handgun
- Mossy Oak® New Break-Up®
- Dimensions: 26" L x 16" W x 16" D

**MEDIUM DUFFLE**

SALT CREEK WATERFOWL BAGS

SALT CREEK  
waterfowl

Large Duffle

Medium Duffle

Gear Bag

Luggage Tag

The Salt Creek meanders through some of the West's finest waterfowl marshes, so it's only fitting that the Browning waterfowl bags that bear its name are the finest on the market. As any duck hunter knows, waterfowl gear must stand up to the harshest conditions. Salt Creek bags are built out of the finest and most rugged materials like wear-resistant Ballistic Nylon, heavy-duty 900 denier poly, rust-proof pewter zipper pulls, oversized heavy-coil zippers, reinforced stitching, rigid foam liners and molded waterproof bottoms. These are just some of the construction features that make these bags the top-of-the-line gear for waterfowl hunting. Couple the durable construction with functional design and handsome aesthetics and it's hard to imagine a better built, better looking, more functional line of waterfowl bags anywhere. Designed and engineered by the famed Fishpond® company, these bags are built with the sole purpose to be the best.

**LARGE DUFFLE**

- Cavernous main compartment

**GUNSLINGER**

**NEW**

No matter how light your rifle or shotgun is, packing it around all day can wear you down and make your shoulder sore. The new Browning Gunslinger system gives you the option of changing all that. By mounting the Gunslinger Holster on your belt or the available Rifle Belt, and strapping your firearm's pistol grip into the Holster, you share the weight of the firearm with your waist, and secure the rifle to your body. Add the optional Backpack Accessory to further secure your firearm, and have the ability to unbuckle and immediately shoulder your gun should a quick shot arise.

BACKPACK ACCESSORY

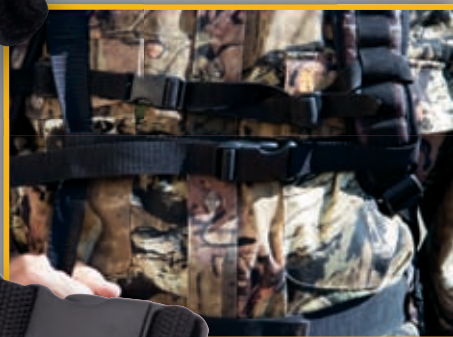

HOLSTER

RIFLE BELT

Holster

Backpack Accessory

Rifle Belt

**HOLSTER**

- Secures your rifle or shotgun to help prevent accidental dropping and excessive movement when hiking
- Fully adjustable to fit most rifles and shotguns with a pistol grip
- Rubberized hooked cradle and adjustable, quick-release buckle secures firearm in place
- Fits up to a 2" belt or backpack waist strap
- Constructed from high-quality nylon webbing
- Secure hook and loop closure secures Gunslinger Holster to your belt

**RIFLE BELT**

- Oversize belt is designed to fit over layers of clothing
- Perfect for use with the Gunslinger Holster
- Constructed from high-quality nylon webbing
- Cut-to-fit length

**BACKPACK ACCESSORY**

- Attaches to the shoulder straps of a backpack, suspenders or a bird vest
- Allows you to carry your rifle in side or front carry position (holster not included)
- Constructed from high-quality nylon webbing
- Quick adjust/quick disconnect buckle
- Ideal for both rifles and shotguns

MOA SHOOTING STICKS

**NEW**

A stable rest is essential to making accurate rifle shots. Unfortunately, the terrain you are in dictates the quality of the rest you have at hand, and can mean the difference between a clean shot or a miss at a once-in-a-lifetime trophy. Give yourself an edge with a set of new Browning MOA Shooting Sticks. Ultra-light, ultra-strong 6061-T6 aircraft aluminum construction minimizes flex. Collapsible MOA Shooting Sticks take down into a compact bundle small enough to carry in a backpack and internal shock cords put the sticks into action fast and keep the pole sections connected. A durable powder coat finish reduces glare. Long-wearing carbide steel tips provide positive footing. Textured rubber sleeves protect your firearm, yet allow easy repositioning. Never miss an opportunity with a set of new MOA Shooting Sticks.

Collapsible Bipod

Collapsible Tripod

**COLLAPSIBLE SHOOTING STICKS**

- Easy to carry, quick to deploy
- Extends to 40" length for sitting or kneeling shooting positions
- Lightweight 9mm aluminum legs collapse into three segments of 14½"
- Leg segments are secured by heavy-duty elastic shock cord
- 1½" internal ferrule quickly guides poles together for tight, rigid fit
- All-terrain gripper feet with carbide steel tips
- Rubber coated yoke secures gun, but allows for easy repositioning
- Textured, powder-coated poles minimize reflections

**FIXED LEG SHOOTING STICKS**

- Lightweight and easy to carry
- Ultra stable, large diameter 13mm one-piece aluminum legs
- Gripper yoke secures lower legs when hiking
- Approximately 40" length
- All-terrain gripper feet with carbide steel tips are easily removed to add leg extensions
- Rubber coated yoke secures gun, but allows for easy repositioning
- Textured, powder-coated poles minimize reflections

- Ultra-rigid vertically split rings use oversize hardware for extra strength and ease of installation
- Standard, Intermediate and High rings are available for both 1" and 30mm diameter scopes
- Compatible with the two-piece Scope Bases for A-Bolt, BAR, BLR shown above and the X-Lock bases for X-Bolt rifles shown on page 137

THE HEIGHT IS DETERMINED BY MEASURING FROM THE TOP OF THE BASE TO THE BOTTOM OF THE SCOPE RING.\*

**STANDARD (.300")**

For scopes with an objective up to 44mm and a standard barrel contour

**INTERMEDIATE (.400")**

For scopes with an objective up to 50mm and a standard barrel contour

**HIGH (.500")**

For scopes with an objective up to 56mm and a standard barrel contour

\* Barrel contour, optic size and preferred eye relief all affect the fit of the scope on a rifle.

- Integrated Scope Mounts unite the ring and base into a single unit
- Machined from 7000 series aluminum
- Eliminates alignment problems and loose connections between bases and rings
- Choose from integrated mounts in Standard, Intermediate and High rings
- Will accommodate both 1" and 30mm diameter scopes in gloss, matte and nickel finishes
- X-LOCK™ bases also use standard Browning rings (See page 136)

**SOLID X-LOCK™ MOUNTS** Securely mounted optics are essential to the accuracy and precision of any rifle. To ensure the X-Bolt has the most stable mount possible, it features the X-LOCK scope mounting system that uses four screws per base, replacing the traditional two-screw standard. The benefits mean the scope bases are secured at all four corners rather than only held at the center of the base, and offers more accurate placement of the bases on the receiver. The revolutionary X-LOCK system holds the base tighter to the rifle than any other system.

**X-BOLT EXTRA MAGAZINES**

The X-Bolt uses a detachable rotary magazine constructed from a durable lightweight polymer. The magazine is designed to feed cartridges directly in line with the bolt, instead of offset as with traditional leaf-spring magazines, for a straight path right into the chamber. An ergonomic magazine-mounted release lets the magazine rotate directly downward and into the hand. The magazine sits flush with the bottom of the rifle for a sleeker appearance. Additional magazines can be kept loaded and carried in your pocket or pack for easy, safe access.

**BOSS®-CR ACCESSORY**

The BOSS-CR accessory offers all the accuracy and tunable advantages of the original BOSS device without the muzzle brake feature. By simply replacing the original BOSS forward weight and recoil reduction components with the one-piece, no-hole BOSS-CR accessory, only the reduced recoil of the original BOSS is sacrificed. The BOSS-CR accessory is designed to fit only BAR Mark II and A-Bolt centerfire rifles previously factory-fitted with the BOSS.

# KNIVES

**KNIVES — ESSENTIAL TOOLS**

The knife is one of the oldest, most basic of tools and can be used for a variety of chores.

Whether hunting, backpacking, fishing or working at home, keeping a sharp knife handy should be essential. We offer a wide selection of blades to meet nearly every use you can imagine. From dressing big game to cleaning a fish to slicing an apple, Browning has the knife you want.

*Backcountry Camp Knife, page 170*

**NEW**

**INDEPENDENCE KNIVES**

There was a time in the not so distant past when nearly everything you purchased was built in America, and the term Made in the USA stood for the highest quality. Made in the USA still means something special to many people, and that is why we are proud to offer the new Independence knife series. This collection was designed in the USA by famed knifemaker Russ Kommer. All the materials are sourced from

American companies, and the knives themselves are also built in the USA. Their quality is evident from first glance. Functional designs have been tried and tested in real-world hunting situations to make certain their balance is perfect and their blades stay sharp. Get your hands on a new Independence Series knife and take a bit of homegrown Browning quality into the field on your next hunting trip.

**RUSS KOMMER**

For nearly 30 years Russ Kommer has earned his living as a highly respected big game hunting guide in Idaho and the wilds of Alaska. The work of a guide doesn't end with leading clients to trophy game animals, it starts there. Once an animal is on the ground the real work begins. Over the years Russ used many knives to dress and skin countless animals, yet found each knife lacking in performance. He drew upon his wealth of hands-on experience and started designing and producing his own knives. It turned out that Russ had a knack for this art and has become a talented, award-winning knifemaker. What started as a hobby and the search for a better blade has led to numerous best-in-show awards. Russ creates and personally field tests his designs to ensure they meet the toughest standards — his own. Browning is honored to team with Russ to produce many of the knives throughout this catalog.

WHITETAIL LEGACY KNIVES

This special Whitetail Legacy Limited Edition presentation-grade knife honors the cagey whitetail deer and makes an excellent gift for the dedicated hunters who pursue them. The handsome handles are shaped from exquisite mesquite burl and feature pronounced finger grooves for a secure grip. Highly polished, the drop point, semi-skinner blade is hollow ground and carefully crafted from high-quality

Swedish Sandvik® steel. The full-length tang is tapered to provide perfect balance. Polished bolsters dovetail neatly. A whitetail deer lithograph is included and suitable for framing. This deluxe limited edition knife includes a felt-lined, hand-crafted walnut presentation box for display. Only 3,000 of the Whitetail Legacy Limited Editions will be made, so get yours today.

Without question, the whitetail deer is the most popular big game species in North America. To honor them, we offer the Whitetail Legacy series knives. Don't let their beauty fool you, these rugged knives have been extensively field tested by Alaskan guides and Midwestern bowhunters and used for every task imaginable. The unique mesquite burl handles offer natural beauty with a warm texture and exceptional durability. Hollow ground blades are razor sharp and an ideal length for field dressing.

**BLADES** - Hollow ground, satin-finished 420-J2 stainless steel · Laser-engraved Buckmark logo  
**HANDLES** - Finely polished zinc casting for heft and balance · Laser-engraved Buckmark logo · Adorned with scrimshaw wildlife artwork  
**FEATURES** - Brush finished back with Browning logo

HARD CORE HUNTER COMBOS

437  
Black Combo

★ *Designed  
in the USA  
by  
Russ Kommer*

438  
Mossy Oak®  
New Break-Up® Combo

Years of extensive field research have culminated with the ultimate three-piece hunting set, the Hard Core Hunter. Demanding hunters are sure to appreciate the hand saw with its 4¾" high carbon steel push/pull blade that makes fast work of wood or game. The custom handle shape minimizes hand fatigue. The knife has a semi-skinner drop point main blade and a unique canoe-shape handle with Dura-Touch® Armor Coating for complete comfort and control. A small caping knife offers precision for delicate field chores from capping a hide to peeling an apple. All blades fit into a slim, one-of-a-kind compact carry system with a unique swivel belt clip that makes the saw and knives easily accessible.

**SERIES FEATURES**

**TYPE** - Fixed blades

**BLADES** - German X50CrMoV15 steel

**HANDLES** - Contour-molded composite

GUIDE'S CHOICE KNIVES

**NEW**

Straight from the demands of hunters comes the new Guide's Choice knives. These sleek pairs are constructed from tough Sandvik® 12C27 stainless steel. The modified drop point style blade of the larger knife is ideal for general field dressing, while the smaller caping knife makes skinning easier and more precise than ever. Full-length tangs afford impeccable balance and strength. Canoe-shaped handles with finger grooves give ample grip. When a single knife just won't do the job, reach for the Guide's Choice.

Nylon sheath included with Model 521.

**OUTDOORSMAN FILLET KNIVES**

While a skilled individual can properly fillet a fish with most any knife, the rest of us require the aid of a sharp, flexible fillet knife. Browning Outdoorsman fillet knives are made to easily cut fillets with veteran-like ease. The razor-sharp German X50CrMoV15

steel blade provides just the amount of flex and feedback needed to glide over bones and carve perfect fillets every time. Tough, canoe-shaped molded handles provide a secure non-slip grip even when wet, for added control.

**SERIES FEATURES**

- TYPE - Fixed blade fillet

Knives similar to the Classic Series first appeared way back in the 1969 Browning catalog. Today's Classic Series knives have all the features, and more, that made the original models so prized. Razor sharp blades are fancy scroll etched and embellished with a gold Buckmark. Precision construction means the blade locks open with a snap. Folding models are thin enough to hardly notice in a pocket or purse, and make excellent gifts. Select from a variety of handle materials including stainless, wood, stag or mother-of-pearl scales. Leather sheath included with fixed blade models.

SERIES FEATURES

**TYPE** - Fixed blade and folding lockbacks

**BLADES** - 5CR15MOV stainless steel with engraving

**HANDLES** - Stainless, Wood, Stag or Mother-of-Pearl

**FEATURES** - Ultra-thin construction slides easily into pocket without adding excess bulk · Unique blade etching with Buckmark sets these knives apart · Fixed blade models include a leather sheath

**BIG GAME STAG HUNTING KNIFE**

525

The warm feel of a stag-handled knife in your hand is as traditional as it gets. This finely-crafted, fixed blade knife has a genuine stag handle with canoe shape and finger grooves for excellent grip. Razor-sharp 440-A stainless steel blade. High-polished stainless bolsters feature a finger guard and a lasered Buckmark. Top grain leather tie and sheath included.

**TACTICAL HUNTER SERIES KNIVES**

The new Tactical Hunter Series knives offer a unique addition to every outdoorsman's arsenal. Precision crafted, these high-quality knives feature a unique flipper design that assists in the speedy opening of the knife, and doubles as a finger guard when the blade is extended. The VG-10 stainless steel drop point blade is of the highest quality and holds an incredible edge. Lightweight, durable, corrosion-resistant titanium bolsters and liners. The attached pocket clip keeps the knife secure and easy to locate.

**EXTREME MOUNTAIN HUNTER KNIVES**

Extreme Mountain Hunter knives are designed for performance and reliability in extreme conditions and circumstances. With no scales to break or come loose part way through a job, the handles provide a secure grip with comfortable, rounded edges and are easy to clean after dressing game. Four models include two different sized drop point blades, one with a modified drop point and one with a deep belly,

semi-skinner shape. Each knife is built from tough Sandvik® 12C27 stainless steel with a Rockwell hardness of 58c-59c for the razor-sharp, edge-holding ability hunters demand. Each knife comes complete with a lightweight, injection molded sheath that complements the knives' rugged, no-nonsense construction. If you push yourself and your gear to the limit, an Extreme Mountain Hunter is your knife.

Logo detail

SERIES FEATURES

- TYPE - Fixed blade and folding lockback
- BLADES - Sandvik® 12C27 stainless steel
- HANDLES - Genuine stag or exotic desert ironwood
- FEATURES - Top grain leather sheath included · Leather tie

Don't be fooled by the name because these knives are big on performance. Lil' Bit series knives are a tried and true drop point blade design cut from Swedish Sandvik® 12C27 stainless steel that is renowned for superior edge holding ability. Ideally balanced to minimize hand fatigue, Lil' Bit knives are available with genuine stag or desert ironwood, a rare and beautiful exotic wood that resists wear and has a unique grain. All of the Lil' Bit knives come with a top grain leather tie and sheath (shown at right).

PACKER SERIES KNIVES

SERIES FEATURES

TYPE - Fixed blade

BLADES - Sandvik® 12C27 stainless steel

HANDLES - Genuine stag or highly grained burl wood

FEATURES - Top-grain sheath included with stag models · Nylon sheath included with RMEF models

Designed by experienced guide and knifemaker Russ Kommer, Packer Series knives were conceived on the unforgiving frontiers of Alaska. The unique handle design and blade shapes maximize the cut efficiency and reduce wrist fatigue. Packers come in three different blade designs: A multi-use modified drop point, a big belly semi-skinner and a modified drop point with a guthook. The knives feature genuine stag handles and a beautiful leather sheath. Browning has also teamed up with the Rocky Mountain Elk Foundation to offer knives with highly figured burl handles and a laser engraved RMEF logo on the bolsters, along with a nylon sheath.

OBSESSION SERIES KNIVES

Obsession knives give hunters the perfect tool for dressing and skinning duties. The main blade is a drop point design, and twin-blade models include the best guthook blade ever. The guthook's long throat efficiently funnels the hide without puncturing the rumen.

**CROWELL/BARKER COMPETITION KNIFE**

James Crowell

This unique knife is a joint design effort between James Crowell and Reggie Barker, the only two men to have won an American Bladesmith Society (ABS) World Cutting Championship. Jim Crowell is well known in the knife industry and the first to win the ABS World Championship. Reggie Barker is known as "The Sharpest Man in Texas," and won the ABS World Champion title for the third time at the 2007 BLADE Show. He's also won the 2004 and 2005 ABS World Championship Cutting Competition. The Browning Crowell/Barker Competition Knife includes a top-grain leather sheath and a Certificate of Authenticity, signed by both Jim Crowell and Reggie Barker.

Reggie Barker

**OUTDOORSMAN STEAK KNIVES AND KITCHEN CUTLERY SET**

Nothing is used more in the kitchen than a good set of sharp knives. Kitchen knives must be durable, have a variety of blade shapes for specific tasks and remain sharp, especially when used for processing wild game. The 14-piece Outdoorsman Kitchen Cutlery set has everything necessary for the home or cabin, including a hollow-ground boning knife that holds a razor edge, game shears and a sharpening steel. The set also includes standard kitchen cutlery and a uniquely designed carving fork with a pigtail twist so it won't bend when lifting a 10-pound roast from the pan. The set has a standard chef's knife with an innovative scalloped blade to reduce friction for carving meat, and six elegant steak knives for table use. Another favorite will be the bread knife, with large serrations, to make slicing warm homemade bread easy. The knives are made from quality German steel to ensure the Outdoorsman Set will last. A metal Browning Buckmark is set in the durable injection molded handles.

**SERIES FEATURES**

- TYPE - Steak knives/Kitchen cutlery
- BLADES - German X50CrMoV15 steel
- HANDLES - Durable injection molded handles with inlaid metal Buckmark

# LIGHTS

## HOW TO CHOOSE A FLASHLIGHT

Browning is a leading manufacturer of portable battery-powered lighting. For 2011, we have expanded our line to more than 50 styles. So, how do you choose the light that best meets your needs?

## SIZE, WEIGHT AND POWER

Smaller and lighter are better. New high-output LEDs from manufacturers like Luxeon® and Cree® are incredibly powerful and efficient, and don't require the size and weight of the old C and D battery lights to achieve the same light output. Our Alpha and Alpha Max flashlights, with a single AA battery, are brighter than the flashlights of the past and are no bigger than a shotgun shell.

## LED VS. XENON BULBS

LEDs are now preferred over Xenon and other types of filament bulbs for most uses. LEDs use batteries more efficiently, illuminate at equal or greater distance, emit a clean white versus a dull yellow beam and will not burn out under normal use. LEDs are also nearly unbreakable.

## HAND-HELD OR HANDS-FREE

Headlamps and cap lights allow the use of both hands for other tasks like dressing a deer, fixing the truck or finding a path through the woods. With modern technology many headlamps are as powerful as a larger hand-held flashlight. Several Browning headlamps, such as MicroBlast and Phantom can be worn either as a headlamp or clipped to the brim of a hat.

## BATTERIES

Lithium batteries are used in many of our highest-performing lights, such as the Catalyst, Hunt Master and Nitro. Lithium batteries pack about twice the power of alkaline batteries for their weight, and operate at very cold temperatures. Convenient AA and AAA alkaline batteries are also used extensively because they cost less than lithium and are more readily available. The latest integrated circuit designs in our Hi Power, Pro Hunter, Zeta and Alpha Max flashlights boost the performance of alkaline batteries to approach the performance of lithium batteries.

## SWITCH SETTINGS

Single-action switches (on/off) are preferred for self-defense and tactical applications. Multiple switch settings (high, low and in-between) preserve battery life and allow selecting between colors and flashing options. Lock-out switches on many Browning lights keep the light from accidentally turning on.

## RED, GREEN AND BLUE

Colored LEDs help preserve night vision, are great for map reading and are less obvious than white light to many types of game animals when walking to a tree stand in the dark.

## BROWNING ADOPTS ANSI FL-1 PERFORMANCE STANDARDS

Beginning in 2010, many top flashlight manufacturers agreed to use the same standards (ANSI-FL1) for measuring performance, so you can make an apples-to-apples comparison between models. We are proud to endorse and participate in these standards for portable lighting.\*

Lumens = Brightness. A traditional 2D flashlight is approximately 15 - 20 lumens.

Battery Life (Run Time) is defined as the time elapsed when the batteries are new to when the light reaches 10% of the original brightness.

Maximum Distance is measured as the distance in meters from the light to where it decreases in brightness to 0.25 lux — about the brightness of the full moon on a clear night.

\* For Browning lights with multiple settings, the Lumens, Battery Life and Distance are stated in the specifications at the highest setting (100% power), unless indicated otherwise.

TACTICAL HUNTER CONTROL POINT FLASHLIGHTS

**NEW**

The Browning Control Point is as powerful as any two battery light we've ever offered. This wonder combines the latest Luxeon® LED with a pair of 3V Lithium batteries and advanced electronics for a flashlight that outperforms all other flashlights in its class. In addition to tremendous light output and superior battery life, Control Point flashlights now offer five brightness levels to provide just the light you need (high [100%],

medium-high [80%], medium [60%], medium-low [35%], low [10%]) and three flashing modes (fast strobe, normal strobe and S.O.S.). A rotating selector switch on the tailcap controls the electronics and a tactical, push button on/off switch on the end of the light makes it easy to turn the light on in a momentary function. Try a Control Point and it is clear to see why this light outshines all the rest in the portable lighting market.

HI POWER FLASHLIGHTS

With great looks and the potential to squeeze every last drop of energy from a pair of common, easy-to-find AA alkaline batteries, our award winning Hi Power flashlights blend innovative technology with a striking appearance. The latest advancements in circuitry allow the AA-powered LED Hi Power to rival most lithium-powered lights for both lumen output and battery life. Protecting this leading-edge technology is a precision-

machined aluminum housing available with tough resin inlays or the same American walnut used for our firearms set into the grip for a great new look. The side located, push-button switch is simple to use and includes a lock-out to keep the switch from accidentally turning on. One thing is for certain, when it comes to looks, convenience, battery life and sheer lumen output, the Hi Power flashlight is sure to be the first light you reach for.

- All-aluminum construction with walnut or black resin handle inlays
- Latest generation Cree® XP-E LED is rated for 50,000 hours use
- High-low electronic switch with lock-out
- O-ring sealed for water resistance
- Includes lanyard and two AA batteries
- Length: 5.25"
- Brightness: 145 lumens
- Effective distance: 150 meters

**NITRO HEADLAMP**

Our brightest, most-powerful headlamp · Luxeon® Rebel LED shines 100 meters on high setting; plus two red and two green LEDs · Lock-out switch with settings for high and low · Unbreakable LEDs are rated for 100,000 hours use · CR123A battery operates to -40° F · Includes headstrap, or use with hat clip · Glass-fiber reinforced polycarbonate housing with aluminum lens ring · Silent Hinge™ for stealth · Brightness: 110 lumens · Effective distance: 100 meters

*Martin Buser and his Happy Trails Kennels sled dog teams have won the grueling 1,161 mile Iditarod Trail Sled Dog Race an impressive four times. Their 1997 victory still holds the course record for the fastest finish time. Martin has relied on the Browning Nitro headlamp since 2008 to steer his team through the darkest Alaskan nights. "I am always searching for durable, unique products to give me an edge. The long-reaching, focused beam of the Nitro stretches past 80 feet of the sled team and makes finding trail markers easier. The lithium batteries are great because they last longer and are less affected by the cold than alkaline batteries."*

— MARTIN BUSER

**ALPHA, ALPHA MAX AND ZETA FLASHLIGHTS**

Powerful Browning flashlights offer more illumination with innovative new LED bulbs that provide more lumens and make excellent use of battery life. Compact and powerful, these flashlights use standard AA alkaline batteries and fit easily in a pocket. A lock-out tailcap switch features a momentary function, and single-action on/off for simplicity and

maximum control. Rugged aircraft aluminum construction protects the high-tech circuitry and the LEDs. The Deep Pocket™ carry clip holds the light securely in your pocket where it's easy to find and is removable if it is not needed. Check out the latest innovations in handheld lighting technology, available from Browning.

TACTICAL HUNTER

HUNT MASTER

HUNT MASTER VXT

The new Hunt Master VXT features a powerful new green LED for maximum stealth and enhanced night vision. The new Cree® XP-C green LED is a bright 70 lumens — about 15 times more powerful than a standard 4-5 lumen green LED — to send the beam past 60 meters. Two Cree XP-E LEDs emit 225 lumens of clean white light. The VXT also features an adjustable spot-to-flood lens design and a memory feature that returns the light to the last setting you used.

- Powerful 70 lumen green LED
- Focusable lens for flawless spot beam
- Smaller than a 2D flashlight
- CR123A batteries operate to -40° F
- All-aluminum construction with unbreakable lens
- High-power LEDs are rated for 100,000 hours use
- Length: 6.6"
- Brightness: 225 lumens
- Effective distance: 100 meters

NEW

3711211

HUNT MASTER

With three Luxeon® Rebel LEDs and an awesome 300 lumen output, the Hunt Master is the brightest flashlight in the Browning line-up. The Hunt Master utilizes advanced circuitry to manage power from three CR123A batteries to leave larger, heavier flashlights in the dust. The Hunt Master also features an adjustable spot-to-flood lens design to focus light to your needs. Precision aluminum housing.

- Focusable lens for flawless spot beam
- Smaller than a 2D flashlight
- CR123A batteries operate to -40° F
- All-aluminum construction with unbreakable lens
- High-power LEDs are rated for 100,000 hours use
- Length: 6.6"
- Brightness: 300 lumens
- Effective distance: 150 meters

PRO HUNTER LED FLASHLIGHTS

PRO HUNTER FLASHLIGHTS

Pro Hunter flashlights feature long-running, powerful LEDs, rugged lightweight polymer bodies with rugged aluminum lens rings, and the very latest in circuit and switch design. The new Classic Pro and Twin Beam+ are among the most powerful lights in their class. Both sport a screaming Cree® XP-C LED for maximum lumens and distance. The Twin-Beam+ includes a new “Mean Green” LED rated at 70 lumens, and a new Soft-Sunshine LED for blood tracking. Affordable and easy to find AAA batteries are included with all models. A tactical-style lock-out end cap disables the switch to assure the light is not turned on accidentally. A carrying lanyard and ribbed body provide maximum grip in wet or cold weather. ANSI rated for water resistance. LEDs are rated for 50,000 to 100,000 hours and will not burn out under normal use.

RGB FLASHLIGHT

The Pro Hunter RGB features a pair of high-intensity LEDs for long distance, one wide view LED for maximum peripheral vision and one red-green-blue LED that enhances night vision and is stealthier around game animals. The RGB is a bright 40 lumens on the high setting. Black with matte aluminum lens ring. Three AAA alkaline batteries (included). All this, and the RGB is easy on your wallet too.

PRO HUNTER LED

The original Pro Hunter flashlight features unbreakable, long-running LEDs. The center 0.5W LED pushes 25 lumens out to 50 meters and two red and two green LEDs provide improved night vision and safety, and are stealthy around game animals. Dura-Touch® Armor Coating enhances grip in all conditions.

CLASSIC PRO

Pure power is what these lights are all about. The Classic Pro is rated at 100 lumens, out to 100 meters and beyond. A tactical end-cap switch with high, low and flashing settings is simple to use and includes a lock-out that disables the switch to protect the batteries. The Classic Pro is certain to become a favorite for performance, good looks and cost-efficiency.

TWIN BEAM+

With 100 lumens in the main beam, the new Twin Beam+ is the ultimate hunting flashlight. The main beam uses a Cree® XP-C LED to throw 100 lumens of light out to 100 meters. A new green Cree® XP-C LED emits 70 lumens — easily 15 times more powerful than other green LEDs that give off 4-5 lumens — for the maximum in stealthy brightness without disturbing the animals nearby. A new Soft-Sunshine LED limits glare for better up-close map reading and tracking. The light flashes in any setting (including green) by holding down the switch for 2 seconds. Memory feature returns to the most recent setting when you turn the light back on. Three AAA batteries are included.

- Ultra-light, ultra-tough polymer construction with rugged aluminum lens ring
- Textured non-slip body for secure grip in wet weather
- O-ring sealed for water-resistance
- Length - 5.1"

**PRO HUNTER HEADLAMPS**

Browning is proud to introduce a new line of powerful, rugged and sensibly-priced Pro Hunter headlamps for 2011. Each headlamp features the latest in LED technology and circuit design to give the brightest output and longest run times. The three common, inexpensive AAA Alkaline batteries used to power Pro Hunter headlamps are interchangeable with many other devices such as GPS and walkie-talkies. Durable lightweight polymer housings feature easy-to-use switch buttons. All headlamps tilt up and down to direct the light where needed, and come with adjustable, snug-fitting elastic headstraps.

**PRO HUNTER RGB HEADLAMP**

Based on the best-selling Pro Hunter RGB flashlight, the new RGB headlamp features the same extremely functional LED set with two high-intensity LEDs for long distance, a wide-view LED for maximum peripheral vision and one Red-Green-Blue LED. Colored LEDs enhance night vision and safety, and are more stealthy around game animals. Black front with charcoal accents.

**PRO HUNTER ESCAPE HEADLAMPS**

Escape headlamps feature three high-intensity LEDs for maximum brightness and long distances (up to 45 lumens and 40 meters) and one Soft-Sunlight LED for up-close lighting. The Soft-Sunlight LED is helpful when examining leaves, bark and grass at close distances for a blood trail, because it reduces glare and shadows. Also perfect for reading books and maps. Escape has three light settings, plus flashing. Maximum run time 32 hours. In Mossy Oak® camo patterns: Break-Up® Infinity™, Duck Blind® and Blaze®.

**PRO HUNTER MAXUS HEADLAMP WITH FOCUS-CONTROL**

Maxus is a versatile, technically-advanced, powerful headlamp worthy of the name. Zoom lever on front adjusts the focus of the main LED from spot to flood. Powerful Cree® LED sends 85 lumens to 80 meters or more. Three light levels (High, Medium, Low) and Flashing settings extend the maximum run time on Low to 24 hours. Memory switch returns to the most recent setting when you turn the light on. Plus two green and two red LEDs offer maximum stealth, safety and protect night vision. Black front with charcoal accents.

**NIGHT SEEKER RGB CAP LIGHT**

The Night Seeker™ RGB cap light features two white LEDs plus a cool RGB LED which shines first red, then green, then blue — all from a single LED — just by pushing the switch. Like other Night Seeker Lights, the RGB is made from lightweight polymer with an integrated clip that swivels to allow the light to be directed easily.

- Adjustable tilt allows the light to pivot up and down to aim the light where it is needed
- Two white LEDs for all-purpose use
- One RGB LED offers night vision, safety and stealth
- Wear on the brim of a cap, as a pocket light or on a pack strap
- LEDs are rated for 100,000 hours use
- Brightness: 15 lumens
- Effective distance: 20 meters

Night Seeker™  
**PRO** Cap Light

Cap lights are one of the best ideas ever, and we have the best executed designs available. Night Seeker™ cap lights are durably constructed from a lightweight polymer to keep weight to a minimum. An integrated clip swivels to allow the light to be directed easily. The unique clip is also highly versatile. In addition to attaching to the brim of a cap, the clip can be attached to your shirt pocket, backpack strap or folded out to allow the light to stand on its own.

**BUCK MARK 6D LANTERN**

There isn't a better camp lantern than the Buck Mark 6D. The light source is a replaceable fluorescent bulb which puts out 350 lumens for 12 hours, perfect for use around camp and general purpose lighting, or turn it on to the economy setting (140 lumens / 20 hours). The second light source is a 0.5 watt white LED that will run for 168 hours (7 days) when long-term lighting, such as in an emergency situation, is needed. The third light source is a pair of 5mm red LEDs that will run for 264 hours (11 days) for stealth lighting or reading a map and long-term use as a marker, a night light or hanging in the tent. The red LEDs can also be set to blinking mode in an emergency.

- Bright fluorescent and LED lantern
- Steady on and flashing modes
- Durable polymer and metal construction with rubber accents for durability
- Brightness: 350 lumens (Fluorescent)
- Height: 9.25"

## THE NEXT GENERATION OF WATERPROOF/BREATHABLE

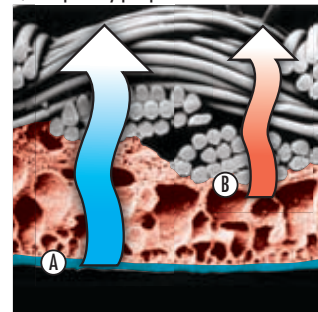

**NEW**

### NEW HMX BI-COMPONENT WATERPROOF BREATHABLE FABRIC TECHNOLOGY IS HERE

For 2011, Browning introduces new high performance, Bi-Component HMX waterproof and breathable fabrics. HMX is different because it combines the advantages of the two most widely used technologies. Hydrophilic Monolithic systems do not transport perspiration vapor, but only the liquid perspiration formed when the vapor condenses. Hydrophobic Microporous systems transport vapor, but do not transport condensed perspiration. By using a Bi-Component System we utilize the advantages of both technologies to move both water vapor and condensed water to the outside of the garment keeping you protected from internal moisture. At the same time, HMX totally prevents water entry from the outside. The revolutionary Bi-Component technology found in HMX fabrics provides the level of protection and comfort you have come to expect from Browning Technical Clothing, The Best There Is.

**HMX™**

A) Wicks moisture away.  
B) Pumps away perspiration.

BI-COMPONENT Waterproof breathable fabric  
(Shown magnified 300 times)

## STAY WARMER WITH NEW PRIMALOFT® SPORT INSULATION

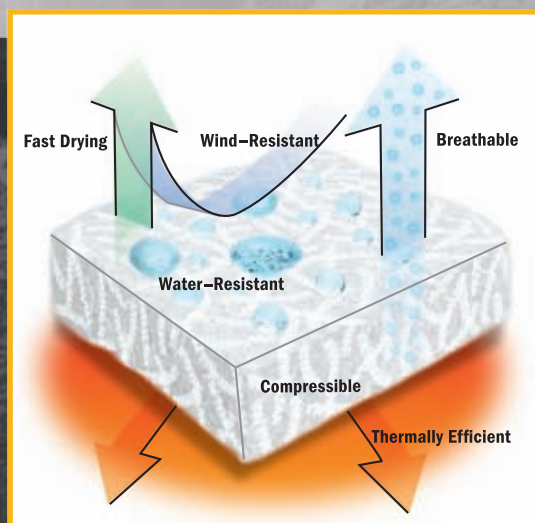

**PRIMALOFT®**  
sport

Being cold is a thing of the past with the addition of PrimaLoft® Sport insulation to the Browning Technical Clothing line-up. PrimaLoft Sport is a premium performance, fine-fiber, high-loft insulation engineered to keep you warmer, drier and more comfortable in extreme conditions — even if it gets wet. PrimaLoft is so good, it was chosen by the US Military with over 1,000,000 PrimaLoft military garments deployed in Iraq and Afghanistan.

**NEW**

### WHAT MAKES PRIMALOFT® SO GOOD?

- PrimaLoft® Sport is a premium performance insulation engineered for superior warmth, water resistance, loft, softness and compressibility.
- PrimaLoft fibers are the finest in the industry and are densely packed to retain heat better for improved thermal efficiency
- PrimaLoft fibers are specially treated to repel water molecules and absorb less water to make PrimaLoft more water-resistant and faster drying than other polyester insulations
- The tightly-compressed fibers make PrimaLoft highly wind-resistant
- The smaller, finer fibers compress more and are lighter, less bulky, more breathable and extremely compressible

# THE RETURN OF BROWNING® HYDRO-FLEECE — THE BEST THERE IS.

When Browning Hydro-Fleece was first introduced in 1993, it was a game changer, totally different than anything else in the hunting clothing market. Hydro-Fleece was the first truly technical outdoor gear offered in the hunting industry with the ideal combination of quiet, waterproof, windproof and breathable protection. Hunters clamored for it and Hydro-Fleece quickly became the standard by which all other hunting garments were compared to.

For 2011 we've put some new twists on this favorite with the re-introduction of Hydro-Fleece, now updated and better than ever to make it the go-to hunting clothing when you're looking for the ultimate in quiet, waterproof protection. Hydro-Fleece now includes innovative new technology that provides improved performance.

These innovations not only make new Browning Hydro-Fleece better than before, they make it better than anything else on the market. Now add fully-taped seams that reliably waterproof critical areas, gear-swallowing pockets, adjustable hoods and cuffs, sturdy zippers and a performance fit that won't restrict your range of motion. If you are seeking the ultimate technical hunting clothing, look no further than Hydro-Fleece from the most trusted name in the technical clothing business, Browning.

- New softer, quieter Hydro-Fleece fabric with an improved water shedding treatment on the fabric surface
- New HMX bi-component waterproof and breathable fabric for the ultimate in protection and comfort
- New insulated models feature ultra warm, quiet and lightweight PrimaLoft® Sport insulation that provides the highest warmth-to-weight ratio of any synthetic insulation
- Updated models and features including 2-layer and 3-layer soft shells.
- OdorSmart™ anti-microbial lining helps control the bacteria that causes human odors
- Mossy Oak® Break-Up® Infinity™ camouflage

**NEW**

## HYDRO-FLEECE — THE BEST IS BACK. AND BETTER THAN EVER.

**NEW**

2-layer Hydro-Fleece with PrimaLoft® Sport insulation models are the warmest hunting parkas, jackets and pants we offer. The combination of the loftier soft shell fabric and thermally efficient PrimaLoft insulation provide a level of protection and comfort never before possible. Four pieces are available including a parka and matching bib and a lighter weight jacket and pant. 3-layer Hydro-Fleece Soft Shell models add a new dimension with a form-fitting design to minimize weight and bulk. The 3-layer fabric features new Hydro-Fleece fabric on the outside with a smooth, fully-taped knit lining on the inside for ease of movement. Jacket and matching pant available.

### WHAT DOES IT MEAN TO BE WATERPROOF?

Here's what makes Browning waterproof and breathable clothing different from many of our competitors:

- **Waterproof fabrics:** HMX™ and Pre-Vent® fabrics have been specially created to meet our very high standards for waterproofness and breathability. Since shell fabrics are your first defense against the elements, we don't cut corners on quality.
- **Taped Seams:** Every seam is taped or we don't call it "waterproof." End of story. We are very involved in developing the correct tape and using only manufacturers who have years of experience taping garments.
- **Construction:** Browning waterproof garments are designed and constructed to resist water entry at all closures including cuffs, hoods, pockets and zippers. The Browning name is your assurance that corners are not cut for the sake of cost. When you see the HMX or Pre-Vent labels in Browning garments you know you can rely on them to perform to the highest standards.

**TRANSITIONS — AWARD WINNING PROTECTION**

Since its introduction in 2008, the Browning Transitions series has won two prestigious awards for design excellence and performance in the field: “Best of the Best” from *Field and Stream* and the “Award of Excellence” from *Sporting Classics*. We are proud of these accomplishments, but we won't sit back on our laurels. We have overhauled many Transitions models for 2011 to keep them on the leading edge of performance, plus we've added new models that bring even more versatility and excitement to the line.

For 2011, all waterproof, breathable models in the Protection Layer feature HMX™ bi-component fabrics for extreme waterproofness and high breathability for maximum comfort. We have also added a new PrimaLoft Liner Jacket to the insulation category for a new dimension of warmth in the Insulation Layer. The great layering concept represented by the Transitions models continue to make it one of the most versatile apparel assortments available by combining Base, Insulation and Protection layers, all utilizing leading-edge technology.

**BASE layer**

Base layers wick perspiration away from the skin and keep you warm and dry, not cold and clammy, even when moving. Anti-microbial technology is added to Big Game garments to control the growth of odor-causing bacteria to reduce human odor.

**INSULATION layer**

Insulation layers are available to meet specific needs based on weather conditions and activity level. In dry weather, Layer 2 garments make excellent outer pieces. Choose from down or PrimaLoft® models.

**PROTECTION layer**

The Protection layer is the first line of defense against wind, rain and snow. Layer 3 garments are designed to maximize protection with minimal bulk. Choose one of several styles featuring new HMX™ or WindKill™ models.

### NTS PRO BASE LAYER — A SOLID FOUNDATION FOR WARMTH.

Featuring VisaEndurance® anti-microbial fabric, NTS (Next To Skin) Pro Base Layer gear with OdorSmart™ technology is designed to provide advanced odor control. OdorSmart features patented encapsulated silver ion technology that inhibits the growth of odor-causing bacteria to help prevent body odors. Encapsulated silver ions work for the life of the garment, with no loss of effectiveness even after repeated washings. The wicking fabric effectively transports moisture away from the body where it quickly evaporates to keep you dry and comfortable. A lighter weight fabric under the arm enhances breathability. NTS is a solid foundation for controlling human odor and maintaining comfort on your next adventure.

**COMFORT FLEECE — WARMTH ANYTIME.**

Designed as a base layer, Comfort Fleece is so soft and warm you'll want to wear it while lounging at home. The lightweight, 200 gram fleece offers a tremendous amount of warmth with minimal bulk and breathes like it has its own set of lungs. The mock neck top snugs up to seal in heat, and the bottoms have a tapered fit with stirrups to keep them in place when putting on waders. Make Comfort Fleece your foundation layer for protection from the cold.

**PRIMALOFT® — WARMER, DRIER, SOFTER.**

Looks can be deceiving. At first glance the new Browning PrimaLoft® Liner Jacket is just another insulated jacket. In reality, it is much more. The combination of superfine PrimaLoft® Sport insulation and highly-constructed shell and lining fabrics provide unbelievable warmth with minimal weight or bulk. Unlike down, PrimaLoft® Sport continues to insulate even when wet, and dries incredibly fast. When you layer it under a waterproof shell, it offers incredible protection from cold, wet weather. Because of its lightweight comfort and warmth, you may find yourself wearing it alone in less demanding weather. Zip-off sleeves quickly convert the jacket into a vest for greater versatility. Jacket stuffs into the chest pocket.

**PRIMALOFT® LINER JACKET WITH ZIP-OFF SLEEVES**

**ILLUSION — PURSUING PERFECTION.**

Illusion combines the ruggedness, quietness and comfort of a soft shell with our new HMX™ bi-component waterproof, breathable fabric for the ultimate in hunting gear. Every seam has been sealed with matching 3-layer tape to make Illusion models truly waterproof for reliability and protection in the nasty conditions you often hunt in. OdorSmart™ anti-microbial treatment keeps human scent to a minimum. The form-fitting jacket minimizes bulk and weight and is backpack friendly, allowing you to access the pockets when wearing a pack. The pant moves easily with you, making it ideal for stalking game.

**WHAT DOES IT MEAN TO BE WINDPROOF?**

This is what you should know about Browning windproof clothing that makes us different:

- WindKill™ clothing is made from laminated fabric that blocks the passage of wind through the fabric while breathing away perspiration.
- Browning windproof clothing is designed and constructed to prevent wind from sneaking in through cuffs, zippers and hoods. This combination of laminated fabric and design features ensures our clothing is totally windproof, not just wind-resistant.

## MAXUS JACKET. THE FINEST WATERFOWL GEAR AVAILABLE.

For 2011 the Maxus jacket has been redesigned with even more features like our revolutionary new HMX™ fabric that provides maximum waterproof protection while transferring perspiration buildup to the outside where it can evaporate. As a stand-alone jacket, it provides protection from rain, sleet and snow with ease. In colder weather it can be layered over a fleece, down or PrimaLoft® liner jacket for insulation from the cold and elements. The lightweight, rugged 3-layer soft shell fabric resists the pokes and sticks with minimal weight. All seams are taped using 3-layer tape to insure total 100% waterproof protection. Serious waterfowlers will appreciate all the features that make this the ultimate waterfowl jacket.

**ADDHEAT – TURN IT ON AND GET HEATED UP!**

The new AddHeat Soft Shell Jacket and Vest take heating technology to the next level of performance. The new 2-layer soft shell fabric features a mesh lining with OdorSmart™ anti-microbial technology to help control human odor. The jacket features three individual heating panels for maximum warmth, while the vest has one heating panel to maximize battery life. Either piece functions as an insulating mid-layer, or as an outer layer in less demanding weather.

For 2011 we have also trimmed away excess weight and bulk by combining the compact, rechargeable Li-ion battery pack with the control module into a single unit. The battery pack/control module is sold separately, so you may purchase a single battery pack/control module to use with both AddHeat garments without having a separate AddHeat System for each. The AddHeat System still provides up to 5.5 hours of continuous heat and is controlled by a simple-to-use “intelligent” Micro-CPU controller and 110-220 VAC charger or with an optional 12VDC vehicle charger. Care of an AddHeat garment is simple. Just remove the battery pack/control module and hand wash and line dry the garment as often as necessary. No worries and no hassles.

**Note that the battery pack/control module is not included with AddHeat garments and must be purchased separately.**

XTENDED PERFORMANCE OUTERWEAR

**XPO — EXCEPTIONAL COMFORT AND PERFORMANCE.**

Browning XPO (eXtended Performance Outerwear) is designed to be affordable, tough, comfortable and functional in all types of weather conditions. XPO features Pre-Vent®, a waterproof, windproof, breathable laminate that ensures protection from the most severe conditions you are likely to encounter in the field, yet remains breathable to let perspiration escape. Importantly, Pre-Vent does all this at a very competitive price, without skimping on other features that matter like abundant pockets, quality zippers and rugged construction.

HELL'S CANYON FULL THROTTLE — GO TOP SPEED.

Lighter weight Hell's Canyon Full Throttle gear brings a level of performance to your hunt with a 2-layer fabric featuring a rugged water- and wind-resistant woven outer shell bonded to moisture-wicking OdorSmart™ featherweight fleece on the inside. Because there is no lamination layer, there is less resistance to airflow through the fabric for increased breathability. You will stay dry and comfortable in warmer weather and higher activity levels as perspiration is quickly moved away from your body. Crank up the intensity of your next hunt with Hell's Canyon Full Throttle.

HELL'S CANYON FULL THROTTLE JACKET

Woven 2-layer bonded fabric is highly water- and wind-resistant and extremely breathable

### XPO GRAND PASSAGE LAYOUT BIB

The specialized Grand Passage Layout Bib has features specifically designed to maximize your comfort in the layout blind. The bib is highlighted by a waterproof, breathable Pre-Vent® laminate and is uninsulated, yet easily layered, for multi-season versatility. The back of the bib is double-padded to increase comfort and protection from the ice-cold ground. An oversize bellows pocket on the chest keeps oft needed gear at the ready and a pass-through handwarmer pocket keeps your hands warm and dry.

**WING-SET JACKET—  
RUGGED PERFORMANCE FOR RUGGED CONDITIONS.**

Weighing a mere 26 oz., the rugged soft shell Wing-Set jacket provides heavyweight protection from gouging sticks, thorns and the paws of an excited retriever. The rugged 3-layer fabric combines a rugged nylon outer shell, waterproof, windproof and breathable Pre-Vent® lamination plus a soft inner fleece layer to provide warmth and protection over a wide range of conditions. Unlike other soft shell jackets that only claim to be waterproof, the Wing-Set jacket truly is, with external taping on every seam. Freedom sleeve construction and articulated elbows allow you unrestricted movement to swing and follow through on fast flying birds. Discover how comfortable hunting can be with the lightweight, minimal bulk and mega protection of the Wing-Set jacket.

**WINDKILL & WARM FRONT — VERSATILE PROTECTION.**

Chilly mornings often become sunny and warm afternoons that require a versatile mid-layer. WindKill outerwear features a fleece lining and a highly wind- and water-resistant outer shell, making it perfect as an insulation layer on cold days or an outer layer on blustery days. Lightweight Warm Front layers are ideal in drier, cooler weather. These protective shells are easily worn over additional layers to fend off the wind and light rain or snow.

### 4X MICROFLEECE — THE RIGHT FLEECE.

4X Microfleece has four times the wind resistance of regular fleece. It is ideal for nearly all hunting situations. Under fair skies, in warmer temperatures, 4X adds just the right amount of insulation and wind protection. When layered underneath a waterproof parka, it offers excellent insulating performance with little bulk.

### SANTA FE DOWN — HEAVY DUTY WARMTH.

Santa Fe down jackets are designed to withstand the use and abuse that might destroy a lesser down garment. The heavy-duty, highly-constructed Repel-Tex™ fabric is treated with a revolutionary new wax finish that sheds water and makes Santa Fe jackets extremely water-resistant. This new treatment adheres to the jacket significantly better than traditional waxing and remains unchanged over time and multiple washings. Santa Fe jackets are also cut longer to give you additional protection from the cold. Knit cuffs seal out drafts. Check out the next generation of down with new Santa Fe jackets.

#### SANTA FE DOWN JACKET

Water- and wind-resistant Repel-Tex™ shell fabric · 650 fill-power goose down insulation · Downproof nylon lining · Full-length front zipper flap · Fleece-lined, down-filled zip-through collar · Drawcord adjustable bottom · Two lower slash pockets and single inside pocket with zippered closure · Knit cuffs · Sizes: S-3XL

**FULL CURL WOOL — THE EVOLUTION OF NATURE'S MOST FUNCTIONAL FABRIC.**

First there was wool, supremely versatile yet itchy. Then came non-itch wool blends that were just as versatile but more comfortable to wear. Now, we have taken wool to an even higher level with Full Curl Wool, and this wonder fabric has never been more comfortable and effective against the elements. Full Curl combines a durable 7 oz. wool blend outer fabric a new WindKill™ windproof and water-resistant lamination and soft tricot lining for the ultimate wool fabrication. Fleece side panels are added to increase breathability. The 3-in-1 Parka relies upon another of nature's wonders — goose down — to provide insulation in the removable liner. The rugged, time-honored performance of wool makes the new Full Curl ideal for nearly all conditions, terrains and activity levels.

**HIGHLANDS II — THE BEST GETS BETTER.**

The insulating advantages of wool in cold, wet weather are well known. For time-proven performance combined with today's technology, look to Browning's Highlands II wool. Highlands II offers additional versatility by taking a wool blend and adding a soft tricot lining for extra warmth and comfort, without the itch usually associated with wool. These versatile products are also machine washable. 11 oz. wool blend makes up the parka and bib, offering the same rugged performance in cold weather. The shirt and pant feature lighter weight 7 oz. wool blend to increase their versatility in warmer temperatures and as layering pieces. There is no substitute for the performance of Highlands II wool.

**PHEASANTS FOREVER — JOIN THE CAUSE.**

Without the conservation efforts of Pheasants Forever, millions of acres of prime pheasant habitat would be lost. Pheasants Forever chapters all over the United States work to protect, restore and enhance wildlife habitat by establishing and maintaining local and regional projects. From encouraging farmers to leave longer wheat stubble, to the purchase of upland habitat land, Pheasants Forever continues to work to preserve America's favorite game bird. To become a member or volunteer, please call toll free (877) 773-2070. With every purchase of a Browning Pheasants Forever product, Browning proudly makes a contribution to this most worthy conservation organization.

# Bird'n Lite®

WIDE NYLON SHOULDER STRAPS TRANSFER THE LOAD TO YOUR SHOULDERS, YET STILL LET YOU SWING THROUGH THE BIRD NATURALLY

THE QUICK-RELEASE STERNUM STRAP HELPS KEEP THE WEIGHT CENTERED BETWEEN YOUR SHOULDERS FOR IMPROVED BALANCE AND LESS FATIGUE

## BIRD'N LITE — WHERE TRADITION AND INNOVATION COME TOGETHER.

Upland hunters are immersed in tradition. It's all about being afield with a good dog, a well-traveled Citori® and feeling the heft of shells and birds swinging in your favorite vest. Now's the time to upgrade your upland gear and check out Browning's new Bird'n Lite series. Bird'n Lite jackets and vests feature an integrated load-bearing system that lifts the load higher and balances it between your shoulders and hips for more comfort and stability, all without sacrificing the look of traditional upland hunting gear. With Bird'n Lite, you can carry more, with less effort, for far longer than you would ever have wanted to with your old hunting vest. Start a new tradition with Browning's new Bird'n Lite jackets and vests.

THE FULLY-ADJUSTABLE SIDE STRAPS LET YOU PLACE YOUR LOAD'S CENTER OF GRAVITY WHERE IT'S MOST COMFORTABLE TO CARRY

ERGONOMICALLY-CONTOURED, PADDED ADJUSTABLE WAIST BELT OFFERS ADDED SUPPORT TO YOUR LOWER BACK AND ALLOWS PART OF THE LOAD TO BE CARRIED ON YOUR HIPS FOR GREATER COMFORT

QUICK-RELEASE COMPOSITE BUCKLE ALLOWS FOR QUICK ON AND OFF, BOTH AT THE TRUCK OR IN THE FIELD

**BIRD'N LITE JACKET— YOU'LL NEVER GO AFIELD WITHOUT IT.**

Now you can have the best of both worlds - a state-of-the-art load carrying system built right into a traditional looking jacket you'll be proud to wear afield. Bird'n Lite jackets lift your load higher and let you select the ideal balance point between your shoulders and hips for both comfort and stability. The blaze orange shoulder and sleeve overlays let other hunters know exactly where you are, while the traditional khaki body helps hide the smudges and scuffs that are part of every upland hunt. The blood proof game bag is easy to access, and there are pockets galore for every item you might want to take into the field. When you're ready to load up and move out on your next upland hunt, you're ready for a Browning Bird'n Lite jacket.

## BIRD'N LITE VEST — THE FINEST FOR THE FIELD.

If covering miles of open ground laden with shells, birds, water, lunch, a jacket, training transmitters and all the sundry items you need in the field make you think you need a backpack instead of an upland vest, take a gander at the new Browning Bird'n Lite Strap Vest. This innovative vest utilizes the patented Bird'n Lite Technology load bearing system that secures and distributes the weight of heavy loads, making walking all those miles much more comfortable. Gone are the days of heavy, swinging game bags, picking wet feathers off of your water bottle and rubbing sore shoulders. Hitch up a Bird'n Lite Strap Vest and enjoy hunting all over hill and dale.

**BIRD'N LITE VEST AND PANT — COMPLETE YOUR HUNTING OUTFIT.**

Complete your ensemble with the Bird'n Lite Vest and Pant. The vest offers all the latest Bird'n Lite features in a comfortable, more traditionally-styled upland bird vest. The pants have a relaxed fit for all-day comfort and are constructed of rugged poly/cotton twill with briar-resistant nylon overlays front and back. A zipper fly and snap-button flaps on the rear pockets make them perfect pair of pants for upland game. Both the Bird'n Lite Vest and Pant are available with Pheasants Forever embroidery.

A ▶ Reactar™ G2 Pad

**NEW REACTAR™ G2 PAD— NOW WITH IMPACT GEL™ FOR BETTER PERFORMANCE.**

Shooting all day can take a heavy toll on your shoulder. Take the sting out of shooting with the REACTAR G2 pad. Our newest REACTAR G2 pad features a totally new, ultra-flexible recoil absorption material called Impact Gel™ that absorbs recoil forces better than any other pad on the market. Most amazingly, the REACTAR G2 pad with Impact Gel performs so well at a thickness of only 8mm, it won't change your length of pull or affect your point of aim. To reap the benefits of greater comfort and less fatigue, try a new Made in the USA REACTAR G2 Pad today.

**REACTAR PAD G2 AND SHOOTING HARNESS**

**REACTAR Shooting Pad:** Browning's exclusive REACTAR™ pad (Recoil ACTION ARrestor) absorbs recoil on the inside of vest, jacket or shirt without altering appearance or increasing length of pull  
 · Uses patented, environmentally-friendly Impact Gel™ which reduces peak recoil · Only 8 mm thick  
 · Lightweight · Flexible to form to the body · Dimensions: 3¾" W x 7" L

**Harness:** Updated for better fit · Includes REACTAR pad · Heavy-duty 500 denier Cordura® · Reversible for use by right- or left-handed shooters · Elastic strap with buckle size adjustment · Sizes: One size fits most

B ▶ Reactar™ Shooting Harness

C ▶ Reactar™ Shoulder Saver Shirt

*"There is no better endurance test on shooting gear than an Argentina dove hunt. After 3,300 shells fired in just three short days, I found Browning's new REACTAR Shirt really performs. It's comfortable to wear, the pad is soft and molds right to your shoulder. The generous pad is oversized to cover a larger area on your shoulder so you are protected no matter where you shoulder your gun. The pad is thin enough that it doesn't affect mounting the gun or the length of pull. Best of all, I had no bruising or soreness. It's a must-have for anybody planning a full day of shooting, and it lives up to our motto, The Best There Is." — Rafe Nielsen, Browning Product Manager*

DUSTY MESH VESTS — STAY COOL.

When temperatures soar and the competition heats up, keep your cool in a new Browning Dusty Mesh Vest. Constructed from lightweight polyester mesh and cotton stonewash twill, the Dusty Mesh Vest lets air circulate over your torso to evaporate perspiration, making you more comfortable and helping keep your mind on the clays. Large front pockets hold your shells and the large rear pocket gives you a place to carry those valuable empties. REACTAR™ pad (pad not included) pockets sit behind both shoulders so you can enjoy added recoil control as another feature of your soon to be favorite shooting vest.

**SAFETY BLAZE CAPS — A SMART CHOICE IN THE FIELD.**

A little visibility goes a long way, and wearing a Blaze cap in the field is a good idea. When upland hunting, a Blaze cap helps communicate to your hunting partners where you are in a corn field or tall grass. When big game hunting, Blaze lets other hunters see you from hundreds of yards away. But don't think for a second that a Blaze cap has to be boring. Browning offers several styles of Blaze caps that are both highly visible and look cool enough to wear to the mall and make it easier for your significant other to find you there, too.

Claymaster

# BROWNING PRO STAFF

**RICK CAMUGLIA** is a long-time Browning shooter with multiple sporting clays titles, nearly all won with Browning autoloading shotguns. A short list of his victories includes multiple National and Regional FITASC Championships, nine-time New Mexico State Champion, two-time HOA Arizona State Champion and two-time HOA Colorado State Champion. He is also an eight-time NSCA All-American Team member. Rick prefers to shoot the new Maxus® autoloader.

**ANDY DUFFY** is the only shooter to win three NSCA National Championships with back-to-back wins in 1994 and 1995. He has been on the NSCA All American Team 17 times, Team USA 20 times and won more world, national and local sporting clays championship titles than he can shake a stick at. In 2005, he was honored by being inducted into the NSCA Hall-of-Fame. When Andy isn't dusting clays with his Citori®, you will find him instructing others in the ways of shotgunning.

**MATT HUGHES** is a nine-time UFC® World Welterweight Champion and was inducted into the UFC Hall of Fame in 2010. Matt's toughness and work ethic are legendary in the UFC, something he attributes to growing up on a farm in rural Illinois. Matt spent a good portion of his early years hunting and shooting — passions that have never left him. Matt is now the frontman for Browning's Double Barrel Militia.

**JOHNNY MEITZEN** started shooting competitively in 1987 and is currently a NSCA Level III instructor. He has won a number of shooting titles including two-time NSCA Nationals Vet Champion and two-time NSCA Nationals FITASC Vet Champion. Johnny is a six-time All-American Sporting Team member, two-time Team USA Sporting member and two-time Team USA FITASC member. He also has many state and zone championship titles to his credit. Johnny is a die-hard Citori® man. His current model of choice is the Citori 625 Sporting.

**DEEANN MASSEY** was introduced to sporting clays shooting by her husband Jeff, who taught her to shoot in their backyard. She shot in her first tournament in the summer of 1996. In 1997, ten days before the Sporting Clays National Championship, she purchased her first 12 gauge Browning Gold. She used the Gold to tie for Ladies High Overall. Since then she has won two National Championships and has been a five-time runner-up. She has been on the 1st All American Team twelve times and Team USA seven times. She has also won the Michigan State Ladies Championship twelve times, the Zone Three Ladies Championship ten times and has numerous other wins in local and regional competition. She has been a member of the Browning Pro Staff Team for twelve years. DeeAnn currently shoots the Cynergy® over and under.

# BROWNING PRO STAFF

**ROBBIE PURSER** started shooting skeet at the tender age of six. Over the years he has accumulated an impressive list of shooting titles including 1980 World Skeet Champion, 1991 and 1998 NSCA Champion, Zone 4 Champion, Quail Unlimited Champion, four-time Ducks Unlimited Champion, 2002 Sportsman Team Challenge Champion and an ESPN Great Outdoor Games gold medalist. He is also a twelve-time All-American Team member, a member of Team USA and a ten-time Georgia State Champion. All told, Robbie has more than 200 tournament wins to his credit — all with Browning autoloaders.

**FRED ZINK** is the newest Browning Pro Staff member. Fred founded Zink Calls™ in 2001 primarily to fulfill the needs of waterfowlers and professional callers who demanded high-end calls. A nationally-recognized goose caller in his own right, Zink's business continues to grow and set new standards in the call industry. Zink's high-octane 24/7 DVD series is designed to speak to hunters with exciting footage that shares the hunting experience with the viewers. In 2011, look for Fred to be shooting the Browning Maxus® as he continues his quest to bring new hunters into the sport and grow the outdoor industry.

**BRODY SIKES** is a rising star on the clay target scene, recently winning the 2010 North American Grand Prix FITASC event at Claythorne Lodge. Just 20 years old, Brody shoots a Browning Citori® for clay targets and a Silver® in the blind. A product of the popular SCTP development program, Brody and his Citori will be in the winner's circle for years to come.

When **ZAC COOPER** was born, his parents decided that instead of giving up hunting for a while, they would adapt to new ways of hunting. And at four months of age, Zac was on a plane to Iowa for a whitetail hunt. He took his first two deer at age five, and hunting has since become a way of life for Zac. Now thirteen, Zac has gained national recognition for his speaking ability. He has been a guest speaker at such events as the 2009 QDMA National Convention, the University of Florida's Field Day, the Sportsman's Spectacular, and Florida's National Field Day. Zac is also a leader in school, serving in student government while maintaining straight-A grades. Zac has two long-term goals: To be a positive influence on today's youth and to help get them into the sport of hunting. See him in his debut hunting DVD titled "Little Man, Big Dreams."

**STEPHEN LE BLANC** is a man of many talents. He has a degree in wildlife biology, is a master taxidermist, an award-winning wildlife sculptor and an avid hunter. His impressive list of talents, coupled with an easy going, personable demeanor made him the perfect candidate to host our new television program "Browning Expeditions." His impressive hunting résumé includes a North American Grand Slam of sheep and the Africa Big Five that consists of elephant, white rhino, cape buffalo, lion and leopard.

**KRISTY LEE COOK** brought her amazing voice to the TV screen on the 9th season of "American Idol®." Now Kristy is a rising country music singer and hosts the Browning-sponsored TV show "Goin' Country." Kristy's husband Andy introduced her to hunting and she has since become a fanatic. Kristy possesses an infectious passion for everything she does, whether it is performing, hunting or saving horses through the Kristy Lee Horse Heaven Foundation.

Vehicles are shown with optional equipment. Warning: ATVs can be hazardous to operate. For your safety, avoid operating Polaris ATVs or RANGERS on paved surfaces or public roads. Riders and passengers should always wear helmets, eye protection, protective clothing, and seat belts (on RANGEH vehicles). Never carry passengers unless the vehicle has been designed by the manufacturer for that purpose. Polaris adult ATV models are for riders aged 16 and older. Drivers of RANGEH vehicles must be at least 16 years old with a valid driver's license. All ATV riders should take a safety training course. For ATV safety and training information in the U.S., call the SVIA at (800) 697-2697, see your dealer, or call Polaris at (800) 342-3764. In Canada, see your local Polaris dealer about Polaris ATVs. Check your local laws before riding on trails. ©2010 Polaris Industries Inc.

**BE A SAFE SHOOTER** Read and follow all safety information in the owner's manual provided with each firearm before using the firearm. Additional copies are available for free download on the Browning website. Browning endeavors to make the safest firearms possible, however, firearm safety begins with you. At all times treat any firearm with intense respect for its power and potential danger. Always point the muzzle in a safe direction. There is no excuse for careless or abusive handling of any firearm.

**BROWNING IS COMMITTED TO SERVING YOU** Every effort has been made to ensure that all product photographs, descriptions and specifications in this workbook are accurate; however, inadvertent errors may occur. Changes in design or materials due to our continual effort to improve products may result in specification changes before subsequent publications are issued. Browning reserves the right to modify or change specifications without notice. If you have any questions regarding Browning products, please write to Browning, One Browning Place, Morgan, UT 84050-9326.
