TOTAL BARREL DYNAMICS — FROM EXPERIMENTATION TO SCIENCE

- Our engineers have fired literally millions of shells in order to improve the relationship between the shotgun barrel and shotshell. What began as experiments have become the science of shot pattern performance.
- Extensive testing has shown that shot is deformed as it passes through the restrictions of the forcing cone, a tight bore and the choke tube. When shot is deformed it is less stable in flight, leading to flyers and holes in patterns. Our Vector Pro lengthened forcing cone is designed to reduce stress on the shot column, and Back-Bored Technology allows the shot column to exit the barrel at maximum velocity. Our proven choke tube technologies further minimize the stress placed on the shot as it exits the barrel while constricting it to the pattern you need. Other manufacturers use shorter forcing cones that smash the shot, a bore that is too tight or loose, and shorter choke tubes that result in inferior pattern performance.
- Total Barrel Dynamics — standard on A5, Maxus, BT-99 and on 12 and 20 gauge Citori and Cynergy models — is a system of technologies that function together to reduce shot deformation and significantly improve pattern consistency and performance. Each component of Total Barrel Dynamics plays a part in keeping shot patterns whole and pellets on target, and to ignore a single part weakens performance.

CHAMBER

FEATHER TECHNOLOGY

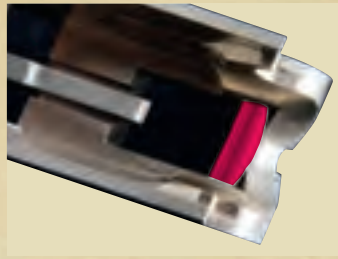

HEAVY DUTY, LIGHT WEIGHT

- Feather technology significantly reduces the weight of an over and under shotgun (about one pound) by using a high quality alloy for the receiver rather than steel.
- To maintain maximum durability, the breech face is a dovetailed steel insert.
- Citori models also use a full-width steel hinge pin and Cynergy shotguns feature steel MonoLock Hinge surfaces.

STEEL BREECH FACE

All Feather models feature a steel breech face that resists wear, allowing the receiver to be built from weight-saving alloy.

CITORI STEEL HINGE PIN

The full-width, steel hinge pin in the Citori provides maximum strength and lasting endurance.

CYNERGY STEEL INSERTS

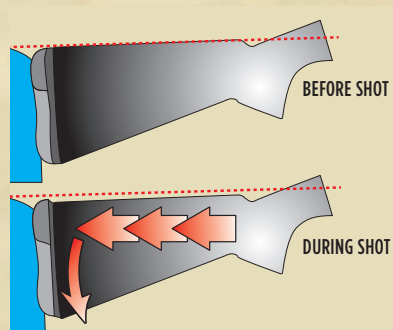

To ensure longevity, steel inserts are added to the MonoLock Hinge.

RECOIL REDUCTION TECHNOLOGIES

INFLEX TECHNOLOGY RECOIL PAD

- Inflex recoil pads incorporate directional deflection construction that guides the comb down and away from your face, reducing felt recoil for greater shooting comfort and faster, more accurate follow-up shots.
- The Inflex recoil pads are made from a soft material for the best recoil absorbing performance available.

FOR SMALLER SHOOTERS

MICRO MIDAS FIREARMS

- Micro Midas firearms are specifically designed to give younger or smaller shooters a high quality, great fitting firearm.
- Micro Midas firearms are constructed with the same quality components and attention to detail as all Browning firearms.

BROWNING GROWTH INSURANCE PROGRAM

- Micro and Micro Midas models are eligible for the Growth Insurance Program that allows new owners to purchase a full-size stock at 50% off the retail price.
- Growth Insurance allows Micro and Micro Midas firearms to grow with the shooter.
- Offers you a higher rate of return on your firearm investment.
- Visit browning.com for complete details.

STOCK FINISHES

MAXIMUM GRIP

- Dura-Touch Armor Coating is extremely durable.
- Improves grip in wet and cold conditions.

DURA-TOUCH®
Armor Coating

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

TOTAL BARREL DYNAMICS

VECTOR PRO™

LONGER IS BETTER. THE ADVANTAGES OF A LENGTHENED FORCING CONE

- The forcing cone is the tapered transition between the chamber and the bore that constricts the shot column. The longer the forcing cone is, the more gradual the constriction.
- A gradual constriction reduces stress on the shot column as it passes into the bore, resulting in fewer deformed pellets. Less pellet deformation produces more uniform patterns and keeps more pellets in the central part of the pattern.
- Vector Pro is better than the competitors' forcing cone designs because of the more gradual constriction.
- Lengthening forcing cones is a popular aftermarket practice done to increase shot pattern performance. But it comes standard on A5, Maxus, BT-99 and on 12 and 20 gauge Citori and Cynergy models.

STANDARD INVECTOR™

STANDARD INVECTOR™

PATTERN VERSATILITY FOR 10 GA., 16 GA., 28 GA. AND .410 BORE SHOTGUNS

- The Standard Invector interchangeable choke tube system offers consistent, dense shot patterns with the constriction needed for the shooting situation.
- Threads on the breech end help prevent gases from slipping between the choke tube and barrel that could damage the choke tube and the barrel.
- Standard Invector is standard on 10, 16 and 28 gauge, and .410 bore Citori, Cynergy, Gold and BPS models.
- See pages 161 through 164 for a complete listing of choke tubes.

BACK-BORED TECHNOLOGY

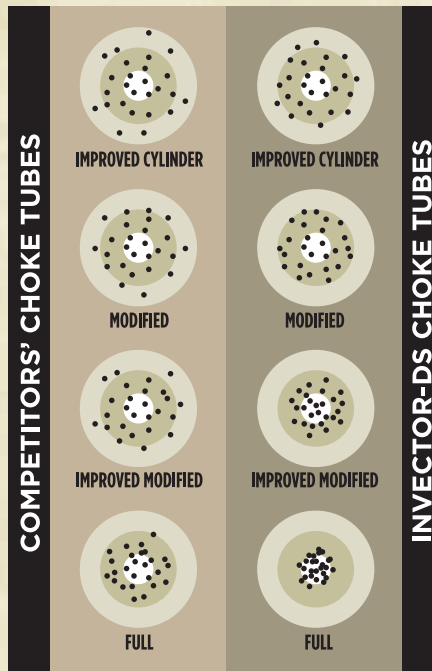

WHAT IS BACK-BORING?

- Back-boring enlarges the bore to the maximum diameter to increase shot velocity, minimize pellet deformity for more uniform patterns and reduce felt recoil.
- Extensive testing has shown that Back-Bored Technology reduces the friction between the shot cup and the bore, but does not allow gases to slip past the shot cup that would result in reduced pellet velocity and blown patterns.
- Back-Bore Technology specifications minimize shot deformation and maximize pattern uniformity, consistency and density. Back-Bored Technology is standard on A5, Maxus, BT-99 and on 12 and 20 gauge Citori, Cynergy, BPS and Silver models.

INVECTOR-DS

TAKING CHOKE TUBES TO THE MAX

- Invector-DS choke tubes combine muzzle-end threads and thin-wall construction for a longer, more gradually tapered choke tube.
- From Cylinder to Extra Full, Invector-DS shot patterns tighten consistently in reliable, evenly scaled steps.
- The longer choke taper produces extremely consistent, dense shot patterns.
- Muzzle threads minimize the flare at the end of the barrel for improved shotgun appearance. A slightly lighter overall barrel weight is achieved for faster swinging and improved balance.
- The more gradual taper of Invector-DS choke tubes reduce shot deformation for fewer flyers and gaps in the pattern and allows higher shot velocities for hard hitting performance.
- The "DS" stands for double-seal. Our proprietary differential-banded brass seal compresses against the barrel wall to keep the choke tube threads clean and make installation and removal easier than any other muzzle thread system.
- Invector-DS is standard on A5 and Citori 725 models.
- View the full line of Invector-DS choke tubes on page 163.

INVECTOR-DS CHOKE TUBES VS. COMPETITORS' CHOKE TUBES

Invector-DS tubes have even pattern percentage increments, offering just the right pattern for any shooting situation.

Competitors' choke tubes show little pattern difference between choke constrictions.

INVECTOR-PLUS™

CHAMPIONSHIP PROVEN PERFORMANCE

- Invector-Plus started the long choke tube revolution. An ever-growing collection of championship medals is proof of its patterning performance.
- The Invector-Plus choke tube system works with Vector Pro and Back-Bored Technology to offer consistent, dense shot patterns with the constriction needed for the shooting situation.
- The long choke taper inside an Invector-Plus choke tube produces consistent patterns with more uniform densities and fewer flyers.
- Threads on the breech end help prevent gases from slipping between the choke tube and barrel that could damage the choke tube and the barrel.
- Invector-Plus is standard on 12 and 20 gauge Maxus, Citori, Cynergy, Silver, BPS and BT-99 models.

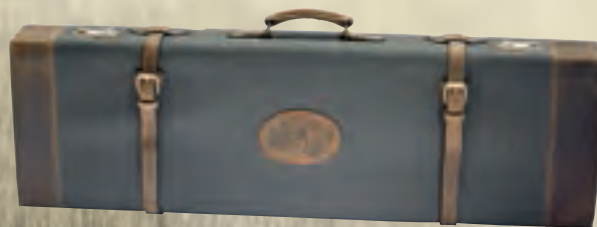

THE BROWNING HIGH GRADE PROGRAM — YEAR TWO.

The Browning High Grade Program moves into its second year with a pair of full sideplate Citori over and unders. The extended sideplates create a larger palette that is perfect for additional embellishment by our highly skilled engravers. Sharply checkered, finely finished high-grade wood is hand fit to the case colored receiver. These limited production guns may look like art but make no mistake, the same quality and attention to detail that goes into the outside is also evident on the inside, making these rugged shotguns heirlooms for generations to come. A combined total of up to 500 of these High Grade firearms will be produced.

NEW

NEW

High Grade Canvas/Crazy Horse Leather case included with the Citori Grade VI. See page 129 for case specifications.

Molded ABS case with rugged combination lock latches and fitted interior is included with the Citori Grade III.

CITORI 725 — NOW IN 20 GAUGE AND ADDITIONAL CONFIGURATIONS.

With precision hand fitting and assembly, a superb trigger and unequalled durability for a low profile over and under, the Citori 725 has a lot to offer. 2014 showcases an expanded line-up of these top-notch performers with more target models and slick-handling new 20 gauge offerings.

725 CITORI

TRIPLE TRIGGER SYSTEM

- The Triple Trigger System fine tunes finger-to-trigger reach on target models.
- Includes three trigger shoes: wide checkered, narrow smooth and wide smooth canted.

TAPERED LOCKING BOLT

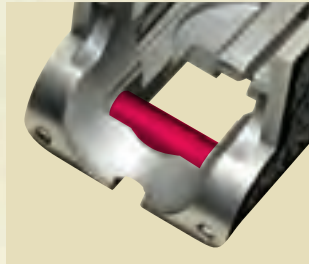

- Unlike other low-profile over and unders, the Citori 725 features a transverse-mounted, full-width tapered locking bolt and full-width hinge pin just like other Citori models for maximum strength and longevity.
- The locking bolt engages a full-width tapered recess in the monobloc. Tapering the bolt and recess allows the bolt to seat deeper over time, accommodating for wear.

**FIRE
LITE**
MECHANICAL
TRIGGER

FIRE LITE MECHANICAL TRIGGER

- Exclusive mechanical trigger design.
- Unlike an inertia trigger, Fire Lite does not rely on recoil to set the next shot; instead, it offers immediate second shot capability.
- Features less take up, a crisp break and shorter overtravel.
- The Fire Lite Mechanical Trigger is light, crisp and has minimal overtravel.

FULL-WIDTH HINGE PIN

The Citori 725's full-width hinge pin provides maximum strength and long-lasting endurance.

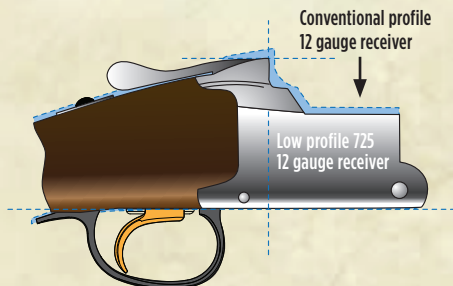

COMPETING TRUNNION DESIGN

The competitor's trunnions provide only a fraction of the bearing surface that the Citori 725's full-width hinge pin provides.

PALM SWELL

- Aids in control.
- Optimizes finger-to-trigger placement.
- Provides a comfortable, secure grip.

LOW PROFILE RECEIVER

- Improved recoil control and less muzzle jump are two of the big benefits of a low profile receiver. There is also the "one with the gun" feeling that makes the Citori 725 feel like an extension of the body.
- Places front hand closer to the bore line for superior hand-eye coordination and pointability.

**BECOME
ONE
WITH THE
GUN**

**ERGO
BALANCED**

ERGO BALANCED

- Incredibly balanced in the hands from pad to muzzle.
- Facilitates a light feel and fast swing.
- Promotes follow through.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

BECOME ONE WITH THE GUN.

Browning 725 Field guns combine legendary reliability with the pointability and feel of a low profile 12 gauge receiver and a mechanical trigger. Lightweight, precisely fit and finished, quick to your shoulder and even quicker to your target, the 725 is ideally suited for field duty. Nimble new 20 gauge models reduce weight and offer more ways for you to become “one with the gun.”

AS CLOSE AS IT GETS.

Sporting clays has broad appeal. Hunters are drawn to it because, with difficult shots, it is as close as it gets to actual hunting. Sporting clays shooters just like the challenge. To help you achieve top scores, Browning Citori 725 Sporting models put a ton of features into a rugged and reliable package. Barrel porting keeps recoil light and muzzle climb to a minimum for fast, accurate second shots.

NOT JUST A PASSING FAD.

For nearly 100 years, skeet has both fascinated and frustrated generations of shooters. If you have caught the competition bug, a purpose built skeet gun is a must. After all, you wouldn't enter a stock car in an Indy car race. The 12 gauge 725 is ideal for skeet shooting with its light weight and low-profile receiver contributing to its nimble nature.

IT'S A TRAP! (SHOTGUN.)

Designed to meet the refined demands of avid trap shooters, the new 725 Trap is built around a rugged low-profile 12 gauge receiver that offers faster pointing and improved recoil control, without sacrificing the strength and longevity a Citori is known for. A high-post rib matches the needs of the game, while the optional adjustable comb tailors the stock to match your personal shooting style.

TOTAL BARREL
DYNAMICS

VECTORPRO

INVECTOR-DS

BACKBORED
TECHNOLOGY

HAND-FINISHED PERFECTION.

Often we hear “you get what you pay for.” That isn’t entirely true, because with a Browning Citori, you get much more. The Citori boasts a level of hand fitting, polishing and assembly that rivals guns costing hundreds, and sometimes thousands of dollars more. The extra attention to detail evident in every Citori does more than assure smooth operation and flawless looks. It adds longevity and integrity so it’s ready for the next generation. Searching for a high performance, high value over and under for a pheasant, quail or dove hunt? Look no further than the legendary Citori.

TRIPLE TRIGGER SYSTEM

All Sporting Clays, XT and XS Citori shotguns come equipped with the Triple Trigger System, which fine tunes finger-to-trigger length of pull. Choose a wide checkered, narrow smooth or wide smooth canted trigger shoe.

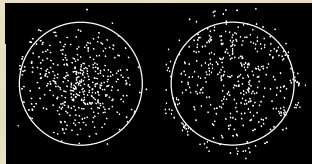

LOCKING BOLT AND HINGE PIN

The Citori features a heavy-duty, transverse-mounted, full-width tapered locking bolt that engages a full-width tapered recess in the rear barrel lugs. Tapering the bolt and recess allows the bolt to seat deeper, accommodating for wear. The hinge pin extends across the width of the receiver for maximum strength. Engineering like this ensures the Citori wears in, not out.

WHAT IS BACK-BORING?

- Back-boring enlarges the bore to the maximum diameter to increase shot velocity, minimize pellet deformity for more uniform patterns and reduce felt recoil.
- Extensive testing has shown that Back-Bored Technology reduces the friction between the shot cup and the bore, but does not allow gases to slip past the shot cup that would result in reduced pellet velocity and blown patterns.
- Back-Bored Technology specifications minimize shot deformation and maximize pattern uniformity, consistency and density. Back-Bored Technology is standard on 12 and 20 gauge Citori models.

Browning shotgun pattern with Back-Bored Technology

The competitors' pattern without Back-Bored Technology

CHROME CHAMBERS

For increased durability and corrosion resistance, all Citori shotguns have hard chrome-plated chambers to resist the toll that thousands of shells can take on lesser quality guns.

HAMMERS AND HAMMER EJECTORS

For positive primer ignition, Citori hammers are driven by powerful coil-type mainsprings. The convenient barrel selector allows a shooter to choose which barrel fires on the first pull of the single trigger, and the second pull fires the remaining barrel. Ejectors are fired by a sharp hammer blow for more positive ejection than the push imparted by competitors' ejectors. The automatic ejectors eject fired hulls when the breech is opened and elevate unfired shells for easy removal.

VECTORPRO™

VECTOR PRO LENGTHENED FORCING CONES ON 12 AND 20 GAUGE CITORI SHOTGUNS

- The forcing cone is the tapered transition between the chamber and the bore. The forcing cone constricts the shot column. The longer the forcing cone is, the more gradual the constriction.
- A gradual constriction reduces stress on the shot column as it passes into the bore, resulting in fewer deformed pellets. Less pellet deformation produces more uniform patterns and keeps more pellets in the central part of the pattern. Vector Pro is better than the competitors' forcing cone designs because of the gradual constriction.
- Lengthening forcing cones is a popular aftermarket practice done to increase shot pattern performance. But it comes standard on 12 and 20 gauge Citori models.

INVECTOR-PLUS™

CHAMPIONSHIP PROVEN PERFORMANCE

- Invector-Plus started the long choke tube revolution. A pile of championship medals is proof of its patterning performance.
- The Invector-Plus choke tube system works with Vector Pro and Back-Bored Technology to offer consistent, dense shot patterns with the constriction needed for the shooting situation.
- The long choke taper inside an Invector-Plus choke tube produces consistent patterns with more uniform densities and fewer flyers.
- Threads on the breech end help prevent gases from slipping between the choke tube and barrel that could damage the choke tube and the barrel.
- Invector-Plus is standard on 12 and 20 gauge Citori models.

STANDARD INVECTOR™

PATTERN VERSATILITY FOR 16 GA., 28 GA. AND 410 BORE SHOTGUNS

- The Standard Invector interchangeable choke tube system offers consistent, dense shot patterns with the constriction needed for the shooting situation.
- Threads on the breech end help prevent gases from slipping between the choke tube and barrel that could damage the choke tube and the barrel.
- Standard Invector is standard on 16 and 28 gauge, and .410 bore Citori models.

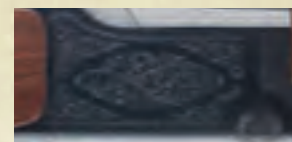

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

UPSCALE UPLAND.

While the Citori has a legendary reputation for dependability, its beautiful looks, precision construction and hand-assembled quality have ensured that it remains a timeless example of what an over and under should be. It is the shotgun that you might imagine carrying on opening day. The Citori floating up to your shoulder is as effortless as the dream itself, swinging onto flushing birds as their wings beat out a hasty escape.

THE FEELING OF TRADITION.

The Browning Citori is a shotgunner's shotgun. This time-tested design traces its heritage back to John M. Browning's Superposed, the first widely successful over and under shotgun. Each Citori undergoes an extensive hand fitting process that ensures tight tolerances between components for maximum strength, lifespan and finish appearance. This labor intensive process elevates the quality of the Citori beyond other over and unders and ensures it will be around for you to enjoy for years and years to come.

LIGHTWEIGHT IS ANYTHING BUT LIGHT DUTY.

In the world of Browning over and under shotguns, the word “Feather” takes on special significance. It means that the receiver is made from a lightweight, yet strong aluminum alloy that trims over one pound from the weight of the gun. To help ensure maximum reliability, we add a steel breech face and hinge pin to the receiver. Less weight, without sacrificing an ounce of strength.

LOADED WITH PERFORMANCE AND VALUE.

Avid trap shooters fire thousands of shells a year in practice and competition, and this heavy use takes a toll on guns that don't have the name Browning on them. The Citori is a legend among trap shooters for its longevity, achieved by using a full width steel hinge pin (not simply a pair of trunnions) and a tapered locking lug that seats deeper with wear. No wonder people say that through the years a Citori wears in, not out.

CYNERGY SHOTGUNS.

Loaded with high performance features.

CYNERGY®

REVERSE STRIKER MECHANICAL TRIGGER

- The Reverse Striker is a striker-based, mechanical trigger system that does not use inertia to set the hammers.
- Reverse Striker offers the benefits of a crisp feel, reduced locktime and less overtravel than other over and under shotguns.
- Because inertia is not needed for the hammers to set, the design eliminates the possibility of the second barrel not firing.
- Cynergy target models are equipped with the Triple Trigger System, allowing finger-to-trigger length adjustment and the ability to switch between styles of trigger shoes: Wide checkered, narrow smooth or wide smooth canted.

ADJUSTABLE COMB

- Composite models include an integrated, adjustable comb system that allows the gun to be easily customized.
- Drop at comb adjustments are made in 1/8" increments.
- For cast on/cast off customizing, accessory combs are shown below.

SUPERIOR GRIPPING SURFACES

- Composite Cynergy models combine molded-in rubberized textured gripping surfaces.
- Proven Dura-Touch Armor Coating adds a sure hold and a sleek feel in all climates and weather conditions.

MONOLOCK HINGE

- The strong MonoLock Hinge design is the engineering behind the Cynergy's low profile receiver.
- Integrates the monobloc and the hinge for up to 300% more surface area to pivot on than traditional trunnion-style hinges.
- Rectangular locking pins provide extra strength and feature a "Wear-In Relief" that keeps the action tight.
- Jeweling adds a beautiful appearance, smoother function and improves durability.

CHROME CHAMBERS

- Cynergy shotguns feature hard chrome-plated chambers.
- Increased durability and corrosion resistance.

IMPACT EJECTORS

- Impact Ejectors are aided by the punch of a secondary striker spring for positive, reliable ejection of fired hulls.
- Unfired shells are elevated for easy removal.

STRAIGHT TO THE POINT.

The Browning Cynergy doesn't look like other over and under shotguns because it isn't like them. The ultra low profile receiver reduces weight without sacrificing strength and helps control recoil, making the Cynergy a pleasure to carry and shoot all day long.

JUDGE THESE BOOKS BY THEIR COVER.

The Cynergy may be a new kind of over and under, but its handling is designed to appeal to shooters of all kinds. Exclusive styling and features make these fine over and unders stand out from the crowd of “me too” shotguns, and add comfort and longevity that other ultra-low profile receiver guns can't begin to match.

SPORTING GOOD LOOKS.

The sporting clays course is another place the Cynergy truly shines. Inherently nimble, easy handling and quick to the shoulder, the Cynergy points and swings as fast as it looks. The Reverse Striker trigger offers a smooth, fast pull and the long-travel Inflex Technology recoil pad adds comfort when the competition heats up.

READY FOR COMPETITION.

Cynergy Trap guns are ready to help improve your scores and build your confidence. Boasting features like an ultra-low profile receiver that reduces recoil to easily managed levels, a wide forearm for extra control, back-bored barrels and lengthened forcing cones, a Cynergy Trap comes ready to rock straight from the box. These shotguns are hungry for competition, even if it's only against yourself.

THE TRAP GUN SHOOTERS WANT.

For a trap gun to be successful, it must be durable enough to handle tens of thousands of shells, adaptable to fit your needs and have a good trigger to improve accuracy. Looking good helps, too. The Cynergy over and under platform lends itself particularly well to the trap range because it excels in each of these areas. Three Cynergy Trap models are available to ensure you match up with a gun that is perfect for your shooting style. The Unsingle combo model includes a fully adjustable rib designed to make perfect scores an almost effortless endeavor.

MORE POPULAR THAN EVER.

Trap shooting was one of the first shotgunning games to gain widespread popularity. This challenging discipline requires tremendous focus and practice, and having a specialized gun like the fast swinging BT-99 never hurts when you're taking a shot at victory.

FOREARM

- A beavertail forearm helps control recoil and assists hand-eye coordination.

RIB

- High-post, 11/32" rib offers natural sighting and target acquisition.

EXTRACTOR

- The BT-99 features an extractor that lifts hulls for easy extraction.

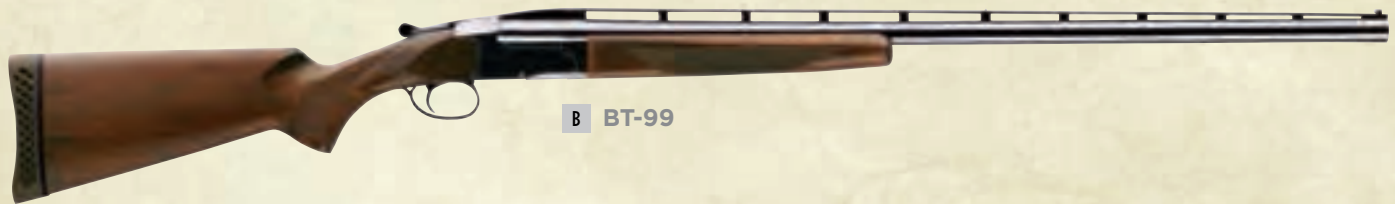

CHROME CHAMBER

- The chrome-plated chamber resists wear and corrosion.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

THE LEGEND.

The single-barrel BT-99 (Browning Trap) is a legend at shooting ranges all over the world. These easy-to-use shotguns are renowned for their simplicity and durability. Though considered a less expensive way to get in the game, every BT-99 benefits from the same attention to detail as other Browning firearms.

SMALL IN SIZE. FULL FEATURED.

Browning Micro and Micro Midas guns buck the trend in the firearm industry by offering guns of the highest quality for smaller shooters. After all, just because a person is smaller or not fully grown doesn't mean they shouldn't enjoy a gun that both fits and will last more than a couple of seasons. Speaking of seasons, Micro and Micro Midas guns are eligible for the Growth Insurance Program (see page 2 for more information) that ensures these fine guns will be around for a long time to come.

A5[®]

THE A5 IN 3 1/2". BRING THE THUNDER.

The rugged Browning A5 definitely has the timeless humpback look, and how many shotguns offer a 100,000-round or five-year guarantee? Now, the A5 is ready to bring big 3 1/2" thunder to the field. Big birds and tough shots? No problem. The hump is back and more powerful than ever.

ERGO
BALANCED

ERGO BALANCED

- Incredibly balanced in the hands from pad to muzzle.
- Facilitates a light feel and fast swing.
- Promotes natural follow through.
- Places your front hand closer to the bore line for superior hand-eye coordination and pointability.

TURNKEY
MAGAZINE PLUG

TURNKEY MAGAZINE PLUG

- The patented TurnKey Magazine Plug is easily removed in seconds using a car key.

HUMPBACK
ACQUISITION ADVANTAGE

GET THE HUMPBACK ACQUISITION ADVANTAGE

- Lengthens the sight plane for faster, more natural sight alignment.
- Speeds target acquisition.

ERGONOMIC BOLT LATCH

- Conveniently located just ahead of the trigger guard.
- Locks the bolt to the rear when the magazine is unloaded and releases a shell from the magazine when the bolt is closed for faster loading.
- Oversized shape is easy to locate and operate with or without gloves.

KINEMATIC
DRIVE

KINEMATIC DRIVE SYSTEM

- Kinetic energy is defined as the energy of motion.
- The A5 uses kinetic energy to power the recoil-operated Kinematic Drive System.
- Simplicity of design for consistent, reliable function with any load and under the full extremes of weather, temperature, moisture and grime.
- Kinematic Drive is so reliable that the A5 is the first ever autoloading shotgun to carry a 100,000-round or five-year guarantee – come hell or high water.
- Clean operation because gases are sent out the barrel and away from the action.
- Extreme load versatility for reliable performance with virtually all loads down to one ounce field with no adjustments.

ABS CASE INCLUDED

- Lockable ABS case is perfect for storing the A5.

SPEED LOAD
PLUS

SPEED LOAD PLUS

- Patented feeding system sends the first shell loaded into the magazine directly into the chamber.
- Speed Unload feature makes emptying the magazine fast and easy, without chambering and ejecting every shell with the bolt handle.

MAGAZINE CAPACITY

- 2 3/4": Four in magazine, one in chamber
- 3": Three in magazine, one in chamber
- 3 1/2": Three in magazine, one in chamber
- A three-shot magazine adaptor plug is included.

A5[®]

100,000
ROUND GUARANTEE
OR FIVE YEARS

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

THE NEW A5 — PERFECT FOR THE FIELD AND RANGE.

If you split your time between the range and field, you may desire a shotgun that is a little more understated. For you the A5 is available in both handsomely-finished walnut and rugged black synthetic. Whether shooting at winged or clay birds, the A5 gives you the advantage of the receiver's extended sighting plane for improved accuracy.

STANDOUTS IN THE HIDEOUT.

Your hunting blind may look great from the ground but viewing it from the air is a different story. Likewise, a shiny shotgun looks pretty on the sporting clays range but it flashes like a big warning sign to circling waterfowl. With full-coverage Mossy Oak® patterns, a camouflage A5 is the ideal concealment solution. New, hard-hitting 3 1/2" models offer the extra payload and punch you need for geese and difficult shots.

TAKING IT TO THE LIMIT.

Walking cornfields for pheasants, doubling on the skeet range and just for looking at, the A5 Ultimate is the perfect blend of function and style. The two-tone receiver features handsomely engraved hunting scenes and perfectly complements the richly finished walnut stock. Too pretty to use, but too good to keep hidden away in a safe, you have to make the ultimate choice.

MAXUS

MAXUS SHOTGUNS.

Loaded with high performance features, the Maxus is the premier gas-operated autoloader available.

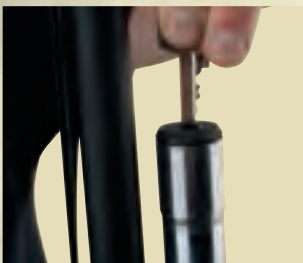

POWER DRIVE GAS SYSTEM

POWER DRIVE GAS SYSTEM

- Extensive research has produced the most reliable gas piston design ever.
- The gas piston features larger exhaust ports that dump gases faster with heavy loads to control recoil.
- 20% longer piston stroke travel increases reliability with light loads.
- An enclosed seal keeps residue out of the action for cleaner operation.

TURNKEY MAGAZINE PLUG

TURNKEY MAGAZINE PLUG

- The patented TurnKey Magazine Plug is easily removed in seconds using a car key.

MAGAZINE CUT-OFF

- The magazine cut-off (not available on Sporting and Deer models) allows the chamber to be unloaded to change loads without cycling a shell from the magazine.
- Useful when hunting different bird species and different loads are instantly required.

SPEED LOCK FOREARM

SPEED LOCK FOREARM

- The patented Speed Lock Forearm replaces the traditional screw-on magazine cap.
- Makes taking down the Maxus for cleaning or storage fast.
- Makes attaching or removing the sling a snap.

SPEED LOAD PLUS

SPEED LOAD PLUS

- Patented feeding system sends the first shell loaded into the magazine directly into the chamber.
- Speed Unload feature makes emptying the magazine fast and easy, without chambering and ejecting every shell with the bolt handle.

MAGAZINE CAPACITY

- 2 3/4": Four in magazine, one in chamber
- 3": Three in magazine, one in chamber
- 3 1/2": Three in magazine, one in chamber
- A three-shot magazine adaptor plug is included.

OPTIMAL DIMENSIONS

- The Maxus features a trim forearm and close radius pistol grip to maximize control.
- An externally relieved steel magazine tube reduces weight for a faster swing while retaining durability.
- Drop and cast can be tuned using the included stock shim kit.
- A low rib is in line with the top of the receiver and translates into dead-flat point of impact.

LIGHTNING TRIGGER

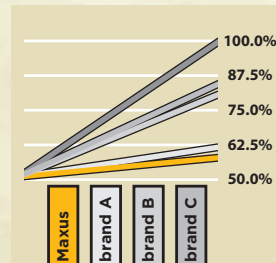

LIGHTNING TRIGGER

- The Lightning Trigger is the finest fire control system ever offered in an autoloading shotgun.
- Offers a smooth, crisp feel with minimal travel.
- Lock times average .0052 seconds, 24% faster than the nearest competing autoloader.
- Easy to remove for cleaning.

THE SOFTEST SHOOTING AUTOLOADER EVER

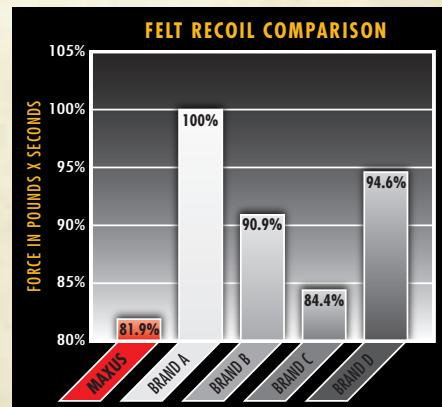

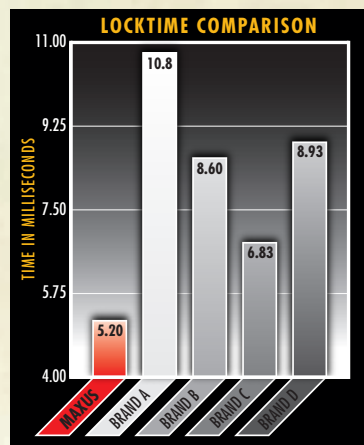

- Felt recoil is more than an instantaneous peak force; it is the total energy absorbing experience felt when a shell is fired.
- The Power Drive Gas System, Inflex Technology recoil pad, back-boring and natural Browning balance combine to transfer up to 18% less total felt recoil force to the shoulder than other autoloaders on the market.

MUZZLE JUMP COMPARISON

LESS MUZZLE JUMP

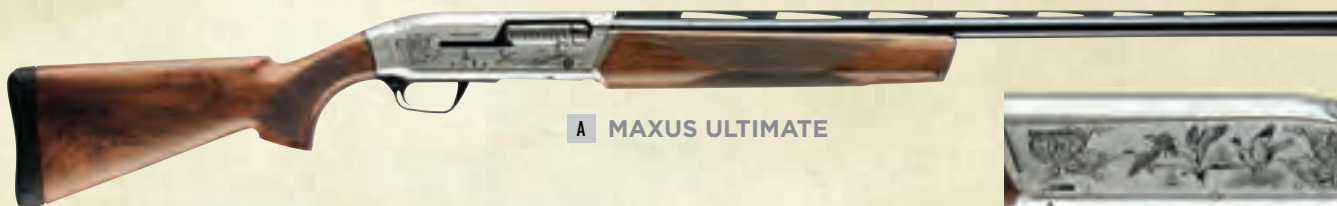

- The Power Drive Gas System works with the Inflex Technology recoil pad.
- Reduces muzzle jump up to 44% compared to the competition.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

MAXIMUM PERFORMANCE.

The Browning Maxus is designed to provide maximum performance, maximum reliability and maximum speed. This premium gas-operated autoloader is feature packed to exceed your expectations every time you pull the trigger. If you demand the best presentation with your advanced technology, the Maxus Ultimate and Sporting Golden Clays are the finest examples of the breed.

DON'T GIVE THE COMPETITION A SPORTING CHANCE.

Because they are lighter and easier to maneuver than most over and under shotguns, an autoloader is the best choice for many sporting clays shooters. Unfortunately, the price for less weight is often paid with extra recoil. This is not the case with Maxus and its Power Drive Gas System. The soft shooting Maxus keeps recoil low for a full day of comfortably shooting clays and offers the load versatility that gets these guns off the range and into the field for live birds.

READY FOR ANYTHING.

The Maxus Hunter is ready for anything. In addition to a beautiful gloss finished stock, it is available with a 3 1/2" action for hard-hitting all around performance when you're hunting waterfowl or turkey, and reliably cycles light 2 3/4" loads when you're shooting doves or sporting clays. Likewise, the Maxus All-Purpose Hunter is built to do it all with less flash, wearing a camo finish and including an easy to install HiViz® turkey sight.

SLUG IT OUT.

With a fully-rifled barrel that is optimized for today's slug ammunition, a Maxus Deer gun is a force to be reckoned with in your treestand. The Lightning Trigger is the best in any autoloading shotgun, providing a crisp break with minimal overtravel. The fast cycling, soft shooting action provides accurate follow ups. A cantilever scope mount is attached to the barrel to help prevent the scope from losing zero when the barrel is removed for cleaning.

MAXIMUM DURABILITY.

Water, rain, snow, cold and mud are just a few of the terms associated with waterfowl hunting. In every way a composite Maxus shotgun is ideal for this environment. The rugged stock is impervious to weather and the Dura-Touch finish provides a secure grip whether wet or dry. The Power Drive Gas System cycles the loads needed for the type of bird you are hunting and transfers less felt recoil for faster, more accurate follow up shots to fill your bag limit and get your feet up in front of the fire sooner.

Silver

PERFORMANCE PRICED RIGHT.

Adding a bunch of extra bells and whistles to a shotgun has some great advantages. But it also adds cost. If you want a high-quality, long-lasting autoloader that gets the job done every time you pull the trigger, the Browning Silver fills that role with style.

LESS RECOIL WITH THE ACTIVE VALVE

- The self-adjusting Active Valve gas system diverts gases from fired shells to operate the action instead of adding to recoil.
- When shooting light loads, most of the gases operate the action.
- With magnum loads, only a small amount of gas is necessary to operate the action, while the remaining gases are vented out the top of the forearm and away from the receiver for cleaner, more reliable operation.
- Superior recoil reduction from the Active Valve means faster, more accurate follow-up shots and all-day shooting comfort regardless of the loads being fired.

LOAD VERSATILITY

- The Active Valve-equipped gas piston efficiently adjusts to reliably fire a wide range of loads.
- 12 gauge 3" models fire everything from light, 1 oz., 2 3/4" target loads to the heaviest 3" magnums. The 3 1/2" version is built to handle a similar range, from 1 1/8 oz., 2 3/4" field loads up to hard-hitting 3 1/2" magnum loads.

Light Load (1 oz.)

Heavy Load (2 oz.)

MAXIMUM GRIP

- Composite Silver models combine checkered gripping surfaces and proven Dura-Touch Armor Coating for a sure hold and a sleek feel in all climate conditions.

TRIGGER

- The trigger assembly can be removed in just seconds for a thorough cleaning.
- The trigger guard is large and has carefully rounded edges to accommodate gloved fingers.

MAGAZINE CAPACITY

- 2 3/4": Four in magazine, one in chamber
- 3": Three in magazine, one in chamber
- 3 1/2": Three in magazine, one in chamber
- A three-shot magazine adaptor plug is included.

CUTTING PRICES WITHOUT CUTTING CORNERS.

Browning firearms are made to high standards to be the best in their class. Silver shotguns are no exception. Zero corners are cut in the quality and manufacture of these fine autoloaders. Instead, we rely on proven technology and straightforward design to ensure flawless function and lasting value.

ACTIVE VALVE SYSTEM

SPORTING GUNS FOR EVERYONE.

Sporting clays guns can cost thousands of dollars. That's a high price for a full-size gun and almost unthinkable for a compact gun that might be outgrown long before it ever wears out. Browning bucks the price trend by offering guns with important features like a ported barrel and soft shooting action, without compromising on quality. Micro models are eligible for the Growth Insurance Program (see page 2 for details) to ensure that a gun that fits today will still be in service tomorrow, and for years to come.

DURA-TOUCH®
Armor Coating

ADDED VALUE AND VERSATILITY.

Modern slug ammunition has made hunting deer, bear or boars with a shotgun increasingly popular. Browning Silver slug guns are incredibly effective at bringing down heavy game, even at longer ranges. There is also a side benefit to hunting with a Silver — accessory barrels are available that easily convert the same shotgun into a wingshooter. And, thanks to the cantilever scope mount, you can swap between barrels without affecting the scope's zero.

HANDS ON ACTION.

While most companies build pump shotguns to entry-level price quality for the entry-level shooter, we buck the low cost trend and offer the rugged, steel framed BPS. The BPS is the shotgun you want if you demand quality and reliability from your pump shotgun. The steel, twin action bars resist twisting for bind-free performance.

BOTTOM EJECTION AND LOADING

- Unique bottom ejection throws empty hulls straight down, out of your line of sight.
- Whether you shoot right- or left-handed, bottom ejection and a top-tang safety make the BPS the best choice in pump shotguns.

MAGAZINE CAPACITY

- 2 3/4": Four in magazine, one in chamber.
- 3": Three in magazine, one in chamber.
- 3 1/2": Three in magazine, one in chamber.
- A three-shot magazine adaptor plug is included.

RELIABLE PUMP-ACTION

- The proven pump-action features rugged steel components.
- The receiver is machined from a solid block of forged steel.
- Rigid double slide bars are made from heat-treated steel to eliminate twisting and binding for faster, more efficient slide-action operation.
- Reliable in all conditions.
- A convenient serrated slide release is located at the rear of the trigger guard.

MAXIMUM GRIP

- Camo composite BPS models combine in-molded checkered gripping surfaces and our proven Dura-Touch Armor Coating for a sure hold and a sleek feel in all climate conditions.

TANG SAFETY

- The thumb-operated, top-tang safety on the BPS can easily be operated with the right or left hand, even with gloves on.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

QUALITY BREEDS RELIABILITY.

If there is one word that describes the BPS it's reliable. Snow, rain, ice, dirt, so long as your arm is willing to do the work, the BPS delivers. The BPS gets much of its dependability from the design, but it really comes down to quality. Precision built using the finest materials, the BPS is made to last.

THE SHOTGUN THAT THINKS IT'S A RIFLE.

Deer, bear and boar hunting with a shotgun is growing by leaps and bounds, and the A-Bolt shotgun is ready to meet the rising interest. It shares many of the same features that made the A-Bolt rifle so popular, including the high level of accuracy.

BARREL

- Rifled 1 in 28" twist barrel.
- Designed exclusively for use with sabot-type slugs.
- Superb accuracy with 1 1/2" groups or better typical at 100 yards.

PERFORMANCE

- Smooth, anti-bind bolt design.
- Non-rotating bolt sleeve.

COMPOSITE STOCK

- Rugged composite stock.
- Right-hand palm swell pistol grip.
- Checkered gripping surfaces and Dura-Touch Armor Coating provide security in all conditions.

DETACHABLE MAGAZINE

- Detachable magazine on a hinged floorplate for fast reloads.
- 2 + 1 capacity.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

HARD-HITTING PERFORMANCE.

Unlike the wide-open West where long-range centerfire bolt-action rifles are a must, the thick woods of many whitetail hunting paradises are better served by a rock-solid, accurate shotgun. The A-Bolt shotgun packs a wallop with awesome performance made even better with modern slug ammunition.

INSURE THE FUTURE.

Rather than build a lesser firearm that will be outgrown all too quickly, Micro Midas guns welcome you to take advantage of the Growth Insurance Program. With Growth Insurance, you can pick up a full size stock for your Micro Midas firearm at 50% off the retail price. That means that your young shooter has a high quality Browning firearm that fits just right today and as they grow up.

FIT IS MORE THAN LENGTH OF PULL.

The fit of a firearm goes beyond the length of pull. Micro Midas firearms feature shorter barrels for reduced weight and extra maneuverability. Tighter grips offer easier finger to trigger reach. These little details make shooting more enjoyable and successful.

ROOM TO GROW.

With a Browning Micro Midas firearm, there will never be a need to substitute fit for quality. These fine guns are made right along side their full size counterparts, with the same quality and attention to detail, plus a little extra room to grow built in.

ACCURACY. PRECISION. VALUE. THE NEW A-BOLT 3 RIFLE FROM BROWNING.

With a slogan like “The Best There Is” it’s tough to imagine a value-packed rifle wearing the name Browning. Yet the AB3 is just that. The AB3 packs a ton of features and superb accuracy into a rifle that will cause you to do a double take at the affordable price tag. The AB3’s secret to accuracy is the barrel, built using the same methods and machines that make other Browning rifles so accurate. The secret behind the AB3’s value lies in the innovative new technologies that simplify production while maintaining top performance.

INFLEX
TECHNOLOGY

IT LOOKS GOOD TOO.

The Browning AB3 is a great value because great strides were taken to ensure that it performs as good as it looks. The new composite stock design features a tight grip radius for optimum finger-to-trigger reach and a narrow fore-end with textured gripping surfaces for enhanced control. The trigger is pre-set to break between 3 1/2 to 4 1/2 pounds. Pick one up and you will instantly fall in love with the AB3.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

A AB3 COMPOSITE STALKER

LARGE BOLT SURFACE

- The oversize bolt offers additional rigidity.
- The bolt is machined from solid steel bar stock and machined internally to keep weight low.
- Three locking lugs provide exceptional bolt strength.
- Super smooth chrome bolt finish is great looking, quiet and offers smooth cycling.

INFLEX TECHNOLOGY RECOIL PAD

- Inflex Technology recoil pad softens recoil and allows faster, more accurate second shots.
- Internal structure is designed to pull the rifle down and away from your face to reduce felt recoil.

BOLT LOCK OVERRIDE BUTTON

- The bolt lock override button provides an additional margin of safety when checking and unloading the chamber.
- Located behind the bolt handle, the bolt lock override allows the bolt to be unlocked and opened with the tang safety in the on safe position.
- The convenient tang safety blocks the trigger sear and features a firing pin block for added security.

DETACHABLE MAGAZINE

- Polymer and steel construction is lightweight and extra tough.
- Unique spring and follower design minimizes follower tilt for more reliable feeding.

FREE-FLOATING BARREL

- The free-floating maintains barrel to stock spacing for consistent accuracy.
- Recessed muzzle crown helps protect the rifling from damage.
- Precision button-rifled barrel is triple checked for interior finish, straightness and air-gauged for uniformity.
- Hand-reamed chamber for precision accuracy.

60° BOLT LIFT

- Short 60° bolt lift is fast cycling and your hand easily clears the scope.

THE TOTAL ACCURACY PACKAGE.

Straight-from-the-box, the Browning X-Bolt offers you tack-driving performance in a lightweight package. This is made possible by taking a different approach to design, one that factors in every feature that goes into the rifle and ensuring it complements other features to maximize accuracy.

X-BOLT®

FEATHERTRIGGER™

FEATHER TRIGGER

- For precise shooting there is absolutely no substitute for a crisp, predictable trigger.
- The X-Bolt's three-lever Feather Trigger provides a clean, crisp pull with no take-up or creep and minimal overtravel.
- The trigger is screw adjustable from 3 to 5 lbs. and factory pre-set at approximately 3 1/2 lbs.
- An alloy trigger housing contains hard chromed steel components that are highly polished on all critical contact surfaces.

X-BOLT RIFLES. PERFORMANCE IS A FEATURE.

- The Browning X-Bolt is a modern bolt-action rifle with a host of innovative features.
- The total accuracy advantage gives you added confidence in the field to make longer shots.
- Inflex Technology recoil pad softens recoil and allows faster, more accurate second shots.
- Fast-operating 60° bolt lift offers fast cycling and prevents interference from the scope when working the bolt.
- The bolt unlock button allows the bolt to be cycled with the safety in the on safe position.
- Bolt design is simple, with three locking lugs for superior lock-up.

X-LOCK SCOPE MOUNTING SYSTEM

- Securely mounted optics are essential for accuracy and precision on any rifle.
- X-Lock mounts feature a four screws per base design that replaces the traditional two screw system.
- Offers more accurate placement and more secure attachment to the receiver.

FREE-FLOATING BARREL

- Every X-Bolt is individually bedded into the stock for a true free-floating barrel, not bedded using a master receiver like the competition.
- The X-Bolt barrel is free-floated by bedding the front and rear of the action for stability.
- Maintains barrel to stock spacing for consistent accuracy.
- The recessed muzzle crown helps protect the rifling from damage.
- Barrels are triple checked for interior finish, straightness and air-gauged for uniformity.
- Hand-reamed chamber for precision accuracy.

BOLT UNLOCK BUTTON

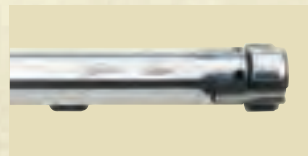

- The bolt unlock button works in conjunction with the top-tang safety to provide an extra margin of safety when checking and unloading the chamber.
- Located on top of the bolt handle, the bolt unlock button allows the bolt to be unlocked and opened with the tang safety in the on safe position.
- The convenient tang safety blocks the trigger sear and features a firing pin block for added security.

PERSONALIZED ENGRAVING ON THE X-BOLT

- The bolt can be personalized with your name. Call (800) 333-3288.

Block

Script

60° BOLT LIFT

- Short 60° bolt lift is fast cycling and the hand easily clears the scope.
- The bolt is machined from solid steel bar stock for strength and custom rifle precision.
- Three locking lugs provide exceptional bolt strength.

ROTARY MAGAZINE

- The unique rotary magazine is removable, durable, easy to load and feeds rounds from the center line — not off to the side like other rifles — for straight to the chamber feeds.

TANG SAFETY

- Tang safety is easy to reach with the thumb.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

TOTAL ACCURACY ECLIPSE.

The new X-Bolt Eclipse Hunter features a beautiful laminated stock that offers extra stability, a Monte Carlo cheekpiece for improved eye-to-scope alignment and a thumbhole grip for more consistent finger-to-trigger reach. These few changes result in elevated accuracy potential both in the field and from the bench, without adding significant weight.

THE WARMTH OF WOOD.

Composite stocks have become the material of choice for many gun makers, but there is something about the beauty and feel of finely finished walnut in your hands that can't be beat. We offer the X-Bolt in several wood-stocked configurations, all bedded at the recoil lugs and rear action screw to help ensure accuracy.

IT'S OKAY, CALL IT PRETTY.

Even with its tack-driving accuracy, fast-cycling bolt and super stable scope mounting system, it's okay to call the X-Bolt Medallion pretty. The handsome walnut stock features contrasting rosewood grip and fore-end caps and a gloss finish that is as protective as it is polished. A touch of receiver engraving adds a tasteful bit of extra elegance.

A TRADITION OF BEAUTY.

Next to reliability, Browning Medallion guns are renowned for their beauty, fit and finish. The fine grain of the wood is protected and accented by a gloss finish. Actions are carefully fit into the stock to minimize unsightly gaps and are bedded at the recoil lugs and rear action screw to ensure accuracy.

PRECISION RIFLES FOR SHOOTERS OF ALL SIZES.

X-Bolt Micro rifles offer slim proportions that do more than trim excess weight. This sculpting also makes the rifle feel nimble and easier to control, especially for those of smaller stature. Add in the shorter length of pull of the Micro Hunter and the X-Bolt becomes the ideal mountain rifle or the best choice for the smaller hunter who deserves the highest quality.

INSPIRED.

As Browning headquarters are tucked high in the Wasatch Range of Northern Utah, our engineers are inspired to build rifles that will excel in rugged mountain conditions where tough, long shots are the norm. Pick up an X-Bolt rifle and discover the trim dimensions, the light weight, crisp trigger and x-ring accuracy that make it ideally suited to be the perfect all terrain rifle right out of the box.

INNOVATION, INTEGRATION, ACCURACY.

Some gun companies get a good thing going and just stick with it, never moving beyond the basic design. Not Browning. The X-Bolt was conceived to be different, a totally new rifle from the ground up. Every piece of the X-Bolt was designed to function together to optimize performance for Total Accuracy.

A CALL FOR CONSERVATION.

With the combination of the 325 WSM cartridge and a short action, X-Bolt RMEF Edition rifles give you two legs up on the competition. The short action keeps rifle weight below long-action magnum rifles, while the 325 WSM matches, or surpasses, the ballistics of many traditional elk hunting calibers.

BROWNING LEVER ACTION. THE BLR SADDLES UP.

Though compact, easy to handle and fast to cycle, some would say that lever-action rifle technology peaked in the late 1800s. The Browning BLR makes a winning argument against that statement. With a detachable box magazine that allows the use of superior pointed bullets, a strong multi-lug bolt, glass-smooth lever-action and accuracy that rivals some bolt-action rifles, the BLR proves that lever-actions are anything but obsolete.

RECEIVER

- Lightweight, sturdy machined aircraft-grade aluminum. Drilled and tapped to accept scope mounts.

SIGHTS

- Low profile, square notch, screw adjustable rear sight aligns easily with a highly visible gold bead on raised ramp front sight.

TAKEDOWN FEATURES

- BLR Takedown models are just as accurate and reliable as their unified counterparts but much easier for you to transport and store.
- The rifle is easily and quickly assembled by simply sliding the barrel half into the receiver half and locking them together with the flip of a lever. The lever mechanically engages a stout locking lug into a recess in the bottom of the receiver. The system is rugged, precise and blends seamlessly into the styling of the rifle.

HAMMER

- The folding hammer provides an added measure of safety when the hammer is at half-cock.
- The fold-down hammer has two positions at half-cock so the status of the rifle is readily seen; and four basic positions: Full-cock, half-cock, folded hammer position and the dropped, or fired position.

ACTION

- Lightning fast, glass-smooth rack and pinion lever-action.
- Strong rotating head, multiple-lug breech bolt with a recessed bolt face and side ejection.

MAGAZINE

- The flush-mounted detachable box magazine has a capacity of three magnum or four standard rounds in the magazine, plus one in the chamber.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

THE MOST ACCURATE LEVER. EVER.

The Achilles heel of most lever-action rifles is marginal accuracy caused by flat-nosed bullets. The BLR utilizes a box magazine that protects bullet tips and allows the use of ballistically superior ammunition. Additionally, the multi-lug bolt is strong enough to handle magnum cartridges, making the BLR suitable for big game like elk, caribou, bear and moose.

THE ICONIC LEVER-ACTION RIFLE, PERFECTED.

There's something iconic about a lever-action rifle. The looks, the speed of cycling a round to the chamber or maybe the images of cowboys and outlaws in the Old West have seared their places in the American psyche. Whatever the reason is, the Browning BLR satisfies your desire to own a fine lever-action rifle, with the added benefits of modern ammunition and improved accuracy.

MAGNUM PUNCH.

The BAR is the sporting gun inspired by the original Browning Autoloading Rifle, and is still the finest on the market. The BAR combines the strength to fire hard-hitting magnum cartridges with the accuracy to send them down range right on target. The piston-operated gas system is reliable and softens felt recoil to reduce muzzle climb.

ACTION

- The BAR is a gas-operated autoloader with a high-strength, multiple-lug rotating bolt that locks directly into the barrel.
- The seven-lug bolt and precise breech-to-chamber relationship give the BAR exceptional accuracy and the strength to handle magnum loads.
- The strong and rigid action bar/inertia block link-up improves accuracy by reducing barrel vibration.
- The buffering system reduces wear and stress on the rifle's mechanism.

MAGAZINE

- Detachable box magazine with a unique hinged floorplate allows you to lower the floorplate, detach the empty magazine and snap in a full magazine in mere seconds.

MAXIMUM GRIP

- Camo composite BAR models combine overmolded gripping surfaces and Dura-Touch Armor Coating for a sure hold and a sleek feel in all climate conditions.

ADJUSTABLE SHIM SYSTEM

- ShortTrac and LongTrac BAR rifles include six shims that customize drop at comb and cast on/off.

THE BOSS DEVICE

- The Ballistic Optimizing Shooting System (BOSS) is designed to maximize accuracy.
- The BOSS device quickly and easily tunes barrel harmonics to precisely match the specific ammunition fired, resulting in amazingly tight groups. The BOSS device is available as an option on the BAR Mark II Safari.

RECEIVER

- The BAR Mark II Safari uses a blued one-piece ordnance steel receiver with scroll engraving.
- ShortTrac and LongTrac models have an aircraft-grade aluminum alloy receiver.
- All BAR rifles are drilled and tapped for scope mounts. The bolt release lever is incorporated into the receiver.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

AUTOLOADERS WITH STYLE.

The BAR is definitely not the only choice in today's crop of autoloading rifles, but none other possess the lasting beauty that a BAR affords. In contrast with the current crop of modern sporting rifles, the BAR is a traditional approach, with warm-feeling, finely finished and fit walnut contrasting beautifully with satin nickel and polished blue finishes.

BOLT-ACTION ACCURACY AND MAGNUM POWER.

A precision hammer forged barrel and secure multi-lug rotary bolt lock up give the BAR the accuracy you expect from a bolt-action rifle, and the ability to send magnum lead downrange. Chamberings are available in standard calibers for deer and varmints, while magnum offerings make the BAR suitable for elk, caribou and bear.

PISTON-DRIVEN.

BAR autoloaders rely on a gas piston-driven action to cycle and eject cartridges. As an added benefit, the gas operation helps reduce felt recoil, a feature that comes in handy when you're firing magnum rounds.

STEEL IS REAL.

The BAR Mark II Safari is built with a rugged steel receiver finished in a deeply polished blue. Surrounding it is the traditional gloss-finished walnut that has made Browning quality sought after for generations. The tunable BOSS is optional, and allows you to tune the barrel harmonics to match the ammunition being fired.

BOSS-CR ACCESSORY

The BOSS-CR accessory offers all the accuracy and tunable advantages of the original BOSS device without the muzzle brake feature. By simply replacing the original muzzle brake BOSS with the one-piece, no-hole BOSS-CR accessory, only the reduced recoil of the original BOSS is sacrificed. The BOSS-CR accessory is designed to fit only BAR Mark II and A-Bolt centerfire rifles previously factory-fitted with the BOSS.

It is important that the correct BOSS-CR be selected for a specific caliber and model of rifle.

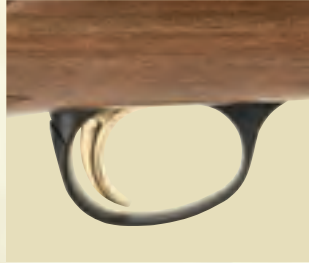

STRAIGHT UP PERFORMANCE.

The straight-pull bolt action of the Browning T-Bolt really makes it stand out in a crowd. This neat design cycles fast and locks up tight for excellent accuracy. Tremendously fun to shoot, T-Bolt rifles are made to the highest standards of quality.

STOCK

- Stocks are full-size to comfortably fit adults.
- Durable Composite models feature a Monte Carlo comb and include magazine storage in the buttstock.
- Walnut stocked Sporter models feature trim dimensions with a satin finish and cut checkering. Walnut Target/Varmint models feature a Monte Carlo comb and wide forearm for stability on the bench.
- All models include a bedded action and dual action screws for solid attachment.
- Sling swivel studs included.

TRIGGER

- The three-lever trigger design combined with a short-travel firing pin give a crisp break, quick lock time, no take-up and minimal overtravel.
- Adjustable for pull weight.

ACTION

- Receiver is machined from steel barstock.
- Features crossbolt lockup for strength and smooth operation.
- The mainspring runs directly through the massive pivot pin. Cocking effort is split between opening and closing for ease of operation. The bolt features dual extractors and a red cocking indicator band.
- Right-side ejection on both right- and left-hand models.

SAFETY

- Top-tang, thumb operated two-position safety can be operated without changing from a shooting grip.

BARREL

- Target/Varmint models feature a 22" medium target profile.
- T-Bolt Sporter models feature a 22" medium sporter profile.
- Barrel is free-floating with a semi-match chamber and target muzzle crown.

OPTICS READY

- Receiver is drilled and tapped for scope mounts (not included). See pages 150-151 for scope rings and bases for T-Bolt rifles.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

22 Long Rifle

17 HMR / 22 WMR

DOUBLE HELIX MAGAZINES

- 10-round capacity.
- The patented Double Helix rotary box magazine uses torsion spring driven interlocking gears for added reliability and easy loading and unloading.

FULL FEATURED.

Unlike most rimfire rifles that are bare bones and built to meet a price point, the T-Bolt includes features like an adjustable trigger and top-notch construction. Composite models also feature storage for a spare magazine in the buttstock.

A RIMFIRE WITH A TWIST.

The T-Bolt is a unique rifle. These rimfires, with their slick straight-pull bolt that cycles fast and locks up tight to the barrel, offer an elevated combination of speed and accuracy. It looks elegant with smooth contours and fine craftsmanship and is also fun to shoot.

A LEVER TO LOVE.

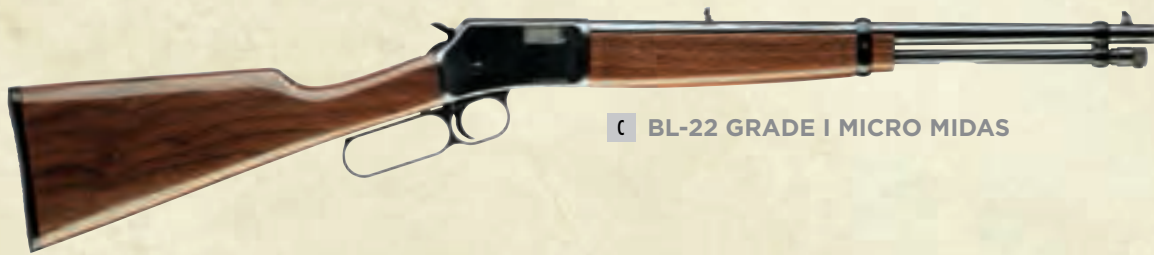

Traditional good looks, rock-solid build quality and a list of convenient features make the Browning Lever 22 (BL-22) a perfect choice if you are interested in a reliable rimfire rifle. Like all Browning firearms, lasting quality is built in to ensure your BL-22 will be around for years to come.

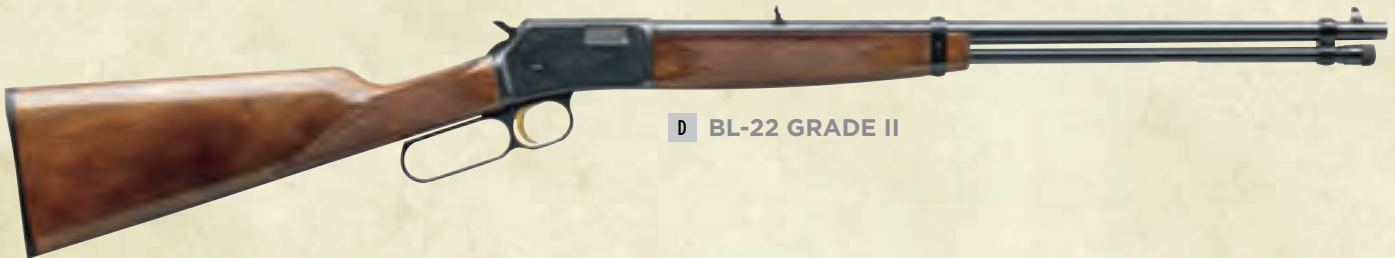

RIMFIRE THOROUGHBREDS.

- The slick, lever-action BL-22 is perfect for new and seasoned shooters alike.
- Quick-cycling 33° lever throw.
- The trigger travels with the lever to prevent finger pinch.
- High-quality construction.
- Fires .22 Short, Long and Long Rifle ammunition.
- Short lever throw is ideal for smaller hands.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

A CENTURY OF PURE GENIUS.

Straight from the workbench of John M. Browning, the SA-22 is a time-honored and cherished reminder of his genius. To look at an SA-22, it's hard to believe that 2014 marks its 100th year of production. In celebration, all SA-22's produced in 2014 will bear commemorative serial numbers that begin with the number "100A14." Get yours today.

READY. AIM. PLINK!

Based on the reliable Buck Mark pistol, the Buck Mark Rifle is the perfect plinking rimfire. These compact rifles are lightweight, simple to operate, easy to load, accurate and pure fun. The frame is machined from a solid block of 7075-T6 aluminum for strength and longevity.

**SAFETY AND SLIDE RELEASE**

- Large manual thumb safety.
- The convenient manual slide release is easily operated with the shooting or support hand.

**SIGHTS**

- Sporter model features a TRUGLO®/Marble's® fiber-optic sight system.
- The rear sight is adjustable for windage and elevation.

**MAGAZINE RELEASE**

- Located adjacent to the trigger guard for convenient operation.

**ACTION**

- The straight blowback design offers enhanced simplicity and reliability.

**FRAME**

- Machined to exacting tolerances from a solid billet of 7075-T6 aluminum. The stock structure is a part of the pistol frame, reducing weight and the number of parts.

**BARREL**

- Sporter model features lightweight, tapered sporter-weight barrel. Target models feature a bull barrel.
- The chamber in every Buck Mark Rifle barrel is hand-reamed and the muzzle crown is recessed to protect it from damage that could degrade accuracy.

**SLIDE**

- Built-in recess and raised side panels for an improved cocking grip.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

85% OF THE GREATEST PISTOL EVER MADE.

Scaled down to 85% of John M. Browning's original 45 ACP Model 1911, the ultralight Browning 1911-22 is ideal for plinking, hunting and target shooting. This handsome, Made in the USA sidearm is chambered in 22 Long Rifle and features a sturdy alloy, or new for 2014, a composite frame. Lightweight and compact, the 1911-22 comfortably fits hands of every size.

1911 22

SAFETY

- Large manual thumb safety and grip safety.

SLIDE

- Vertical serrations provide an improved cocking grip. The convenient manual slide release is easily operated with the shooting or support hand.

FRAME

- Aircraft grade aluminum alloy or engineering grade composite.
- Walnut grip panels on select models.

ACTION

- The straight blowback design offers enhanced simplicity and reliability.

MAGAZINE

- The steel magazine body is heat treated for long-term feeding reliability and long life. The coil spring provides a consistent follower angle. 10-round capacity.

MAGAZINE RELEASE

- Positioned adjacent to the trigger guard for convenient operation.

ABS CARRY CASE

- 1911-22 pistols are shipped in a sturdy ABS case.

ALL-AMERICAN QUALITY.

Proudly built in the USA, the Browning Buck Mark is precision made and extremely accurate. These affordable pistols are built on a machined aluminum frame and feature a precision rifled barrel, crisp trigger and fully-adjustable sights.

**SAFETY AND SLIDE RELEASE**

- Large manual thumb safety.
- The convenient manual slide release is easily operated with the shooting or support hand.

**MAGAZINE RELEASE**

- Positioned adjacent to the trigger guard for convenient operation.

**FRAME**

- Machined from aircraft grade aluminum alloy.

**SIGHTS**

- The 16-click per revolution adjustable Pro-Target™ sight is standard on all models.
- This sight provides a finer degree of adjustment over the industry's standard of 12-clicks per revolution.
- Fiber-optic TRUGLO®/Marble's® front sights are available on select models.

**MAGAZINE**

- The steel magazine body is heat treated for long-term feeding reliability and long life. The coil spring provides a consistent follower angle. 10-round capacity.

**ACTION**

- The straight blowback design offers enhanced simplicity and reliability.

**BARREL**

- Most models have bull barrels for improved stability. Lite models have a steel barrel liner inside an ultralight aluminum sleeve.
- The chamber is hand-reamed and the muzzle crown is recessed to protect it from damage that could degrade accuracy.

**GRIPS**

- Several wood, laminate and composite styles are available. Wood Ultragrip Deluxe (UDX), soft nitrile rubber Ultragrip RX (URX) and overmolded Ultragrip FX (UFX) grips offer ambidextrous comfort.

MADE TO A HI-ER STANDARD.

The single-action Browning Hi Power has a proven reputation forged in the hands of generations of law enforcement, military, special operations forces and law abiding citizens. The confidence-inspiring heft of the Hi Power's steel frame aids in recoil control and accuracy. A Hi Power deserves a place in every firearm enthusiast's collection, including yours.

HI POWER

SAFETY

- A large, ambidextrous manual thumb safety is conveniently located on the frame just above the grip.

MAGAZINE CAPACITY

- Double-stack magazine design.
- 13-round magazine capacity. 10-round capacity where required by law. Follow state and local laws regarding magazine capacity.

SIGHTS

- Hi Power pistols are available with fixed, low-profile three-dot sights. The Hi Power Standard is also available with optional low-profile target sights that are adjustable for windage and elevation.

TRIGGER

- The light single-action trigger breaks clean and crisp.

FRAME AND SLIDE

- The frame and slide are built from solid steel and keeps recoil light and manageable for accurate firing, even at a rapid rate. The Hi Power's balance in the hand is impeccable.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

A PERFECT PISTOL.

Though the Browning Hi Power was designed by John M. Browning, Fabrique Nationale's designer Dieudonne Saive saw this fine handgun into production. The original and still ultimate double-stack 9mm, the steel-framed Hi Power feels solid and fits nicely in your hand.

IMAGINE A CUSTOM-BUILT BROWNING.

Owning a custom Browning firearm is similar to that of owning a work of art that is made to your exacting specifications. The Browning Custom Shop works closely with you to ensure your creative ideas are satisfied, from the type of wood to the most unusual engravings you desire. Once designed, the project is then placed in the capable hands of highly skilled craftsmen to make your dream gun a reality.

The Custom Shop range comprises four grades, each of which includes a certain number of options. As the firearms are produced in-house, a multitude of options are available.

PRICE

- Pricing for the basic firearm, before custom enhancement, is available from the sales department at Browning in Morgan, Utah by calling (801) 876-2711. All prices are subject to change due to changing world currencies.

HOW TO BUILD A CUSTOM GUN

- Visit browning.com/custom to view or download the Browning Custom Shop brochure. In addition to showcasing the firearms available, this brochure displays and explains the many grades, engraving patterns, checkering patterns, stock and forearm designs and personal touches available.

HOW TO ORDER

- All inquiries for Custom Gun Shop products will be submitted to headquarters in Morgan, Utah. Once the basic specifications have been determined, a written order should be placed with the Morgan office. The specifications will be reviewed with the Custom Shop in Belgium, and a price and delivery date will be determined.

DELIVERY

- Actual production time will be based on the complexity and detail of the custom order. An approximate delivery date will be furnished with the factory cost quotation.

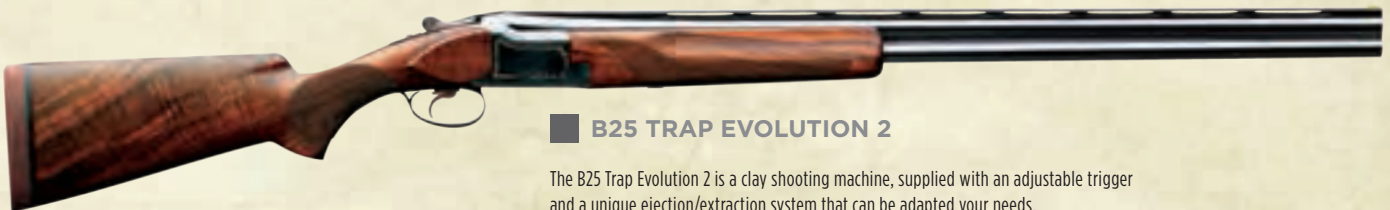

B25 SIDEPLATE TRAP

With a full sideplate design, the B25 Sporter is the epitome of over and under shotguns. This much appreciated model is generally configured with long barrels and a wide ventilated rib fitted with a mid bead sight.

B25 SPORTER NEW GENERATION

The B25 Sporter New Generation is a new model from the Custom Shop. In addition to an Olympic trigger, this model includes a tapered 5/16" - 7/16" top rib and ventilated side ribs. It is available in 30" and 32" barrel length versions. The adjustable stock is optional.

B25 TRAP EVOLUTION 2

The B25 Trap Evolution 2 is a clay shooting machine, supplied with an adjustable trigger and a unique ejection/extraction system that can be adapted your needs.

SECURITY

Every Browning ProSteel safe is rated by Underwriters Laboratories® (UL) to stand up to rigorous attacks on the body, door, handle and lock. These test attacks are performed by experienced professionals familiar with the design and construction of the safe. To combat such attacks, Browning ProSteel safes incorporate a number of security features at various levels. From robust locking mechanisms with multiple layers of lock protection, to thick steel bodies, to Pry-Stop Locking Bolts, the security of a Browning ProSteel safe is The Best There Is.

FIRE PROTECTION

Don't get burned by a lack of fire protection. Many safe manufacturers offer some type of fire rating; however, there are no industry standards to ensure that all ratings are measured the same. The best way to compare fire protection is to look at the overall thickness of insulation — more insulation means more protection. Additional design features, like external hinges, a full inner-door plate and the use of a Palusol® fire seal ensure that Browning ProSteel safes provide the best fire protection available.

BROWNING PROSTEEL SAFE TESTIMONIAL

On April 11, 2013, John B. was mowing his lawn when he suddenly found himself flying through the air and over a fence. "I sat up and straightened my glasses just in time to see my house become a huge ball of fire." Recalls John. "The explosion blew the walls right out of the house."

Heard over a mile away, the explosion is believed to have been caused by a natural gas leak. The explosion and fire all but leveled the house, taking with it decades of memories. Even though they lost almost everything, John and his family consider themselves lucky. "In another hour, that house would have been full of people coming home from work and school." John says. "It could have been much worse. We feel very blessed."

In the end, all that was left standing were a pair of water heaters and a section of brick wall that was partially shielded from the blast by John's Browning ProSteel safe. John called Browning, who sent a locksmith to open the safe. Both John and the locksmith were stunned when the safe opened to reveal that the contents were largely unharmed. John says, "Standing in the devastation, we were amazed that everything in the safe was okay."

John B.
McCullough, AL

APPEARANCE

Automotive grade paint with attractive and inspiring wildlife scenes. State of the art manufacturing techniques and quality materials. Furniture grade finishes. The result is appearance of the highest order and a safe that you will be proud to showcase in your home.

WARRANTY

Browning provides a Gun Safe Warranty that is equal to the best in the industry. The warranty covers:

- ATTEMPTED BREAK IN
- FIRE
- BREAK IN

If a safe is involved in one of the above situations and your homeowner's insurance policy does not cover the damage to the safe, Browning will repair or replace the safe. (Safe contents are not covered.) Shipping costs for a new safe, if necessary, are included. Some restrictions apply. See Safe Owner's Manual or browning.com for complete warranty information.

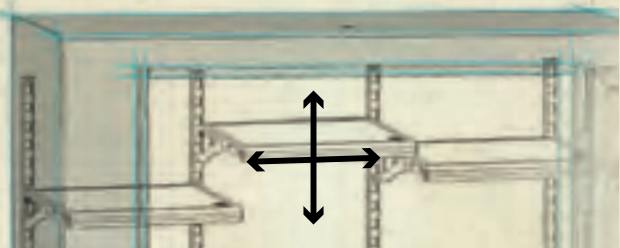

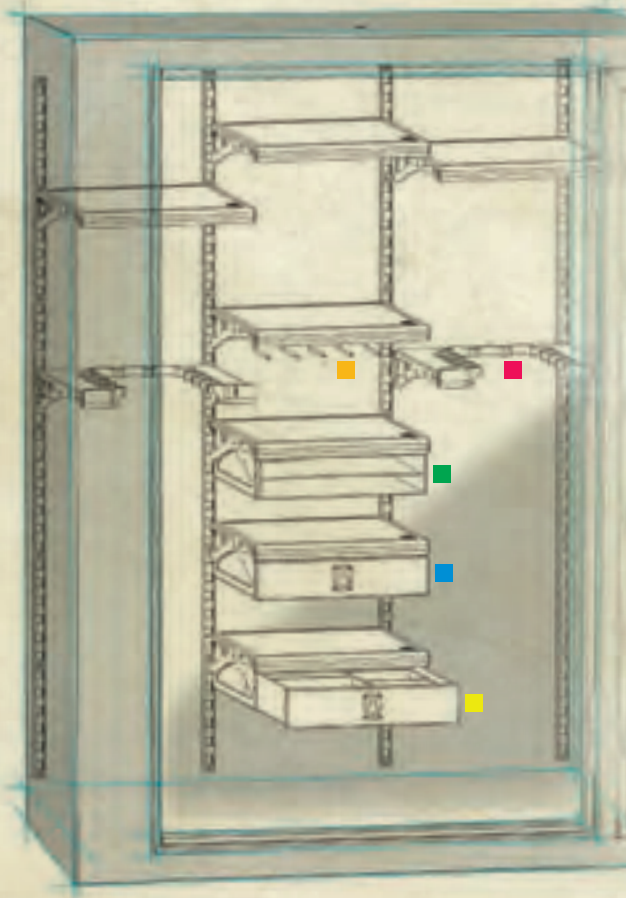

AXIS ADJUSTABLE SHELVING

MORE VERSATILE. MORE STORAGE. MORE GUNS.

A glance inside the average gun safe reveals loads of wasted space. The shelves in most safes cannot be precisely adjusted, nor can extra shelves be added or removed. Browning's Axis Adjustable Shelving can be configured to meet your exact needs and allows you to utilize every inch of interior space.

- Browning ProSteel safes lead the industry when it comes to safe interior storage.
- The exclusive Axis Adjustable Shelving (U.S. patent #D662341) is a completely customizable system with an array of shelves that can be configured to meet virtually every need.
- Unlike shelves in the competitors' safes that are either fixed in position or only offer vertical adjustment, Axis shelves can be adjusted up and down, side to side, added and removed to accommodate items over a broad range of sizes.
- Axis maximizes interior storage of long guns, handguns and other valuables.
- Several different, specific shelves and accessories are available as options (see page 122) to further customize the interior to meet your specific needs.
- The Axis shelf is made from a single piece of sturdy steel.
- Shelves are clad in a soft, protective polymer coating that is highly durable and designed to protect guns and valuables. It also adds a sleek appearance to the safe interior.
- Axis accessories are designed to easily mount to the solid steel shelf or barrel rack. (Compatible with safes that feature Axis Adjustable Shelving built in 2013 or later.)

Axis Adjustable Shelving utilizes tracks on the back of the safe interior that offer vertical adjustment. Shelves and barrel racks can be precisely adjusted to the vertical height needed to match what is on, above or below.

SHELF TYPES

PISTOL RACK*

- With five handgun capacity, the pistol rack stores its cargo under a shelf.

BARREL RACK

- 11 slots for long guns.
- The barrel rack can be raised or lowered to accommodate long guns, shotguns, carbines and modern sporting rifles.

FILE BOX*

- Protects and organizes important documents.

DRAWER*

- The sturdy drawer is perfect for all sorts of smaller goods that need to be organized.

DRAWER INSERTS

- Drawer inserts fit neatly into the Axis drawer. Money/Passport, Multipurpose, Pick and Pluck Foam and Jewelry inserts are available.

* These accessories must be mounted to a solid steel shelf or barrel rack.

DPX STORAGE SYSTEM

CONVENIENCE IS KEY.

Maximum gun capacity is important, but so is ease of access to more of your guns. Most safes put 4-8 easy-to-reach long guns on the outer row, next to the door. But a Browning ProSteel safe with a DPX door mounted gun rack adds as many as 13 more guns quickly accessible on the door, and adds up to 42% more long gun capacity to the safe. More guns and better access is a tough combination to beat.

- The patented DPX storage system (U.S. patent #7,409,790) is exclusively available on Browning ProSteel safes.
- This unequalled organizational tool allows you to store long guns, handguns, shooting gear and more on the back of the safe door.
- The DPX gun rack allows as much as 42% more long gun capacity inside the safe, and makes the guns on the door easy to access.
- The Scope Saver increases storage and protects optics.
- DPX pouches and pockets hold valuables and gear where they are easy to find and free up shelf space for even more stuff.

THE QUICK ACCESS DPX BARREL RACK

Flexible polymer wings protect the barrel finish, secure the barrel in place and allow firearms to easily be pushed into or pulled from the rack. (U.S. patent #D643500)

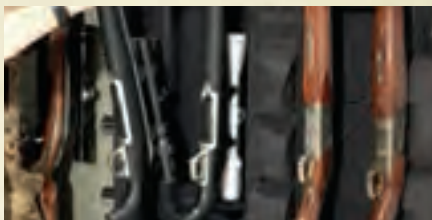

DPX HANDGUN POUCHES

The military-style MOLLE system straps on the DPX panel allow handgun pouches to be placed virtually anywhere.

MESH POCKETS

See-through mesh pockets hold smaller items and make valuables fast and easy to locate visually.

DPX SCOPE SAVER

Store long guns with optics on the DPX door rack with the Scope Saver. The recessed panel protects scopes and increases gun capacity.

HOW DO BROWNING PROSTEEL SAFES HOLD 42% MORE LONG GUNS?

- The long gun capacity is a series of three numbers, for example 11/22+7 on a 26 Cu. Ft. safe.
- The first number is the long gun capacity in the safe body with a Half Shelf interior (11 in the example).
- The second number is the long gun capacity in the safe body with an All Gun interior (22 in the example).
- The "plus" number is the long gun capacity on the back of the door (+7 in the example).
- Total capacity grows up to 42% in the Half Shelf configuration because there is a full rack of long guns on the door back.
- "Fast Access Guns" increase in both Half Shelf and All Gun configurations. These guns are defined as those that are on the front row of the safe body and the door gun rack.

*Due to the varying sizes of firearms, actual gun capacity may vary.

GUN CAPACITY COMPARISON CHART

CAPACITY COMPARISON	BROWNING PROSTEEL SAFE 26 CU. FT.	OTHER BRAND OF SAFE 25-28 CU. FT.
Body Capacity - Half Shelf Interior	11 Guns	12 Guns
Body Capacity - All Gun Interior	22 Guns	24 Guns
Door Capacity	7 Guns	N/A
Total Gun Capacity - Half Shelf Interior	18 Guns	12 Guns
Total Gun Capacity - All Gun Interior	29 Guns	24 Guns

Fast Access Guns - All Gun Interior	11 Guns	4 Guns

SAFE FEATURE ICONS

The icons on this page are a quick, easy way to identify and compare the features of Browning safes.

FORCE DEFLECTOR™ LOCKING SYSTEM

The Force Deflector Locking System (U.S. patent #7,665,405) prevents bolt or handle forces from reaching the lock by using a rotating cam device. It prevents energy transfer to the lock better than most systems used in the safe industry.

UNI-FORCE™ LOCKING SYSTEM

The finest Browning ProSteel safe locking mechanism uses robust cam locks and a large, multiple diversion bar system to prevent bolt or handle pressure from reaching the lock. Forces go to the cams and diversion bars, not the lock, for protection unmatched by other locking systems.

1" FORMED DOOR

The 1" Formed Door is engineered with a rugged steel face, back and reinforcement panels to provide excellent strength and attack protection compared to the competition.

DUO-FORMED® DOOR

The best safe door Browning offers is made from multiple layers of steel formed together to provide superior strength, pry resistance and attack protection. Full second panel for outstanding strength. The door face is 15/16" thick.

OMNIBARRIER® LOCK PROTECTION SYSTEM

A carefully engineered structure of steel hard plate and steel components designed to protect the safe lock from drill, punch and push attacks.

FIRE RATING (VARIABLE TIME)

A laboratory measurement of time and temperature (in Fahrenheit) used to compare the relative amount of fire resistance provided by a safe. Safes with a longer fire rating time provide more fire protection than a safe with a shorter time.

LAYERS OF INSULATION

The most important factor in fire protection is the total thickness of the insulation in the safe. More insulation means more protection from fire. Browning ProSteel safes use 1/2" thick gypsum panels, so the number of layers multiplied by 1/2" shows the total insulation thickness in inches.

REINFORCED DOOR FRAME

The door opening of the safe is strengthened by a U-shaped steel channel around the entire perimeter to create added pry and attack resistance.

180° HEAVY DUTY HINGES

Rugged hinges are machined from solid steel bar stock for strength. The hinges allow the door to swing open 180° for unhindered access to the safe interior. Hinge-side locking bolts maintain full security even if the hinges are cut off. The door is removable to simplify moving the safe.

SCOPE SAVER

With the Scope Saver, long guns with optics now fit on the DPX rack without taking up space inside the safe body. The optics are also protected from the bumps and dings of guns going into and out of the safe.

UL® SECURITY CONTAINER RATING

The industry standard test and rating for home/personal safes. Requires minimum construction specifications and passing a laboratory attack test. Premium Browning ProSteel models far exceed the minimum requirements for the UL Residential Security (Tool Attack) listing.

PRY-STOP CORNER BOLTS

Pry-Stop Corner Bolts (U.S. patent #8,276,527) provide better protection than other pry-defense designs. Innovative long locking bolts extend diagonally from a reinforced support at the corners of the door to protect against pry attack at the vulnerable corner areas.

PRY-STOP END BOLTS

Superior to other bolt designs which allow the locking bolt support bar to bend. Pry-Stop End Bolts are over two and one-half times longer and attach to a high-strength steel angle iron which prevents the locking bolt support bar from bending in a pry attack. The top and bottom locking bolts on the door side secure the critical door corners.

LOCKING BOLTS (VARIABLE SIZE)

The rugged steel pieces that move behind the door frame to actually hold the safe door locked and closed. Bigger bolts, and more of them, provide greater security.

BOLT DIRECTION

Better safes have locking bolts extending from all four sides of the door for extra resistance to pry attack. Safes with bolts on three sides have them on both sides of the door and on the top edge.

BODY THICKNESS (VARIABLE MEASURE)

The thickness of the steel that comprises the safe body. A smaller gauge number means thicker steel, which provides more security than thinner steel. The thickest Browning ProSteel safe body is 3/16" (on Platinum Plus) and this specification is not shown in gauge measurement.

INTERIOR LED LIGHT PACKAGE

The interior light package includes four LED light bars (five on tall safes) to illuminate the safe interior. This package makes it easier to find items in the safe.

DPX STORAGE SYSTEM

The DPX Storage System (U.S. patent #7,409,790) includes a rack on the back of the door to store long guns and make them easier to access (Except Compact Safes). Pouches and pockets organize other valuables. See the opposite page for a complete description.

AXIS ADJUSTABLE SHELVING

The exclusive Axis Adjustable Shelving (U.S. patent #D662341) is designed to maximize storage and provide convenience. Multiple shelf styles are available and can be moved to allow small and large items to fit in the safe and take up only the minimum amount of space. See page 97 for a complete description.

FIRE AND SECURITY GAUGE

To make understanding and comparing the fire protection and security features safes offer, a Fire and Security Gauge is located on every safe page. This 1-10 scale makes it easy to determine protection levels at a glance.

THE PERFECT UNION OF SECURITY, STYLE AND ADAPTABILITY.

Exquisitely finished, Platinum Plus safes incorporate all of Browning's most trusted security features, plus a heavy duty 3/16" steel body for unmatched rigidity and break-in resistance. The outer finish is flawless and surrounds a luxuriously appointed interior that is as versatile as it is beautiful.

WHY STEP UP TO A PLATINUM PLUS SAFE?

Stepping up to a Platinum Plus model gives you the advantage of an exquisite Grade VI cedar interior for a unique appearance. Thicker 3/16" (6 1/2-Gauge vs. 10-Gauge) steel adds additional mass and rigidity, while more locking bolts offer greater security and protection. A superior 120 min. fire rating keeps valuables better protected longer. An Axis Drawer with Multipurpose Insert, and File Box are included.

GRADE VI INTERIOR/LED LIGHTING

A fragrant cedar interior adds a rich quality to the safe. Interior LED lighting along the door frame makes locating items inside the safe much easier.

ELECTRICAL OUTLET

A new outlet allows electrical accessories to be added without taking apart power cords.

AXIS DRAWER AND MULTIPURPOSE INSERT

The Axis drawer mounts beneath an Axis steel shelf and includes a multipurpose insert that keeps small items organized, easy to locate and protected.

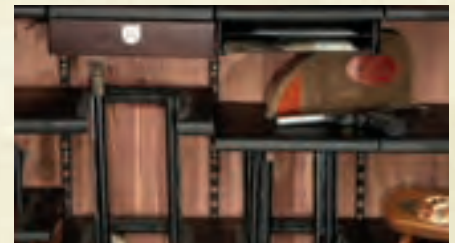

AXIS FILE BOX

Important documents may be irreplaceable and need to be easy to find. Keep track of them in the convenient File Box.

DPX SCOPE SAVER

Found exclusively on Browning ProSteel safes, the Scope Saver keeps your rifle scopes protected and ready for use.

AXIS ADJUSTABLE SHELVING

Platinum Plus Series safes come with an Axis interior standard.

THE "BEST SELLER" GETS EVEN BETTER.

The Medallion is the perfect mix of security, fire protection, storage features and a handsome appearance. It is a perennial best seller, offering the quality and peace of mind you demand from your gun safe.

WHY STEP UP TO A MEDALLION SAFE?

Stepping up to a Medallion Series safe buys added security with Pry-Stop Corner Bolts for improved protection against pry attacks, the Uni-Force Locking System that provides better protection and smoother operation and the Omnibarrier® Lock Protection System that protects against drill, punch and push attacks. Thicker steel (10-Gauge vs. 11-Gauge) means less body flex. A higher fire rating (90 min. vs. 75 min.) is also a benefit. For 2014, a new Interior Light Package and Electrical Outlet are included.

SMALL SIZE. BIG FEATURES.

Ideal for a small business, or tucked into the corner of a room or closet at home, our Compact safe is ideal for handguns, jewelry, important documents and cash.

H9 COMPACT SAFE INTERIOR

H9 COMPACT SAFE EXTERIOR

WHY CHOOSE A COMPACT SAFE?

Unlike other compact "safes" on the market, a Browning ProSteel Compact safe provides real safe quality and construction to keep small valuables, handguns and important documents secure against fire and theft.

SECURITY 12-Gauge steel body • 1" formed steel door • Force Deflector™ Locking Mechanism • Hardened steel pin lock protection • 1" diameter chromed locking bolts • Heavy-duty 180° external hinges • UL® tool attack listed **FIRE** Two layers of 1/2" fire-resistant insulation in the body and door • 1200° F/45 min. fire protection • Palusol® expanding fire seal • UL Type I Electronic Lock • Baked-on high-gloss finish • Beige two-shelf interior • DPX Door Storage System

A FORTRESS FOR YOUR TACTICAL FIREARMS.

Elegant in its understatement, the Black Label Mark IV is designed to accommodate modern sporting rifles as well as traditional long guns. These full-featured, no-nonsense safes provide maximum protection from fire and theft while adding a sleek tactical appearance to your room.

BLACK LABEL[®]
TACTICAL SAFES

NEW

WHY STEP UP TO A MARK IV SAFE?

Stepping up to the Mark IV gives the added versatility of Axis Adjustable Shelving for more interior organization potential. The Exterior Gear Loft provides a place to keep gear in a convenient location. The heavy-duty Duo-Formed[®] Door adds additional security while the new Electrical Outlet makes it easy to add accessories such as dehumidifiers and lighting.

AXIS ADJUSTABLE SHELVING

Multiple shelf styles are available and can be moved to allow small and large items to fit in the safe and use the minimum amount of space. Individual shelves can be adjusted to accommodate modern sporting rifles, carbines and shotguns.

EXTERIOR GEAR LOFT

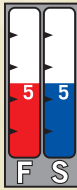

Tactical and hunting gear can be stored within easy reach on top of the safe in the semi-enclosed Gear Loft.

CARBINE BARREL LOOPS

Lower mounted barrel loops secure shorter rifles and shotguns to the DPX door panel.

TOP-NOTCH SECURITY.

A Black Label Mark III safe is optimized for storing today's gun collections where the selection may vary from over and under shotguns with 32" barrels to modern sporting rifles with 16" barrels. The versatile, best-in-class Cantilevered Modular Shelving maximizes storage space while making accessories easier to find.

BLACK LABEL®
TACTICAL SAFES

WHY CHOOSE A MARK III SAFE?

The Mark III fits in with today's modern, tactical look and takes shorter rifles and shotguns into special consideration with the short barrel loops on the DPX Storage System.

CANTILEVERED MODULAR SHELVING

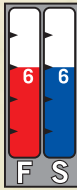

Quickly and easily adjust the shelving to meet individual storage needs. Barrel racks can be adjusted at various heights to accommodate long guns, as well as shorter carbine models. The cantilevered design eliminates the need for a vertical shelf support to add extra interior space.

DPX STORAGE SYSTEM

Includes a rack on the back of the door to store long guns and make them easier to access. Pouches and pockets organize other valuables.

A CUSTOM BLEND OF FEATURES.

A great mix of security and fire protection features, plus a stunning appearance package and interior lighting make the Select an attractive choice at a price that is tough to beat.

Select Series safes are available exclusively from Browning Full Line and Medallion Dealers.

WHY CHOOSE A SELECT SAFE?

A Select Series safe offers added security with Pry-Stop End Bolts and a big increase in convenience and capacity thanks to the Quick Access Rack with Scope Saver and full DPX Storage System.

NEW

CANTILEVERED MODULAR SHELVING

Quickly and easily adjust the shelving to meet individual storage needs. Barrel racks can be adjusted at various heights to accommodate long guns, as well as shorter carbine models. The cantilevered design eliminates the need for a vertical shelf support to add extra interior space.

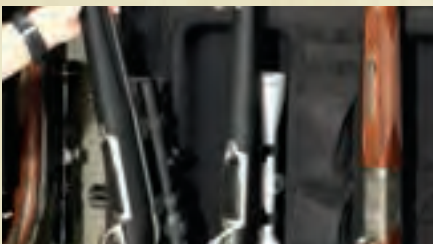

LED INTERIOR LIGHT PACKAGE

LED lighting around the door frame adds value and makes locating items in the safe easier. A pressure sensor turns on the lights when the door is opened.

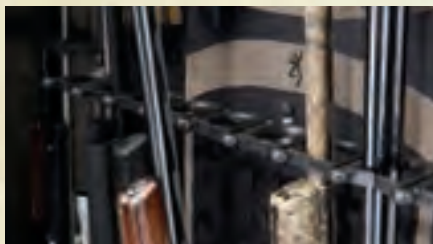

PRY-STOP END BOLTS

More than two and one-half times longer than door bolts, they attach to angle iron which prevents the locking bolt support bar from bending in a pry attack. The top and bottom locking bolts on the door secure the critical door corners.

DPX SCOPE SAVER

Store long guns with optics on the DPX door rack with the Scope Saver. The recessed panel protects scopes and increases gun capacity.

QUICK ACCESS RACK

Flexible polymer wings secure the barrel and allow firearms to easily be pushed into or pulled from the rack.

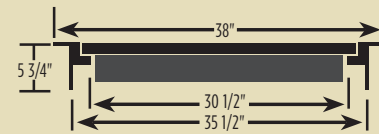

TURN AN ENTIRE ROOM INTO A VAULT.

When a safe just isn't big enough, you can turn an entire room into secure storage with a Vault Door. Whether for new construction or an existing room, the Vault Door can be installed to add walk-in security that won't soon be outgrown.

INTERNAL LOCK RELEASE

Allows the door to be opened from inside the vault to prevent accidentally being locked inside.

AXIS ADJUSTABLE SHELVING

Explore the full potential of Axis Adjustable Shelving by adding more shelves for maximum organization. Available for Platinum Plus, Medallion, Silver and Black Label Mark IV models produced in 2013 and later.

AXIS STEEL SHELF

The most basic shelf is made from tough steel with a protective polymer skin that protects valuables and handguns.

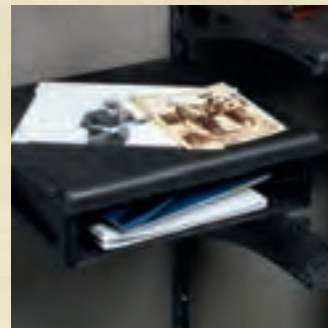

AXIS BARREL RACK

With 11 slots for long guns, the barrel rack can be raised or lowered to accommodate rifles, shotguns, carbines and modern sporting rifles.

AXIS PISTOL RACK / SCOPED PISTOL RACK

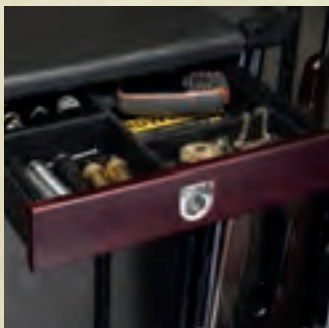

With a five handgun capacity, the pistol rack stores its cargo under the shelf, leaving the shelf available for possessions and gear.

AXIS FILE BOX

Important documents may be irreplaceable, valuable or both. Keep them all in the file organizer.

NEW

AXIS DRAWER WITH MULTIPURPOSE INSERT

Keep delicate jewelry and other small items organized, protected and easy to find.

AXIS DRAWER WITH MONEY / PASSPORT INSERT

Compartments are sized to organize cash, passports and other documentation.

NEW

AXIS DRAWER WITH JEWELRY INSERT

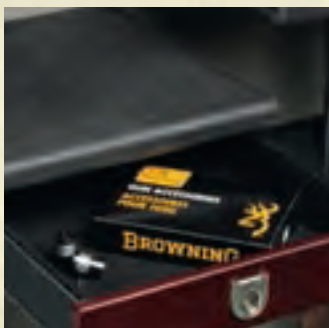

This insert protects and organizes valuables such as watches, rings, bracelets and necklaces.

NEW

AXIS DRAWER WITH FOAM INSERT

Now your most prized possessions can be isolated from potential damage. Pick and pluck foam is easily customized to fit any shape item.

AXIS DRAWER

The sturdy drawer is perfect for all sorts of goods that need to be separated.

AXIS BRIDGE

The Axis Bridge is designed to allow fine lateral shelf adjustments.

USER INSTALLED ACCESSORIES

Easy to install at home, these accessories are designed to organize and protect belongings.

A DRY-ZONE MOISTURE REDUCER

B ZERUST® VCI PROTECTANT

C DPX HANDGUN POUCHES

D PISTOL RACK 6-GUN

E PISTOL RACK 4-GUN

F VCI GUN SOCK

DRY ZONE MOISTURE REDUCER

Absorbs moisture without electricity, and is rechargeable in an oven • Can be reactivated indefinitely • One 500-gram box protects up to 37 cubic feet of enclosed space, about the volume of a standard 30" wide safe

A	SUGGESTED RETAIL	20.00
----------	-------------------------	-------

ZERUST VCI PROTECTANT CAPSULE

Small capsule emits an invisible vapor that forms a corrosion- and rust-resistant barrier on metal surfaces • Volatile Corrosion Inhibitors (VCIs) have been used for years to protect metal parts in industrial and commercial applications • One capsule protects a standard 30" wide safe for one year

B	SUGGESTED RETAIL	8.00
----------	-------------------------	------

DPX HANDGUN POUCHES

More handguns can be stored in the safe with the versatile DPX Handgun Pouches • Versatile pouches include snap-straps to allow use on the MOLLE System used on the DPX and also hook and loop fasteners for use on carpeted interior surfaces • Set of two (Not intended for use as a belt holster)

C	SUGGESTED RETAIL	30.00
----------	-------------------------	-------

PISTOL RACK

Store handguns more efficiently • Increases storage space on shelves • Access to handguns is made easier by placing them in an upright position

	DESCRIPTION	SUGGESTED RETAIL
D	6-Gun	30.00
E	4-Gun	20.00

VCI GUN SOCK

VCI (Vapor Corrosion Inhibitor) penetrates into the smallest crevices and drives out moisture where oils cannot reach • Provides full protection by forming a vapor enclosure around the firearm from muzzle to butt • Gives additional protection to all metal items in an enclosed area such as a gun safe or cabinet • Drawstring closure • Fits rifles and shotguns 48" to 56"

F	SUGGESTED RETAIL	18.00
----------	-------------------------	-------

TRADITIONAL, TASTEFUL PROTECTION FOR EVERY CLASSIC BROWNING.

Your classic Browning firearm deserves to reside and travel in an elegant fitted gun case that provides a place for everything from choke tubes to shooting gloves. Nothing speaks more eloquently of your good taste than a traditional fitted case constructed of fine leather, polished brass fittings and solid wood that creates the perfect backdrop for showing off your fine Browning firearm.

THE SOFTER SIDE OF PROTECTION FOR FIREARMS.

There are plenty of times that a soft case is the ideal solution for transporting your guns to the range, ranch or cabin. Soft cases are light, durable and slip behind the seat of your truck or into your car trunk with ease.

SOFT CASES AND RUGS DESIGNED TO GIVE YOUR PISTOLS A LITTLE EXTRA ZIP.

There is no better way to transport your pistol to the range or around the ranch than in a soft-sided zipper case or rug. These great looking, high-quality Browning cases and rugs protect both your pistol and magazines from everyday bumps and thumps so they'll be ready to go when the zipper gets pulled.

L	Rifles	1225098	68.00	Antique Basketweave, Leather	25 1/2 to 35 1/2

MOA ACCURACY IS IN THE BAG.

It's impossible to extract optimum accuracy from any firearm if it's not perfectly stable at the moment of firing. Browning's MOA sandbag-style shooting rests are the ideal way to make sure the only thing moving is your trigger finger when that bullet starts downrange. The clean, polymer-pellet filling conforms to most stock shapes and won't absorb moisture that could ruin your firearm's fine finish.

FINE TUNE FOR FULL POWER ACCURACY WITH THE BROWNING BOSS.

When trying to wring maximum accuracy out of any rifle, your two choices are try to find a factory load with acceptable accuracy, or experiment with handloads that offer improved accuracy but often at the cost of maximum velocity. Both are expensive and time consuming endeavors. With the Browning BOSS, demanding shooters like you can simply dial up maximum accuracy without sacrificing maximum velocity.

BOSS-CR ACCESSORY

The BOSS-CR accessory offers all the accuracy and tunable advantages of the original BOSS device without the muzzle brake feature. By simply replacing the original BOSS forward weight and recoil reduction components with the one-piece, non-ported BOSS-CR accessory, only the reduced recoil of the original BOSS is sacrificed. The BOSS-CR accessory is designed to fit only BAR Mark II and A-Bolt centerfire rifles previously factory-fitted with the BOSS.

It is important that the correct BOSS-CR be selected for a specific caliber and model of rifle.

EVERY BROWNING DESERVES THE BEST THERE IS IN BASES AND RINGS.

Browning firearms are designed and built to deliver outstanding accuracy. In order to maximize their accuracy potential, make sure they are equipped with genuine Browning bases and rings.

THE HEIGHT IS DETERMINED BY MEASURING FROM THE TOP OF THE BASE TO THE BOTTOM OF THE SCOPE RING. BARREL CONTOUR, OPTIC SIZE AND PREFERRED EYE RELIEF ALL AFFECT THE FIT OF THE SCOPE ON A RIFLE.

STANDARD HEIGHT (.300")

For scopes with an objective up to 44mm and a standard barrel contour.

INTERMEDIATE HEIGHT (.400")

For scopes with an objective up to 50mm and a standard barrel contour.

HIGH HEIGHT (.500")

For scopes with an objective up to 56mm and a standard barrel contour.

NEW FOR 2014

INTEGRATED SCOPE MOUNT SYSTEM

Integrated Scope Mount Systems utilize the ring and base into a single, ultra-rigid unit
 • Machined from 7000 series aluminum • Eliminates alignment problems and the possibility of a loose connection between bases and rings • .400" Standard height • .500" Intermediate height • .600" High height

BROWNING MAGAZINES FEED SMOOTHER FOR MAXIMUM RELIABILITY.

No firearm can ever be more reliable than the ammunition magazine that feeds it. All too many aftermarket magazines are long on promises but come up short on delivering reliable performance. When making every shot count, make sure that your Browning rifle, shotgun or pistol is feeding from a genuine Browning factory magazine.

NEW FOR 2014	CALIBER	CODE NUMBER	SUGGESTED RETAIL

PICK THE RIGHT CHOKE TUBE.

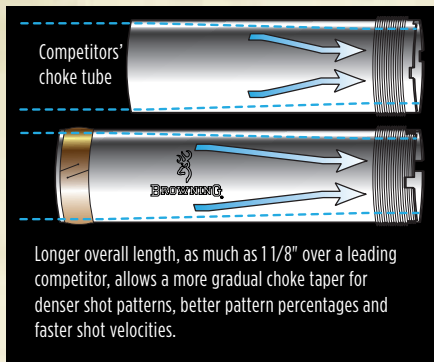

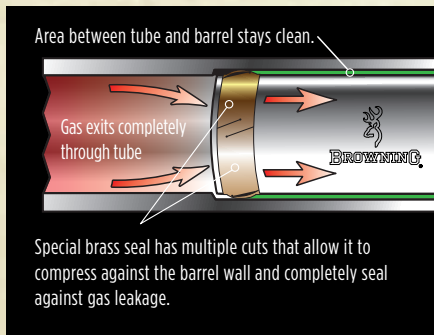

Demanding shooters know that selecting the right choke tube for a specific hunting situation or challenging target presentation is a key factor in making a successful shot. That's why Browning offers such a wide selection of choke tubes, ranging from Extra-Full constrictions for turkey, coyote and goose hunters to pattern-spreading Timber n' Teal tubes for close-in waterfowling. Every Browning choke tube is made to exacting standards to provide years of dependable service.

INVECTOR-DS

INVECTOR-DS CHOKE SYSTEM

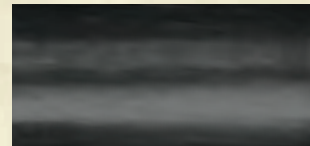

- Invector-DS choke tubes combine muzzle-end threads and thin-wall construction for a longer, more gradual taper that produces extremely consistent, dense shot patterns that tighten consistently in reliable, evenly scaled steps.
- Muzzle threads minimize the flare at the end of the barrel for improved appearance, a faster swing and improved balance.
- The "DS" stands for double-seal. Our proprietary differential-banded brass seal compresses against the barrel wall to keep the choke tube threads clean and make installation and removal easier than any other muzzle thread system.
- Invector-DS is standard on A5 and Citori 725 models.
- View the full line of new Invector-DS choke tubes on page 163.

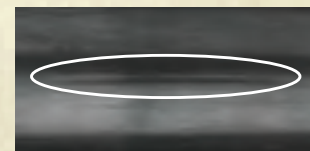

INVECTOR-Plus™

INVECTOR-PLUS CHOKE SYSTEM

- The Invector-Plus interchangeable choke tube system works with Vector-Pro and Back-Bored Technology to offer consistent, dense shot patterns.
- The longer choke taper inside an Invector-Plus choke tube produces consistent patterns and is far more durable than choke systems in competitors' guns, especially with steel shot.
- Invector-Plus eliminates gases slipping between the choke tube and barrel that could damage the choke tube and the barrel.
- Invector-Plus is standard on 12 and 20 gauge Maxus, Citori, Cynergy, Silver, BPS and BT-99 models.
- See pages 161 through 164 for a complete listing of choke tubes.

Browning's Invector-Plus choke tube is still flawless after 500 rounds of steel shot.

The competitors' choke tube is grooved and pitted after shooting 500 rounds of steel shot.

STANDARD INVECTOR®

STANDARD INVECTOR CHOKE SYSTEM

- The Standard Invector interchangeable choke tube system is for Browning's non back-bored barrels and offers consistent, dense shot patterns. It's far more durable than the choke systems found in competitors' guns, especially with steel shot.
- Standard Invector eliminates gases slipping between the choke tube and barrel that could damage the choke tube and the barrel and it's standard on 10, 16 and 28 gauge, and .410 bore Citori, Cynergy, Gold and BPS models.
- See pages 161 through 164 for a complete listing of choke tubes.

				<p>COMPETITORS' CHOKE TUBES</p> <p>Competitors' choke tubes show little pattern difference between choke constrictions.</p>
<p>INVECTOR-DS CHOKE TUBES</p> <p>Invector-DS tubes have even pattern percentage increments, offering just the right pattern for any shooting situation.</p>

PICKING THE RIGHT STEEL.

Ah, steel — that most adaptable of metals for knives and cutting tools. Browning picks every blade steel in every knife model we make with care, selecting the exact grade and type to create the perfect blend of toughness, corrosion resistance, edge holding ability, ease of sharpening and lasting value. The chart below offers a better understanding of blade steels to help you select the perfect Browning knife for every need.

BROWNING BLADE STEEL INDEX

STEEL TYPE	ATTRIBUTES	ROCKWELL HARDNESS	GOOD	BETTER	BEST
3Cr	A tough carbon stainless steel that offers superior sharpenability with good edge retention and moderate corrosion resistance.	54	EDGE RETENTION / HARDNESS CORROSION RESISTANCE SHARPENABILITY		
420	Similar to 3Cr, it's a tough carbon stainless steel that offers superior sharpenability with reasonably good edge retention and moderate corrosion resistance.	54	EDGE RETENTION / HARDNESS CORROSION RESISTANCE SHARPENABILITY		
AUS-6	A specialized stainless steel with vanadium added to improve wear resistance, sharpenability and corrosion resistance.	56	EDGE RETENTION / HARDNESS CORROSION RESISTANCE SHARPENABILITY		
440 Series	A classic all-around stainless for knife blades giving and excellent balance of sharpenability, good edge retention and high corrosion resistance.	56-60	EDGE RETENTION / HARDNESS CORROSION RESISTANCE SHARPENABILITY		
AUS-8A	A higher grade of Japanese vanadium stainless steel with additional carbon content. It offers improved wear resistance with reasonable sharpenability and excellent corrosion resistance.	58-60	EDGE RETENTION / HARDNESS CORROSION RESISTANCE SHARPENABILITY		
8Cr13MoV	A tough stainless that's usually tempered in the Rc56 to Rc58 range, it gives great corrosion resistance and edge retention along with good sharpenability.	56-58	EDGE RETENTION / HARDNESS CORROSION RESISTANCE SHARPENABILITY		
154CM/ATS-34	A premium, custom-grade U.S. or Japanese stainless used for both folding and fixed blades, it has a higher carbon and chromium content for greater hardness and outstanding edge retention.	58-61	EDGE RETENTION / HARDNESS CORROSION RESISTANCE SHARPENABILITY		
Sandvik® 12C27	A well-balanced Swedish stainless steel that provides high hardness with good wear resistance.	57-58	EDGE RETENTION / HARDNESS CORROSION RESISTANCE SHARPENABILITY		
X50 CrMo-15	A high-quality cutlery German stainless made with carbon, chromium and molybdenum to provide excellent sharpenability and good corrosion resistance.	56-60	EDGE RETENTION / HARDNESS CORROSION RESISTANCE SHARPENABILITY		
VG-10	A specialized, fine-grain Japanese stainless steel made with cobalt and vanadium that offers very good edge retention and hardness with all-around sharpenability and corrosion resistance.	59-60	EDGE RETENTION / HARDNESS CORROSION RESISTANCE SHARPENABILITY		
5Cr15MoV & 7-Cr	All-around stainless steels with similar qualities to the best 440 Series metals, providing good sharpenability, good edge retention and high corrosion resistance.	56-60	EDGE RETENTION / HARDNESS CORROSION RESISTANCE SHARPENABILITY		
N690Co	A premium grade of stainless steel from Austria with a higher cobalt content for greater hardness and exceptional edge retention, usually hardened at Rc58 to Rc61.	58-61	EDGE RETENTION / HARDNESS CORROSION RESISTANCE SHARPENABILITY		
1055 Tool Steel	A very durable high carbon conventional steel used in heavy duty cutting tools. It is often heat-treated to increase its flexibility and reduce breakage.	60-64	EDGE RETENTION / HARDNESS CORROSION RESISTANCE SHARPENABILITY		

HOW TO CHOOSE A FLASHLIGHT

Browning is a leading manufacturer of portable battery-powered lighting for outdoorsmen, hunters and shooters with more than 35 styles in the product line. To help you choose the right light — read on.

SIZE, WEIGHT AND POWER

When choosing a light, smaller, brighter and lighter are better. Today's high-output LEDs from manufacturers like Luxeon® and Cree® are so powerful and efficient they achieve the same light output as the old multi-cell C and D lights. The super bright Alpha and Alpha Max flashlights use a single AA battery yet are not much bigger than a shotgun shell.

LED VS. XENON BULBS

LEDs are preferred over Xenon bulbs for most uses, thus all Browning lights are now LED designs. LEDs use batteries more efficiently, illuminate at greater distances, emit a clean, even beam and will never burn out under normal use. Like most technology, LEDs keep getting better every year. For 2014 many of Browning's lights offer upgraded LEDs with 35% - 60% more output.

HANDHELD OR HANDS-FREE

Headlamps and cap lights allow the use of both hands for tasks like dressing a deer, fixing a truck or finding a path through the woods. Modern technology makes many headlamps as powerful as larger handheld flashlights. The MicroBlast headlamp can be worn either as a headlamp, clipped to a shirt pocket or to the brim of a hat.

LONG RUN TIME

By using advanced digital circuitry, highly efficient LEDs and low-resistance switches, Browning is able to offer extra long run times on many lights. Most Tactical Hunter lights will run for 20-60 hours on the low setting. These extended run times could be the difference between getting home safely and having to spend the night in the woods.

WATERPROOF AND SUBMERSIBLE

Because the great outdoors doesn't always have great weather, Browning has redesigned several flashlights to be waterproof and submersible to 3 feet for 30 minutes (ANSI IPX7). Most of Browning's other flashlights are O-ring sealed for greater water resistance (IPX4). The High Noon LED Spotlight is submersible and it floats.

BATTERIES

Lithium batteries are used in many of Browning's highest-performing lights, such as Blackout and Nitro. Lithium batteries pack twice the power of alkaline batteries for their weight, and operate well at very cold temperatures. Other lights in the Browning line use AA and AAA alkaline batteries because they cost less than lithium and are readily available anywhere in the world. The latest integrated circuit designs in Browning's Pro Hunter and Alpha flashlights allow alkaline batteries to approach the performance of lithium batteries.

SWITCH SETTINGS

Multiple switch settings (high, low and in-between) help preserve battery life and allow selection of colors and flashing options. The lock-out switches found on most of Browning's lights keep the light from accidentally turning on in a pack or pocket. A disorienting Fast Strobe setting is now available on many Browning lights, and it has proven useful for self-protection and for signalling during an emergency.

RED, GREEN AND BLUE

Colored LEDs help preserve night vision and are great for map reading. They are less obvious than white light to many types of game animals.

FL-1 FLASHLIGHT PERFORMANCE STANDARDS

Browning proudly participates in the FL-1 flashlight performance standards for measuring and stating performance claims for all portable lights. This includes Brightness (Lumens), Distance, Run Time, Water Resistance and Impact Resistance. FL-1 provides the only reliable apples-to-apples comparison between models and is used by most major manufacturers. Look for these FL-1 symbols on Browning light packaging.*

* For Browning lights with multiple settings, the lumens, battery life and distances are stated at the highest setting (100% power), unless indicated otherwise.

LUMENS = BRIGHTNESS

The output of a traditional 2D cell flashlight is approximately 15 - 20 lumens. The latest LED flashlights can have an output of more than 700 lumens.

BATTERY LIFE

Battery Life (Run Time) is defined as the time elapsed from when the batteries are new to when the light reaches 10% of the original brightness.

MAXIMUM DISTANCE

Maximum Distance is measured as the distance from the light source to where it decreases in brightness to 0.25 lux — about the brightness of the full moon on a clear night.

WATER RESISTANCE

Water Resistance (FL-1 Standard IPX4) is tested by spraying water onto the light from multiple directions. This simulates a heavy, all-day rain.

WATERPROOF AND SUBMERSIBLE

Waterproof and Submersible (FL-1 Standard IPX7) assures water cannot get inside the light. This is conducted for 30 minutes at a water depth of 1 meter (about 39").

IMPACT RESISTANCE

Impact Resistance (FL-1 Standard IM) measures how well the light resists damage when dropped repeatedly from a height of 1 meter (about 39") onto concrete.

MORE CHOICES THAN EVER BEFORE.

For 2014 Browning has taken technical outerwear to the next level, more specifically to the next three levels. If you are one of the hardest of the hardcore big game hunters, you will be immediately drawn to the all new XM Elite. XM Elite uses premium fabrications not found anywhere else in the Browning line-up to maximize protection from the elements. Hell's Canyon receives a makeover with more styles and even more features to elevate performance. The stalwart Wasatch line adds value-packed technical clothing. One thing is for certain, Browning has come out swinging and is ready to give you the edge when it's time to go toe-to-toe with Mother Nature.

XM ELITE — PREMIUM, UNCOMPROMISING PERFORMANCE.

Whether you're stalking caribou in Newfoundland or tracking a trophy bull elk in Colorado, it's best to leave nothing to chance when it comes to choosing hunting clothing. If you demand premium no compromise products, you need new Browning XM Elite.

XM Elite is the warmest, highest quality technical outerwear Browning builds. It has been researched extensively to maximize performance in adverse weather conditions and offer superior comfort when moving. Premium Browning Pre-Vent fabric is both rugged and quiet. Fully-taped seams ensure 100% waterproof, windproof and breathable capabilities. The PrimaLoft® insulation used in XM Elite offers the highest insulation value of any of Browning's outerwear. XM Elite is also the only place in the line-up where you will find premier 800 fill-power down and the trusted warmth of 100% Merino wool. In addition to premium materials, XM Elite adds functional touches you will appreciate.

HELL'S CANYON — SEE YOU THERE.

Browning Hell's Canyon has made a name for itself as tough, all-conditions gear. Now it's revamped and badder than ever with additional styles and new technologies like ADVANCED SCENT CONTROL that satisfy your specialized needs, and look great doing it.

The entire Hell's Canyon line has been redesigned and now includes ultralight rain wear, PrimaLoft® insulated models, lightweight styles for warmer temperatures, tough 3-Layer gear and even base layers. Exclusive Pre-Vent fabrics offer the tough performance a name like Hell's Canyon implies. PrimaLoft insulation provides an excellent warmth-to-weight ratio. If that isn't enough, the addition of the ladies Hell's Belles line brings hardcore hunting gear and excellent protection to outdoorswomen.

WASATCH — MORE STYLES, BETTER VALUE.

For 2014, the value and performance that Wasatch has long been known for has expanded into even more field wear options and new technical outerwear.

Wasatch does one thing and does it well — it gets the job done. New soft shell pieces bring this windproof, breathable and water-resistant fabrication to the masses, while insulated rain wear offers true technical outerwear at a great price.

Insulation layers range from warm, quiet fleece to good-looking hoodies with style that extends beyond the woods and into downtown. New field wear options include Mesh-Lite pieces that are ideal for hot weather bowhunting and sitting around a water tank during dove season.

Wasatch didn't forget about the ladies and youth either. Both will find designs that are comfortable, stylish and rugged.

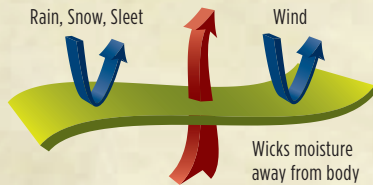

PRE-VENT

WATERPROOF • WINDPROOF • BREATHABLE

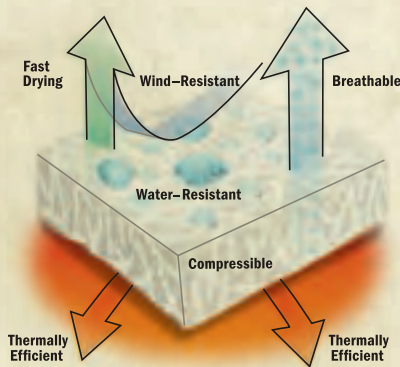

PRE-VENT — SUPERIOR WATERPROOF, WINDPROOF AND BREATHABLE FABRICS.

- Pre-Vent is Browning's waterproof, windproof, breathable fabric.
- Pre-Vent keeps out rain, snow and wind while breathing away perspiration to keep you warmer and drier.

PRIMALOFT IS WARM, WHETHER IT'S WET OR DRY.

- PrimaLoft® is a premium performance insulation engineered for superior warmth, water-resistance, loft and compressibility.
- PrimaLoft fibers are densely packed and retain heat better than other insulations for improved thermal efficiency.
- PrimaLoft fibers are treated to repel water and absorb less water, making it more water-resistant and faster drying than other polyester insulations.
- PrimaLoft fibers are tightly compressed for improved wind-resistance, less bulk and extreme compression.
- The fine-fiber, high-loft insulation keeps you warmer in extreme conditions — even if it gets wet.
- PrimaLoft is so good, it was chosen by the U.S. Military. Over 1,000,000 PrimaLoft military garments are deployed in active service around the world.

SIZING CHART (MEASUREMENTS IN INCHES)

	S		M		L	XL

Every garment is designed and built to the specifications on the charts above. Offered in 3XL sizes in many styles, which are cut larger throughout.

ADVANCED SCENT CONTROL™

GET THE ADVANTAGE OF A TWO PRONGED ATTACK ON HUMAN ODOR.

As long as hunters have headed into the field, they have worked hard to outwit the keen noses of wary game. To combat human odor, Browning is proud to introduce two-level protection with new **ADVANCED™ SCENT CONTROL**. **ADVANCED** is the next generation of scent control and revolutionizes this critical aspect of hunting. Rather than relying on stifling carbon technology, **ADVANCED** uses two level technology to first attack the bacteria that causes human odors. Secondly, it captures human scent before it escapes into the air. This one-two punch helps control detectable human scent, regenerates with every wash/dry cycle, lasts for the life of the garment and adds no noticeable weight or stiffness. The result is that you can go undetected longer and get closer than ever before for a perfect, well-placed shot.

ADVANCED SCENT CONTROL

- Attacks bacteria that causes human odors.
- Captures human scent before it can escape into the environment.
- Recharges easily.
- Lasts for the life of the garment.
- Adds no noticeable weight or stiffness.

ODORSMART™

CONTROLS ODOR AT THE START.

- Human odor is caused by bacteria that thrive on the skin. The bacteria's waste produces odors that are detected by deer and other big game animals.
- OdorSmart attacks bacteria in the microclimate around the skin, helping to kill the bacteria before odors develop.
- OdorSmart lasts the life of the garment with normal care, and does not require recharging or special cleansers. You only need to wash OdorSmart items as instructed on the care label.

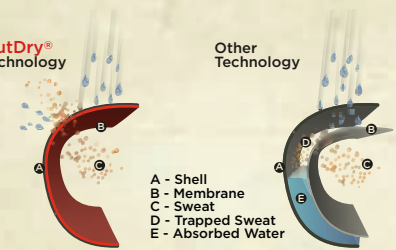

HARNES ACCESS ON SELECT HELL'S CANYON OUTERWEAR.

- Select Hell's Canyon outerwear now offers Harness Access.
- Allows a treestand safety harness to be comfortably worn underneath your parka or jacket.
- Improves concealment as the harness no longer interferes with the camouflage pattern on the garment.
- Easy access to pockets.

OutDry® Technology

Other Technology

NO MORE COLD, WET HANDS.

- Cold, wet hands are often caused when cold water is trapped between the outer shell of the glove and the waterproof liner. It's like inserting a small plastic bag inside a larger bag, then filling the space between the two bags with ice water. Your hands stay dry, but still get cold.
- The OutDry® membrane is laminated to the inside surface of the fabric shell and eliminates the space between the shell and liner, leaving no place for cold water to collect.
- This unique construction offers a sleek fit with improved finger dexterity and eliminates torn or loose fitting liners.
- When combined with PrimaLoft® insulation you get the benefit of even more warmth.

ATHLETIC CUT

REGULAR CUT

WHAT FIT TO CHOOSE?

- Browning outerwear is divided into Athletic Cut and Regular Cut.
- Athletic Cut provides a trimmer, tailored fit with reduced bulk. Athletic Cut garments are comfortable with less snagging on brush.
- Regular Cut is a traditional, full cut design that offers maximum freedom of movement.
- Athletic Cut is cut straight, or slightly tapered, from the shoulders to the hips. If you don't exactly fit this body shape, a larger size can be chosen.
- Regular Cut is tailored for a wide variety of body shapes with a fuller fit. If you are a larger hunter, or just want a little extra room, you will prefer this fit.

KILL CHILL WITH WINDKILL.

- Our windproof, breathable WindKill fabric is 100% windproof, highly breathable and water-resistant.
- A lightweight barrier, WindKill prevents chilling winds from penetrating the fabric to keep you warm.

	XS	S	M	L	XL
MEN'S GLOVE SIZING CHART					
Hand	7-7 1/2	8-8 1/2	9-9 1/2	10-10 1/2	11-11 1/2

Measure around the flat of the hand just below the knuckles, excluding the thumb. Number of inches around hand equals glove size.

	S	M	L	XL	2X
FOR HER GLOVE SIZING CHART					
Hand	6 3/4-7	7-7 1/4	7 1/4-7 1/2	7 1/2-8	8-8 1/2

Measure around the flat of the hand just below the knuckles, excluding the thumb. Number of inches around hand equals glove size.

RAINWEAR ON STEROIDS.

XM Elite Soft Shell takes rainwear to the next level. Worn alone, the fully-taped, 3-Layer fabric keeps you dry in the wettest conditions possible. Slip a PrimaLoft®, down or fleece insulating layer underneath and your comfort range is extended into severe conditions.

MOTHER NATURE'S BEST.

Nothing beats down for maximum warmth, minimum weight and extreme packability. XM Elite combines the benefits of high-quality 800 fill-power down with an ultralight, functional design to provide the ultimate jacket that is superb as a stand-alone outer garment or layered under a waterproof shell.

NEW

SUPERIOR 800 FILL-POWER DOWN.

Down has the highest warmth-to-weight ratio of any insulation making it the proven winner when it comes to maximum warmth without excess weight. XM Elite's specially selected and tested 800 fill-power down is the best of the best. Premium 800 fill-power down provides better performance with less material, resulting in a lighter weight jacket that stuffs into a smaller package when not in use. The down is surrounded by an ultralight fabric that is water- and wind-resistant. No coatings are added to maximize breathability.

ULTRA-LITE WITH MAXIMUM FEATURES.

For hunting in early season conditions, it's tough to beat Hell's Canyon Ultra-Lite. The focus here is on breathability and mobility, making Ultra-Lite ideal if you are an active hunter who covers miles of ground. It is also great for cold weather when worn over an insulation layer like down, fleece or PrimaLoft®. New **ADVANCED SCENT CONTROL** puts you closer to game with less chance of detection.

MAXIMUM VERSATILITY.

The 4-in-1 parka concept may be considered by some as “old school” but we believe it is alive and well. Hell’s Canyon takes the idea up a notch by eliminating weight and bulk, and adding extra features for enhanced performance. The reversible zip-out liner features PrimaLoft® insulation that ensures maximum warmth with minimum weight.

WARMTH WITHOUT BULK.

As an outerwear piece for layering, PrimaLoft® can't be beat. It has become the premier insulation because of its high warmth-to-weight ratio and ability to shed water so you stay warm if it gets damp. Combined with a waterproof shell, the Hell's Canyon PrimaLoft Jacket becomes an effective mid-layer for protection against cold, wet conditions.

THE EVOLUTION OF SOFT SHELL.

Soft shell fabrics are ideal for hunting. The fabric is tough, doesn't pick up burrs and sticks, and is highly wind- and water-resistant. Maybe most importantly, soft shell fabric is all this while remaining extremely quiet.

FLEECE. TRUSTED PERFORMANCE.

Cozy usually isn't a term used with hunting clothing. But when it comes to soft, warm Wasatch Fleece, the word fits. The mid-weight fabric is ideal as an insulation layer in cold weather and as an outer layer in cool, dry conditions. Wasatch Fleece is also supremely breathable and ultra quiet for silent stalking.

TOUGH FOR KIDS' SAKE.

Kids play hard and given the opportunity, will gladly hunt or hike with equal zeal. While other camo clothing for kids isn't any tougher than street clothes, Wasatch Jr. is different. Wasatch Jr. is built to the same tough standards as Browning's adult gear.

WATERFOWLING'S A DIRTY BUSINESS... AND BUSINESS IS GOOD.

Keeping hunters warm and dry is a mission taken seriously at Browning. Waterfowling, especially, requires gear to be designed with extra features only real-world experience can yield. Dirty Bird bridges the gap between keeping hunters dry, warm and comfortable in the marsh without the designs themselves inhibiting the freedom of motion necessary for a smooth, easy swing on a passing bird.

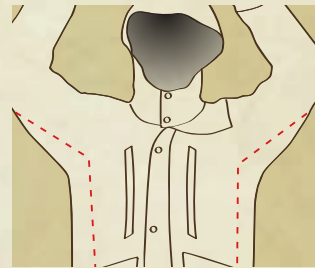

ANGLE-ENTRY POCKETS

- Angle-Entry pockets are designed around the arm and hand.
- When the hands are above the elbows they naturally point up, and when they are below the elbows they point down.
- The interiors of the chest accessory Angle-Entry pockets and the shell pockets are slanted down to align with hand angles while the two handwarmer Angle-Entry pockets slant up.

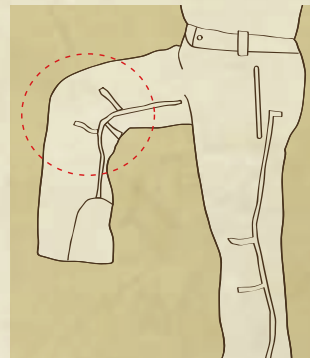

RAGLAN SLEEVES

- Raglan sleeves are cut at a long tapering angle right up to the collar line.
- The top of the sleeve becomes one seamless piece of fabric all along the shoulder with no exposed seams to leak, even in the worst downpours.

ARROW GUSSETS

- The Arrow Gusset armpit design has a smooth, tapering shape as it rises along the side to under the sleeve.
- Offers a better fit, enhanced range of movement and no binding.

ARTICULATED KNEE

- Vari-Tech Temperature and Motion Design adds highly-tailored pleated leg construction.
- Pre-curved knee design follows the natural bend of the knee joint for less bunching of material behind the knee when sitting.
- Offers greater ease of motion when walking and climbing in and out of boats and blinds.

VARI-TECH DESIGN

- Vari-Tech Temperature and Motion Design mixes insulation weights.
- Heavier PrimaLoft® Synergy insulation is placed in the body to maintain core temperature.
- Bonded 3-Layer fabric insulation in the sleeves for warmth, ease of movement and a full range of motion.

GET DOWN AND DIRTY.

Dirty Bird is the ultimate gear for waterfowlers. The designs benefit from hands-on design and feedback from the Browning Pro-Staff and hard-core hunters.

IT ISN'T ALWAYS RAINING.

If the skies are clear and the temperature is warm enough that marsh water is still in liquid form, a lighter weight jacket is a better choice than a heavy parka shell. These offerings provide warmth and wind resistance, and make great insulation layers.

BETTER THAN BASICS.

Fall is a tricky season. Mornings on the marsh reveal frost and temperatures cold enough to put a film of ice on the water. After a couple of hours, the sun is out and the extra clothing layers come off. When this happens, great looking Dirty Bird fleece is enough to keep you comfortable and concealed.

SAFETY FIRST.

Often overlooked until the last minute of hunt preparation, the safety orange vest is often a necessary hunting requirement. Don't skimp on a cheap vest, buy a long lasting vest that is legal and functional with large pockets for gear and ammo.

PHEASANTS FOREVER® — JOIN THE CAUSE.

Without the conservation efforts of Pheasants Forever, millions of acres of prime pheasant habitat would be lost. Pheasants Forever chapters all over the United States work to protect, restore and enhance wildlife habitat by establishing and maintaining local and regional projects. From encouraging farmers to leave longer wheat stubble to the purchase of upland habitat land, Pheasants Forever continues to work to preserve America's favorite game bird. To become a member or volunteer, please call toll free (877) 773-2070. With every Browning Pheasants Forever product sold to consumers, we proudly make a contribution to this most worthy conservation organization.

Bird'n Lite®

A

RC
REGULAR CUT

- Wide nylon shoulder straps transfer the load to the shoulders, yet still allows you to swing through the bird naturally.
- Quick-release sternum strap helps keep the weight centered between the shoulders for improved balance and less fatigue.
- Fully-adjustable load bearing straps place the load's center of gravity where it's most comfortable to carry.
- Ergonomically-contoured, padded adjustable waist belt offers added support to the lower back and allows part of the load to be carried on the hips for greater comfort.
- Quick-release composite buckle allows for quick on and off.

EASE YOUR BURDEN.

Carrying pheasants, water, lunch and shells can get heavy in a traditional upland rig. Ease your burden and hunt harder, for longer, with Browning Bird'n Lite gear. Essentially a backpack in disguise, the innovative load bearing system evenly distributes weight between your shoulders and hips, securing it from flapping and swaying to reduce fatigue and increase comfort all day long.

DON'T LOSE THE EDGE.

Sitting on the couch all winter not only widens the waistline, it also takes a toll on your shooting skill. While many ranges offer year-round shooting, being out in the cold is less than fun. With the Ballistic Insulated Shooting Jacket, it's easy to keep your skills honed without sacrificing warmth and comfort.

MEET THE MAN BEHIND BROWNING BLACK LABEL TACTICAL GEAR.

JARED WIHONGI

With 25 years of blade fighting under his multiple black belts (including Filipino Pekiti-Tirsia Kali), international martial arts instructor and SWAT officer Jared Wihongi proudly endorses Browning's Black Label Tactical Gear. From confidence honed by experience, Jared knows that the Black Label line of tactical knives, lights, clothing and other gear will satisfy the requirements of demanding professional operators and tactically-oriented civilians alike.

**HARD CORE TACTICAL
BLADES FOR YOUR HARDEST TASKS.**

When the going gets tough, the tough draw a Black Label Tactical Blade. These rugged knives are no-nonsense tools designed to help you cut your way out of any trouble. You can carry a Black Label Tactical Blade on any mission and in any environment with absolute confidence.

A Blade-Tech™ polymer sheath comes with each Black Label fixed blade. These sheaths add security and adjust for carry angle. The Tek-Lok™ clip adjusts for belt width.

The polymer sheath on the Rail System knife attaches in seconds to the MIL-STD 1913 accessory rail on a firearm or other device. This patented design by Kelly Van Orden of Battle Blades adds a whole new dimension to the tactical firearm/knife platform. MIL-STD 1913 rail section as shown is not included.

MERELY CALLING THEM EXOTIC DOESN'T DO THEM JUSTICE.

Some knife companies produce funky fantasy knives and wishfully call them serious tactical tools. Browning Black Label specialty knives are designed to be all-business blades, rugged and ready when the time comes for you to do some serious tactical work.

Reinforced nylon sheath holds all three Stick-It throwing knives.

A Kydex neck sheath with matte black chain keeps the Tracer ready for instant use.

IT'S NOT JUST A TACTICAL LIGHT. IT'S A TACTICAL LIGHTING SYSTEM.

Black Label Tactical Lights are designed from the ground up to work as a modular system. Start with the basic light and add components as needed to expand your tactical lighting capabilities. Configure the light to match your mission with Browning Black Label.

TACTICAL TAILCAP SWITCHES

- Multi-mode push-button tailcap switches allow partial depression for a quick search and full depression click to provide continuous lighting for threat identification and target engagement.
- Textured rubber-covered switch prevents finger slippage during activation.
- Rotating tailcap lock-out prevents accidental activation and a quick twist enables the light.

REMOTE CABLE SWITCH ENDCAP ACCESSORY

- Many Black Label lights (and many other Browning flashlights) accept a remote cable switch endcap accessory that allows you to activate the light while it is mounted on a long gun.
- The remote switchpad itself may be located on the pistol grip or forearm of a long gun with the included mounting hardware.

INTERCHANGEABLE METAL FRONT BEZEL RINGS

- Select from a smooth bezel for snag-free weapon-mounted applications or a crenelated strike bezel for handheld self-defense applications.

MULTIPLE MODE CAPABILITY

- Most Black Label lights offer a choice of continuous full output, continuous low output and a rapid strobe mode.
- Simply toggle through the modes by quickly pressing the tailcap switch.

RAPID STROBE MODE

- Most Black Label lights offer a rapid strobe mode.
- The rapid strobe mode is ideal for rescue signalling or to disorient an attacker.

MIL-STD 1913 RAIL MOUNT

- Allows many Black Label lights (and many other Browning flashlights) to be attached to any MIL-STD 1913 Picatinny accessory rail.
- Included screwdriver allows simple installation of the light onto the mount.
- Thumbscrew allows easy installation and removal of the light to the rail without tools.

INTERCHANGEABLE REAR GLASS-BREAKER POINT

- Many Black Label lights are equipped with a hardened metal point on the rear bezel to allow you to break window glass for emergency egress from a vehicle or glass-enclosed environment.

REMOVABLE ANTI-ROLL METAL FINGER RING

- Several Black Label flashlights are equipped with a metal anti-roll finger ring to prevent the light from rolling on a sloped surface, and allows you to use the popular "syringe" technique with a defensive handgun.

FL-1 1-METER WATERPROOF CERTIFICATION

- Most Black Label lights are certified to meet the latest international FL-1 Standard to operate after being submerged in 1 meter of water for 30 minutes.

STACK THE ODDS WITH BLACK LABEL TACTICAL FLASHLIGHTS.

Most tactical situations happen without warning, and many potential threats will use the cover of darkness to their advantage. Stack the odds in your favor by putting some light on the subject with these new Black Label tactical flashlights. Whether handheld or weapon-mounted, they are designed to be compact, rugged, powerful and dependable under the most demanding tactical conditions.

----------	--	---------	-------	-------------------------	---	--------------------------

SEEING THE THREAT IS THE FIRST STEP IN DEFEATING THE THREAT.

A threat that can't be seen is a threat that can't be rapidly dealt with in an effective manner. The Black Label EDC (Every Day Carry) and Approach tactical lights are designed to be used handheld or they can be quickly mounted on your defensive firearm. Both models put the lumens downrange to help you detect, identify, distract and deter any threat — anywhere, anytime.

A NEW

Install the smooth bezel for snag-free firearm-mounted applications or the crenelated strike bezel for handheld self-defense applications.

A metal pocket clip allows secure carry of the EDC Light Module in either your front or back pocket as a handheld flashlight.

The rail bracket remains on the MIL-STD 1913 Picatinny rail of the firearm. The EDC Light Module instantly slides onto the rail bracket without tools for firearm-mounted applications.

Two ambidextrous side tailcap switches are easy to access with either hand for momentary lighting. A single under-switch enables continuous lighting in high, low and strobe modes.

EDC Light Module activation can be locked out by partially unscrewing the front bezel ring.

EDC Light Module shown in pocket carry configuration.

EDC Light Module shown in firearm-mounted configuration.

MAKING A CASE FOR PROFESSIONAL GRADE GEAR.

Stash it, stow it, grab it and go with Browning's Black Label tactical bags and cases. From guns and ammo to range gear and tactical tools, pack them right in Black Label and you'll be ready to roll.

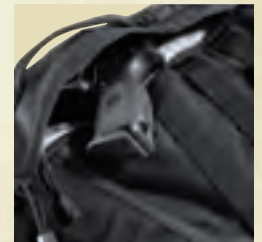

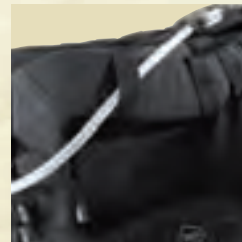

NEW

E

The new Alfa Tactical Gear Bag provides loads of room for your guns, ammo and accessories. The wide opening offers quick and easy access to everything inside.

The Alfa Tactical Gear Bag instantly converts from a well-balanced hand duffel to a rugged double strap backpack for longer treks across the range with heavier loads.

The Alfa Tactical Gear Bag is hydration compatible so you'll never run dry, an especially important feature when training during warm weather.

The Alfa Tactical Gear Bag's hidden pistol pocket allows discrete transportation and storage (plus instant access) to your lawfully-carried concealed handgun.

BLACK LABEL TACTICAL CLOTHING — THINK OF IT AS TACTICAL HARDWARE YOU CAN WEAR.

Tactical clothing is hot, but you know that a gritty label on everyday outdoor clothing doesn't make it tactical. Browning Black Label breaks out from the "me-too" tactical clothing crowd by offering the features real professionals — working cops, firefighters, paramedics, soldiers, range masters, special operators and savvy civilians want and need. Browning's Black Label Clothing is designed and manufactured with one object in mind, to keep you comfortable in any environment and to help you be ready to meet any challenge. That's why Browning's Black Label Tactical Clothing is The Best There Is. Period.

CONCEALACCESS ENTRY

- ConcealAccess side seams are secured with zippers or hook and loop fasteners yet open instantly for access to your lawfully concealed sidearm.

REACTAR POCKETS

- Pockets inside the shoulders accept a REACTAR G2 pad that absorbs recoil from hard-kicking rifles and shotguns. REACTAR G2 pad is sold separately.

SNAPSHOT ACCESS

- SnapShot magnetic buttons allow instant access to your lawfully concealed sidearm carried under the shirt in a shoulder holster.

CONCEAL POCKETS

- Concealed pocket lets you stow your cell phone, carry permit or credentials, tactical lights and other items yet have them right at your fingertips.

EYEWEAR/MIC/RADIO LOOP

- Front placket loop keeps eyewear, a small radio or a microphone handy for instant access with either hand from any position.

PEN POCKETS

- Pen pockets on the sleeve keeps pens, pen lights or other similar items within easy reach.

ON-SLEEVE ZIP POCKET

- Keep small items close at hand in the on-sleeve zippered pocket. This feature is especially handy when seated in a vehicle or when working undercover.

KNIFE CLIP OVERLAY

- Overlay on front pockets is extended downward to protect the pant from wear or abrasion caused by the pocket clips on knives, flashlights and pocket tools.

STASH POCKETS

- Leading Edge stash pockets provide instant access to small items, especially when seated in a vehicle or kneeling on the range. The hidden zippers keep contents secure during movement.

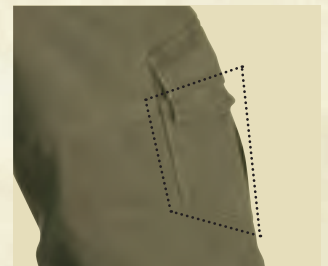

KNEEPAD POCKETS

- Internal kneepad pockets allow use of various pads, while the pad opening is sized to make insertion a snap. (Kneepads are not included.)

STRETCH WAISTBAND

- Stretch waistband lets you move freely without binding or pinching, especially when wearing your lawfully concealed sidearm.

ACCESSORY POCKET

- Flapped accessory pocket puts a phone, PDA, digital camera or spare magazine right at your fingertips.

----------	-------	-----------	-------	--------------------

From world-class shooters to the hardest of the hardcore hunters to unique personalities, the members of the Browning ProStaff all share a love of the outdoors, the shooting sports and the greatest gun brand in the world. ProStaff members are chosen for their skill, professionalism and enthusiasm in promoting the Browning brand. Look for these faces at major shooting events and on television.

RICK CAMUGLIA

RICK is a long-time Browning shooter with multiple sporting clays titles, nearly all won with Browning autoloading shotguns. A short list of his victories includes multiple National and Regional FITASC Championships, nine-time New Mexico State Champion, two-time HOA Arizona State Champion and two-time HOA Colorado State Champion. He is also an eight-time NSCA All-American Team member. Rick prefers to shoot the Maxus autoloader.

ROBBIE PURSER

ROBBIE started shooting skeet at the tender age of six. Over the years he has accumulated an impressive list of shooting titles including 1980 World Skeet Champion, 1991 and 1998 NSCA Champion, Zone 4 Champion, Quail Unlimited Champion, four-time Ducks Unlimited Champion, 2002 Sportsman Team Challenge Champion and an ESPN Great Outdoor Games gold medalist. He is also a twelve-time All-American Team member, a member of Team USA and a ten-time Georgia State Champion. All told, Robbie has more than 200 tournament wins to his credit.

ANDY DUFFY

ANDY is the only shooter to win three NSCA National Championships with back-to-back wins in 1994 and 1995. He has been on the NSCA All-American Team 17 times, Team USA 20 times and won more world, national and local sporting clays championship titles than he can shake a stick at. In 2005, he was honored by being inducted into the NSCA Hall-of-Fame. When Andy isn't dusting clays with his Citori, you will find him instructing others in the ways of shotgunning.

KRISTY LEE COOK

KRISTY brought her amazing voice to the TV screen on the 7th season of "American Idol®." Now Kristy is a rising country music singer and possesses an infectious passion for everything she does, whether it is performing, hunting or saving horses through the Kristy Lee Horse Heaven Foundation.

JOHNNY MEITZEN

JOHNNY started shooting competitively in 1987 and is currently a NSCA Level III instructor. He has won a number of shooting titles including two-time NSCA Nationals Vet Champion and two-time NSCA Nationals FITASC Vet Champion. Johnny is a six-time All-American Sporting Team member, two-time Team USA Sporting member and two-time Team USA FITASC member. He also has many state and zone championship titles to his credit. Johnny is a die-hard Citori man. His current model of choice is the Citori 625 Sporting.

MATT HUGHES

MATT is a nine-time UFC® World Welterweight Champion and was inducted into the UFC Hall of Fame in 2010. Matt's toughness and work ethic are legendary in the UFC, something he attributes to growing up on a farm in rural Illinois. Matt spent a good portion of his early years hunting and shooting — passions that have never left him.

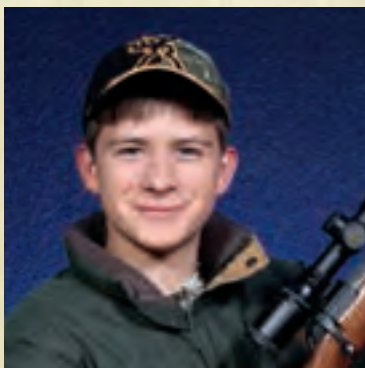

FRED ZINK

FRED founded Zink Calls™ in 2001 primarily to fulfill the needs of waterfowlers and professional callers who demanded high-end calls. A nationally-recognized goose caller in his own right, Zink's business continues to grow and set new standards in the call industry. Zink's high-octane 24/7 DVD series is designed to speak to hunters with exciting footage that shares the hunting experience with the viewers. Look for Fred to be shooting Browning autoloaders as he continues his quest to bring new hunters into the sport and grow the outdoor industry.

ZAC COOPER

ZAC took his first deer at the age of five and hunting has become his way of life. Zac joined the Browning ProStaff Team at age 13. He has spent the last 5 years traveling across America as a guest speaker at events such as the 2013 Iowa State Trap Shoot, the 2012 IHEA Conference in Kansas City, the 2013 Kansas Hunter Education Instructor Academy, the 2012 and 2013 Monster Buck Classics in Kansas, the QDMA National Convention and the NWF National Convention. Now 17, Zac is on track to complete his two-year Business AA in early 2014 with full academic honors. Zac has two long term goals: To be a positive influence on today's youth and to help get them into the sport of hunting. Check out Zac's DVDs "Little Man, Big Dreams" and "The Cooper Family Tradition."

KASSIDEE DUNFORD

KASSIDEE is the latest member of the Browning ProStaff family. Although young, her energy and enthusiasm towards the shooting sports is contagious. Coming up through the Youth Hunter Education Challenge (YHEC) program, Kassidee won numerous shooting titles in all categories, but it's trap shooting that has captured her heart. A gold medal at the preliminary tryouts in December of 2012 and a solid fifth place at the USA Shooting spring selection match is a testament to her spirit and mileposts on her path to Olympic gold.

The Browning ProStaff was created to bring together many of the finest shooting sports athletes in the world to be our brand ambassadors and help develop and evaluate new Browning products for our demanding customers. Before a Browning product hits the retail shelves, it has been thoroughly tested by our internal staff, then it's handed off to our ProStaffers for even more testing. When you see the name Browning on that product, you can be assured that it is indeed The Best There Is.

Look for members of the Browning ProStaff at major outdoor shows and expos, state and national level competitive shooting events and on popular outdoor television programs.

FOSTER AND MATT BARTHOLOW

FOSTER and **MATT** are rising stars on the ATA trapshooting circuit, and both shoot Browning Citori shotguns. The brothers came up through the Scholastic Clay Target Program and have made their mark within the open ranks. Whether in a shoot-off with legendary Leo Harrison III or winning the Preliminary Doubles event at the Grand American, both will tell you that the Citori shotgun is a workhorse that just keeps on shooting, round after round, year after year.

As much an emblem of the outdoor lifestyle as it is of the Browning brand, the Buckmark is the most recognizable symbol in the firearm industry. Whether on vehicles, T-shirts, caps, or permanently inked on the body, the Buckmark is a statement about your lifestyle. Browning has partnered with the companies on the following pages to represent the Browning brand with quality products and to share the Browning commitment to the outdoor industry.

AIRGUNS

High-performance designs like the 800 Series pistols and under-lever cocking Leverage rifle are cornerstones of this versatile line-up of top-quality airguns.

BE A SAFE SHOOTER

Read and follow all safety information in the owner's manual provided with each firearm before use. Additional copies are available for free download on the Browning website. Browning endeavors to make the safest firearms possible; however, firearm safety begins with you. At all times treat any firearm with intense respect for its power and potential danger. Always point the muzzle in a safe direction. There is no excuse for careless or abusive handling of any firearm.

BROWNING IS COMMITTED TO SERVING YOU

Every effort has been made to ensure that all product photographs, descriptions and specifications in this workbook are accurate; however, inadvertent errors may occur. Changes in design or materials due to our continual effort to improve products may result in specification changes before subsequent publications are issued. Browning reserves the right to modify or change specifications without notice.
