BROWNING®

WELCOME TO MOSSY OAK COUNTRY.

Country means something a little different to everyone. It might be the music you listen to. Maybe it's a location anywhere except the city. Maybe country is a way of life that is just a whole lot more easygoing.

The folks at Mossy Oak see country as being all those things and more. They think of country as a lifestyle, one in which hunting and spending time in the great outdoors is a big part. They know that time outdoors is family time, and that is time well spent. This is why we are proud to introduce Mossy Oak's all new Break-Up Country® camouflage pattern.

Break-Up Country is the first camo pattern ever that utilizes true-to-life size elements, unmatched digital clarity and accuracy to conceal your outline anywhere and in any season you hunt. In Break-Up Country, the elements are larger and more sparse to prevent the muddy darkness of other patterns. All the elements are actual objects, precisely represented in a digital format for unmatched realism and concealment. The leaf you see is a picture of a leaf, not just an artist's rendition.

When you remove all the technical jargon, Mossy Oak Break-Up Country is more than just another camo pattern, at its core, it's the country life itself.

Welcome to Break-Up Country.

BREAK-UP
COUNTRY

TOTAL BARREL DYNAMICS — FROM EXPERIMENTATION TO SCIENCE

- Our engineers have fired literally millions of shells in order to improve the relationship between the shotgun barrel and shotshell. What began as experiments have become the science of shot pattern performance.
- Extensive testing has shown that shot is deformed as it passes through the restrictions of the forcing cone, a tight bore and the choke tube. When shot is deformed it is less stable in flight, leading to flyers and holes in patterns. Our Vector Pro lengthened forcing cone is designed to reduce stress on the shot column, and Back-Bored Technology allows the shot column to exit the barrel at maximum velocity. Our proven choke tube technologies further minimize the stress placed on the shot as it exits the barrel while constricting it to the pattern you need. Other manufacturers use shorter forcing cones that smash the shot, a bore that is too tight or loose, and shorter choke tubes that result in inferior pattern performance.
- Total Barrel Dynamics — standard on A5, Maxus, BT-99 and on 12 and 20 gauge Citori and Cynergy models — is a system of technologies that function together to reduce shot deformation and significantly improve pattern consistency and performance. Each component of Total Barrel Dynamics plays a part in keeping shot patterns whole and pellets on target, and to ignore any single part weakens performance.

CHAMBER

FEATHER TECHNOLOGY

HEAVY DUTY, LIGHT WEIGHT

- Feather technology significantly reduces the weight of an over and under shotgun (about one pound) by using a high quality alloy for the receiver rather than steel.
- To maintain maximum durability, the breech face is a dovetailed steel insert.
- Citori models also use a full-width steel hinge pin and Cynergy shotguns feature steel MonoLock Hinge surfaces.

STEEL BREECH FACE

All Feather models feature a steel breech face that resists wear, allowing the receiver to be built from weight-saving alloy.

CITORI STEEL HINGE PIN

The full-width, steel hinge pin in the Citori provides maximum strength and lasting endurance.

CYNERGY STEEL INSERTS

To ensure longevity, steel inserts are added to the MonoLock Hinge.

RECOIL REDUCTION TECHNOLOGIES

INFLEX TECHNOLOGY RECOIL PAD

- Inflex recoil pads incorporate directional deflection construction that guides the comb down and away from your face, reducing felt recoil for greater shooting comfort and faster, more accurate follow-up shots.
- The Inflex recoil pads are made from a soft material for the best recoil absorbing performance available.

STOCK FINISHES

MAXIMUM GRIP

- Dura-Touch Armor Coating is extremely durable.
- Improves grip in wet and cold conditions.

FOR SMALLER SHOOTERS

MICRO MIDAS FIREARMS

- Micro Midas firearms are specifically designed to give younger or smaller shooters a high quality, great fitting firearm.
- Micro Midas firearms are constructed with the same quality components and attention to detail as all Browning firearms.

BROWNING GROWTH INSURANCE PROGRAM

- Micro and Micro Midas models are eligible for the Growth Insurance Program that allows new owners to purchase a full-size stock at 50% off the retail price.
- Growth Insurance allows Micro and Micro Midas firearms to grow with the shooter.
- Offers you a higher rate of return on your firearm investment.
- Visit browning.com for complete details.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

VECTORPRO™

BACK-BORED TECHNOLOGY

INVECTOR-DS
INVECTOR-Plus™

VECTOR PRO

LONGER IS BETTER. THE ADVANTAGES OF A LENGTHENED FORCING CONE

- The forcing cone is the tapered transition between the chamber and the bore that constricts the shot column. The longer the forcing cone is, the more gradual the constriction.
- A gradual constriction reduces stress on the shot column as it passes into the bore, resulting in fewer deformed pellets. Less pellet deformation produces more uniform patterns and keeps more pellets in the central part of the pattern. Vector Pro is better than the competitors' forcing cone designs because of the more gradual constriction.
- Lengthening forcing cones is a popular and expensive aftermarket practice done to increase shot pattern performance. But it comes standard on A5, Maxus, BT-99 and on 12 and 20 gauge Citori and Cynergy models.

BACK-BORED TECHNOLOGY

WHAT IS BACK-BORING?

- Back-boring enlarges the bore to the maximum diameter to increase shot velocity, minimize pellet deformity for more uniform patterns and reduce felt recoil.
- Extensive testing has shown that Back-Bored Technology reduces the friction between the shot cup and the bore, but does not allow gases to slip past the shot cup that would result in reduced pellet velocity and blown patterns.
- Back-Bore Technology specifications minimize shot deformation and maximize pattern uniformity, consistency and density. Back-Bored Technology is standard on A5, Maxus, BT-99 and on 12 and 20 gauge Citori, Cynergy, BPS and Silver models.

INVECTOR-DS

TAKING CHOKE TUBES TO THE MAX

- Invector-DS choke tubes combine muzzle-end threads and thin-wall construction for a longer, more gradually tapered choke tube that produces extremely consistent, dense shot patterns.
- From Cylinder to Extra Full, Invector-DS shot patterns tighten consistently in reliable, evenly scaled steps.
- Muzzle threads minimize the flare at the end of the barrel for improved shotgun appearance. A slightly lighter overall barrel weight is achieved for faster swinging and improved balance.
- The more gradual taper of Invector-DS choke tubes reduces shot deformation for fewer flyers and gaps in the pattern and allows higher shot velocities for hard hitting performance.
- The "DS" stands for double-seal. Our proprietary differential-banded brass seal compresses against the barrel wall to keep the choke tube threads clean and make installation and removal easier than any other muzzle thread system.
- Invector-DS is standard on A5 and Citori 725 models.
- View the full line of Invector-DS choke tubes on pages 145 and 147.

STANDARD
INVECTOR™

STANDARD INVECTOR

PATTERN VERSATILITY FOR 10 GA., 16 GA., 28 GA. AND .410 BORE SHOTGUNS

- The Standard Invector interchangeable choke tube system offers consistent, dense shot patterns with the constriction needed for the shooting situation.
- Threads on the breech end help prevent gases from slipping between the choke tube and barrel that could damage the choke tube and the barrel.
- Standard Invector is standard on 10, 16 and 28 gauge, and .410 bore Citori, Cynergy, Gold and BPS models.
- See pages 144 through 149 for a complete listing of choke tubes.

INVECTOR-DS CHOKE TUBES VS. COMPETITORS' CHOKE TUBES

Invector-DS tubes have even pattern percentage increments, offering just the right pattern for any shooting situation.

Competitors' choke tubes show little pattern difference between choke constrictions.

INVECTOR-PLUS

CHAMPIONSHIP PROVEN PERFORMANCE

- Invector-Plus started the long choke tube revolution. An ever-growing collection of championship medals is proof of its patterning performance.
- The Invector-Plus choke tube system works with Vector Pro and Back-Bored Technology to offer consistent, dense shot patterns with the constriction needed for the shooting situation.
- The long choke taper inside an Invector-Plus choke tube produces consistent patterns with more uniform densities and fewer flyers.
- Threads on the breech end help prevent gases from slipping between the choke tube and barrel that could damage the choke tube and the barrel.
- Invector-Plus is standard on 12 and 20 gauge Maxus, Citori, Cynergy, Silver, BPS and BT-99 models.
- View the full line of Invector-DS choke tubes on pages 145 and 147.

THE BROWNING HIGH GRADE PROGRAM — YEAR THREE.

For a unique, limited edition firearm, look no further than the Browning High Grade Program. 2015 brings the in-demand Citori 725 to the artisan's workbench, where these fine over and unders receive as much as 30 hours of hand-engraving and touch-up prior to being precisely set into finely wrought, high-grade walnut.

ONE WITH THE GUN.

The Citori 725 combines legendary reliability with the pointability and feel of a low profile receiver and the precision of a mechanical trigger. Lightweight, precisely fit and finished, quick to the shoulder and even quicker to the target, the Citori 725 is the ideal way to feel “one with the gun.”

725

CITORI

PRO

TRIPLE TRIGGER SYSTEM

- The Triple Trigger System fine tunes finger-to-trigger reach on target models.
- Includes three trigger shoes: Wide checkered, narrow smooth and wide smooth canted.

LOW PROFILE RECEIVER

- Improved recoil control and less muzzle jump are two of the big benefits of a low profile receiver. There is also the “one with the gun” feeling that makes the Citori 725 feel like an extension of the body.
- Places the front hand closer to the bore line for superior hand-eye coordination and pointability.

PALM SWELL

- Aids in control.
- Optimizes finger-to-trigger placement.
- Provides a comfortable, secure grip.

PRO FIT ADJUSTABLE COMB

- The new Browning Pro Fit Adjustable Comb makes it easy to find the perfect comb position.

- Pro Fit offers single bolt adjustment for both cast and drop. The revised design allows the stock to be professionally fit for shorter length of pull.
- Easy to read markings allow the shotgun to be dialed-in and easily replicated should the comb be removed.

PRO BALANCE SYSTEM

- The Pro Balance System allows shooters to fine-tune the balance point for a perfect mount and swing.
- Adding weights to the stock helps balance the shotgun, aids follow-up shots and the additional mass reduces felt recoil.

- Stock weights reduce muzzle jump for more accurate follow-up shots and allow a smoother follow through.
- Pro Balance weights are easy to install.

INVECTOR-DS CHOKE TUBE SYSTEM

- Citori 725 Pro models include five extended Invector-DS tubes.
- Invector-DS choke tubes combine muzzle-end threads and thin-wall construction for a longer, more gradually tapered choke tube that produces extremely consistent, dense shot patterns.
- From Cylinder to Extra Full, Invector-DS shot patterns tighten consistently in reliable, evenly scaled steps.
- The more gradual taper of Invector-DS choke tubes reduces shot deformation for fewer flyers and gaps in the pattern and allows higher shot velocities for hard hitting performance.
- The “DS” stands for double-seal. Our proprietary differential-banded brass seal compresses against the barrel wall to keep the choke tube threads clean and make installation and removal easier than any other muzzle thread system.

CITORI 725 — LESS GUN, MORE FEATURES.

Citori shotguns are known for their durability, long outliving most over and unders. The Citori 725 models utilize a new low-profile receiver design that retains the features that make the Citori so tough. A mechanical trigger provides superb performance with a light, crisp break.

725 CITORI

TRIPLE TRIGGER SYSTEM

- The Triple Trigger System fine tunes finger-to-trigger reach on target models.
- Includes three trigger shoes: Wide checkered, narrow smooth and wide smooth canted.

HIGH RIB

- Offers increased visibility, the barrels don't cover up the target.
- Improved cooling helps prevent heat waves from distorting visibility.

BECOME
ONE
WITH THE
GUN

**FIRE
LITE**
MECHANICAL
TRIGGER

FIRE LITE MECHANICAL TRIGGER

- Exclusive mechanical trigger design.
- Unlike an inertia trigger, Fire Lite does not rely on recoil to set the next shot; instead, it offers immediate second shot capability.
- Features less take-up, a crisp break and shorter overtravel.
- The Fire Lite Mechanical Trigger is light, crisp and has minimal overtravel.

TAPERED LOCKING BOLT

- Unlike other low-profile over and unders, the Citori 725 features a transverse-mounted, full-width tapered locking bolt and full-width hinge pin just like other Citori models for maximum strength and longevity.
- The locking bolt engages a full-width tapered recess in the monobloc. Tapering the bolt and recess allows the bolt to seat deeper over time, accommodating for wear.

FULL-WIDTH HINGE PIN

The Citori 725's full-width hinge pin provides maximum strength and long-lasting endurance.

COMPETING TRUNNION DESIGN

The competitors' trunnions provide only a fraction of the bearing surface that the Citori 725's full-width hinge pin provides.

**ERGO
BALANCED**

ERGO BALANCED

- Incredibly balanced in the hands from pad to muzzle.
- Facilitates a light feel and fast swing.
- Promotes follow through.

HAND-FINISHED RELIABILITY.

Every Browning Citori is fitted, polished and assembled by hand, achieving a level of perfection that rivals guns often costing much more. The extra attention to detail assures smooth operation and flawless looks, while adding longevity and integrity to a gun so it's ready for the next generation.

Citori®

TRIPLE TRIGGER SYSTEM

Citori target shotguns come equipped with the Triple Trigger System, which fine tunes finger-to-trigger length of pull. Choose a wide checkered, narrow smooth or wide smooth canted trigger shoe.

LOCKING BOLT AND HINGE PIN

The Citori features a heavy-duty, transverse-mounted, full-width tapered locking bolt that engages a full-width tapered recess in the rear barrel lugs. Tapering the bolt and recess allows the bolt to seat deeper, accommodating for wear. The hinge pin extends across the width of the receiver for maximum strength. Engineering like this ensures the Citori wears in, not out.

Browning pattern with Back-Bored Technology

The competitors' pattern without Back-Bored Technology

CHROME CHAMBERS

For increased durability and corrosion resistance, all Citori shotguns have hard chrome-plated chambers to resist the toll that thousands of shells can take on lesser quality guns.

STEEL SHOT PERFORMANCE

The strength of Browning barrels is legendary, and built to handle the punishment of steel shot. Unlike some manufacturers' barrels that show pitting after shooting steel, Browning pioneered construction that maximizes steel shot performance and barrel durability. Browning barrels meet the strictest material and construction quality standards. The barrel blanks are made from rolled and tempered steel bars and are stress relieved to offer exceptional mechanical properties. The barrel blanks are then precision drilled, reamed and honed to exacting specifications. With proper care, Browning Citori barrels will last a lifetime.

HAMMERS AND HAMMER EJECTORS

For positive primer ignition, Citori hammers are driven by powerful coil-type mainsprings. The convenient barrel selector allows a shooter to choose which barrel fires on the first pull of the single trigger, and the second pull fires the remaining barrel. Ejectors are fired by a sharp hammer blow for more positive ejection than the push imparted by competitors' ejectors. The automatic ejectors eject fired hulls when the breech is opened and elevate unfired shells for easy removal.

VECTORPRO™

VECTOR PRO LENGTHENED FORCING CONES ON 12 AND 20 GAUGE CITORI SHOTGUNS

Browning was the first manufacturer to recognize the performance advantages of a back-bored barrel and to make it a standard feature on shotguns.

Longer, tapered Vector Pro forcing cone dimensions minimize shot deformation and maximize pattern uniformity, consistency and density.

Back-boring increases bore diameter specifications and decreases friction between the shot cup and the bore to maximize shot pellet velocity and to reduce felt recoil. Reducing constriction from the forcing cone on the shot column results in fewer deformed pellets for more uniform patterns, and keeps more pellets in the central part of the pattern where they're needed to bag more upland birds, waterfowl and clay targets. Browning back-bore specifications represent the ideal bore dimensions. A larger bore diameter can let gases slip by the shot cup, resulting in both reduced pellet velocity and blown patterns. A smaller bore diameter means the forcing cone can deform pellets, leading to flyers and poor ballistic performance.

INVECTOR CHOKE TUBE SYSTEMS

The proven Standard Invector (28 gauge, .410 bore) or Invector-Plus (12, 20 gauge) interchangeable choke tube systems are featured on every Citori shotgun and provide consistent, dense shot patterns in the constriction needed for the specific shooting situation. The longer choke taper inside an Invector-Plus choke tube works with back-bored barrels and Vector Pro lengthened forcing cones to produce dense patterns with uniform densities and fewer flyers. The superior designs of the Invector systems are far more durable than the choke systems found in competitors' guns, especially when shooting steel shot loads. The Invector systems eliminate gases slipping between the choke tube and barrel that could damage both the choke tube and the barrel. See pages 144 to 149 for a complete listing of choke tubes.

PREMIUM VALUE.

The Browning Citori XT is a legend among trap shooters for its long-term reliability, achieved from using a full width steel hinge pin (not simply a pair of trunnions) and a tapered locking lug that seats deeper with wear. No wonder people say that through the years a Citori wears in, not out.

CYNERGY SHOTGUNS.
Loaded with high performance features.

CYNERGY®

REVERSE STRIKER MECHANICAL TRIGGER

- The Reverse Striker is a striker-based, mechanical trigger system that does not use the inertia from recoil to set the hammers.
- Reverse Striker offers the benefits of a crisp feel, reduced locktime and less overtravel than other over and under shotguns.
- Because inertia is not needed for the hammers to set, the design eliminates the possibility of the second barrel not firing.
- Cynergy target models are equipped with the Triple Trigger System, allowing finger to trigger length adjustment and the ability to switch between styles of trigger shoes: Wide checkered, narrow smooth or wide smooth canted.

MONOLOCK HINGE

- The strong MonoLock Hinge design is the engineering behind the Cynergy's low profile receiver.
- Integrates the monobloc and the hinge for up to 300% more surface area to pivot on than traditional trunnion-style hinges.
- Rectangular locking pins provide extra strength and feature a "Wear-In Relief" that keeps the action tight.

CHROME CHAMBERS

- Cynergy shotguns feature hard chrome-plated chambers.
- Increased durability and corrosion resistance.

IMPACT EJECTORS

- Impact Ejectors are aided by the punch of a secondary striker spring for positive, reliable ejection of fired hulls from the chambers.
- Unfired shells are elevated for easy removal.

ADJUSTABLE COMB

- Composite models include an integrated, adjustable comb system that allows the gun to be easily customized.
- Drop at comb adjustments are made in 1/8" increments.
- For cast on/cast off customizing, we offer accessory combs that are shown below.

SUPERIOR GRIPPING SURFACES

- Composite Cynergy models combine molded-in rubberized textured gripping surfaces.

DESIGNED TO BE DIFFERENT.

The Browning Cynergy is designed to be the lowest profile over and under available, and also the strongest. The ultra low profile receiver reduces weight without sacrificing strength and helps control recoil, making the Cynergy easy on the shoulder.

MORE POPULAR THAN EVER.

Trap shooting is a challenging discipline that requires tremendous focus and plenty of practice. Having a specialized gun like the fast swinging BT-99 is a big advantage when taking a shot at victory.

BT99

FOREARM

- A beavertail forearm helps control recoil and assists hand-eye coordination.

RIB

- High-post, 11/32" rib offers natural sighting and target acquisition.

CHROME CHAMBER

- The chrome-plated chamber resists wear and corrosion.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

A5 — TRADITION AND TECHNOLOGY COLLIDE.

The familiar silhouette of a humpbacked Browning A5 may bring back memories, but this is not the Browning you grew up with. Built with cutting edge design and features, the A5 is ready to be the shotgun the next generation so fondly remembers.

ERGO BALANCED

- Incredibly balanced in the hands from pad to muzzle.
- Facilitates a light feel and fast swing.
- Promotes smoother follow through.
- Places front hand closer to the bore line for superior hand eye coordination and pointability.

TURNKEY MAGAZINE PLUG

- The patented TurnKey Magazine Plug is easily removed in seconds using a car key.

GET THE HUMPBACK ACQUISITION ADVANTAGE

- Extends the sight plane for faster, more natural sight alignment.
- Speeds target acquisition.

KINEMATIC DRIVE SYSTEM

- Kinetic energy is defined as the energy of motion.
- The A5 uses kinetic energy to power the recoil-operated Kinematic Drive System.
- Simplicity of design for consistent, reliable function with any load and under the full extremes of weather, temperature, moisture and grime.
- Kinematic Drive is so reliable that the A5 is the first ever autoloading shotgun to carry a 100,000-round or five-year guarantee – come hell or high water.
- Clean operation because gases are sent out the barrel and away from the action.
- Extreme load versatility for reliable performance with virtually all loads down to one ounce field with no adjustments.

SPEED LOAD PLUS

- Patented feeding system sends the first shell loaded into the magazine directly into the chamber.
- Speed Unload feature makes emptying the magazine fast and easy, without chambering and ejecting every shell with the bolt handle.

ABS CASE INCLUDED

- Sturdy ABS case is perfect for storing the A5.
- Lockable.

100,000
ROUND GUARANTEE
OR FIVE YEARS

ERGONOMIC BOLT LATCH

- Conveniently located just ahead of the trigger guard.
- Locks the bolt to the rear when the magazine is unloaded and releases a shell from the magazine when the bolt is closed for faster loading.
- Oversized shape makes the bolt latch easy to locate and operate with or without gloves.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

A A5 ULTIMATE

RECEIVER Strong, lightweight aluminum alloy • Satin finish with brushed accents • Engraving pattern depicts pheasants on the left side and mallards on the right side, all surrounded by intricate scrollwork **BARREL** Lightweight profile • Flat, ventilated rib • Gloss blued finish **ACTION** 3" chamber • Recoil-operated Kinematic Drive **STOCK** Gloss oil finish walnut with close radius pistol grip • Sharp 22 lines-per-inch checkering • Shim adjustable for length of pull, cast and drop • 1/4" and 1/2" stock spacers for length of pull adjustment **FEATURES** Vector Pro lengthened forcing cone • Three Invector-DS choke tubes • Inflex recoil pad • Fiber-optic front sight • Ivory mid-bead sight • Includes ABS case **IDEAL USAGE** Hunting/Sporting Clays

MAXUS SHOTGUNS.

Loaded with high performance features.

MAXUS®

POWER DRIVE
GAS SYSTEM

POWER DRIVE GAS SYSTEM

- Extensive research has produced the most reliable gas piston design ever.
- The gas piston features larger exhaust ports that dump gases faster with heavy loads to control recoil.
- 20% longer piston stroke travel increases reliability with light loads.
- An enclosed seal keeps residue out of the action for cleaner operation.

LESS MUZZLE JUMP

- The Power Drive Gas System works with the Inflex Technology recoil pad.
- Reduces muzzle jump up to 44% compared to the competition.

TURNKEY
MAGAZINE PLUG

TURNKEY MAGAZINE PLUG

- The patented TurnKey Magazine Plug is easily removed in seconds using a standard car key.

MAGAZINE CUT-OFF

- The magazine cut-off (not available on Sporting models) allows the chamber to be unloaded to change loads without cycling a shell from the magazine.
- Useful when hunting different bird species and different loads are instantly required.

SPEED LOCK
FOREARM

SPEED LOCK FOREARM

- The patented Speed Lock Forearm replaces the traditional screw-on magazine cap.
- Makes taking down the Maxus for cleaning or storage fast.
- Makes attaching or removing the sling a snap.

SPEED LOAD
PLUS

SPEED LOAD PLUS

- Patented feeding system sends the first shell loaded into the magazine directly into the chamber.
- Speed Unload feature makes emptying the magazine fast and easy, without chambering and ejecting every shell with the bolt handle.

OPTIMAL DIMENSIONS

- The Maxus features a trim forearm and close radius pistol grip to maximize control.
- An externally relieved steel magazine tube reduces weight for a faster swing while retaining durability.
- Drop and cast can be tuned using the included stock shim kit.
- A low rib is in line with the top of the receiver and translates into dead-flat point of impact.

LIGHTNING
TRIGGER

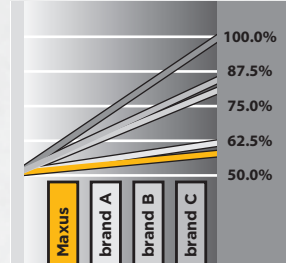

LIGHTNING TRIGGER

- The Lightning Trigger is the finest fire control system ever offered in an autoloading shotgun.
- Offers a smooth, crisp feel with minimal travel.
- Lock times average .0052 seconds, 24% faster than the nearest competing autoloader.
- Easy to remove for cleaning.

THE SOFTEST SHOOTING
AUTOLOADER EVER

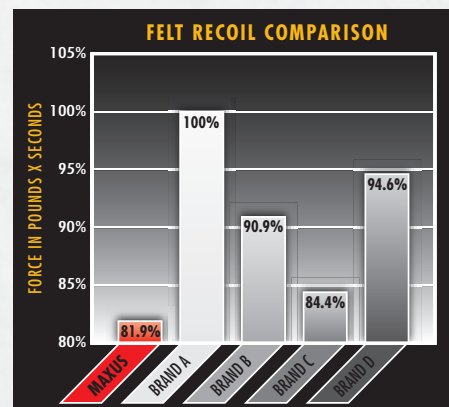

- Felt recoil is more than an instantaneous peak force; it is the total energy absorbing experience felt when a shell is fired.
- The Power Drive Gas System, Inflex Technology recoil pad, back-boring and natural Browning balance combine to transfer up to 18% less total felt recoil force to the shoulder than other autoloaders on the market.

MUZZLE JUMP COMPARISON

LESS MUZZLE JUMP

- The Power Drive Gas System works with the Inflex Technology recoil pad.
- Reduces muzzle jump up to 44% compared to the competition.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

MAXIMUM SPEED AND RELIABILITY.

Maximum performance, maximum reliability and maximum cycling speed are what the Browning Maxus delivers. This premium gas-operated autoloader is feature packed and will exceed expectations every time it comes to the shoulder.

PURE BROWNING PERFORMANCE.

Adding extra features to a shotgun also adds cost. The truth is, some people simply want a high-quality, long-lasting autoloader that gets the job done every time they pull the trigger. The Browning Silver fills that role with genuine Browning style.

LESS RECOIL WITH THE ACTIVE VALVE

- The self-adjusting Active Valve gas system in Silver autoloaders diverts gases from fired shells to operate the action instead of adding to recoil.
- When shooting light loads, most of the gases operate the action.
- With magnum loads, only a small amount of gas is necessary to operate the action, while the remaining gases are vented out the top of the forearm and away from the receiver for cleaner, more reliable operation.
- Superior recoil reduction from the Active Valve means faster, more accurate follow-up shots and all-day shooting comfort regardless of the loads being fired.

MAXIMUM GRIP

- Composite Silver models combine checkered gripping surfaces and proven Dura-Touch Armor Coating for a sure hold and a sleek feel in all climate conditions.

TRIGGER

- The trigger assembly can be removed in just seconds for a thorough cleaning.
- The trigger guard is large and has carefully rounded edges to accommodate gloved fingers.

LOAD VERSATILITY

- The Active Valve-equipped gas piston efficiently adjusts to reliably fire a wide range of loads.
- 12 gauge 3" models fire everything from light, 1 oz., 2-3/4" field loads to the heaviest 3" magnums. The 3-1/2" version is built to handle a similar range, from 1-1/8 oz., 2-3/4" field loads up to hard-hitting 3-1/2" magnum loads.

Light Load (1 oz.)

Heavy Load (2 oz.)

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

A SILVER LIGHTNING, FULL LINE DEALER

VALUE AND VERSATILITY.

Hunting deer, bear or wild boar with a shotgun is increasing in popularity, and improvements in ammunition make modern slug guns — like the Browning Silver — very effective at bringing down heavy game. There is also a side benefit to hunting with a Browning, accessory barrels are available that easily convert the same shotgun into a wingshooter. The cantilever scope mount makes swapping barrels easy without affecting the scope's zero.

THE BEST PUMP THERE IS.

For most companies, the pump shotgun is an entry-level item built for the beginner. We don't see it that way, knowing there are shooters who demand the highest quality and reliability from their pump shotgun. The BPS uses a rugged, steel frame and twin action bars for long-lasting, bind-free, pump-action performance.

BOTTOM EJECTION AND LOADING

- Unique bottom ejection throws empty hulls straight down, out of the line of sight.
- The BPS is the best pump shotgun choice for both right- and left-handed shooters.

MAGAZINE CAPACITY

- 2-3/4": Four in magazine, one in chamber.
- 3": Three in magazine, one in chamber.
- 3-1/2": Three in magazine, one in chamber.
- A three-shot magazine adaptor plug is included.

RELIABLE PUMP-ACTION

- The proven pump-action features rugged steel components.
- The receiver is machined from a solid block of forged steel.
- Rigid double slide bars are made from heat-treated steel to eliminate twisting and binding for faster, more efficient slide-action operation.
- Reliable in all conditions.
- A convenient serrated slide release is located at the rear of the trigger guard.

MAXIMUM GRIP

- Camo composite BPS models combine in-molded checkered gripping surfaces and our proven Dura-Touch Armor Coating for a sure hold and a sleek feel in all climate conditions.

TANG SAFETY

- The thumb-operated, top-tang safety on the BPS can easily be operated with the right or left hand, even with gloves on.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

READY FOR ANY PURSUIT.

Why limit a shotgun as great as the BPS to just wingshooting? This versatile and incredibly durable pump-action platform lends itself well to every type of hunting and shooting sport.

BIG BORES.

The potent 10 gauge is always a force to be reckoned with. When the quarry is big, like geese and turkey, there is no substitute for a large bore size and a hefty shot payload to match.

THE SHOTGUN THAT THINKS IT'S A RIFLE.

Featuring a crisp trigger, smooth bolt operation, short 60° bolt lift and detachable box magazine, the A-Bolt shotgun shares many of the same features that made the A-Bolt rifle so popular. Most importantly, these traits provide a high level of reliability and accuracy.

BARREL

- Rifled 1 in 28" twist barrel.
- Designed exclusively for use with sabot-type slugs.
- Superb accuracy with 1-1/2" groups or better typical at 100 yards.

PERFORMANCE

- Smooth, anti-bind bolt design.
- Non-rotating bolt sleeve.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

COMPOSITE STOCK

- Rugged composite stock.
- Right-hand palm swell pistol grip.
- Checkered gripping surfaces and Dura-Touch Armor Coating provide security in all conditions.

DETACHABLE MAGAZINE

- Detachable magazine on a hinged floorplate for fast reloads.
- 2 + 1 capacity.

IMPORTANT: DO NOT ATTEMPT THE USE OF 3-1/2" CHAMBERED BARRELS WITH 3" RECEIVERS OR 3" CHAMBERED BARRELS WITH 3-1/2" RECEIVERS.

TOTAL ACCURACY.

With new models and calibers, there is a Browning X-Bolt rifle for every customer. All feature precision construction for tack-driving performance right from the box. Pick up an X-Bolt and pull the trigger.

FEATHERTRIGGER™

FEATHER TRIGGER

- For precise shooting there is absolutely no substitute for a crisp, predictable trigger.
- The X-Bolt's three-lever Feather Trigger provides a clean, crisp pull with no take-up or creep and minimal overtravel.
- The trigger is screw adjustable from 3 to 5 lbs. and factory pre-set at approximately 3-1/2 - 4 lbs.
- An alloy trigger housing contains hard chromed steel components that are highly polished on all critical contact surfaces.

X-BOLT RIFLES. PERFORMANCE IS A FEATURE.

- The Browning X-Bolt is a modern bolt-action rifle with a host of innovative features.
- The total accuracy advantage gives added confidence in the field to make longer shots.
- Inflex recoil pad softens recoil and allows faster, more accurate second shots.
- Fast-operating 60° bolt lift offers fast cycling and prevents interference from the scope when working the bolt.
- The bolt unlock button allows the bolt to be cycled with the safety in the on safe position.
- Bolt design is simple, with three locking lugs for superior lock-up.

X-LOCK SCOPE MOUNTING SYSTEM

- Securely mounted optics are essential for accuracy and precision on any rifle.
- X-Lock mounts feature a four screws per base design that replaces the traditional two screw system.
- Offers more accurate placement and more secure attachment to the receiver.

FREE-FLOATING BARREL

- Every X-Bolt is individually bedded into the stock for a true free-floating barrel, not bedded using a master receiver like the competition.
- The X-Bolt barrel is free-floated by bedding the front and rear of the action for stability.
- Maintains barrel to stock spacing for consistent accuracy.
- The recessed muzzle crown helps protect the rifling from damage.
- Barrels are triple checked for interior finish, straightness and air-gauged for uniformity.
- Hand-reamed chamber for precision accuracy.

BOLT UNLOCK BUTTON

- The bolt unlock button works in conjunction with the top-tang safety to provide an extra margin of safety when checking and unloading the chamber.
- Located on top of the bolt handle, the bolt unlock button allows the bolt to be unlocked and opened with the tang safety in the on safe position.
- The convenient tang safety blocks the trigger sear and features a firing pin block for added security.

PERSONALIZED ENGRAVING ON THE X-BOLT

- The bolt can be personalized with an individual's name. Call (800) 333-3288.

Block

Script

60° BOLT LIFT

- Short 60° bolt lift is fast cycling and the hand easily clears the scope.
- The bolt is machined from solid steel bar stock for strength and custom rifle precision.
- Three locking lugs provide exceptional bolt strength.

ROTARY MAGAZINE

- The unique rotary magazine is removable, durable, easy to load and feeds rounds from the center line — not off to the side like other rifles — for straight to the chamber feeds.
- Unique design holds U.S. patent numbers: 8,156,675; 8,484,875 and 8,745,912

TANG SAFETY

- Tang safety is easy to reach with the thumb.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

THE FEEL OF TRADITION.

Composite stocks have become the material of choice for many gun makers, but there is something special about the warmth, beauty and feel of finely finished walnut in the hands that can't be beat. We offer the X-Bolt in several wood-stocked configurations, all bedded at the recoil lug and all feature a rear action screw to help ensure accuracy.

THE AB3 — NOW IN SHORT ACTION CALIBERS.

The Browning AB3 packs a tremendous amount of performance and features into a very affordable package, without sacrificing the quality that we are renowned for. These straight-shooting rifles are now available in short action calibers to meet the demands of even more shooters. The AB3's secret to accuracy is the barrel, made to the same quality standards as other Browning rifles.

**LARGE BOLT SURFACE**

- The robust bolt offers additional rigidity.
- The bolt is machined from solid steel bar stock and machined internally to keep weight low.
- Three locking lugs provide exceptional bolt strength.
- Super smooth chrome bolt finish is great looking, quieter and offers smooth cycling.

**INFLEX RECOIL PAD**

- Inflex recoil pad softens recoil and allows faster, more accurate second shots.
- Internal structure is designed to pull the rifle down and away from the face to reduce felt recoil.

**BOLT LOCK OVERRIDE BUTTON**

- The bolt lock override button provides an additional margin of safety when checking and unloading the chamber.
- Located behind the bolt handle, the bolt lock override allows the bolt to be unlocked and opened with the tang safety in the on safe position.
- The convenient tang safety blocks the trigger sear and sear.

**DETACHABLE MAGAZINE**

- Polymer and steel construction is lightweight and extra tough.
- Unique spring and follower design minimizes follower tilt for more reliable feeding.

**FREE-FLOATING BARREL**

- The free-floating maintains barrel to stock spacing for consistent accuracy.
- Recessed muzzle crown helps protect the rifling from damage.
- Precision button-rifled barrel is triple checked for interior finish, straightness and air-gauged for uniformity.
- Hand-reamed chamber for precision accuracy.

**60° BOLT LIFT**

- Short 60° bolt lift is fast cycling and the hand easily clears the scope.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

IT LOOKS GOOD TOO.

The Browning AB3 is a super value with a top-quality barrel, Inflex recoil pad and smooth-riding chromed bolt, but great lengths were taken to ensure the AB3 looks as good as it shoots. The composite stock features a tight radius grip for optimum finger-to-trigger reach and a narrow fore-end with textured gripping surfaces for enhanced control. The crisp trigger breaks between 3-1/2 to 4-1/2 ounces. Pick up an AB3; it might be difficult to put back down.

SADDLE UP.

Compact, easy to handle and fast to cycle, the Browning BLR makes a winning argument against those that claim lever-action rifle technology peaked in the late 1800s. With a detachable box magazine that allows the use of superior pointed bullets, a strong multi-lug bolt, glass-smooth lever-action and accuracy that rivals some bolt-action rifles, the BLR proves that lever-actions are not out to pasture.

RECEIVER

- Lightweight, sturdy machined aircraft-grade aluminum. Drilled and tapped to accept scope mounts.

ACTION

- Lightning fast, glass-smooth rack and pinion lever-action.
- Strong rotating head, multiple-lug breech bolt with a recessed bolt face and side ejection.

HAMMER

- The folding hammer provides an added measure of safety when the hammer is at half-cock.
- The fold-down hammer has two positions at half-cock so the status of the rifle is readily seen; and four basic positions: Full-cock, half-cock, folded hammer position and the dropped, or fired position.

TAKEDOWN FEATURES

- BLR Takedown models are just as accurate and reliable as their unified counterparts but much easier to transport and store.
- The rifle is easily and quickly assembled by simply sliding the barrel half into the receiver half and locking them together with the flip of a lever. The lever mechanically engages a stout locking lug into a recess in the bottom of the receiver. The system is rugged, precise and blends seamlessly into the styling of the rifle.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

MAGNUM KNOCK DOWN POWER.

The Browning BAR is the sporting rifle inspired by the original Browning Automatic Rifle. The BAR combines the strength to fire hard-hitting magnum cartridges with the down range accuracy potential to keep rounds right on target. The piston-operated gas system is reliable and softens felt recoil to reduce muzzle climb.

ACTION

- The BAR is a gas-operated autoloader with a high-strength, multiple-lug rotating bolt that locks directly into the barrel.
- The seven-lug bolt and precise breech-to-chamber relationship give the BAR exceptional accuracy and the strength to handle magnum loads.
- The strong and rigid action bar/inertia block link-up improves accuracy by reducing barrel vibration.
- The buffering system reduces wear and stress on the rifle's mechanism.

THE BOSS DEVICE

- The Ballistic Optimizing Shooting System (BOSS) is designed to maximize accuracy.
- The BOSS device quickly and easily tunes barrel harmonics to precisely match the specific ammunition fired, resulting in amazingly tight groups. The BOSS device is available as an option on the BAR Mark II Safari.

MAGAZINE

- Detachable box magazine with a unique hinged floorplate allows the shooter to lower the floorplate, detach the empty magazine and snap in a full magazine in mere seconds.

RECEIVER

- The BAR Mark II Safari uses a blued one-piece ordnance steel receiver with scroll engraving.
- ShortTrac and LongTrac models have an aircraft-grade aluminum alloy receiver.
- All BAR rifles are drilled and tapped for scope mounts. The bolt release lever is incorporated into the receiver.

MAXIMUM GRIP

- Camo composite BAR models combine overmolded gripping surfaces and Dura-Touch Armor Coating for a sure hold and a sleek feel in all climate conditions.

ADJUSTABLE SHIM SYSTEM

- ShortTrac and LongTrac BAR rifles include six shims that customize drop at comb and cast on/off.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

RECOIL PADS FOR BAR SHORTTRAC AND LONGTRAC

For wood and composite models **PAD** Black, polymer cushion **TOP** Insert hard polypropylene **REINFORCEMENT** Black, glass-fiber reinforced synthetic **THICKNESS** Choice of 1/2", 3/4" or 1"

B	3/4"	44.00
C	1"	44.00

AUTOLOADERS WITH STYLE.

Far from the only choice among autoloading rifles, the Browning BAR has what modern sporting rifles don't, the beauty of Browning. In stark contrast to most autoloading rifles, the BAR offers a traditional approach with finely finished walnut contrasting beautifully with satin nickel and polished blue finishes.

BOSS-CR ACCESSORY

The BOSS-CR accessory offers all the accuracy and tunable advantages of the original BOSS device without the muzzle brake feature. By simply replacing the original BOSS forward weight and recoil reduction components with the one-piece, non-ported BOSS-CR accessory, only the reduced recoil of the original BOSS is sacrificed. The BOSS-CR accessory is designed to fit only BAR Mark II and A-Bolt centerfire rifles previously factory-fitted with the BOSS. **GLOSS BLUED** for BAR Safari; A-Bolt models: Medallion and Gold Medallion **MATTE BLUED** for A-Bolt models: Composite Stalker, Hunter, Euro-Bolt, Varmint, Eclipse Hunter and M-1000 Eclipse **STAINLESS** for A-Bolt models: Stainless Stalker, White Gold, Medallion and M-1000 Eclipse **IT IS IMPORTANT THAT THE CORRECT BOSS-CR BE SELECTED FOR A SPECIFIC CALIBER AND MODEL OF RIFLE.**

STRAIGHT UP PERFORMANCE.

The straight-pull bolt action of the Browning T-Bolt really makes it stand out in a crowd. This neat design cycles fast and locks up tight for excellent accuracy. Tremendously fun to shoot, T-Bolt rifles are made to the highest standards of quality.

STOCK

- Stocks are full-size to more comfortably fit adults.
- Durable Composite models feature a Monte Carlo comb and include magazine storage in the buttstock.
- Walnut stocked Sporter models feature trim dimensions with a satin finish and cut checkering. Walnut Target/Varmint models feature a Monte Carlo comb and wide forearm for stability on the bench.
- All models include a bedded action and dual action screws for solid attachment.
- Sling swivel studs included.

TRIGGER

- The three-lever trigger design combined with a short-travel firing pin give a crisp break, quick lock time, no take-up and minimal overtravel.
- Adjustable for pull weight.

BUTTSTOCK MAGAZINE STORAGE

- Composite stock models offer a convenient location to securely store an extra magazine.

ACTION

- Receiver is machined from steel barstock.
- Features crossbolt lockup for strength and smooth operation.
- The mainspring runs directly through the massive pivot pin. Cocking effort is split between opening and closing for ease of operation. The bolt features dual extractors and a red cocking indicator band.
- Right-side ejection on both right- and left-hand models.

SAFETY

- Top-tang, thumb operated two-position safety can be operated without changing from a shooting grip.

BARREL

- Target/Varmint models feature a 22" medium target profile.
- T-Bolt Sporter models feature a 22" medium sporter profile.
- Barrel is free-floating with a semi-match chamber and target muzzle crown.

OPTICS READY

- Receiver is drilled and tapped for scope mounts (not included). See pages 136-137 for scope rings and bases for T-Bolt rifles.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

22 Long Rifle

17 HMR / 22 WMR

DOUBLE HELIX MAGAZINES

- 10-round capacity.
- The patented Double Helix rotary box magazine uses torsion spring driven interlocking gears for added reliability and easy loading and unloading.

A LEVER TO LOVE.

Traditional good looks, rock-solid build quality and quick-throw lever action make the Browning BL-22 a perfect rifle for shooters interested in a reliable rimfire. Long lasting Browning quality ensures the BL-22 will be around for years to come.

RIMFIRE THOROUGHBREDS.

- The slick, lever-action BL-22 is perfect for new and seasoned shooters alike.
- Quick-cycling 33° lever throw.
- The trigger travels with the lever to prevent finger pinch.
- High-quality construction.
- Fires .22 Short, Long and Long Rifle ammunition.
- Short lever throw is ideal for smaller hands.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

PURE GENIUS FROM THE MAN HIMSELF.

Straight from the workbench of John M. Browning comes the SA-22. One of the famous inventor's most time-honored and cherished designs, these compact, takedown rifles are a perfect reminder of the talents of the greatest gun designer in history.

TAKEDOWN FEATURE

- The Semi-Auto 22 can be quickly taken down to a compact length of only 19-3/8" for storage or packing.

BARREL ADJUSTMENT

- The knurled knob allows play to be adjusted out of the barrel to ensure accuracy.

IN-STOCK MAGAZINE

- The magazine is located in the stock to maintain the trim dimensions of the rifle.

BOTTOM EJECTION

- Bottom ejection makes the Semi-Auto 22 ideal for right- or left-handed shooters alike.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

RIGHT ON THE MARK.

Based on the reliable Buck Mark pistol, the Buck Mark Rifle is the perfect rimfire for plinking. These compact rifles are nimble, simple to operate, easy to load, accurate and pure fun. The frame is machined from a solid block of 7075-T6 aluminum for strength and longevity.

SAFETY AND SLIDE RELEASE

- Large manual thumb safety.
- The convenient manual slide release is easily operated with the shooting or support hand.

SIGHTS

- Sporter model features a TRUGLO[®]/Marble Arms[®] fiber-optic sight system.
- The rear sight is adjustable for windage and elevation.

MAGAZINE RELEASE

- Located adjacent to the trigger guard for convenient operation.

ACTION

- The straight blowback design offers enhanced simplicity and reliability.

FRAME

- Machined to exacting tolerances from a solid billet of 7075-T6 aluminum. The stock structure is a part of the pistol frame, reducing weight and the number of parts.

BARREL

- Sporter model features lightweight, tapered sporter-weight barrel. Target models feature a bull barrel.
- The chamber in every Buck Mark Rifle barrel is hand-reamed and the muzzle crown is recessed to protect it from damage that could degrade accuracy.

SLIDE

- Serrated for an improved cocking grip.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

ALL-AMERICAN.

Built on a machined aluminum frame and featuring a precision rifled barrel, crisp trigger and fully-adjustable sights, the Browning Buck Mark is a reliable, top notch performer. The Buck Mark is proudly made in the USA.

SAFETY AND SLIDE RELEASE

- Large manual thumb safety.
- The convenient manual slide release is easily operated with the shooting or support hand.

MAGAZINE RELEASE

- Positioned adjacent to the trigger guard for convenient operation.

FRAME

- Machined from aircraft grade aluminum alloy.

SIGHTS

- The 16-click per revolution adjustable Pro-Target™ sight is standard on all models.
- This sight provides a finer degree of adjustment over the industry's standard of 12-clicks per revolution.
- Fiber-optic TRUGLO®/Marble Arms® front sights are available on select models.

MAGAZINE

- The steel magazine body is heat treated for long-term feeding reliability and long life. The coil spring provides a consistent follower angle. 10-round capacity.

ACTION

- The straight blowback design offers enhanced simplicity and reliability.

BARREL

- Most models have bull barrels for improved stability. Lite models have a steel barrel liner inside an ultralight aluminum sleeve.
- The chamber is hand-reamed and the muzzle crown is recessed to protect it from damage that could degrade accuracy.

GRIPS

- Several wood, laminate and composite styles are available. Overmolded Ultragrip FX (UFX), soft nitrile rubber Ultragrip RX® (URX) and wood Ultragrip Deluxe® (UDX) ambidextrous grips have ergonomic finger grooves for enhanced control.

CALIFORNIA MODELS

- Some California approved Buck Mark Pistols include the slide shown on the left, while non California compliant models feature the slide on the right.

ABS CARRY CASE

- Buck Mark pistols are shipped in a sturdy ABS case.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

MORE FEATURES, MORE PERFORMANCE.

Model 1911-22 pistols are accurate and reliable, but it was only a matter of time before we made them better. Black Label models include a host of additional features that are designed to enhance the shooting experience.

1911 22

**EXTENDED AMBIDEXTROUS SAFETY**

- Ambidextrous thumb safety is easy to operate for both right- and left-handed shooters.
- Extended design is easier to reach with the strong hand and ensures secure thumb engagement.

**MAGAZINE**

- The steel magazine body is heat treated for long-term feeding reliability and long life.
- The coil spring provides a consistent follower angle.
- 10-round capacity.

**BEAVERTAIL GRIP SAFETY**

- The beavertail design prevents the hand from being pinched between the grip safety and the hammer.
- Raised bump ensures positive operation.

**FLAT MAINSPRING HOUSING**

- Makes the grip more comfortable for a wider range of shooters.

**FRAME**

- Engineering grade composite.
- Laminated grip panels.

**ABS CARRY CASE**

- 1911-22 pistols are shipped in a sturdy ABS case.

**SIGHTS**

- Combat-style sights offer rapid target acquisition.

**Made
in the USA**

FUNCTIONAL ADDITIONS.

Black Label 1911-22 handguns include a list of features that shooters seek. An extended thumb safety and slide stop, and a skeletonized hammer make manipulation easier and more positive. The beavertail grip safety prevents hammer bite and the flat mainspring housing ensures more positive operation of the grip safety. Combat-style sights allow for faster target acquisition. Get all this and the reliability we are known for with the Black Label 1911-22.

380 ACP POWERHOUSE.

The new 1911-380 pairs two of John M. Browning’s original inventions — the Model 1911 handgun and the 380 ACP cartridge. Scaled down to 85% of the size of the original 45 ACP versions, the single-action 1911-380 utilizes a precision built composite frame and extras like extended controls that make it ideal for sport shooting and personal protection. The 1911-380 is proudly Made in the USA.

EXTENDED AMBIDEXTROUS SAFETY

- Ambidextrous thumb safety is easy to operate.
- Extended design is easier to reach with the strong hand.

BEAVERTAIL GRIP SAFETY

- The beavertail design prevents bite to the hand from the grip safety.
- Raised bump ensures positive operation.

FRAME

- Engineering grade composite.
- Composite grip panels.

SIGHTS

- Combat-style sights offer rapid target acquisition.

MAGAZINE

- The steel magazine body is heat treated for long-term feeding reliability and long life.
- 8-round capacity.

FLAT MAINSPRING HOUSING

- Makes the grip more comfortable for a wider range of shooters.

ABS CARRY CASE

- The 1911-380 pistol is shipped in a sturdy ABS case.

SIZE MATTERS.

The new Browning 1911-380 combines two of John M. Browning’s most lasting innovations — the Model 1911 and the 380 ACP cartridge — into a modern, lightweight pistol. Unlike most of the modern “pocket pistols” that chamber the snappy 380 ACP cartridge, the 1911-380 is slightly larger to better manage recoil for improved control that makes follow-up shots faster and more accurate. The longer barrel increases bullet velocity for more downrange punch and improved accuracy. The grip is compact, yet it is long and wide enough to allow the shooting hand full purchase for added shooting comfort.

THE STANDARD.

The single-action Browning Hi Power has a proven reputation forged in the hands of generations of law enforcement, military, special operations forces and law abiding citizens. Unlike many modern, composite handguns, the heft of the Hi Power's steel frame aids in recoil control and accuracy for added confidence.

HI POWER

FRAME AND SLIDE

- The frame and slide are built from solid steel and keeps recoil light and manageable for accurate firing, even at a rapid rate. The Hi Power's balance in the hand is impeccable.

SIGHTS

- Hi Power pistols are available with fixed, low-profile three-dot sights. The Hi Power Standard is also available with optional low-profile target sights that are adjustable for windage and elevation.

MAGAZINE CAPACITY

- Double-stack magazine design.
- 13-round magazine capacity. 10-round capacity where required by law. Follow state and local laws regarding magazine capacity.

SAFETY

- A large, ambidextrous manual thumb safety is conveniently located on the frame just above the grip.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

MAKE A MASTERPIECE.

Building a custom Browning firearm is an endeavor to be relished. The Browning Custom Shop works closely with the customer to ensure their individual desires and creative ideas are satisfied, from the type of wood to the most unusual engravings desired. Once designed, the project is then placed in the expert hands of highly skilled craftsmen to make the customers dream gun a reality.

The Custom Shop range comprises four grades, each of which includes a certain number of options. As the firearms are produced in Belgium, a multitude of options are available.

PRICE

- Pricing for the basic firearm, before custom enhancement, is available from the sales department at Browning in Morgan, Utah by calling (801) 876-2711. All prices are subject to change due to changing world currencies.

HOW TO BUILD A CUSTOM GUN

- Visit browning.com/custom to view or download the Browning Custom Shop brochure. In addition to showcasing the firearms available, this brochure displays and explains the many grades, engraving patterns, checkering patterns, stock and forearm designs and personal touches available.

HOW TO ORDER

- All inquiries for Custom Gun Shop products will be submitted to headquarters in Morgan, Utah. Once the basic specifications have been determined, a written order should be placed with the Morgan office. The specifications will be reviewed with the Custom Shop in Belgium, and a price and delivery date will be determined.

DELIVERY

- Actual production time will be based on the complexity and detail of the custom order. An approximate delivery date will be furnished with the factory cost quotation.

B25 SIDEPLATE TRAP

With a full sideplate design, the B25 Sporter is the epitome of over and under shotguns. This much appreciated model is generally configured with long barrels and a wide ventilated rib fitted with a mid bead sight.

B25 SPORTER NEW GENERATION

The B25 Sporter New Generation is a new model from the Custom Shop. In addition to an Olympic trigger, this model includes a tapered 5/16" - 7/16" top rib and ventilated side ribs. It is available in 30" and 32" barrel length versions. The adjustable stock is optional.

B25 TRAP EVOLUTION II

The B25 Trap Evolution II is a clay shooting machine, supplied with an adjustable trigger and a unique ejection/extraction system that can be adapted to the shooter's needs.

**ELECTRONIC 4-BUTTON TOUCH PAD**

Easily program your own personal code to offer ready access to your handguns and small valuables. Uses eight AA batteries. (Not included.)

**PICK AND PLUCK FOAM**

A pick and pluck foam insert allows the Pistol Vault to be customized to your firearms and other valuables. This feature is especially handy if the Pistol Vault is mounted in a vehicle.

**LED LIGHTING**

Bright LED lighting illuminates the interior, making it easy to locate the Pistol Vault's contents at night or in a closet.

**LOCKING BOLTS**

A pair of tough 1/2" diameter locking bolts secure the lid.

**MANUAL KEY LOCK**

Batteries go out? Forget your code? No problem. Access the Pistol Vault anytime using the unique four-sided key.

**EXTERNAL ELECTRICAL CONTACTS**

Should the batteries fail or if the key is lost, Pistol Vaults include external electrical contacts that power the touch pad. (9V back up battery not included.)

BETTER THAN THE REST.

While many gun safes look similar standing on a sales floor, you won't find another that lives up to the standards set by Browning. Browning ProSteel safes combine high quality construction, proprietary technology, and patented interior designs to elevate them above the rest. In addition to groundbreaking features, all Browning ProSteel safes carry the UL RSC (Residential Security Container) rating — the industry standard that defines a home security safe and ensures that it meets construction specifications and has passed a series of laboratory test attacks.

Faith in our product is what allows Browning and ProSteel to offer the best warranty in the gun safe industry — a lifetime warranty that covers:

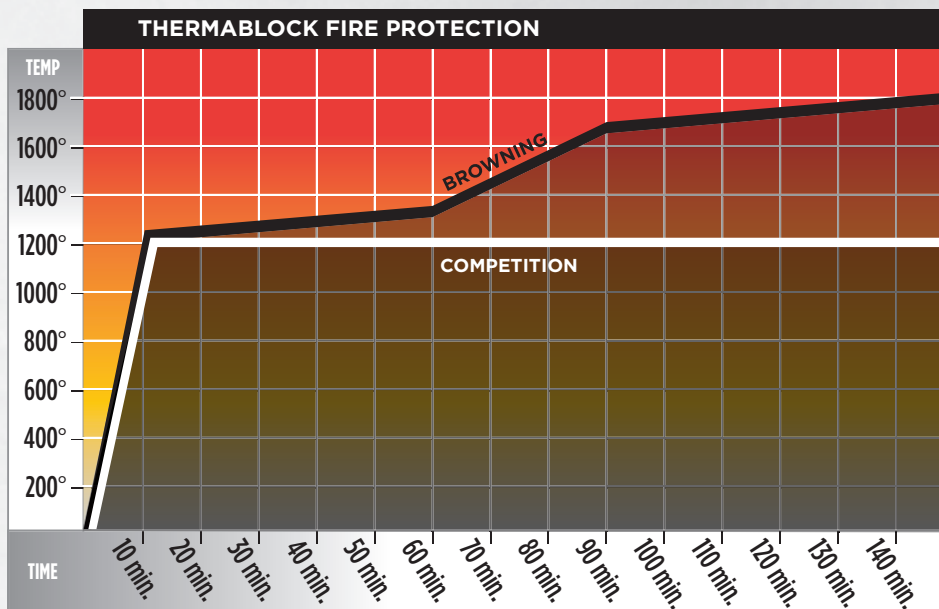

- ATTEMPTED BREAK IN
- BREAK IN
- FIRE

If your safe is involved in one of the above situations and your homeowner's insurance policy does not cover the damage to the safe, ProSteel will repair or replace the safe. (Safe contents are not covered.)

NEW THERMABLOCK FIRE PROTECTION.

When heat builds and flames roar, ThermaBlock ensures that your valuables are well protected. Exclusive to Browning ProSteel Safes, ThermaBlock features thicker sheets of fire insulation arranged in an interlocking design that minimizes gaps that would allow the internal temperature in the safe to rise during a fire.

With ThermaBlock's advantages, we begin fire testing safes where the other brands' testing ends. The chart below shows the temperatures a Browning ProSteel safe is subjected to at different durations compared to the competition.

NEW
ThermaBlock

THERMABLOCK INTERLOCKING DESIGN

BE MORE SECURE WITH A BROWNING PROSTEEL SAFE.

DUO-FORMED DOOR

The best Browning ProSteel safe door is made from multiple layers of steel formed together to provide superior strength, pry resistance and attack protection. Full second panel for outstanding strength. The door face is 1-5/16" thick.

1" FORMED DOOR

The 1" Formed Door is engineered with a rugged steel face. Back and reinforcement panels provide excellent strength and attack protection compared to the competition.

REINFORCED DOOR FRAME

The door opening of the safe is strengthened by an integrated return flange to create added pry and attack resistance.

UNI-FORCE™ LOCKING SYSTEM

The finest Browning ProSteel safe locking mechanism uses robust cam locks and a large, multiple diversion bar system to prevent bolt or handle pressure from reaching the lock. Forces go to the cams and diversion bars, not the lock, for protection unmatched by other locking systems.

OMNIBARRIER® LOCK PROTECTION SYSTEM

A carefully engineered structure of steel hard plate and steel components designed to protect the safe lock from drill, punch and push attacks.

FORCE DEFLECTOR™ LOCKING SYSTEM

The Force Deflector Locking System (U.S. patent #7,665,405) prevents bolt or handle forces from reaching the lock by using a rotating cam device. It prevents energy transfer to the lock better than most systems used in the safe industry.

PRY-STOP CORNER BOLTS

Pry-Stop Corner Bolts (U.S. patent #8,276,527) provide better protection than other pry-defense designs. Innovative long locking bolts extend diagonally from a reinforced support at the corners of the door to protect against pry attack at the vulnerable corner areas.

PRY-STOP END BOLTS

Superior to other bolt designs which allow the locking bolt support bar to bend. Pry-Stop End Bolts are over two and one-half times longer and attach to a high-strength steel angle iron that prevents the locking bolt support bar from bending in a pry attack. The top and bottom locking bolts on the door side secure the critical door corners.

PRY-STOP TABS

Pry-Stop Tabs are pieces of angled steel added to the top and bottom bolts and inside of the safe door. These reinforcements work together to increase pry resistance.

180° HEAVY DUTY HINGES

Rugged hinges allow the door to swing open 180° for unhindered access to the safe interior. Door locking bolts maintain security if the hinges are cut off. Fire protection is better than with internal hinges because no insulation is removed to accommodate the hinges.

THE BEST THERE IS FOR CONVENIENCE AND STORAGE SOLUTIONS.

A gun safe is more than total long gun capacity. Handguns, cameras, jewelry, documents, even laptops and external hard drives with thousands of digital photographs should have a home inside. Browning ProSteel safes have the most versatile interiors in the industry, bar none.

ONE-OF-A-KIND AXIS ADJUSTABLE SHELVING

When it comes to maximizing safe interior storage, Browning ProSteel safes lead the industry with unmatched versatility. The exclusive Axis Adjustable Shelving (U.S. patent #D662341) is a completely customizable system with an array of shelves that can be configured to meet virtually every need. Unlike shelves in the competitors' safes that are either fixed in position or only offer vertical adjustment, Axis shelves can be adjusted up and down, side to side, added and removed to accommodate items over a broad range of sizes. Axis maximizes the interior storage of long guns, handguns and other valuables. Several different shelves and options are available (see page 106) to further customize the interior to meet specific needs. The Axis shelf is made from a single piece of sturdy steel. Shelves are clad in a soft, protective polymer coating that is highly durable and designed to protect guns and valuables. It also adds a sleek appearance to the safe interior. Axis accessories are designed to easily mount to the solid steel shelf or barrel rack. (Compatible with safes that feature Axis Adjustable Shelving built in 2013 or later.)

CANTILEVERED MODULAR SHELVING

Creative interior storage solutions don't end with Browning ProSteel Custom Collection models. Cantilevered Modular Shelving borrows essential components from the patented Axis Adjustable Shelving (U.S. patent #D662341) to retain much of the adjustability of the higher-end system. Like Axis, Cantilevered Modular shelves can be adjusted up and down, side to side, added and removed to fit a wide range of valuables. The shelves are wood covered in soft carpet and built upon a tough steel frame.

MORE GUN STORAGE WITH BROWNING'S DPX SCOPE SAVER SYSTEM

Any way you look at it, a scoped long gun takes up the space of two guns in a safe, except with the DPX Scope Saver. The Scope Saver takes advantage of space no other manufacturer has ever thought of using, the space in the door, to fit a scope. With the scope recessed in the door, the gun takes up no more space than an unscoped long gun. And because the Scope Saver is integrated into the DPX door panel, these scoped long guns are right at your fingertips, easy to access as soon as the door swings open.

The DPX Scope Saver is neatly molded into the door panel and uses the area inside the door to create space for optics mounted on long guns. This unique, one-of-a-kind rack maximizes long gun storage and isolates and protects your optics from the usual bumps that occur when moving guns in and out of a safe. Look for the DPX Storage System and the exclusive Scope Saver on Browning ProSteel Custom Collection safes.

With the Scope Saver, long guns with optics now fit on the DPX rack without taking up space inside the safe body. The optics are also protected from the bumps and dings of guns going into and out of the safe.

NO SPACE GOES UNUSED WITH DPX.

THE DPX ADVANTAGE

The patented DPX storage system (U.S. patent #7,409,790) is available exclusively on Browning ProSteel safes. This unequalled organizational tool allows long guns, handguns, shooting gear and more to be stored on the back of the safe door. The DPX gun rack creates as much as 50% more long gun capacity inside the safe, and makes the guns on the door easy to access. The Scope Saver increases storage and protects optics. DPX pouches and pockets hold valuables and gear where they are easy to find and free up shelf space for even more items.

CAPACITY COMPARISON	COMPETITORS SAFE 25-28 CUBIC FT. SAFE	BROWNING PROSTEEL SAFE 26 CUBIC FT. SAFE	RESULT
TOTAL GUN CAPACITY - HALF SHELF INTERIOR	12 Guns	18 Guns	50% More
TOTAL GUN CAPACITY - ALL GUN INTERIOR	24 Guns	29 Guns	21% More
FAST ACCESS GUNS - HALF SHELF INTERIOR	2 Guns	9 Guns	350% More
FAST ACCESS GUNS - ALL GUN INTERIOR	4 Guns	11 Guns	175% More

THE QUICK ACCESS DPX BARREL RACK

Flexible polymer wings protect the barrel finish, secure the barrel in place and allow firearms to easily be pushed into or pulled from the rack. (U.S. patent #D643500)

MESH POCKETS

See-through mesh pockets hold smaller items and make valuables fast and easy to locate visually.

HOW DO BROWNING SAFES HOLD 50% MORE GUNS?

- The long gun capacity is a series of three numbers, for example 11/22+7 on a 26 Cu. Ft. safe.
- The first number is the long gun capacity in the safe body with a Half Shelf interior (11 in the example).
- The second number is the long gun capacity in the safe body with an All Gun interior (22 in the example).
- The “plus” number is the long gun capacity on the back of the door (+7 in the example).
- Total capacity grows up to 50% in the Half Shelf configuration because there is a full rack of long guns on the door back.
- “Fast Access Guns” increase in both Half Shelf and All Gun configurations. These guns are defined as those that are on the front row of the safe body and the door gun rack.
- * Due to the varying sizes of firearms, actual gun capacity may vary.

DPX HANDGUN POUCHES

The military-style MOLLE system straps on the DPX panel allow handgun pouches and other MOLLE items to be placed virtually anywhere.

DPX SCOPE SAVER

Store long guns with optics on the DPX door rack with the Scope Saver. The recessed panel protects scopes and increases gun capacity.

PLATINUM PLUS SAFES

SECURITY Heavy duty 3/16" (7-Gauge) steel body • 1-5/16" Thick Duo-Formed® Door with full 10-Gauge inner plate • Uni-Force™ Locking System • OmniBarrier® Lock Protection System • Pry-Stop Corner Bolts • 1-1/2" diameter chromed locking bolts on all four sides of door (top/sides/bottom) **FIRE** New ThermaBlock 1750° F/120 min. fire protection **APPEARANCE** Automotive grade gloss finish in your choice of colors • Pinstripping and choice of scenes • Five-spoke handle in your choice of finishes • Grade VI Cedar interior **CONVENIENCE** Premium DPX Storage System with Quick Access Barrel Rack and Scope Saver • Axis Adjustable Steel Shelving with Drawer and Multipurpose Insert, File Box and Pistol Rack • Elevated floor protects gun stocks • Electrical Outlet • Interior Light Package

AXIS FILE BOX

Important documents may be irreplaceable and need to be easy to find. Keep track of them in the convenient File Box.

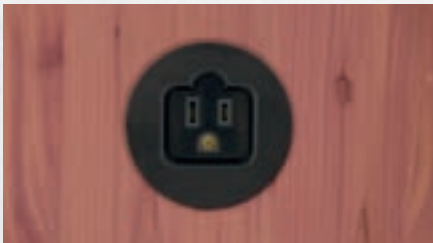

GRADE VI INTERIOR/LED LIGHTING

A fragrant cedar interior adds a rich quality to the safe. Interior LED lighting along the door frame makes locating items inside the safe much easier.

AXIS DRAWER AND MULTIPURPOSE INSERT

The Axis Drawer mounts beneath an Axis steel shelf and includes a Multipurpose Insert that keeps small items organized, easy to locate and protected.

ELECTRICAL OUTLET

The Electrical Outlet allows electrical accessories to be added without taking apart power cords.

WHY STEP UP TO A PLATINUM PLUS SAFE?

Stepping up to a Platinum Plus model gives you the advantage of an exquisite Grade VI Cedar interior for a unique appearance. Thicker 3/16" (7-Gauge) steel adds additional mass and rigidity, while larger (1-1/2") locking bolts and four corner locking bolts offer greater security and protection. A superior ThermoBlock 1750°/120 minute fire rating keeps valuables protected longer. An Axis Drawer with Multipurpose Insert and File Box are included.

MEDALLION SAFES

SECURITY 10-Gauge steel body • 1-5/16" Thick Duo-Formed® Door with full 10-Gauge inner plate • Uni-Force™ Locking System • OmniBarrier® Lock Protection System • Pry-Stop Corner Bolts • 1-1/4" diameter chromed locking bolts on all four sides of door (top/sides/bottom) **FIRE** New ThermaBlock 1700° F/110 min. fire protection **APPEARANCE** Automotive grade gloss or rugged textured finish • Pinstripping and choice of scenes • Five-spoke handle in choice of finishes • Beige Fabric interior **CONVENIENCE** Premium DPX Storage System with Quick Access Barrel Rack and Scope Saver • Axis Adjustable Steel Shelving with Pistol Rack included • Elevated floor protects gun stocks • Electrical Outlet • Interior Light Package

INTERIOR LIGHT PACKAGE

LED lighting adds even more value to the Medallion Series. A sensor turns on the lights when the door is opened.

UNI-FORCE LOCKING SYSTEM

Robust cam locks and a multiple diversion bar system divert pressure from reaching the lock.

OMNIBARRIER LOCK PROTECTION

Steel hard plate surrounds the lock and protects it from drill, punch and push attacks.

ELECTRICAL OUTLET

The Electrical Outlet allows electrical accessories to be added without taking apart power cords.

PRY-STOP CORNER BOLTS

Innovative long bolts extend diagonally from the corners of the door to protect against pry attack at the vulnerable corner areas.

WHY STEP UP TO A MEDALLION SAFE?

Stepping up to a Medallion safe buys added security with Pry-Stop Corner Bolts, Uni-Force™ Locking System and Omnibarrier® Lock Protection System. Thicker steel (10-Gauge vs. 11-Gauge) means less flex. A higher fire rating (ThermaBlock 1700°/110 min. vs. 1680°/100 min.) is also a benefit. An Interior Light Package is included.

SILVER SAFES

SECURITY New 11-Gauge Steel Body • 1-5/16" Thick Duo-Formed® Door with full 10-Gauge inner plate • Force Deflector™ Locking System • Hardened steel pin lock protection • Pry-Stop End Bolts • 1-1/4" diameter chromed locking bolts on all four sides of door (top/sides/bottom) **FIRE** New ThermoBlock 1680° F/100 min. fire protection **APPEARANCE** Automotive grade gloss or rugged textured finish • Pinstriping and choice of scenes • Five-spoke handle in choice of finishes • Beige Fabric interior **CONVENIENCE** Premium DPX Storage System with Quick Access Barrel Rack and Scope Saver • Axis Adjustable Steel Shelving with Pistol Rack included • Elevated floor protects gun stocks • Electrical Outlet

WHY STEP UP TO A SILVER SAFE?

Stepping up to the Silver safe provides you with an elegant Five Spoke handle along with a full selection of finishes, colors and options to select from. Security is heightened thanks to the Duo-Formed door which features a full 10-Gauge inner plate. A higher fire rating (ThermaBlock 1680°/100 min. vs. 1680°/90 min.) and locking bolts on all four sides of the door improve protection from disaster.

ELECTRICAL OUTLET

The Electrical Outlet allows accessories to be added without taking apart power cords.

DPX SCOPE SAVER

Store long guns with optics on the DPX door rack with the Scope Saver. The recessed panel protects scopes and increases gun capacity.

AXIS ADJUSTABLE SHELVING

Multiple shelf styles are available and can be moved to allow small and large items to fit in the safe taking up minimum space.

LIGHTING	
S	LED Lighting Package

LIGHTING

This integrated LED lighting package makes locating objects on shelves or identifying the right firearm convenient and easy. The four included LED light bars (five on tall safes) are wired to a door-activated motion sensor and illuminate when the door is opened. Factory installation adds a seamless look.

SAFE GRAPHICS

Safe graphics are permanently bonded to the safe door and can only be applied at the factory. Scroll is standard on Custom Collection safes, and the scenes below can be substituted for no extra charge. A "no scene" option is also available.

HEAVYWEIGHT SAFES

SECURITY 11-Gauge steel body • 1" Formed Door with inner plate • Force Deflector™ Locking System • Hardened steel pin lock protection • Pry-Stop End Bolts • 1-1/4" diameter chromed locking bolts on three sides of door (top/sides) **FIRE** New ThermoBlock 1550° F/80 min. fire protection **APPEARANCE** Automotive grade gloss black or rugged textured charcoal finish • Decorative scroll work • Three-spoke black chrome handle • Beige Fabric interior **CONVENIENCE** Premium DPX Storage System with Quick Access Barrel Rack • Cantilevered Modular Shelving • Elevated floor protects gun stocks

NEW

WHY STEP UP TO A HEAVYWEIGHT SAFE?

Stepping up to a new Heavyweight safe adds a tough 11-Gauge steel body and Pry-Stop End Bolts for improved break-in protection. The excellent 1550° F/80 min. fire rating offers additional protection. A full DPX door storage rack adds storage for valuables, handguns and long guns, while improving access to more long guns. Black chrome hardware adds a rugged appearance.

QUICK ACCESS RACK

Flexible polymer wings secure the barrel and allow firearms to easily be pushed into or pulled from the rack.

PRY-STOP END BOLTS

More than two and one-half times longer than door bolts, they attach to angle iron which prevents the locking bolt support bar from bending in a pry attack. The top and bottom locking bolts on the door secure the critical door corners.

CANTILEVERED MODULAR SHELVING

Quickly and easily adjust the shelving to meet individual storage needs. Barrel racks can be adjusted at various heights to accommodate long guns, as well as shorter carbine models. The cantilevered design eliminates the need for a vertical shelf support to add extra interior space.

WHY CHOOSE A SPORTER SAFE?

Sporter safes offer the quality, security and fire protection features expected from a Browning ProSteel gun safe at a price that is next to impossible to beat. 2015 models include a 1400° F/60 minute fire protection rating for additional peace of mind. The Cantilevered Modular Interior and DPX door storage provide the most versatile interior found in a safe at this price — and above.

QUICK ACCESS RACK

Flexible polymer wings secure the barrel and allow firearms to easily be pushed into or pulled from the rack.

CANTILEVERED MODULAR SHELVING

Quickly and easily adjust the shelving to meet individual storage needs. Barrel racks can be adjusted at various heights to accommodate long guns, as well as shorter carbine models. The cantilevered design eliminates the need for a vertical shelf support to add extra interior space.

SECURITY 11-Gauge steel body • 1-5/16" Thick Duo-Formed® Door with full 10-Gauge inner plate • Force Deflector™ Locking System • Hardened steel pin lock protection • Pry-Stop End Bolts • 1-1/4" diameter chromed locking bolts on all four sides of door (top/sides/bottom) **FIRE** New ThermoBlock 1680° F/100 min. fire protection **APPEARANCE** Matte tactical black finish with black chrome hardware and accents • Beige Fabric interior **CONVENIENCE** Premium DPX Storage System with Quick Access Barrel Rack and Scope Saver • Two Carbine Barrel Loops • Axis Adjustable Steel Shelving with Pistol Rack included • Elevated floor protects gun stocks • Interior light package • Electrical Outlet

A

A

B

AXIS ADJUSTABLE SHELVING
Multiple shelf styles are available and can be moved to allow small and large items to fit in the safe using the minimum amount of space. Individual shelves can be adjusted to accommodate modern sporting rifles, carbines and shotguns.

EXTERIOR GEAR LOFT
Tactical and hunting gear can be stored within easy reach on top of the safe in the semi enclosed Gear Loft.

AXIS PISTOL RACK
With a five handgun capacity, the pistol rack stores the pistols under the shelf, leaving the shelf available for possessions and gear.

CARBINE BARREL LOOPS
Lower mounted barrel loops secure shorter rifles and shotguns to the DPX door panel.

SECURITY 12-Gauge steel body • 1" Formed Door with partial inner plate • Force Deflector™ Locking System • Hardened steel pin lock protection • 1" diameter chromed locking bolts on three sides of door (top/sides) **FIRE** New ThermoBlock 1400° F/60 min. fire protection **APPEARANCE** Matte tactical black finish with black chrome hardware and accents • Beige Fabric interior **CONVENIENCE** Full DPX Storage System • Two Carbine Barrel Loops • Cantilevered Modular Shelving • Elevated floor protects gun stocks

A

B

CANTILEVERED MODULAR SHELVING

Quickly and easily adjust the shelving to meet individual storage needs. Barrel racks can be adjusted at various heights to accommodate long guns, as well as shorter carbine models. The cantilevered design eliminates the need for a vertical shelf support to add extra interior space.

DPX STORAGE SYSTEM

Includes a rack on the back of the door to store long guns and make them easier to access. Pouches and pockets help organize other valuables.

CARBINE BARREL LOOPS

Lower mounted barrel loops secure shorter rifles and shotguns to the DPX door panel.

WHY CHOOSE A SELECT SAFE?

A Select safe offers added security with Pry-Stop End Bolts and a big increase in convenience and capacity thanks to the Quick Access Rack with Scope Saver and full DPX Storage System. The factory-installed LED Interior Light package makes locating items inside the safe easy.

CANTILEVERED MODULAR SHELVING

Quickly and easily adjust the shelving to meet individual storage needs. Barrel racks can be adjusted at various heights to accommodate long guns, as well as shorter carbine models. The cantilevered design eliminates the need for a vertical shelf support to add extra interior space.

PRY-STOP END BOLTS

More than two and one-half times longer than standard door bolts, they attach to angle iron which prevents the locking bolt support bar from bending in a pry attack. The top and bottom locking bolts on the door side secure the critical door corners.

LED INTERIOR LIGHT PACKAGE

LED lighting around the door frame adds value and makes locating items in the safe easier. A pressure sensor turns on the lights when the door is opened.

EXCLUSIVE, CUSTOMIZABLE, ADJUSTABLE SHELVING.

When it comes to maximizing safe interior storage, Browning ProSteel safes lead the industry with unmatched versatility. The exclusive Axis Adjustable Shelving (U.S. patent #D662341) uses an array of shelves that can be configured to meet virtually any need imaginable.

AXIS BOW HANGER
Lock up and protect expensive archery equipment while taking up minimal space.

AXIS SCOPED PISTOL RACK
With a deeper drop and heavy-gauge rods, handguns with optics are easier to store.

AXIS VERTICAL FILE HOLDER
This file holder makes it easier to locate and organize important documents.

AXIS DEEP DRAWER
The Deep Drawer is the perfect home for larger or odd shaped items.

AXIS HIGH CAPACITY BARREL RACK
Make room for more long guns with this high capacity barrel rack.

AXIS PISTOL RACK
With a five handgun capacity, the pistol rack stores the pistols under the shelf, leaving the shelf available for possessions and gear.

AXIS BARREL RACK
With 11 slots for long guns, the barrel rack can be raised or lowered to accommodate rifles, shotguns, carbines and modern sporting rifles.

AXIS STEEL SHELF
The most basic shelf is made from tough steel with a protective polymer skin that protects valuables and handguns.

AXIS DRAWER WITH JEWELRY INSERT
This insert protects and organizes valuables such as watches, rings, bracelets and necklaces.

AXIS DRAWER WITH FOAM INSERT
Your most prized possessions can be isolated from potential damage. Pick and pluck foam is easily customized to fit any shape item.

AXIS DRAWER WITH MULTIPURPOSE INSERT
Keep delicate jewelry and other small items organized, protected and easy to find.

AXIS DRAWER WITH MONEY/PASSPORT INSERT
Compartments are sized to organize cash, passports and other documentation.

AXIS DRAWER
The sturdy drawer is perfect for all sorts of goods that need to be separated.

AXIS FILE BOX
Important documents may be irreplaceable or valuable or both. Keep them easy to find in this handy file box.

C	Stock Riser	164144	23.00

PISTOL RACK

Store handguns more efficiently • Increases storage space on shelves • Access to handguns is made easier by placing them in an upright position

	DESCRIPTION	CODE NUMBER	SUGGESTED RETAIL
A	6-Gun	164136	30.00
B	4-Gun	164134	20.00

VCI GUN SOCK

VCI (Vapor Corrosion Inhibitor) penetrates into the smallest crevices and drives out moisture where oils cannot reach • Provides full protection by forming a vapor enclosure around the firearm from muzzle to butt • Gives additional protection to all metal items in an enclosed area such as a gun safe or cabinet • Drawstring closure • Fits rifles and shotguns 48" to 56"

CODE NUMBER	SUGGESTED RETAIL
149985	18.00

DRY-ZONE MOISTURE REDUCER

Absorbs moisture without electricity, and is rechargeable in an oven • Can be reactivated indefinitely • One 500-gram box protects up to 37 cubic feet of enclosed space, about the volume of a standard 30" wide safe

CODE NUMBER	SUGGESTED RETAIL
154001	20.00

EVERDRY ELECTRIC DEHUMIDIFIER

The EverDry Electric Dehumidifier removes humidity from the interior of a safe and protects against rust • The 18" long EverDry should be used on safes 30" wide and larger • Cord is removable for installation

CODE NUMBER	SUGGESTED RETAIL
164128	30.00

FLEXIBLE EVERDRY DEHUMIDIFIER

The Flexible EverDry is flat and easily bends • Takes up less space and makes installation easier, especially in small safes • Removes humidity from the interior of a safe and protects against rust • Plug is removable for installation • LED indicates unit is operating

CODE NUMBER	SUGGESTED RETAIL
164129	40.00

TRADITIONAL, TASTEFUL PROTECTION FOR EVERY CLASSIC BROWNING.

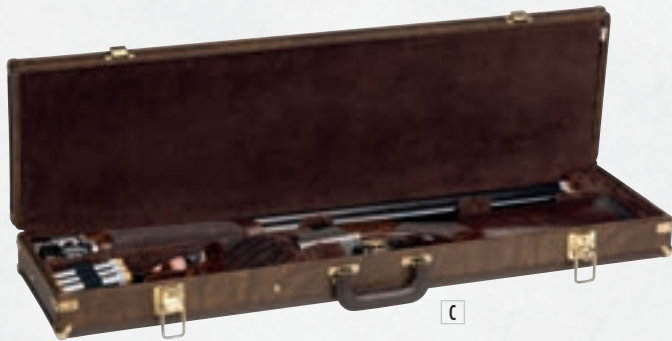

Nothing speaks more eloquently of one's good taste than a traditional Browning fitted case constructed of solid wood with brass fittings and the look of aged leather. They create the perfect backdrop for showing off a fine Browning firearm. These fitted gun cases provide a place for everything from choke tubes to shooting gloves and are designed to provide decades of tasteful protection for the valuable Browning within.

MOA WINDOW MOUNT

Ballistic nylon construction • Rubberized top and bottom to hold both gun and bag in place while shooting • Polymer pellet fill allows for easy repositioning and provides a solid rest • Polymer filled wings provide a stable position in a shooting house window or over treestand frames • V-frame rest provides a solid platform to support firearm without lateral movement

CODE NUMBER	SUGGESTED RETAIL
129103	53.00

FINE TUNE FOR FULL POWER ACCURACY WITH THE BROWNING BOSS.

When trying to wring maximum accuracy out of any rifle, the two choices are try to find a factory load with acceptable accuracy, or experiment with handloads that offer improved accuracy but often at the cost of less than maximum velocity. Both are expensive and time consuming endeavors. With the Browning BOSS, demanding shooters can simply dial up maximum accuracy without sacrificing maximum velocity.

BOSS-CR ACCESSORY

The BOSS-CR accessory offers all the accuracy and tunable advantages of the original BOSS device without the muzzle brake feature. By simply replacing the original BOSS forward weight and recoil reduction components with the one-piece, non-ported BOSS-CR accessory, only the reduced recoil of the original BOSS is sacrificed. The BOSS-CR accessory is designed to fit only BAR Mark II and A-Bolt centerfire rifles previously factory-fitted with the BOSS. **GLOSS BLUED** for BAR Safari; A-Bolt models: Medallion and Gold Medallion **MATTE BLUED** for A-Bolt models: Composite Stalker, Hunter, Euro-Bolt, Varmint, Eclipse Hunter and M-1000 Eclipse **STAINLESS** for A-Bolt models: Stainless Stalker, White Gold Medallion and M-1000 Eclipse **IT IS IMPORTANT THAT THE CORRECT BOSS-CR BE SELECTED FOR A SPECIFIC CALIBER AND MODEL OF RIFLE.**

INTEGRATED SCOPE MOUNT SYSTEM

Browning's Integrated Scope Mount System unitizes the ring and base into a single, ultra-rigid unit. Machined from 7000 series aluminum alloy, they eliminate alignment problems and the possibility of a loose connection between the base and ring. They are available in .400" Standard height, .500" Intermediate height and .600" High height versions for many popular Browning firearms.

EVERY BROWNING DESERVES THE BEST THERE IS IN BASES AND RINGS.

Browning firearms are designed and built to deliver outstanding accuracy. In order to maximize their accuracy potential, make sure they are equipped with genuine Browning bases and rings.

The height is determined by measuring from the top of the base to the bottom of the scope ring. Barrel contour, optic size and preferred eye relief all affect the fit of the scope on a rifle.

STANDARD HEIGHT (.300")

For scopes with an objective up to 44mm and a standard barrel contour

INTERMEDIATE HEIGHT (.400")

For scopes with an objective up to 50mm and a standard barrel contour

HIGH HEIGHT (.500")

For scopes with an objective up to 56mm and a standard barrel contour

SCOPE BASES

Browning Scope Bases are machined from solid steel • Double recoil shoulder design holds rings securely, even under magnum recoil • T-Bolt two-piece and SA-22 one-piece bases are alloy and are only compatible with Browning rimfire rings (Code 12365) • These bases are only compatible with Browning Scope Rings listed at right • Maxus, Gold, Silver, BPS, Buck Mark two-piece bases and BLR Takedown one-piece bases are Weaver-style and not compatible with Browning rings.

HiViz 2-1 Hunting Sight	12871	39.00
HiViz 2-1 Sporting Sight	12872	39.00

PICK THE RIGHT CHOKE TUBE.

Demanding shooters know that selecting the right choke tube for a specific hunting situation or challenging target presentation is a key factor in making a successful shot. That's why Browning offers such a wide selection of choke tubes, ranging from Extra-Full constrictions for turkey, coyote and goose hunters to pattern-spreading Timber n' Teal tubes for close-in flooded timber waterfowling. Every Browning choke tube is made to exacting standards to provide years of dependable service.

INVECTOR-DS

INVECTOR-DS CHOKE SYSTEM

- Invector-DS choke tubes combine muzzle-end threads and thin-wall construction for a longer, more gradual taper that produces extremely consistent, dense shot patterns that tighten consistently in reliable, evenly scaled steps.
- Muzzle threads minimize the flare at the end of the barrel for improved appearance, a faster swing and improved balance.
- A proprietary differential-banded brass seal compresses against the barrel wall when tightened to keep the choke tube threads clean and make installation and removal easier than any other muzzle thread system.
- Invector-DS is standard on A5 and Citori 725 models.
- View the full line of Invector-DS choke tubes on pages 145 and 147.

INVECTOR-Plus™

INVECTOR-PLUS CHOKE SYSTEM

- The Invector-Plus interchangeable choke tube system works with Vector Pro and back-boring to offer consistent, dense shot patterns.
- The longer choke taper inside an Invector-Plus choke tube produces consistent patterns and is far more durable than choke systems in competitors' guns, especially with steel shot.
- Invector-Plus eliminates gases slipping between the choke tube and barrel that could damage the choke tube and the barrel.
- Invector-Plus is standard on 12 and 20 gauge Maxus, Citori, Cynergy, Silver, BPS and BT-99 models.
- See pages 145 through 148 for a complete listing of choke tubes.

Browning's Invector choke tube is still flawless after 500 rounds of steel shot.

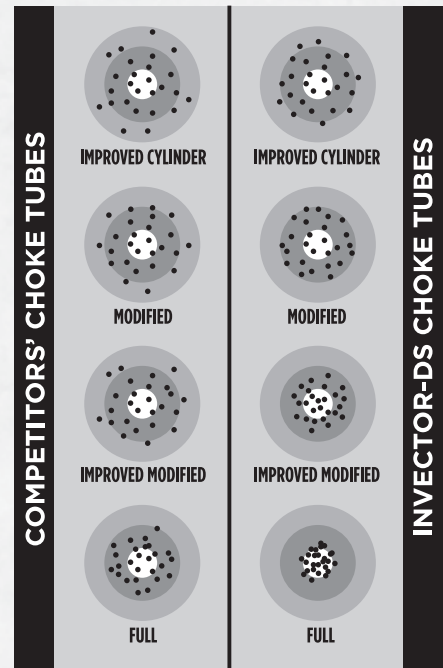

The competitor's choke tube is grooved and pitted after shooting 500 rounds of steel shot.

STANDARD INVECTOR™

STANDARD INVECTOR

- The Standard Invector interchangeable choke tube system is for Browning's non back-bored barrels and offers consistent, dense shot patterns. It's far more durable than the choke systems found in competitors' guns, especially with steel shot.
- Standard Invector eliminates gases slipping between the choke tube and barrel that could damage the choke tube and the barrel and it's standard on 10, 16 and 28 gauge, and .410 bore Citori, Cynergy, Gold and BPS models.
- See pages 145 through 148 for a complete listing of choke tubes.

INVECTOR-DS CHOKE TUBES VS. COMPETITORS' CHOKE TUBES

Invector-DS tubes have even pattern percentage increments, offering just the right pattern for any shooting situation.

Competitors' choke tubes show little pattern difference between choke constrictions.

INVECTOR-DS EXTENDED CHOKE TUBES

Extended length tubes are easy to change and add approximately 3/4" to the overall length of the barrel • Proprietary differential banded brass gas seal eliminates residue build up and makes chokes easy to remove and install • Integrated spring suspension holds the seal tight, yet allows expansion against the barrel wall for a perfect fit and a smooth transition for shot column entering choke • Gas is controlled at the interface between choke and where it seats in the bore • From Skeet to Full choke, patterns tighten consistently and reliably • Choke tube wrenches are listed on page 149 • Flat choke tube wrench is not compatible with Invector-DS choke tubes

INVECTOR-DS

INVECTOR-DS FLUSH CHOKE TUBES

Standard tubes fit flush with the end of the barrel but are longer than competitors' tubes • Proprietary differential banded brass gas seal eliminates residue build up and makes chokes easy to remove and install • Integrated spring suspension holds the seal tight, yet allows expansion against the barrel wall for a perfect fit and a smooth transition for shot column entering choke • Gas is controlled at the interface between choke and where it seats in the bore • From Skeet to Full choke, patterns tighten consistently and reliably • Choke tube wrenches are listed on page 149 • Flat choke tube wrench is not compatible with Invector-DS choke tubes

HIGH GRADE KNIVES FOR THE DEMANDING OUTDOORSMAN.

For decades our knives have been highly regarded by the world's most demanding bladesmen. Our new High Grade Knives are the most magnificent and eye-catching examples of the bladesmithing arts we have ever offered. Some of these jewel-like examples will be acquired for the pure enjoyment of their design, craftsmanship and quality. Others are destined to become an investment for the serious knife collector. Still others will spend adventurous lives far afield, riding the high range on the belt of the avid hunter or the professional guide. Wherever they may roam, we know that each and every one of these Browning High Grade knives will be treasured, enjoyed, and in due time, passed along to the next generation of outdoorsmen. Like all Browning knives, these classic blades are, and shall always be, a cut above the rest.

EXPLORING THE ROAD TO DAMASCUS STEEL.

Like the stripes of a wild animal, the laminated bands of a genuine Damascus blade ripple and shimmer in the sunlight, giving true delight to the knowledgeable eye. A product of folding and hot-forging layer upon layer of high-quality steel, each Damascus blade is a unique expression of the knifemaker's art. These laminations create a robust cutting edge capable of long service and yet they remain easy to sharpen to a razor's edge. When a Damascus knife says Browning on the side it's The Best There Is.

CAMP SAW

TYPE Folding camp saw **BLADE** 4116 stainless steel with push/pull saw teeth **HANDLE** Injection molded composite with rubber gripping inlays • Finger grooves and large tail radius for greater comfort and control **FEATURES** Button securely locks the blade in both the open and closed position • Included nylon sheath can be worn in vertical or horizontal position (not shown)

MODEL	CODE NUMBER	SUGGESTED RETAIL
922	322922	28.00

HOW TO CHOOSE A FLASHLIGHT

Browning is a leading manufacturer of portable battery-powered lighting for hunters and shooters with more than 35 styles in the product line. To choose the best light — read on.

SIZE, WEIGHT AND POWER

When choosing a light, smaller, brighter and lighter are better. Today's high-output LEDs from manufacturers like Luxeon® and Cree® are so powerful and efficient they achieve the same light output as the old multi-cell C and D lights. The super bright Alpha and Alpha Max Flashlights use a single AA battery yet are not much bigger than a shotgun shell.

LED VS. XENON BULBS

LEDs are preferred over Xenon bulbs for most uses, thus all our lights are now LED designs. LEDs use batteries more efficiently, illuminate at greater distances, emit a clean, even beam and will never burn out under normal use. Like most technology, LEDs keep getting better every year. For 2015 many of our lights offer upgraded LEDs with 10% - 400% more output.

HAND-HELD OR HANDS-FREE

Headlamps and cap lights allow the use of both hands for tasks like dressing a deer, fixing a truck or finding a path through the woods. Modern technology makes many headlamps as powerful as larger hand-held flashlights. The MicroBlast headlamp can be worn either as a headlamp, clipped to a shirt pocket or to the brim of a hat.

LONG RUN TIME

By using advanced digital circuitry, highly efficient LEDs and low-resistance switches, we are able to offer extra long run times on many lights. Most Tactical Hunter lights will run for 20-48 hours on the low setting. The High Noon 4C Spotlight will run for 8 days at the low setting. These extended run times could be the difference between getting home safely and spending a night in the woods.

WATERPROOF AND SUBMERSIBLE

Because the great outdoors doesn't always have great weather, we have redesigned most flashlights to be waterproof and submersible to 3 feet for 30 minutes (ANSI IPX7). Most of our other lights are O-ring sealed for greater water resistance (IPX4). The High Noon LED Spotlight is submersible and it floats.

BATTERIES

Lithium batteries are used in many of our highest-performing lights, such as Blackout and Nitro. Lithium batteries pack twice the power of alkaline batteries for their weight, and operate well at very cold temperatures. Other lights in the line use AA and AAA alkaline batteries because they cost less than lithium and are readily available anywhere in the world. The latest integrated circuit designs in the Browning Pro Hunter and Alpha flashlights allow alkaline batteries to approach the performance of lithium batteries.

SWITCH SETTINGS

Multiple switch settings (high, low and in-between) help preserve battery life and allow selection of colors and flashing options. The lock-out switches found on most of our lights keep the light from accidentally turning on in a pack or pocket. A disorienting Fast Strobe setting is now available on many of our lights, and it has proven useful for self-protection and for signalling during an emergency.

RED, GREEN AND BLUE

Colored LEDs help preserve night vision and are great for map reading. They are less obvious than white light to many types of game animals.

FL-1 FLASHLIGHT PERFORMANCE STANDARDS

We proudly participate in the FL-1 flashlight performance standards for measuring and stating performance claims for all portable lights. This includes Brightness (Lumens), Distance, Run Time, Water Resistance and Impact Resistance. FL-1 provides the only reliable apples-to-apples comparison between models and is used by most major manufacturers. Look for these FL-1 symbols on our light packaging.*

* Our lights with multiple settings; the lumens, battery life and distances are stated at the highest setting (100% power), unless indicated otherwise.

LUMENS = BRIGHTNESS

The output of a traditional 2D cell flashlight is approximately 15 - 20 lumens. The latest LED flashlights can have an output of more than 700 lumens.

BATTERY LIFE

Battery Life (Run Time) is defined as the time elapsed from when the batteries are new to when the light reaches 10% of the original brightness.

MAXIMUM DISTANCE

Maximum Distance is measured as the distance from the light source to where it decreases in brightness to 0.25 lux — about the brightness of the full moon on a clear night.

WATER RESISTANCE

Water Resistance (FL-1 Standard IPX4) is tested by spraying water onto the light from multiple directions. This simulates a heavy, all-day rain.

WATERPROOF AND SUBMERSIBLE

Waterproof and Submersible (FL-1 Standard IPX7) assures water cannot get inside the light. This is conducted for 30 minutes at a water depth of 1 meter (about 39").

IMPACT RESISTANCE

Impact Resistance (FL-1 Standard 1M) measures how well the light resists damage when dropped repeatedly from a height of 1 meter (about 39") onto concrete.

THE NEW EPIC HEADLAMPS ARE, QUITE SIMPLY, A BRILLIANT DESIGN.

The new Browning Epic Headlamps combine single-battery power with multiple LED lampheads and high-output circuits to deliver maximum performance, along with minimal size and weight. A flexible elastomer headplate make the Epic so comfortable you might forget you're wearing one. The advanced ergonomic design keeps the light close to your head to keep a steady beam on the subject, even when you are active or in motion. They're rugged and ready to roll on an Epic adventure.

EPIC

BRIGHTNESS 20 or 225 lumens **EFFECTIVE DISTANCE** 27 or 100 yards **FEATURES** Single battery power source • Rugged matte black polymer body with Vista® camo front • LED life of 100,000 hours • Low-profile lamphead design • Soft elastomer headplate for added comfort • Silent beam angle adjustment • 1 AA Model uses two white LEDs to produce 20 lumens for general use around camp • Two green LEDs provide stealth and protect night vision • Hold down mode switch for three seconds to activate Fast-Strobe with white LEDs • 3V model has super-bright white LED producing 225 lumens that reaches out to 100 yards • Two lower-output white LEDs are ideal for general use around camp • Two green LEDs offer stealth and protect night vision

WELCOME TO MOSSY OAK COUNTRY.

Country means something a little different to everyone. It might be the music you listen to. Maybe it's a location anywhere except the city. Maybe country is a way of life that is just a whole lot more easygoing.

The folks at Mossy Oak see country as being all those things and more. They think of country as a lifestyle, one in which hunting and spending time in the great outdoors is a big part. They know that time outdoors is family time, and that is time well spent. This is why we are proud to introduce Mossy Oak's all new Break-Up Country® camouflage pattern.

Break-Up Country is the first camo pattern ever that utilizes true-to-life size elements, unmatched digital clarity and accuracy to conceal your outline anywhere and in any season you hunt. In Break-Up Country, the elements are larger and more sparse to prevent the muddy darkness of other patterns. All the elements are actual objects, precisely represented in a digital format for unmatched realism and concealment. The leaf you see is a picture of a leaf, not just an artist's rendition.

When you remove all the technical jargon, Mossy Oak Break-Up Country is more than just another camo pattern, at its core, it's the country life itself.

Welcome to Break-Up Country.

BREAK-UP
COUNTRY

The logo for Mossy Oak Break-Up Country, featuring the words "BREAK-UP" in a small, bold, sans-serif font above the word "COUNTRY" in a large, bold, serif font. Below the text is a stylized graphic of a tree and a deer head.

ONE BRAND, THREE GREAT CHOICES FOR TECHNICAL CLOTHING.

Whether it is for season, performance or price, hunters demand different things from their clothing and no other company covers the broad spectrum of technical outerwear better than we do. At the top rung is XM Elite, built to ensure that the hardest of the hardcore big game hunters stay warm, dry and comfortable. Hell's Canyon strikes the perfect balance between value and performance by offering a ton of both. Wasatch rounds things out with rugged, no-frills gear at a huge value. Whether you demand the best gear or the best bang for your buck, look to one proven brand — Browning.

XM ELITE — UNCOMPROMISING PERFORMANCE.

If you leave nothing to chance, there is Browning XM Elite. Built with premium fabrications, XM Elite is the warmest, highest quality technical outerwear we build. It offers maximum performance in adverse weather conditions and yields superior comfort when moving. Premium Browning Pre-Vent fabric is both rugged and quiet, and fully-taped seams ensure 100% waterproof, windproof and breathable capabilities. The PrimaLoft® insulation used in XM Elite offers the highest insulation value of any of our outerwear and is the only place in our line-up where you will find the new super-warm PrimaLoft Down. In addition to premium materials, XM Elite adds functional touches hunters will appreciate.

HELL'S CANYON — SEE YOU THERE.

For tough, all-conditions gear, look no further than Browning Hell's Canyon. This versatile line-up includes everything from base layers to waterproof, insulated parkas and bibs, all made to keep you warm and dry from warmer to the worst conditions. Bowhunters will appreciate features like ADVANCED SCENT CONTROL to help hide from game and Harness Access which hides a treestand safety harness underneath the jacket. Browning Hell's Canyon fabrics offer the tough performance the name implies with high resistance to abrasion without sacrificing quietness. PrimaLoft® insulation provides an excellent warmth-to-weight ratio. For the ladies, Hell's Belles brings hardcore hunting gear with excellent protection to outdoorswomen.

WASATCH — BLURRING PERFORMANCE AND VALUE.

Wasatch does one thing and does it well — it gets the job done at a price that is tough to beat. Rugged Soft Shell gear offers windproof, breathable and water-resistant protection perfect for the majority of hunting conditions, while insulated rainwear offers true waterproof outerwear at a great price. Insulation layers range from warm, quiet fleece to stylish hoodies that are ideal for both the woods and downtown. Fieldwear options include the cotton/polyester pieces that made Wasatch famous, plus Mesh-Lite that is perfect for summer bowhunting and sitting around a water tank during dove season. Ladies and youth will both find designs that are comfortable, stylish and rugged.

PRE-VENT — SUPERIOR WATERPROOF, WINDPROOF AND BREATHABLE FABRICS.

- Pre-Vent is our waterproof, windproof, breathable fabric.
- Pre-Vent keeps out rain, snow and wind while breathing away perspiration to keep hunters warmer and drier.

PRIMALOFT® IS WARM, WHETHER IT'S WET OR DRY.

- Primaloft is a premium performance insulation engineered for superior warmth, water-resistance, loft and compressibility.
- Primaloft fibers are densely packed and retain heat better than other insulations for improved thermal efficiency.
- Primaloft fibers are treated to repel water and absorb less water, making it more water-resistant and faster drying than other polyester insulations.
- Primaloft fibers are tightly compressed for improved wind-resistance, less bulk and extreme compression.
- The fine-fiber, high-loft insulation keeps hunters warmer, in extreme conditions — even if it gets wet.
- Primaloft is so good, it was chosen by the U.S. Military. Over 1,000,000 Primaloft military garments are deployed in active service around the world.

JUNIOR SIZING CHART

Kid's caps: 6-1/2", fits ages 18 months to 3 years old. Youth caps: 6-7/8", fits ages 4-9.

HUNTERS HAVE THE ADVANTAGE: BROWNING'S TWO PRONGED ATTACK ON HUMAN ODOR.

As long as hunters have headed into the field, they have worked hard to outwit the keen noses of wary game. To combat human odor, we are introducing two-level protection with new **ADVANCED SCENT CONTROL**. **ADVANCED** is the next generation of scent control and revolutionizes this critical aspect of hunting. Rather than relying on stiffening carbon technology, **ADVANCED** uses two level technology to first attack the bacteria that causes human odors. Secondly, it captures human scent before it escapes into the air. This one-two punch helps control detectable human scent, regenerates with every wash/dry cycle, lasts for the life of the garment and adds no noticeable weight or stiffness. The result is that hunters can go undetected longer and get closer than ever before for a perfect well-placed shot.

ADVANCED SCENT CONTROL

- Attacks bacteria that causes human odors.
- Captures human scent before it can escape into the environment.
- Recharges easily.
- Lasts for the life of the garment.
- Adds no noticeable weight or stiffness.

ODORSMART™

CONTROLS ODOR AT THE START.

- Human odor is caused by bacteria that thrive on the skin. The bacteria's waste produces odors that are detected by deer and other big game animals.
- OdorSmart attacks bacteria in the microclimate around the skin, helping to kill the bacteria before odors develop.
- OdorSmart lasts the life of the garment with normal care, and does not require recharging or special cleansers. Just wash OdorSmart items as instructed on the care label.

HARNES ACCESS ON SELECT HELL'S CANYON OUTERWEAR.

- Select Browning Hell's Canyon outerwear now offers Harness Access.
- Allows a treestand safety harness to be comfortably worn underneath a parka or jacket.
- Improves concealment as the harness no longer interferes with the camouflage pattern on the garment.
- Easy access to pockets.

NO MORE COLD, WET HANDS.

- Cold, wet hands are often caused when cold water is trapped between the outer shell of the glove and the waterproof liner. It's like inserting a small plastic bag inside a larger bag, then filling the space between the two bags with ice water. Hands stay dry, but they are still cold.
- The OutDry® membrane is laminated to the inside surface of the fabric shell and eliminates the space between the shell and liner, leaving no place for cold water to collect.
- This unique construction offers a sleek fit with improved finger dexterity and eliminates torn or loose fitting liners.
- When combined with Primaloft® insulation hunters get the benefit of even more warmth.

WHAT FIT TO CHOOSE?

- Our outerwear is divided into Athletic Cut and Regular Cut.
- Athletic Cut provides a trimmer, tailored fit with reduced bulk. Athletic Cut garments move comfortably with the wearer with less snagging on brush.
- Athletic Cut is cut straight, or slightly tapered, from the shoulders to the hips. For those who don't exactly fit this body shape, a larger size can be chosen.
- Regular Cut is a traditional, full cut design that offers maximum freedom of movement.
- Regular Cut is tailored for a wide variety of body shapes with a fuller fit. Larger hunters, or those who just want a little extra room will prefer this fit.

KILL CHILL WITH WINDKILL.

- Our windproof, breathable WindKill fabric is 100% windproof, highly breathable and water resistant.
- A lightweight barrier, WindKill prevents chilling winds from penetrating the fabric to keep hunters warm.

DOWN HAS MET ITS MATCH.

Combine the proven characteristics of down with modern technology and you have the perfect insulation layer. The new PrimaLoft® Down jacket combines down with advanced synthetic PrimaLoft fibers to keep hunters warmer, longer, even when wet.

XM ELITE PRIMALOFT® DOWN JACKET

Ultralight shell and lining fabrics • PrimaLoft® Down offers high warmth-to-weight ratio and dries significantly faster than untreated down • Innovative quilting concentrates down in areas critical for warmth • Full-length front zipper closure • Welded left chest pocket with zipper closure • Right chest pocket with zipper closure • Drawcord adjustable bottom and Lycra® cuffs prevent drafts • Handwarmer pockets with zipper closures • Athletic Cut

NEW

PRIMALOFT® DOWN

For the ultimate in warmth in varying conditions, look no further than PrimaLoft® Down. As the world's first hybrid of premium down (60%) and ultra-fine PrimaLoft synthetic fibers (40%) this innovative blend creates a lightweight, yet warm insulation that keeps the wearer warmer when wet, than down alone. PrimaLoft synthetic insulation has built a reputation for water-resistant insulations, and tests have shown that the new PrimaLoft Down retains an incredible 94% of warmth when wet, absorbs nine times less water and dries four times faster than pure down. And PrimaLoft Down retains its performance wash after wash, showing excellent property retention after more than 10 launderings.

ULTRA-LITE, ULTRA-WARM.

If down insulation has a single drawback, it would be performance when it gets wet. While synthetic insulations fare better, they can't match the overall performance of pure down. The solution was simple: Blended down. By combining premium down with water-resistant synthetic insulation, a more dynamic garment was created, one that keeps hunters warmer in all conditions — even if it gets wet.

HELL'S CANYON BLENDED DOWN JACKET • HELL'S BELLES BLENDED DOWN JACKET

New blended down insulation offers maximum warmth and water-resistance • Highly constructed shell fabric is wind- and water-resistant • Full-length front zipper closure with internal flap to block drafts • Handwarmer pockets with zipper closures • Inside pocket with zipper closure for valuables • Drop back bottom hem and drawcord seals in warm air and keeps out cold • Elasticized cuff closures for added protection from the elements • Stuffs into provided stuff sack for easy storage • Athletic Cut • Hell's Belles has a women's contoured fit

DIRTY BIRD — PERFECT FOR DIRTY BUSINESS.

If a marsh is the office, and bibs and a parka a business suit, dress for success in Browning Dirty Bird. Dirty Bird waterfowl gear is built to keep hunters comfortably in the field regardless of the conditions. Browning professionals have spent countless hours testing these products and the evidence shows with features only real-world experience can develop. Waterfowling is a dirty business, and business is good with Dirty Bird.

**ANGLE-ENTRY POCKETS**

- Angle-Entry pockets are designed around the arm and hand.
- When the hands are above the elbows they naturally point up, and when they are below the elbows they point down.
- The interiors of the chest accessory Angle-Entry pockets and the shell pockets are slanted down to align with hand angles while the two handwarmer Angle-Entry pockets slant up.

**ARROW GUSSETS**

- The Arrow Gusset armpit design has a smooth, tapering shape as it rises along the side to under the sleeve.
- Offers a better fit, enhanced range of movement and no binding.

**RAGLAN SLEEVES**

- Raglan sleeves are cut at a long tapering angle right up to the collar line.
- The top of the sleeve becomes one seamless piece of fabric all along the shoulder with no exposed seams to leak, even in the worst downpours.

Fred Zink, Host of Avian-X

DIRTY BIRD 4-IN-1 PARKA

SHELL Pre-Vent waterproof, breathable fabric shell • Angle-Entry pocket design • Two upper Angle-Entry handwarmer pockets • Two zippered chest Angle-Entry accessory pockets • Two lower bellows Angle-Entry pockets with magnetic closure and internal pleat • Raglan sleeve design eliminates top shoulder seam for a more waterproof design • Arrow Gusset armpit design and articulated elbow for greater range of motion • Overlay forearm patches to prevent wear • Detachable, adjustable hood • Inside security pocket • External and internal storm flap • Adjustable, watertight laminated cuffs • Molded shoulder strips prevent wear on shoulder areas • Internal waist drawcord • Mesh moisture barrier strip between shell and lining • X-Change System compatible • License tab **LINER** Camo fleece reverses to solid-color woven fabric • PrimaLoft® Synergy insulation • Set-in sleeves • Elasticized bottom and cuffs • Two slash pockets on each side • X-Change System compatible • Regular Cut

DIRTY BIRD TIMBER — OPTIMIZED FOR FLOODED COUNTRY.

Dirty Bird Timber is optimized for hunting in this unique environment with shorter length jacket styles that keep them above the waterline and keep your gear dry. Soft shells include UTW (Under The Wader) Technology with water-resistant uppers and breathable fleece lowers that, you guessed it, fit easily underneath chest waders. Our fleeces are also designed to wear inside waders and have the advantage of splash protection panels on the sleeves.

DIRTY BIRD TIMBER WADER JACKET

Pre-Vent waterproof, breathable fabric shell • Shorter wader length with elastic drawcord waist • Angle-Entry pocket design • Two upper Angle-Entry handwarmer pockets • Two lower bellows shell Angle-Entry pockets with magnetic closure and internal pleat • Raglan sleeve design eliminates top shoulder seam for a more waterproof design • Arrow Gusset armpit design and articulated elbow for greater range of motion • Overlay forearm patches to prevent wear • Detachable, adjustable hood • Inside security pocket • External and internal storm flap • Adjustable, watertight laminated cuffs • Molded shoulder strips prevent wear on shoulder areas • Mesh moisture barrier strip between shell and lining • License tab • Regular Cut

PHEASANTS FOREVER® — JOIN THE CAUSE.

Without the conservation efforts of Pheasants Forever, millions of acres of prime pheasant habitat would be lost. Pheasants Forever chapters all over the United States work to protect, restore and enhance wildlife habitat by establishing and maintaining local and regional projects. From encouraging farmers to leave longer wheat stubble, to the purchase of upland habitat land, Pheasants Forever continues to work to preserve America's favorite game bird. To become a member or volunteer, please call toll free (877) 773-2070. With every Browning Pheasants Forever product sold, we proudly make a contribution to this most worthy conservation organization.

		233.00	2XL-3XL

Sternum strap keeps shoulder straps in place.

Load bearing straps are adjusted within game bag pockets.

Weight is evenly distributed between the shoulders and hips.

Adjustable waist belt secures the load to the hips.

- Wide nylon shoulder straps transfer the load to the shoulders, yet still allow hunters to swing through the bird naturally.
- Quick-release sternum strap helps keep the weight centered between the shoulders for improved balance and less fatigue.
- Fully-adjustable load bearing straps place the load's center of gravity where it's most comfortable to carry.
- Ergonomically-contoured, padded adjustable waist belt offers added support to the lower back and allows part of the load to be carried on the hips for greater comfort.
- Quick-release composite buckle allows for quick on and off.

LITE'N UP.

Carrying pheasants, water, lunch and shells can get heavy in a traditional upland hunting vest. Ease the burden and hunt harder and longer with Browning Bird'n Lite gear. Essentially a backpack disguised as an upland hunting rig, the integrated load bearing system evenly distributes weight between the shoulders and hips, and secures it from flapping and swaying, to reduce fatigue and increase comfort all day long.

BIRD'N LITE VEST

Browning Bird'n Lite Technology weight distribution system secures the load • Rugged, lightweight cotton/polyester shell fabric • Blaze shoulder overlays • Front-loading bloodproof game bag with zip-top opening and load stabilizing strap • Oversized shell pockets with internal shell loops and snap closures • Built-in rucksack with elastic top • Zipper front • Transmitter pocket with antenna loop • REACTAR G2 pad pockets behind each quilted shoulder patch (pad sold separately) • Lined handwarmer pockets behind shell pockets • Water bottle pockets • D-rings for accessories • Available with or without Pheasants Forever embroidery • License tab • Regular Cut

IT'S NOT JUST A TACTICAL LIGHT. IT'S A TACTICAL LIGHTING SYSTEM.

Browning Black Label tactical lights are designed from the ground up to work as a modular system. Start with the basic light and add components as needed for expanded tactical lighting capabilities.

BLACK LABEL
TACTICAL LIGHTS

TACTICAL TAILCAP SWITCHES

- Multi-mode push-button tailcap switches allow partial depression for a quick search and full depression click to provide continuous lighting for threat identification and target engagement.
- Textured rubber-covered switch prevents finger slippage during activation.
- Rotating tailcap lock-out prevents accidental activation and a quick twist enables the light.

REMOTE CABLE SWITCH ENDCAP ACCESSORY

- Many Black Label lights (and many more of our flashlights) accept a remote cable switch endcap accessory that allows the user to activate the light while it is mounted on a long gun.
- The remote switchpad itself may be located on the pistol grip or forearm of a long gun with the included mounting hardware.

INTERCHANGEABLE METAL FRONT BEZEL RINGS

- Select from a smooth bezel for snag-free weapon-mounted applications or a crenelated strike bezel for handheld self-defense applications.

MULTIPLE MODE CAPABILITY

- Most Black Label lights offer a choice of continuous full output, continuous low-output and a rapid strobe mode.
- Simply toggle through the modes by quickly pressing the tailcap switch.

RAPID STROBE MODE

- Most Black Label lights offer a rapid strobe mode.
- The rapid strobe mode is ideal for rescue signalling or to disorient an attacker.

MIL-STD 1913 RAIL MOUNT

- Allows many Black Label lights (and many other Browning flashlights) to be attached to any MIL-STD 1913 Picatinny accessory rail.
- Included screwdriver allows simple installation of the light onto the mount.
- Thumbscrew allows easy installation and removal of the light to the rail without tools.

INTERCHANGEABLE REAR GLASS-BREAKER POINT

- Many Black Label lights are equipped with a hardened metal point on the rear bezel to allow the user to break window glass for emergency egress from a vehicle or from any glass-enclosed environment.

REMOVABLE ANTI-ROLL METAL FINGER RING

- Several Black Label flashlights are equipped with a metal anti-roll finger ring to prevent the light from rolling on a sloped surface, and allows the operator to use the "syringe" technique with a defensive handgun.

FL-1 1-METER WATERPROOF CERTIFICATION

- Most Black Label lights are certified to meet the latest international FL-1 Standard to operate after being submerged in 1 meter of water for 30 minutes.

PICATINNY RAIL MOUNT

FEATURES Rugged matte black all-aluminum construction • Allows easy mounting of Black Label AA, 3V and 6V or 9V flashlights on rifles and shotguns with MIL-STD 1913 Picatinny rails • Also fits many of our sporting flashlights including Alpha, Alpha Max, Crossfire, Catalyst and most flashlights with AA and CR123A batteries • Molded rubber ring improves fit and acts as a recoil vibration damper • Built-in rail key prevents slipping once mounted on the rail • Thumbscrew adjustable mount • Installation screwdriver is included

	DESCRIPTION	CODE NUMBER	SUGGESTED RETAIL
A	Picatinny Rail Mount for 9V Flashlight	3743211	24.00
B	Picatinny Rail Mount for AA, 3V, and 6V Flashlights	3743210	24.00

REMOTE CABLE SWITCH

FEATURES Rugged construction • Replaces factory tailcap switch to allow remote activation of Black Label AA or CR123A flashlights mounted on rifles and shotguns • Also fits many of our sporting flashlights including Alpha, Alpha Max, Chaos (AA model) and Catalyst (CR123 model) • Easily attached with two adjustable straps to pistol grip or forearm • Large momentary switch pad is easy to access, even with gloves • Push to activate light, release to turn off

	DESCRIPTION	CODE NUMBER	SUGGESTED RETAIL
A	Remote Cable Switch for AA Flashlight	3743212	24.00
B	Remote Cable Switch for 3V, 6V, 9V Flashlights	3743213	24.00

Allows the user to activate the light while it is mounted on a long gun. The remote switch pad itself may be located on the pistol grip or forearm.

Allows many flashlights to be attached to any MIL-STD 1913 Picatinny accessory rail. Once the light is installed in the mount with the included screwdriver, the thumbscrew allows easy installation and removal without tools.

DISRUPTER COVERS THE QUARTER MILE AT THE SPEED OF LIGHT.

We offer some of the most powerful portable lighting tools available anywhere. Our new Distrupter is no bigger than a soda can, yet it can pump out a stunning 2800 lumens of white light that reaches out 500 yards (yes, that’s more than a quarter mile). Its rugged all-aluminum construction houses a 10400 mAh lithium-ion battery that can be recharged again and again from any home wall outlet or vehicle power outlet. See what’s across the valley or way down the river with the Distrupter.

DISRUPTER

LENGTH 7" **BRIGHTNESS** 50 to 2800 lumens **EFFECTIVE DISTANCE** 75 to 500 yards **FEATURES** Three super-bright white Cree® LEDs • Three red LEDs and three green LEDs for stealth, safety and night use • Rotary sleeve on switch protects against accidental light activation in pack or pocket • Thumb switch for momentary or continuous lighting • Select from high, medium or low output on white LEDs, plus green, red and fast strobe modes • All-aluminum body construction with optically clear scratch-resistant glass lens is built for years of rugged duty • Anti-roll bezel profile • Heat dissipating fins on lamphead • 10400 mAh rechargeable lithium-ion battery is rated at 500 charge cycles • Comes complete with household (AC) and vehicle (DC) chargers and all cords, including USB • Waterproof and submersible to three feet for 30 minutes • Drop tested to 1 meter • Rugged polymer carrying and storage case

MULTI-LED REFLECTOR

- Three super-bright white LEDs for maximum illumination out to 500 yards (that's more than 1/4 mile).
- Three green LEDs and three red LEDs for stealth, safety and night use.

FL-1 1-METER WATERPROOF CERTIFICATION

- Meets the latest international FL-1 Standard to operate after being submerged in 1 meter of water for 30 minutes.

EDC PISTOL FLASHLIGHT

LENGTH 3-1/2" **BRIGHTNESS** 205 lumens **EFFECTIVE DISTANCE** 125 yards **FEATURES** Powerful white LED never needs replacing • Designed for pocket carry and firearm mounting • Tactical tailcap switches are fully ambidextrous • Momentary, continuous and fast strobe modes • Non-slip polymer body • Interchangeable smooth and crenelated metal front bezel rings • Lockout function via rotating front bezel • Optically clear scratch-resistant glass lens • Deep Carry Pocket Clip™ • Drop tested to 1 meter • Incredible 24 hour run time on low output • Uses one CR123A battery (included) • Mounts instantly on pistols, rifles and shotguns in multiple positions using the included mounting bracket • Bracket mounts on all 1913 Picatinny rails • Two rail bolts included

CODE NUMBER	SUGGESTED RETAIL	BATTERIES	BATTERY LIFE	EFFECTIVE DISTANCE	LUMENS
3713206	86.00	(1) CR123A Lithium	High: 2 hours; Low: 24 hours	125	High: 205 Low: 10

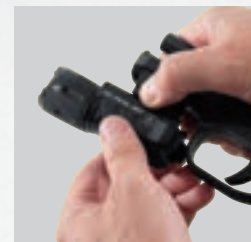

The Deep Carry Pocket Clip™ allows secure carry of the EDC Light Module.

EDC Light Module shown in firearm-mounted configuration.

Two ambidextrous side tailcap switches are easy to access with either hand for momentary lighting. A single under-switch enables continuous lighting in high, low and strobe modes.

The rail bracket remains on the MIL-STD 1913 Picatinny rail of the firearm. The EDC Light Module instantly mounts to the rail.

APPROACH TACTICAL KEYCHAIN LIGHT
APPROACH TACTICAL KEYCHAIN LIGHT/KNIFE COMBO

LIGHT length 2-1/4" **BRIGHTNESS** 18 lumens effective distance 22 yards with white LEDs • 50 yards with red laser **FEATURES** Powerful keychain light quickly unbuckles from key ring and attaches to a pistol or other firearm • Two white LEDs plus one 5mW red laser for intimidation • Mounts on any MIL-STD 1913 Picatinny rail • Dual push-button switches on underside • LEDs and laser can be turned on separately or at the same time • 4 hour run time on LEDs • Rugged polymer construction with molded rail grabbers and rail key • Uses two 2016 coin-type batteries (included) • Laser is a directional pointer only and is not intended for use as a targeting indicator or firearm aiming device **KNIFE** Designed by Russ Kommer • Liner lock construction • 1-3/8" 5Cr stainless steel bead blasted blade • Checkered glass filled polymer handles • Knife quickly detaches from keychain

	DESCRIPTION	CODE NUMBER	SUGGESTED RETAIL	BATTERIES	BATTERY LIFE	EFFECTIVE DISTANCE	LUMENS

B	Approach Tactical Combo	3713209	31.00	(2) 2016 Coin-Type	4 hours on LEDs	LED 22 Laser 50	18 on LEDs

The Approach Tactical Keychain Light is normally carried in the pocket or purse for everyday task lighting chores.

The laser pointer feature on the Approach Tactical Keychain Light can be used for teaching, business presentations or for emergency signalling.

The Approach Tactical Keychain Light can be instantly separated from the keychain and attached without tools to any MIL-STD 1913 Picatinny accessory rail.

The Approach Tactical Keychain Light/Knife Combo includes a small Russ Kommer-designed folding knife that rides on the rail slot.

The Russ Kommer-designed folding knife has a lockback closure and is intended to be removed from the light when used for cutting chores.

TACTICAL CAP LIGHT/KNIFE COMBO

BRIGHTNESS 19 lumens **EFFECTIVE DISTANCE** 22 yards **FEATURES** Two white LEDs and two red LEDs • 10 hour run time on white • 48 hour run time on red • Tilting design attaches to cap brim, pocket or pack strap • Uses two 2032 batteries (included) **RUSS KOMMER DESIGNED KNIFE** Frame lock design • 2-1/2" 440 stainless steel blade • Tanto point with partially serrated edge • Textured handle scales

BLACK LABEL TACTICAL CLOTHING.

Browning Black Label tactical clothing is built to take on any mission in any environment. Durable fabrics, robust construction and sharp styling bring comfort and protection to the operator. Black Label is the brand to be in when it's time to dress for mission success.

BLACK LABEL
TACTICAL CLOTHING

**CONCEALACCESS ENTRY**

- ConcealAccess side seams are secured with zippers or hook and loop fasteners, yet open instantly for access to a lawfully concealed sidearm.

**REACTAR POCKETS**

- Pockets inside the shoulders accept a REACTAR G2 pad that absorbs recoil from hard-kicking rifles and shotguns. REACTAR G2 pad is sold separately.

**SNAPSHOT ACCESS**

- SnapShot magnetic buttons allow instant access to a lawfully concealed sidearm carried under the shirt in a shoulder holster.

**CONCEAL POCKETS**

- Concealed pocket lets the wearer stow a cell phone, carry permit or credentials, tactical lights and other items, yet have them right at their fingertips.

**EYEWEAR/MIC/RADIO LOOP**

- Front placket loop keeps eyewear, a small radio or a microphone handy for instant access with either hand from any position.

**PEN POCKETS**

- Pen pockets on the sleeve keeps pens, pen lights or other similar items within easy reach.

**ON-SLEEVE ZIP POCKET**

- Keep small items close at hand in the on-sleeve zippered pocket. This feature is especially handy when seated in a vehicle or when working undercover.

**KNIFE CLIP OVERLAY**

- Overlay on front pockets is extended downward to protect the pant from wear or abrasion caused by the pocket clips on knives, flashlights and pocket tools.

**HEAVY DUTY BELT LOOPS**

- Heavy duty belt loops enable the wearer to carry a lawfully concealed sidearm, extra ammo and other gear with security and confidence.

**KNEEPAD POCKETS**

- Internal kneepad pockets allow use of various pads, while the pad loading opening is sized to make insertion a snap. (Kneepads are not included.)

**STRETCH WAISTBAND**

- Stretch waistband moves freely without binding or pinching, especially when wearing a lawfully concealed sidearm.

**ACCESSORY POCKET**

- Flapped accessory pocket puts a phone, PDA, digital camera or spare magazine right at the wearer's fingertips.

TACTICAL SHIRTS

Lightweight cotton/spandex fabric • Seven-button front placket • SnapShot hidden magnetic center buttons for fast access to shoulder holster or security credentials • Internal REACTAR G2 pad pockets (pad not included) • Vented back • Hidden collar stays • Two front-load pockets • Two pleated chest pockets • Elbow overlays on long sleeve models

Black Gray Forest Desert

From world-class shooters to the hardest of the hardcore hunters to unique personalities, the members of the Browning ProStaff all share a love of the outdoors, the shooting sports and the greatest gun brand in the world. ProStaff members are chosen for their skill, professionalism and enthusiasm in promoting the Browning brand. Look for these faces at major shooting events and on television.

KASSIDEE DUNFORD

Kassidee is the latest member of the Browning ProStaff family. Although young, her energy and enthusiasm towards the shooting sports is contagious. Coming up through the Youth Hunter Education Challenge (YHEC) program, Kassidee won numerous shooting titles in all categories, but it's trap shooting that has captured her heart. A gold medal at the preliminary tryouts in December of 2012 and a solid fifth place at the USA Shooting spring selection match is a testament to her spirit and mileposts on her path to Olympic gold.

JOHNNY MEITZEN

Johnny started shooting competitively in 1987 and is currently a NSCA Level III instructor. He has won a number of shooting titles including two-time NSCA Nationals Vet Champion and two-time NSCA Nationals FITASC Vet Champion. Johnny is a six-time All-American Sporting Team member, two-time Team USA Sporting member and two-time Team USA FITASC member. He also has many state and zone championship titles to his credit. Johnny is a die-hard Citori man. His current model of choice is the Citori 625 Sporting.

ROBBIE PURSER

Robbie started shooting skeet at the tender age of six. Over the years he has accumulated an impressive list of shooting titles including 1980 World Skeet Champion, 1991 and 1998 NSCA Champion, Zone 4 Champion, Quail Unlimited Champion, four-time Ducks Unlimited Champion, 2002 Sportsman Team Challenge Champion and an ESPN Great Outdoor Games gold medalist. He is also a twelve-time All-American Team member, a member of Team USA and a ten-time Georgia State Champion. All told, Robbie has more than 200 tournament wins to his credit.

RICK CAMUGLIA

Rick is a long-time Browning shooter with multiple sporting clays titles, nearly all won with Browning autoloading shotguns. A short list of his victories includes multiple National and Regional FITASC Championships, nine-time New Mexico State Champion, two-time HOA Arizona State Champion and two-time HOA Colorado State Champion. He is also an eight-time NSCA All-American Team member. Rick prefers to shoot the Maxus autoloader.

FOSTER AND MATT BARTHOLOW

Foster and Matt are rising stars on the ATA trapshooting circuit, and both shoot Browning Citori shotguns. The brothers came up through the Scholastic Clay Target Program and have made their mark within the open ranks. Whether in a shoot-off with legendary Leo Harrison III or winning the Preliminary Doubles event at the Grand American, both will tell you that the Citori shotgun is a workhorse that just keeps on shooting, round after round, year after year.

KRISTY LEE COOK

Kristy brought her amazing voice to the TV screen on the 7th season of *American Idol*®. Now Kristy is a rising country music singer and possesses an infectious passion for everything she does, whether it is performing, hunting or saving horses through the Kristy Lee Horse Heaven Foundation.

ZAC COOPER

Zac took his first deer at the age of five and hunting has become his way of life. Zac joined the Browning ProStaff Team at age 13 and has spent the last 5 years traveling across America as a guest speaker at events such as the 2013 Iowa State Trap Shoot, the 2013 Kansas Hunter Education Instructor Academy, the 2012 and 2013 Monster Buck Classics in Kansas, the QDMA National Convention and the NWT National Convention. Now 17, Zac is on track to complete his two-year Business degree in early 2014 with full academic honors.

Through his speaking engagements and his DVDs "Little Man, Big Dreams" and "The Cooper Family Tradition," Zac is on his way to pursuing his two long term goals: To be a positive influence on today's youth and to help get them into the sport of hunting.

ALASKA OUTDOORS

Bush pilot and Alaskan big game hunter, Rob Stone began his story 40 years ago in the backcountry mountains of Alaska's last frontier. With a family tradition of flying and hunting came his passion for quality firearms. Gifted a Browning at age 16, Rob hunted every chance he was given. His 17-year old son Matthew now carries on the tradition in search of his own hunting adventures and so the passion continues.

As host of *Alaska Outdoors Television*, Rob shares his passion for the outdoors as a true supporter of conservation and ethical hunting. From hunting high for Alaska's Dall sheep to lowland swamps and tundra for Yukon moose and grizzlies, it's boots to the ground every season for Rob and his family.

AVIAN-X

Fred Zink founded Zink Calls™ in 2001 primarily to fulfill the needs of waterfowlers and professionals who demanded high-end calls. A nationally-recognized goose caller in his own right, Zink's business continues to grow and set new standards in the industry.

Zink's high-octane 24/7 DVD series is designed to speak to hunters with exciting footage that shares his hunting experiences with his viewers.

As host of the popular TV series, *Avian-X*, Fred embarks on hunts throughout the U.S. and Canada sharing the excitement and letting his viewers in on his highly successful calling tactics and strategies.

BOB REDFERN OUTDOORS

Bob Redfern's experience as an outdoor TV personality extends back more than 35 years. With his lifelong devotion to promoting hunting, shooting sports, fishing, and conservation efforts, Bob ventured out on his own in 2001 to begin the highly successful outdoor series, *Bob Redfern's Outdoor Magazine*.

Bob enjoys bringing the outdoors and the best it has to offer to the screen each week featuring real life hunting and fishing adventures with featured segments on *How to Succeed* at hunting, shooting, and fishing as well as the award-winning *Sportsman's Table* weekly cooking segment. Each week Bob features hunting and fishing destinations around the country for the sportsman who seeks the best places to enjoy the outdoors year round.

BOUNDLESS HUNTING

Boundless Hunting TV showcases the high adventures of William and McLean Russell, two brothers who grew up hunting the brush country with a passion for the land, nature, and its wildlife. They spent days as youth rattling up whitetails, flushing quail coveys, chasing predators, calling in turkey gobblers, and surprising wild hogs in the thickets.

Viewers will enjoy the excitement and wide range of animals pursued around the globe from bull elephant to brown bear. *Boundless Hunting TV* is fun and suspenseful with a deep immersion into the world of nature and the pursuit of wild game.

KNIGHT & HALE

With a product line that includes turkey, waterfowl, deer, predator, small and big game, every corner of North America boasts Knight & Hale calls. Likewise, numerous world calling championships have been taken with the calls designed by these two friends from Kentucky. Their television program *Knight & Hale's Ultimate Hunting* has been one of the most popular hunting programs on broadcast TV since 1986.

David has gained award-winning acclaim as a videographer throughout his career and remains active as a hunter, game manager and popular television personality.

Harold has won many national calling competitions, including the World Goose Calling Championship. Although retired from the calling circuit, he remains active as a judge and a lifetime member of the National Wild Turkey Federation.

PURE HUNTING

Shortly after leaving the corporate world, Willi Schmidt decided to pursue his passion for the outdoors as a host on outdoor TV, but never felt he was showcasing the way he loved to hunt...with the challenge of succeeding and failing on his own.

Now as the host of his own show *Pure Hunting*, he loves taking viewers on his Do-it-Yourself adventures and showing that pure hunting opportunities still exist for those willing to put in the effort. Willi appreciates the hunt for the journey, not just the result and he enjoys the friendships made and camaraderie experienced along the way.

UNCAGED

Matt is a nine-time UFC® World Welterweight Champion and was inducted into the UFC Hall of Fame in 2010. Matt spent a good portion of his early years hunting and shooting — passions that have never left him.

Matt's new television show *Uncaged* is an un-scripted reality show based on his hunting adventures, giving his fans an unprecedented look inside his life beyond the Octagon as a husband, father and hunter.

The half-hour show will follow Matt as he travels the world in pursuit of some of the world's most challenging big game species. *Uncaged* will bring the viewer along on his journey as he meets new people, explores new places and deals with the dangers and physical challenges of each adventure.

As much an emblem of the outdoor lifestyle as it is of the Browning brand, the Buckmark is the most recognizable symbol in the firearm industry. Whether on vehicles, T-shirts, caps, or permanently inked on the body, the Buckmark is a statement about your lifestyle. We have partnered with the companies on the following pages to represent the Browning brand with quality products and to share the Browning commitment to the outdoor industry.

AIRGUNS

High-performance designs like the 800 Series pistols, replica Buck Mark, and under-lever cocking Leverage Air Rifle are cornerstones of this versatile line-up of top-quality airguns.

BUILD YOUR PERFECT HUNTING MACHINE AT POLARIS.COM

POLARIS®

Warning: The Polaris RANGER® and RZR® are not intended for on-road use. Driver must be at least 16 years old with a valid driver's license to operate. Passengers must be at least 12 years old and tall enough to grasp the hand holds and plant feet firmly on the floor. All S/S drivers should take a safety training course. Contact ROHVA at www.rohva.org or (949) 255-2560 for additional information. Drivers and passengers should always wear helmets, eye protection, protective clothing, and seat belts. Always use cab nets or doors (as equipped). Be particularly careful on difficult terrain. Never drive on public roads or paved surfaces. Never engage in stunt driving, and avoid excessive speeds and sharp turns. Riding and alcohol/drugs don't mix. Check local laws before riding on trails. ATVs can be hazardous to operate. Polaris adult models are for riders 16 and older. For your safety, always wear a helmet, eye protection and protective clothing, and be sure to take a safety training course. For safety and training information in the U.S., call the SVIA at (800) 887-2887. You may also contact your Polaris dealer or call Polaris at (800) 342-3764. ©2013 Polaris Industries Inc.

BE A SAFE SHOOTER

Read and follow all safety information in the owner's manual provided with each firearm before use. Additional copies are available for free download on the Browning website. Browning endeavors to make the safest firearms possible; however, firearm safety begins with you. At all times treat any firearm with intense respect for its power and potential danger. Always point the muzzle in a safe direction. There is no excuse for careless or abusive handling of any firearm.

BROWNING IS COMMITTED TO SERVING YOU

Every effort has been made to ensure that all product photographs, descriptions and specifications in this catalog are accurate; however, inadvertent errors may occur. Changes in design or materials due to our continual effort to improve products may result in specification changes before subsequent publications are issued. Browning reserves the right to modify or change specifications without notice.
