BROWNING[®]

AMMUNITION

New for 2016

BROWNINGAMMO.COM

To some people the name Browning means accuracy, to others dependability, and to others it means heritage. To us, it represents a legacy of innovation that we can trace straight back to John Moses Browning and his humble beginnings in Ogden, Utah, just down the road from our current headquarters.

Browning’s legacy of innovation can be found in the Model 1911-380, descended from one of The Master’s most enduring designs. A “Sweet Sixteen” version of the A5 brings new life to the versatile 16 gauge. Our advances in autoloading rifle technology continue with the new BAR MK 3, the latest evolution of this classic sporting rifle.

While Browning is best known for guns, for more than a half century we have provided hunters and shooters with the finest in outerwear, security safes, knives and flashlights, all designed to make outdoor pursuits more enjoyable and productive. In 2016, our tradition of offering high quality products continues with new introductions in every category. Welcome to Browning 2016.

THE BROWNING SHOTGUN LEGEND.

Nearly every shooter has a great Browning shotgun story. The tales range from blustery mornings in layout boats to late summer dove hunts around a waterhole. Simply mentioning the name Browning sends some folks back in time to that first goose hunt with their grandpa's Auto-5 or to that first clay shattered with a BT-99 rented from the range. We hear these stories every day from customers and enthusiasts that share the Browning bond.

Maybe you are researching your first Browning shotgun — or maybe your fifth. Regardless, you understand and appreciate the quality and performance proven by generations of past and present shooters.

SHOTGUNS

TOTAL BARREL DYNAMICS — FROM EXPERIMENTATION TO SCIENCE

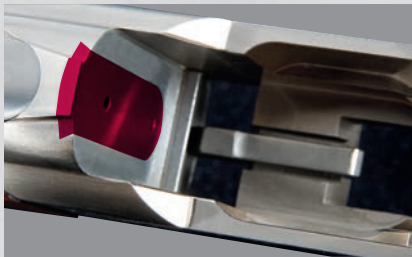

- Our engineers have fired literally millions of shells in order to improve the relationship between the shotgun barrel and shotshell. What began as experiments have become the science of shot pattern performance.
- Extensive testing has shown that shot is deformed as it passes through the restrictions of the forcing cone, a tight bore and the choke tube. When shot is deformed it is less stable in flight, leading to flyers and holes in patterns. Our Vector Pro lengthened forcing cone is designed to reduce stress on the shot column, and Back-Bored Technology allows the shot column to exit the barrel at maximum velocity. Our proven choke tube technologies further minimize the stress placed on the shot as it exits the barrel while constricting it to the pattern you need. Other manufacturers use shorter forcing cones that deform the shot, a bore that is too tight or loose, or shorter choke tubes that result in inferior pattern performance.
- Total Barrel Dynamics — standard on A5, Maxus, BT-99 and on 12 and 20 gauge Citori and Cynergy models — is a system of technologies that function together to reduce shot deformation and significantly improve pattern consistency and performance. Each component of Total Barrel Dynamics plays a part in keeping shot patterns whole and pellets on target, and to ignore any single part weakens performance.

CHAMBER

FEATHER TECHNOLOGY

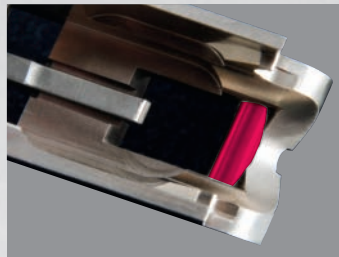

HEAVY DUTY, LIGHT WEIGHT

- Feather technology significantly reduces the weight of an over and under shotgun (approximately one pound) by using a high quality alloy for the receiver rather than steel.
- To maintain maximum durability, the breech face is a dovetailed steel insert.
- Citori models also use a full-width steel hinge pin and Cynergy shotguns feature steel MonoLock Hinge surfaces to resist wear.

STEEL BREECH FACE

All Feather models feature a steel breech face that resists wear, allowing the receiver to be built from weight-saving alloy.

CITORI STEEL HINGE PIN

The full-width, steel hinge pin in the Citori provides maximum strength and lasting endurance.

CYNERGY STEEL INSERTS

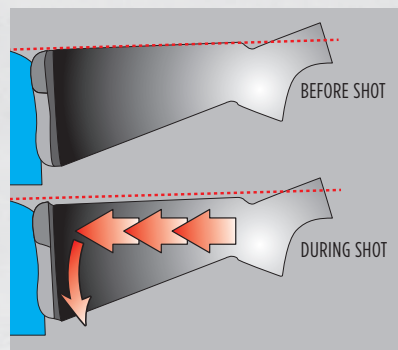

To ensure longevity, steel inserts are added to the MonoLock Hinge.

RECOIL REDUCTION TECHNOLOGIES

INFLEX TECHNOLOGY RECOIL PAD

- Inflex recoil pads incorporate directional deflection construction that guides the comb down and away from your face, reducing felt recoil for greater shooting comfort and faster, more accurate follow-up shots.
- The Inflex recoil pads are made from a soft material for the best recoil absorbing performance available.

FOR SMALLER SHOOTERS

MICRO MIDAS FIREARMS

- Micro Midas firearms are specifically designed to give younger or smaller shooters a high quality, great fitting firearm.
- Micro Midas firearms are constructed with the same quality components and attention to detail as all Browning firearms.

BROWNING GROWTH INSURANCE PROGRAM

- Micro and Micro Midas models are eligible for the Growth Insurance Program that allows new owners to purchase a full-size stock at 50% off the retail price.
- Growth Insurance allows Micro and Micro Midas firearms to grow with the shooter.
- Offers you a higher rate of return on your firearm investment.
- Visit browning.com for complete details.

STOCK FINISHES

MAXIMUM GRIP

- Dura-Touch Armor Coating is extremely durable.
- Improves grip in wet and cold conditions.

DURA-TOUCH
Armor Coating

FLOATING RIB

MORE CONSISTENCY

- The floating rib allows the rib and barrel to expand independently to eliminate stress.
- Prevents changes to point of impact due to barrel heating and the rib staying cool.

FORCING CONE

BORE

CHOKE TUBE

VECTORPRO™

BACK-BORED TECHNOLOGY

INVECTOR-DS

INVECTOR-Plus™

VECTOR PRO

LONGER IS BETTER. THE ADVANTAGES OF A LENGTHENED FORCING CONE

- The forcing cone is the tapered transition between the chamber and the bore that constricts the shot column. The longer the forcing cone is, the more gradual the constriction.
- A gradual constriction reduces stress on the shot column as it passes into the bore, resulting in fewer deformed pellets. Less pellet deformation produces more uniform patterns and keeps more pellets in the central part of the pattern. Vector Pro is better than the competitors' forcing cone designs because of the more gradual constriction.
- Lengthening forcing cones is a popular and expensive aftermarket practice done to increase shot pattern performance. But it comes standard on A5, Maxus, BT-99 and on 12 and 20 gauge Citori 725, Citori and Cynergy models.

BACK-BORED TECHNOLOGY

WHAT IS BACK-BORING?

- Back-boring enlarges the bore to the maximum diameter to increase shot velocity, minimize pellet deformity for more uniform patterns and reduce felt recoil.
- Extensive testing has shown that Back-Bored Technology reduces the friction between the shot cup and the bore, but does not allow gases to slip past the shot cup that would result in reduced pellet velocity and blown patterns.
- Back-Bore Technology specifications minimize shot deformation and maximize pattern uniformity, consistency and density. Back-Bored Technology is standard on A5, Maxus, BT-99 and on 12 and 20 gauge Citori 725, Citori, Cynergy, BPS and Silver models.

INVECTOR-DS

TAKING CHOKE TUBES TO THE MAX

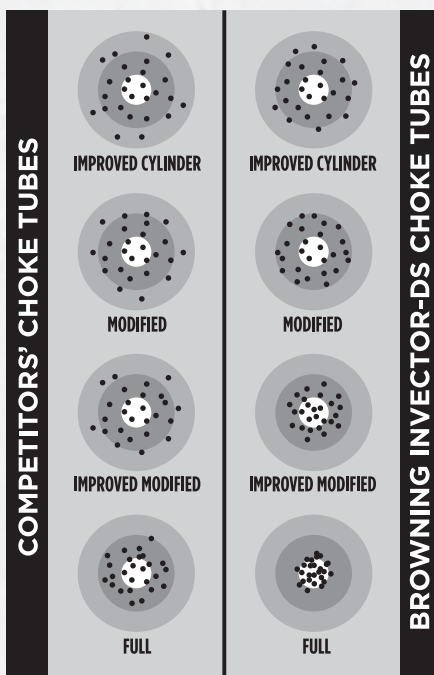

- Invector-DS choke tubes combine muzzle-end threads and thin-wall construction for a longer, more gradually tapered choke tube that produces extremely consistent, dense shot patterns.
- From Cylinder to Extra Full, Invector-DS shot patterns tighten consistently in reliable, evenly scaled steps.
- Muzzle threads minimize the flare at the end of the barrel for improved shotgun appearance. A slightly lighter overall barrel weight is achieved for faster swinging and improved balance.
- The more gradual taper of Invector-DS choke tubes reduces shot deformation for fewer flyers and gaps in the pattern and allows higher shot velocities for hard hitting performance.
- The "DS" stands for double-seal. Our proprietary differential-banded brass seal compresses against the barrel wall to keep the choke tube threads clean and make installation and removal easier than any other muzzle thread system.
- Invector-DS is standard on A5 and Citori 725 models.
- View the full line of Invector-DS choke tubes on pages 175 and 177.

STANDARD INVECTOR™

STANDARD INVECTOR

PATTERN VERSATILITY FOR 10 GA., 16 GA., 28 GA. AND .410 BORE SHOTGUNS

- The Standard Invector interchangeable choke tube system offers consistent, dense shot patterns with the constriction needed for the shooting situation.
- Threads on the breech end help prevent gases from slipping between the choke tube and barrel that could damage the choke tube and the barrel.
- Standard Invector is standard on 10, 16 and 28 gauge, and .410 bore Citori, Cynergy, Gold and BPS models.
- See pages 175 through 178 for a complete listing of choke tubes.

INVECTOR-DS CHOKE TUBES VS. COMPETITORS' CHOKE TUBES

Invector-DS tubes have even pattern percentage increments, offering just the right pattern for any shooting situation.

Competitors' choke tubes show little pattern difference between choke constrictions.

INVECTOR-PLUS

CHAMPIONSHIP PROVEN PERFORMANCE

- Invector-Plus started the long choke tube revolution. An ever-growing collection of championship medals is proof of its patterning performance.
- The Invector-Plus choke tube system works with Vector Pro and Back-Bored Technology to offer consistent, dense shot patterns with the constriction needed for the shooting situation.
- The long choke taper inside an Invector-Plus choke tube produces consistent patterns with more uniform densities and fewer flyers.
- Threads on the breech end help prevent gases from slipping between the choke tube and barrel that could damage the choke tube and the barrel.
- Invector-Plus is standard on 12 and 20 gauge Maxus, Citori, Cynergy, Silver, BPS and BT-99 models.
- View the full line of Invector-Plus choke tubes on pages 175 through 178.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

THE BROWNING HIGH GRADE PROGRAM — YEAR FOUR.

The intricately engraved, beautifully finished, small gauge over and under is considered by many to be the epitome of shotguns; and these handsome guns make a statement to the world that a shooter has arrived. High Grade Browning Citori 725 small gauge shotguns combine many of our most modern features with the style and grace for which over and unders are coveted. Each one of these fine guns receives 30 hours of hand engraving. They are limited in production, so order yours today.

A fitted John M. Browning Signature distressed leather case is included with the Citori 725 Grade VII Small Gauge.

ROBBIE PURSER

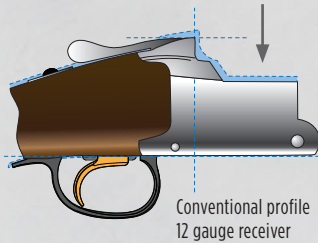

Robbie Purser is a longtime Browning Pro Staffer and has won skeet and sporting clays titles across the country — most with Browning Citori shotguns. Read more about Robbie on page 309.

PRO LEVEL PERFORMANCE.

Get pro level performance with a Citori 725 Pro. Pro models include features that allow you to perfectly dial-in the fit of the shotgun which, in turn, lets you crank up your performance on the range.

725
CITORI
PRO

CITORI 725 PRO FEATURES AND BENEFITS

Conventional profile
12 gauge receiver

LOW PROFILE RECEIVER

- Improved recoil control and less muzzle jump are two of the big benefits of a low profile receiver. There is also the “one with the gun” feeling that makes the Citori 725 feel like an extension of your body.
- Places the front hand closer to the bore line for superior hand-eye coordination and pointability.

**ABS CASE INCLUDED**

- The sturdy, lockable ABS case is perfect for storing and transporting the Citori 725 Pro.

**TRIPLE TRIGGER SYSTEM**

- The Triple Trigger System fine tunes finger-to-trigger reach on target models.
- Includes three trigger shoes: Wide checked, narrow smooth and wide smooth canted.

**PALM SWELL**

- Aids in control.
- Optimizes finger-to-trigger placement.
- Provides a comfortable, secure grip.

**FLOATING RIB**

- The floating rib allows the rib and barrel to expand independently.
- Prevents changes to point of impact due to barrel heating.

**PRO FIT ADJUSTABLE COMB**

- The Browning Pro Fit Adjustable Comb makes it easy to find the perfect comb position.

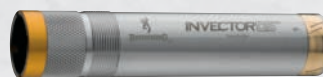

- Pro Fit offers single bolt adjustment for both cast and drop. The revised design allows the stock to be professionally fit for shorter length of pull.
- Easy to read markings allow the shotgun to be dialed in and easily replicated should the comb be removed.

**PRO BALANCE SYSTEM**

- The Pro Balance System allows you to fine-tune the balance point for a perfect mount and swing.
- Adding weights to the stock helps balance the shotgun, aids follow-up shots and the additional mass reduces felt recoil.

- Stock weights reduce muzzle jump for more accurate follow-up shots and allow a smoother follow through.
- Pro Balance weights are easy to install.

**INVICTOR-DS CHOKE TUBE SYSTEM**

- Citori 725 Pro models include five extended Invictor-DS tubes.
- Invictor-DS choke tubes combine muzzle-end threads and thin-wall construction for a longer, more gradually tapered choke tube that produces extremely consistent, dense shot patterns.
- From Cylinder to Extra Full, Invictor-DS shot patterns tighten consistently in reliable, evenly scaled steps.
- The more gradual taper of Invictor-DS choke tubes reduces shot deformation for fewer flyers and gaps in the pattern and allows higher shot velocities for hard hitting performance.
- The “DS” stands for double-seal. Our proprietary differential-banded brass seal compresses against the barrel wall to keep the choke tube threads clean and make installation and removal easier than any other muzzle thread system.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

READY FOR COMPETITION.

Whether you travel across the country to enter shoots or find the challenge of mastering the sport to be your greatest competition, having a top-notch shotgun is essential. Now you need look no further than a Citori 725 Pro to put you on top.

FOSTER
AND **MATT**
BARTHLOW

Browning Pro Staff shooters, brothers Foster and Matt Bartholow, put their Browning Citori shotguns to good use on the ATA trapshooting circuit. Read more about Foster and Matt on page 311.

CITORI 725 — IT'S TOUGH TO KEEP A LOW PROFILE.

It's hard to avoid getting noticed with a gun that looks and shoots as good as the Citori 725. Citori 725 models utilize a low-profile receiver design that retains the features that make the Citori so tough, and adds the benefits of improved recoil control, balance and swing.

725
CITORI**CITORI 725 FEATURES AND BENEFITS****TRIPLE TRIGGER SYSTEM**

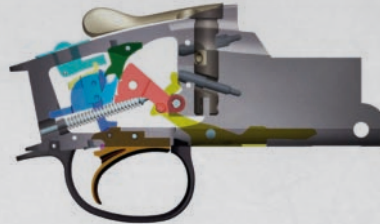

- The Triple Trigger System fine tunes finger-to-trigger reach on target models.
- Includes three trigger shoes: Wide checkered, narrow smooth and wide smooth canted.

**HIGH RIB**

- Offers increased visibility — the barrels don't cover up the target.
- Improved cooling helps prevent heat waves from distorting visibility.

**FLOATING RIB**

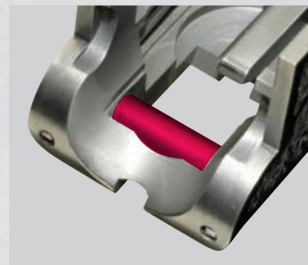

- The floating rib allows the rib and barrel to expand independently to eliminate stress.
- Prevents changes to point of impact due to barrel heating and the rib staying cool.

**FIRE
LITE**
MECHANICAL
TRIGGER**FIRE LITE
MECHANICAL TRIGGER**

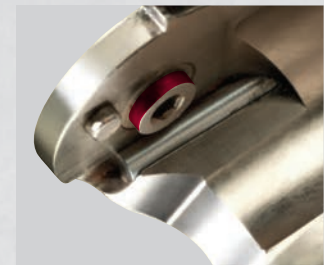

- Exclusive mechanical trigger design.
- Unlike an inertia trigger, Fire Lite does not rely on recoil to set the next shot; instead, it offers immediate second shot capability.
- Features less take-up, a crisp break and shorter overtravel.
- The Fire Lite Mechanical Trigger is light, crisp and has minimal overtravel.

**TAPERED LOCKING BOLT**

- Unlike other low-profile over and unders, the Citori 725 features a transverse-mounted, full-width tapered locking bolt and full-width hinge pin just like other Citori models for maximum strength and longevity.
- The locking bolt engages a full-width tapered recess in the monoblock. Tapering the bolt and recess allows the bolt to seat deeper over time, accommodating for wear.

**FULL-WIDTH HINGE PIN**

The Citori 725's full-width hinge pin provides maximum strength and long-lasting endurance.

**COMPETING TRUNNION
DESIGN**

The competitors' trunnions provide only a fraction of the bearing surface that the Citori 725's full-width hinge pin provides.

**ERGO
BALANCED****ERGO BALANCED**

- Incredibly balanced in the hands from pad to muzzle.
- Facilitates a light feel and fast swing.
- Promotes follow through.

**BECOME
ONE
WITH THE
GUN**

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

PLAY THE GAME.

Shooting sporting clays is exciting and challenging. Achieving top scores requires practice and a Browning Citori 725 Sporting. 725 Sporting guns are loaded with features that help you shoot your best.

GO AFIELD WITH A CITORI 725.

Fast-moving pheasants exploding from the corn and doves passing across the sky require a gun that points and swings with natural grace and speed. A Browning Citori 725 Field gun is equal to the task and ready to shoulder in an instant.

LEGENDARY CRAFTSMANSHIP.

Each and every Browning Citori is fit and assembled by hand to achieve a level of perfection and durability that rivals guns costing hundreds or even thousands of dollars more. The extra attention to detail assures smooth operation and flawless looks, adding longevity and integrity so that your Citori will be good to go for the next generation.

Citori

CITORI FEATURES AND BENEFITS

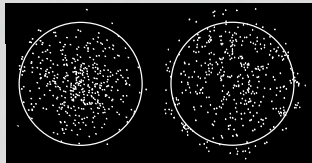

TRIPLE TRIGGER SYSTEM

Citori target shotguns come equipped with the Triple Trigger System, which fine tunes finger-to-trigger length of pull. Choose a wide checkered, narrow smooth or wide smooth canted trigger shoe.

LOCKING BOLT AND HINGE PIN

The Citori features a heavy-duty, transverse-mounted, full-width tapered locking bolt that engages a full-width tapered recess in the rear barrel lugs. Tapering the bolt and recess allows the bolt to seat deeper, accommodating for wear. The hinge pin extends across the width of the receiver for maximum strength. Engineering like this ensures the Citori wears in, not out.

Browning pattern with Back-Bored Technology

The competitors' pattern without Back-Bored Technology

CHROME CHAMBERS

For increased durability and corrosion resistance, all Citori shotguns have hard chrome-plated chambers to resist the toll that thousands of shells can take on lesser quality guns.

STEEL SHOT PERFORMANCE

The strength of Browning barrels is legendary, and built to handle the punishment of steel shot. Unlike some manufacturers' barrels that show pitting after shooting steel, Browning pioneered construction that maximizes steel shot performance and barrel durability. Browning barrels meet the strictest material and construction quality standards. The barrel blanks are made from rolled and tempered steel bars and are stress relieved to offer exceptional mechanical properties. The barrel blanks are then precision drilled, reamed and honed to exacting specifications. With proper care, Browning Citori barrels will last a lifetime.

HAMMERS AND HAMMER EJECTORS

For positive primer ignition, Citori hammers are driven by powerful coil mainsprings. The convenient barrel selector allows you to choose which barrel fires on the first pull of the single trigger, and the second pull fires the remaining barrel. Ejectors are fired by a sharp hammer blow for more positive ejection than the push imparted by competitors' ejectors. The automatic ejectors eject fired hulls when the breech is opened and elevate unfired shells for easy removal.

VECTORPRO™

VECTOR PRO LENGTHENED FORCING CONES ON 12 AND 20 GAUGE CITORI SHOTGUNS

Browning was the first manufacturer to recognize the performance advantages of a back-bored barrel and to make it a standard feature on shotguns. Longer, tapered Vector Pro forcing cone dimensions minimize shot deformation and maximize pattern uniformity, consistency and density. Back-boring increases bore diameter specifications and decreases friction between the shot cup and the bore to maximize shot pellet velocity and to reduce felt recoil. Reducing constriction from the forcing cone on the shot column results in fewer deformed pellets for more uniform patterns, and keeps more pellets in the central part of the pattern where they're needed to bag more upland birds, waterfowl and clay targets. Browning back-bore specifications represent the ideal bore dimensions. A larger bore diameter can let gases slip by the shot cup, resulting in both reduced pellet velocity and blown patterns. A smaller bore diameter means the forcing cone can deform pellets, leading to flyers and poor ballistic performance.

INVECTOR CHOKE TUBE SYSTEMS

The proven Standard Invector (28 gauge, .410 bore) or Invector-Plus (12, 20 gauge) interchangeable choke tube systems are featured on every Citori shotgun and provide consistent, dense shot patterns in the constriction needed for the specific shooting situation. The longer choke taper inside an Invector-Plus choke tube works with back-bored barrels and Vector Pro lengthened forcing cones to produce dense patterns with uniform densities and fewer flyers. The superior designs of the Invector systems are far more durable than the choke systems found in competitors' guns, especially when shooting steel shot loads. The Invector systems eliminate gases slipping between the choke tube and barrel that could damage both the choke tube and the barrel. See pages 175 to 179 for a complete listing of choke tubes and wrenches.

LASTING PERFORMANCE AND VALUE.

Browning Citori XT Trap guns have a well-earned reputation for lasting reliability; which is why people say that a Citori wears in, not out. The XT Trap is built with a full-width steel hinge pin (rather than a pair of trunnions) and a tapered locking lug that is designed to seat deeper with wear and keep the action locking up tight.

CYNERGY®

CYNERGY FEATURES AND BENEFITS

**REVERSE STRIKER MECHANICAL TRIGGER**

- The Reverse Striker is a striker-based, mechanical trigger system that does not use the inertia from recoil to set the hammers.
- Reverse Striker offers the benefits of a crisp feel, reduced locktime and less overtravel than other over and under shotguns.
- Because inertia is not needed for the hammers to set, the design eliminates the possibility of the second barrel not firing.
- Cynergy target models are equipped with the Triple Trigger System, allowing finger to trigger length adjustment and the ability to switch between styles of trigger shoes: Wide checkered, narrow smooth or wide smooth canted.

**ADJUSTABLE COMB**

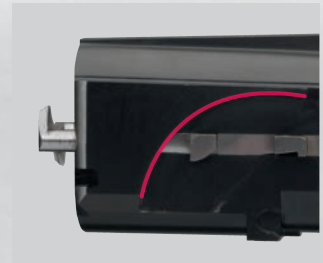

- Composite models include an adjustable comb system that allows the fit of the gun to be customized.
- Drop at comb adjustments are made in 1/8" increments.
- For cast on/cast off customizing, we offer accessory combs that are shown below.

**SUPERIOR GRIPPING SURFACES**

- Composite Cynergy models feature molded-in rubberized gripping surfaces for a secure hold in every situation.

**MONOLOCK HINGE**

- The strong MonoLock Hinge design is the engineering behind the Cynergy's low profile receiver.
- Integrates the monobloc and the hinge for up to 300% more surface area to pivot on than traditional trunnion-style hinges.
- Rectangular locking pins provide extra strength and feature a "Wear-In Relief" that keeps the action tight.

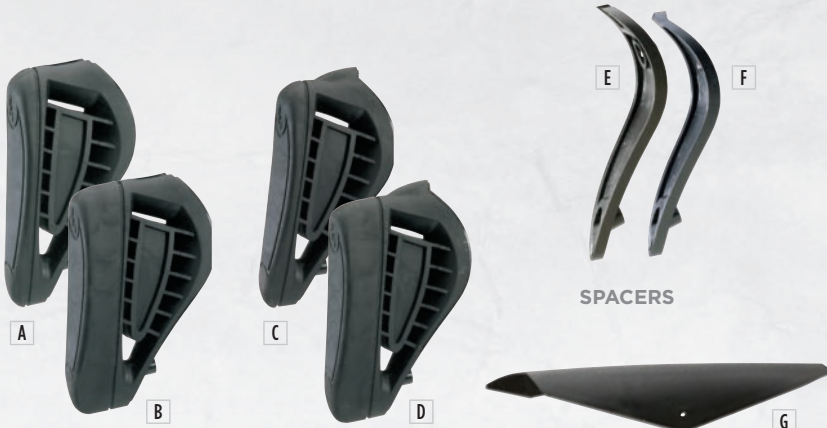

**CHROME CHAMBERS**

- Cynergy shotguns feature hard chrome-plated chambers.
- Increased durability and corrosion resistance.

IMPACT EJECTORS

- Impact Ejectors are aided by the punch of a secondary striker spring for positive, reliable ejection of fired hulls from the chambers.
- Unfired shells are elevated for easy removal.

Length of pull is adjustable from 13-1/4" - 15" with the recoil pads and stock spacers above. See page 4 for details on Inflex pads. All new guns ship with medium pads.

DIFFERENT IS GOOD.

Though the Browning Cynergy is the lowest profile over and under on the market, it is also one of the strongest. The MonoLock Hinge design shrinks the receiver to reduce weight without sacrificing strength, and helps control recoil to make the Cynergy easier on the shoulder.

FEATHERWEIGHTS.

With a lightweight alloy receiver, carrying a Cynergy Feather all day is a pleasure. The lack of weight, however, is most noticeable when the Cynergy is pulled to the shoulder and swung onto a flushing pheasant or grouse. Concerned about strength? Don't be. Feather models feature steel components where it matters to ensure many seasons in the field.

A TRAP SHOOTING MACHINE.

The BT-99 does one thing and does it well — it crushes clays. For decades, shooters of all abilities have put their trust in the performance of a BT-99 because it has features tailored to the trap range and the toughness to withstand years of both practice and competition.

BT99

BT-99 FEATURES AND BENEFITS

FOREARM

- A beavertail forearm helps control recoil and assists hand-eye coordination.

RIB

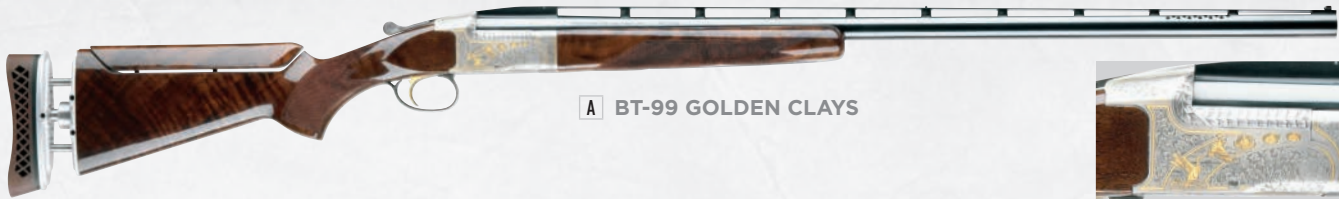

- High-post, 11/32" floating rib offers natural sighting and target acquisition.

CHROME CHAMBER

- The chrome-plated chamber resists wear and corrosion.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

SSSSWWEEEEEEEEEEEEEEET. . .

In the past, if your hunting buddy said he wanted a “Sweet Sixteen,” you knew he wanted a Browning Auto-5 in 16 gauge. Maybe it was the sweet way the gun handled or it might have just had something to do with the way the phrase “Sweet Sixteen” rolled off the tongue. Regardless, it has been synonymous with Browning humpback autoloaders for decades. With this year being 2016, it just feels like the right time to bring back this Browning favorite, albeit with a modern twist. Often referred to as the “Gentleman’s Gauge,” the in-between 16 is, to many hunters, the ideal ammunition for the perfect gun. A well designed 16 gauge is closer in weight to a 20 gauge, with a shot payload nearer the 12 gauge, with patterning that bests them both. Like its most revered predecessor, the new Browning A5 16 gauge is built on a smaller, lighter receiver for reduced weight and a sleek feel that simply takes your breath away. It also benefits from the advantages of modern technology and testing to extract the most performance from this most revered gauge. Pick up a new A5 Sweet Sixteen and see how sweet it is.

A5 FEATURES AND BENEFITS.

ERGO BALANCED

- Incredibly balanced in the hands from pad to muzzle.
- Facilitates a light feel and fast swing.
- Promotes smoother follow through.
- Places front hand closer to the bore line for superior hand eye coordination and pointability.

TURNKEY MAGAZINE PLUG

- The patented TurnKey Magazine Plug is easily removed in seconds using a car key.

100,000
ROUND GUARANTEE
OR FIVE YEARS

GET THE HUMPBACK ACQUISITION ADVANTAGE

- Extends the sight plane for faster, more natural sight alignment.
- Speeds target acquisition.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

SPEED LOAD PLUS

- Patented feeding system sends the first shell loaded into the magazine directly into the chamber.
- Speed Unload feature makes emptying the magazine fast and easy, without chambering and ejecting every shell with the bolt handle.

A5[®] sweet sixteen

A A5 SWEET SIXTEEN

KINEMATIC DRIVE

KINEMATIC DRIVE SYSTEM

- Kinetic energy is defined as the energy of motion.
- The A5 uses kinetic energy to power the recoil-operated Kinematic Drive System.
- Simplicity of design for consistent, reliable function with any load and under the full extremes of weather, temperature, moisture and grime.
- Kinematic Drive is so reliable that the A5 is the first ever autoloading shotgun to carry a 100,000-round or five-year guarantee – come hell or high water.
- Clean operation because gases are sent out the barrel and away from the action.
- Extreme load versatility for reliable performance with virtually all loads down to one ounce field with no adjustments.

ERGONOMIC BOLT LATCH

- Conveniently located just ahead of the trigger guard.
- Locks the bolt to the rear when the magazine is unloaded and releases a shell from the magazine when the bolt is closed for faster loading.
- Oversized shape makes the bolt latch easy to locate and operate with or without gloves.

ABS CASE INCLUDED

- This sturdy, lockable ABS case is perfect for storing and transporting the A5.

TOMMY THACKER

Counted among the best 3-Gun competitors in the nation, Tommy Thacker has his choice among autoloading shotguns. He chooses the Browning A5. Read more about Tommy on page 312.

TRADITIONAL IN NAME ONLY.

While the new A5 may resemble the humpbacked Browning shotguns so many of you grew up admiring, these new guns are anything but traditional. Featuring cutting edge design and technology, these A5's are poised to be the shotguns the next generation will remember.

MAXUS FEATURES AND BENEFITS

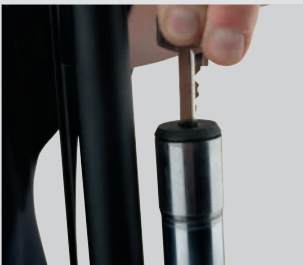

POWER DRIVE GAS SYSTEM

POWER DRIVE GAS SYSTEM

- Extensive research has produced the most reliable gas piston design ever.
- The gas piston features oversized exhaust ports that dump gases faster with heavy loads to reduce recoil.
- 20% longer piston stroke travel increases reliability with light loads.
- An enclosed seal keeps residue out of the action for cleaner operation.

TURNKEY MAGAZINE PLUG

TURNKEY MAGAZINE PLUG

- The patented TurnKey Magazine Plug is easily removed in seconds using a standard car key.

MAGAZINE CUT-OFF

- The magazine cut-off (not available on Sporting models) allows the chamber to be unloaded to change loads without cycling a shell from the magazine.
- Useful when hunting different bird species and different loads are instantly required.

SPEED LOCK FOREARM

SPEED LOCK FOREARM

- The patented Speed Lock Forearm replaces the traditional screw-on magazine cap.
- Speeds take down for cleaning and storage.
- Makes attaching or removing the sling a snap.

SPEED LOAD PLUS

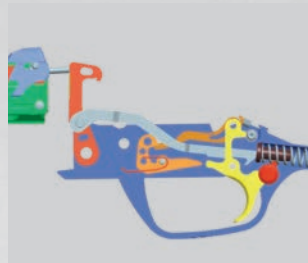

SPEED LOAD PLUS

- Patented feeding system sends the first shell loaded into the magazine directly into the chamber.
- Speed Unload feature makes emptying the magazine fast and easy, without chambering and ejecting every shell with the bolt handle.

OPTIMAL DIMENSIONS

- The Maxus features a trim forearm and close radius pistol grip to maximize control.
- An externally relieved steel magazine tube reduces weight for a faster swing while retaining durability.
- Drop and cast can be tuned using the included stock shim kit.
- A low rib is in line with the top of the receiver and translates into dead-flat point of impact.

LIGHTNING TRIGGER

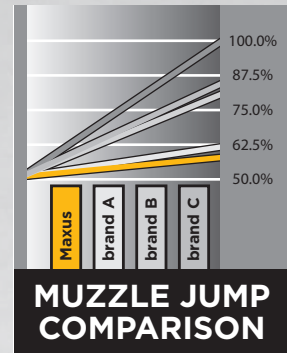

LIGHTNING TRIGGER

- The Lightning Trigger is the finest fire control system ever offered in an autoloading shotgun.
- Offers a smooth, crisp feel with minimal travel.
- Lock times average .0052 seconds, 24% faster than the nearest competing autoloader.
- Easy to remove for cleaning.

THE SOFTEST SHOOTING AUTOLOADER EVER

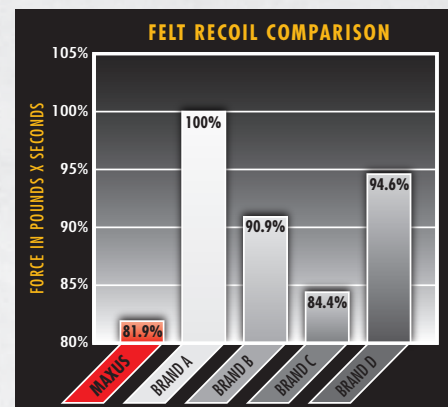

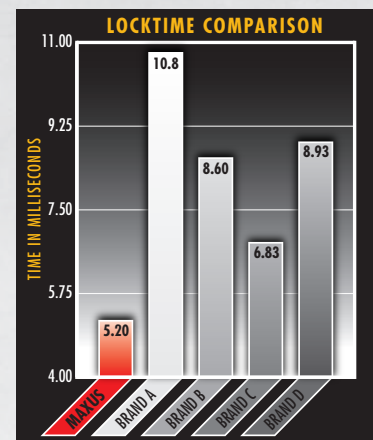

- Felt recoil is more than an instantaneous peak force; it is the total energy absorbing experience felt when a shell is fired.
- The Power Drive Gas System, Inflex Technology recoil pad, back-boring and natural Browning balance combine to transfer up to 18% less total felt recoil force to the shoulder than other autoloaders on the market.

MAXUS®

LESS MUZZLE JUMP

- The Power Drive Gas System works with the Inflex Technology recoil pad.
- Reduces muzzle jump up to 44% compared to the competition.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

SPEED AND RELIABILITY TO THE MAX.

The Browning Maxus lives up to its reputation of maximum performance, maximum reliability and maximum cycling speed. This premium gas-operated autoloader is loaded with features and designed to exceed expectations every time you bring it to your shoulder.

PERFORMANCE AND MORE.

Adding features to a new car quickly drives up the price. The same goes for shotguns. Some of you just want a high-quality, long-lasting autoloader that simply gets the job done every time you pull the trigger. The Silver fills that role with genuine Browning style.

SILVER FEATURES AND BENEFITS

LESS RECOIL WITH THE ACTIVE VALVE

- The self-adjusting Active Valve gas system in Silver autoloaders diverts gases from fired shells to operate the action instead of adding to recoil.
- When shooting light loads, most of the gases operate the action.
- With magnum loads, only a small amount of gas is necessary to operate the action, while the remaining gases are vented out the top of the forearm and away from the receiver for cleaner, more reliable operation.
- Superior recoil reduction from the Active Valve means faster, more accurate follow-up shots and all-day shooting comfort regardless of the loads being fired.

MAXIMUM GRIP

- Composite Silver models combine checkered gripping surfaces and proven Dura-Touch Armor Coating for a sure hold and a sleek feel in all climate conditions.

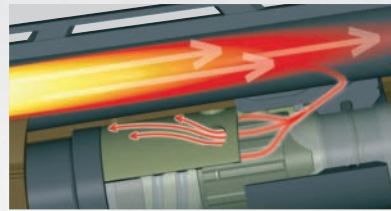

TRIGGER

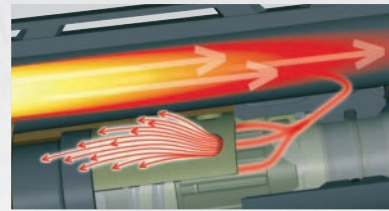

- The trigger assembly can be removed in just seconds for a thorough cleaning.
- The trigger guard is large and has carefully rounded edges to accommodate gloved fingers.

LOAD VERSATILITY

- The Active Valve-equipped gas piston efficiently adjusts to reliably fire a wide range of loads.
- 12 gauge 3" models fire everything from light, 1 oz., 2-3/4" field loads to the heaviest 3" magnums. The 3-1/2" version is built to handle a similar range, from 1-1/8 oz., 2-3/4" field loads up to hard-hitting 3-1/2" magnum loads.

Light Load (1 oz.)

Heavy Load (2 oz.)

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

BETTER VALUE AND ADDED VERSATILITY.

Using a shotgun to hunt deer, bear or wild boar is increasing in popularity because improvements in ammunition make modern slug guns more effective at bringing down heavy game. There is also a side benefit to hunting with a Browning shotgun — accessory barrels are available to easily convert that same shotgun into a wingshooter. The cantilever scope mount ensures the scope is still on target when it's time to swap back.

PUMP-ACTION PERFECTION.

Generally, pump shotguns are entry-level guns built for beginners. We don't see the BPS that way, knowing that many of you demand the highest quality and reliability from a shotgun, whether you are new to the shooting sports or a seasoned gunner. The BPS uses a rugged steel frame and twin action bars for long-lasting, bind-free slide-action performance.

BPS FEATURES AND BENEFITS

BOTTOM EJECTION AND LOADING

- Unique bottom ejection throws empty hulls straight down, out of the line of sight.
- The BPS is the best pump shotgun choice for both right- and left-handed shooters.

MAGAZINE CAPACITY

- 2-3/4": Four in the magazine, one in the chamber.
- 3": Three in the magazine, one in the chamber.
- 3-1/2": Three in the magazine, one in the chamber.
- A three-shot magazine adaptor plug is included.

RELIABLE PUMP-ACTION

- The proven pump-action features rugged steel components.
- The receiver is machined from a solid block of forged steel.
- Rigid double slide bars are made from heat-treated steel to eliminate twisting and binding for faster, more efficient slide-action operation.
- Reliable in all conditions.
- A convenient serrated slide release is located at the rear of the trigger guard.

MAXIMUM GRIP

- Camo composite BPS models combine in-molded checkered gripping surfaces and our proven Dura-Touch Armor Coating for a sure hold and a sleek feel in all climate conditions.

TANG SAFETY

- The thumb-operated, top-tang safety on the BPS can easily be operated with the right or left hand, even with gloves on.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

**A BROWNING RIFLE
IS A SURE SHOT.**

Bolt-action, autoloader, lever-action — there are many types of sporting rifles on the market and each has a loyal following. While the style of rifle may vary, the one thing every rifle must be is accurate. That's when it helps to have the name Browning on the barrel. From the rifle that started it all, the Model 1885, to our current crop of X-Bolts, Browning is synonymous with accurate, innovative rifles of the highest quality.

RIFLES

A RIFLE FOR TOUGH COUNTRY.

Even if you have never been to a place called Hell's Canyon, you can imagine what it might look like. It will most likely have steep walls, sharp rocks and thick, thorny brush — just the sort of place the big bucks like to hide. If you're lucky enough to catch a glimpse of the deer of your dreams, you may only have one shot, make it count with a Browning X-Bolt. This new Hell's Canyon Speed edition rifle is tougher than hell itself with a composite stock finished in A-TACS AU Camo™ and a Cerakote™ Burnt Bronze finish on the barrel and action to provide versatile concealment and protection.

X-BOLT

**NEW
2016**

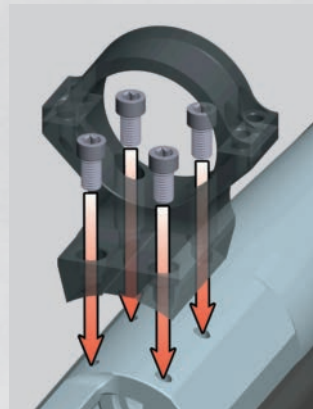

X-BOLT FEATURES AND BENEFITS

FEATHERTRIGGER™

FEATHER TRIGGER

- For precise shooting there is absolutely no substitute for a crisp, predictable trigger.
- The X-Bolt's three-lever Feather Trigger provides a clean, crisp pull with no take-up or creep and minimal overtravel.
- The trigger is screw adjustable from 3 to 5 lbs. and factory pre-set at approximately 3-1/2 - 4 lbs.
- An alloy trigger housing contains hard chromed steel components that are highly polished on all critical contact surfaces.

X-LOCK SCOPE MOUNTING SYSTEM

- Securely mounted optics are essential for accuracy and precision on any rifle.
- X-Lock mounts feature a four screws per base design that replaces the traditional two screw system.
- Offers more accurate placement and more secure attachment to the receiver.

FREE-FLOATING BARREL

- Every X-Bolt is individually bedded into the stock for a true free-floating barrel, not bedded using a master receiver like the competition.
- The X-Bolt barrel is free-floated by bedding the front and rear of the action for stability.
- Maintains barrel to stock spacing for consistent accuracy.
- The recessed muzzle crown helps protect the rifling from damage.
- Barrels are triple checked for interior finish, straightness and air-gauged for uniformity.
- Hand-reamed chamber for precision accuracy.

BOLT UNLOCK BUTTON

- The bolt unlock button works in conjunction with the top-tang safety to provide an extra margin of safety when checking and unloading the chamber.
- Located on top of the bolt handle, the bolt unlock button allows the bolt to be unlocked and opened with the tang safety in the on safe position.
- The convenient tang safety blocks the trigger sear and features a firing pin block for added security.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

A-TACS AU CAMO.

The new X-Bolt Hell's Canyon Speed features A-TACS AU (Arid/Urban) Camo pattern to help hide you from an animal's keen eyes. A-TACS (Advanced Tactical Concealment System) engineers camouflage patterns that blend into the widest possible range of environments. Unlike popular "leaf and twig" camo patterns that use realistic parts of nature to blend in with specific backgrounds, A-TACS relies on a patented process to build a composite from natural colors that have been digitally sampled from real-world elements. These "micro" patterns form larger, more distinct "macro" patterns, with no horizontal or vertical orientation, and conceal more effectively at a distance. This "pattern within a pattern" concept allows A-TACS to eliminate unnatural outlines when viewed from afar. A-TACS camo also benefits from a greater range of intermingled natural colors that are blended and overlaid into one another to create a more naturalistic appearance.

60° BOLT LIFT

- Short 60° bolt lift is fast cycling and the hand easily clears the scope.
- The bolt is machined from solid steel bar stock for strength and custom rifle precision.
- Three locking lugs provide exceptional bolt strength.

ROTARY MAGAZINE

- The unique rotary magazine is removable, durable, easy to load and feeds rounds from the center line, not off to the side like other rifles, for straight to the chamber feeds.
- Unique design holds U.S. patent numbers: 8,156,675; 8,484,875 and 8,745,912

TANG SAFETY

- Tang safety is easy to reach with the thumb.

PERSONALIZED ENGRAVING

- The bolt can be personalized with your name. Call (800) 333-3288.

BEYOND
—THE HUNT—

JULIE KREUTER

Join avid huntress Julie Kreuter and her husband Rick as they team up to bring you the big picture of hunting in their exciting series *Beyond the Hunt* on the Outdoor Channel. You can get to know more about this dynamic duo on page 310.

THE WARMTH OF WALNUT.

Browning guns are prized for finely crafted and finished wood. Though a composite stock has its advantages, there will always be those among you who prefer the warmth and feel of walnut. We offer several X-Bolt models with wood stocks, each bedded at the recoil lug and rear action screw to help ensure accuracy.

THE AB3 — VALUE IN THE 10 RING.

Affordability and performance combine in the Browning AB3 rifle. The straight-shooting AB3 packs feature on top of feature into an affordable package, without sacrificing Browning accuracy and longevity.

AB3™

AB3 FEATURES AND BENEFITS

LARGE BOLT SURFACE

- The robust bolt offers additional rigidity.
- The bolt is machined from solid steel bar stock and machined internally to keep weight low.
- Three locking lugs provide exceptional bolt strength.
- Super smooth chrome bolt finish is great looking, quieter and offers smooth cycling.

INFLEX RECOIL PAD

- Inflex recoil pad softens recoil and allows faster, more accurate second shots.
- Internal structure is designed to pull the rifle down and away from the face to reduce felt recoil.

BOLT LOCK OVERRIDE BUTTON

- The bolt lock override button provides an additional margin of safety when checking and unloading the chamber.
- Located behind the bolt handle, the bolt lock override allows the bolt to be unlocked and opened with the tang safety in the on safe position.
- The convenient tang safety blocks the trigger sear and sear.

DETACHABLE MAGAZINE

- Polymer and steel construction is lightweight and extra tough.
- Unique spring and follower design minimizes follower tilt for more reliable feeding.

FREE-FLOATING BARREL

- Free-floating maintains barrel to stock spacing for consistent accuracy.
- Recessed muzzle crown helps protect the rifling from damage.
- Precision button-rifled barrel is triple checked for interior finish, straightness and air-gauged for uniformity.
- Hand-reamed chamber for precision accuracy.

60° BOLT LIFT

- Short 60° bolt lift is fast cycling and the hand easily clears the scope.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

TOUGH DECISIONS.

There are many choices to pick from within the value bolt-action rifle category, but how many guns can boast of models with a stock built from either rugged composite or handsomely-finished walnut? The Browning AB3 confidently can. Choosing one may be a tough decision, but either way you won't go wrong.

MOST WANTED LIST

Join singer, songwriter and hunter Kristy Lee Cook and her friends Jess Hull and Jessi Jo Stanfill on their new TV adventure, *Most Wanted List* on the Sportsman Channel. Learn more about the ladies and their all new Browning show in the bio on page 309.

WORK IT.

Lever-action rifles will always have a place among those who appreciate a quick handling, fast cycling and sure shooting rifle. Unlike most lever guns, the Browning BLR features a detachable box magazine that feeds superior pointed bullets, in modern calibers, for accuracy that rivals many bolt-action rifles.

BLR FEATURES AND BENEFITS

RECEIVER

- Lightweight, sturdy machined aircraft-grade aluminum. Drilled and tapped to accept scope mounts.

ACTION

- Lightning fast, glass-smooth rack and pinion lever-action.
- Strong rotating head, multiple-lug breech bolt with a recessed bolt face and side ejection.

HAMMER

- The folding hammer provides an added measure of safety when the hammer is at half-cock.
- The fold-down hammer has two positions at half-cock so the status of the rifle is readily seen; and four basic positions: Full-cock, half-cock, folded hammer position and the dropped, or fired position.

TAKEDOWN FEATURES

- BLR Takedown models are just as accurate and reliable as their unified counterparts but much easier to transport and store.
- The rifle is easily and quickly assembled by simply sliding the barrel half into the receiver half and locking them together with the flip of a lever. The lever mechanically engages a stout locking lug into a recess in the bottom of the receiver. The system is rugged, precise and blends seamlessly into the styling of the rifle.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

BOUNDLESS HUNTING™

William and McLean Russell make up the duo that hosts *Boundless Hunting* on the Pursuit Channel. Learn more about the brothers and their show in the bio on page 306.

THE NEW BAR MK 3.

Very few companies can boast of a single firearm that helped to shape history. Browning, well, let's just say that we can. One of the most famous is the Browning Automatic Rifle, the BAR. Its story began back in 1917 as a tool designed for American troops during the First World War. The BAR then saw combat in every major U.S. conflict, extending even into the early days of Vietnam. While it shares a name common with Browning's original, the new sporting BAR MK 3 is ready to provide the rugged performance and accuracy that hunters demand and will serve to further engrave the name BAR into the history books.

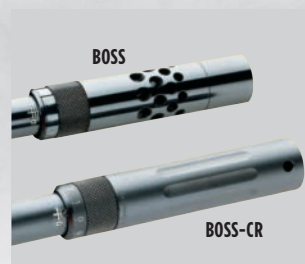

A BAR MK 3

BAR FEATURES AND BENEFITS

ACTION

- The BAR is a gas-operated autoloader with a high-strength, multiple-lug rotating bolt that locks directly into the barrel.
- The seven-lug bolt and precise breech-to-chamber relationship give the BAR exceptional accuracy and the strength to handle magnum loads.
- The strong and rigid action bar/inertia block link-up improves accuracy by reducing barrel vibration.
- The buffering system reduces wear and stress on the rifle's mechanism.

THE BOSS DEVICE

- The Ballistic Optimizing Shooting System (BOSS) is designed to maximize accuracy.
- The BOSS device quickly and easily tunes barrel harmonics to precisely match the specific ammunition fired, resulting in amazingly tight groups. The BOSS device is available as an option on the BAR Mark II Safari.

MK 3 Engraving, Right

RECEIVER Aircraft-grade alloy • Satin nickel finish • High-relief engraving • Drilled and tapped for scope mounts **BARREL** Blued finish • Hammer-forged **ACTION** Gas-operated autoloader • Multi-lug rotary bolt • Detachable box magazine • Composite trigger guard and floorplate • Crossbolt safety **STOCK** Oil finish Grade II walnut • Stylized forearm • Checkered • Shim adjustable for cast on/off and drop at comb **FEATURES** Sling swivel studs installed

MAGAZINE

- Detachable box magazine with a unique hinged floorplate allows the shooter to lower the floorplate, detach the empty magazine and snap in a full magazine in mere seconds.

RECEIVER

- The BAR Mark II Safari uses a blued one-piece ordnance steel receiver with scroll engraving.
- The BAR MK 3 is built on an aircraft-grade aluminum alloy receiver.
- All BAR rifles are drilled and tapped for scope mounts. The bolt release lever is incorporated into the receiver.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

BOSS-CR ACCESSORY

The BOSS-CR accessory offers all the accuracy and tunable advantages of the original BOSS device without the muzzle brake feature. By simply replacing the original BOSS forward weight and recoil reduction components with the one-piece, non-ported BOSS-CR accessory, only the reduced recoil of the original BOSS is sacrificed. The BOSS-CR accessory is designed to fit only BAR Mark II and A-Bolt centerfire rifles previously factory-fitted with the BOSS. **GLOSS BLUED** for BAR Safari; A-Bolt models: Medallion and Gold Medallion **MATTE BLUED** for A-Bolt models: Composite Stalker, Hunter, Euro-Bolt, Varmint, Eclipse Hunter and M-1000 Eclipse **STAINLESS** for A-Bolt models: Stainless Stalker, White Gold, Medallion and M-1000 Eclipse **IT IS IMPORTANT THAT THE CORRECT BOSS-CR BE SELECTED FOR A SPECIFIC CALIBER AND MODEL OF RIFLE.**

STRAIGHT-UP UNIQUE.

Easy to operate for most every shooter, the straight-pull bolt-action design of the Browning T-Bolt cycles fast and locks up tight for excellent accuracy. Tremendously fun to shoot, T-Bolt rifles are made to the highest standards of quality.

T-BOLT FEATURES AND BENEFITS**STOCK**

- Stocks are full-size to more comfortably fit adults.
- Durable Composite models feature a Monte Carlo comb and include magazine storage in the buttstock.
- Walnut stocked Sporter models feature trim dimensions with a satin finish and cut checkering. Walnut Target/Varmint models feature a Monte Carlo comb and wide forearm for stability on the bench.
- All models include a bedded action and dual action screws for solid attachment.
- Sling swivel studs included.

**TRIGGER**

- The three-lever trigger design combined with a short-travel firing pin give a crisp break, quick lock time, no take-up and minimal overtravel.
- Adjustable for pull weight.

**BUTTSTOCK MAGAZINE STORAGE**

- Composite stock models offer a convenient location to securely store an extra magazine.

**ACTION**

- Receiver is machined from steel barstock.
- Features crossbolt lockup for strength and smooth operation.
- The mainspring runs directly through the massive pivot pin. Cocking effort is split between opening and closing for ease of operation. The bolt features dual extractors and a red cocking indicator band.
- Right-side ejection on both right- and left-hand models.

**SAFETY**

- Top-tang, thumb operated two-position safety can be operated without changing from a shooting grip.

BARREL

- Target/Varmint models feature a 22" medium target profile.
- T-Bolt Sporter models feature a 22" medium sporter profile.
- Barrel is free-floating with a semi-match chamber and target muzzle crown.

OPTICS READY

- Receiver is drilled and tapped for scope mounts (not included). See pages 170-171 for scope rings and bases for T-Bolt rifles.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

22 Long Rifle

17 HMR / 22 WMR

DOUBLE HELIX MAGAZINES

- 10-round capacity.
- The patented Double Helix rotary box magazine uses torsion spring driven interlocking gears for added reliability and easy loading and unloading.

LITTLE LEVERS.

They don't build them like this anymore, but we still do. The Browning BL-22 is a handsome little rimfire rifle that puts rock-solid build quality as first priority. The quick-throw lever action makes shooting quick and accurate. The BL-22 is the perfect, reliable rimfire with long lasting Browning class.

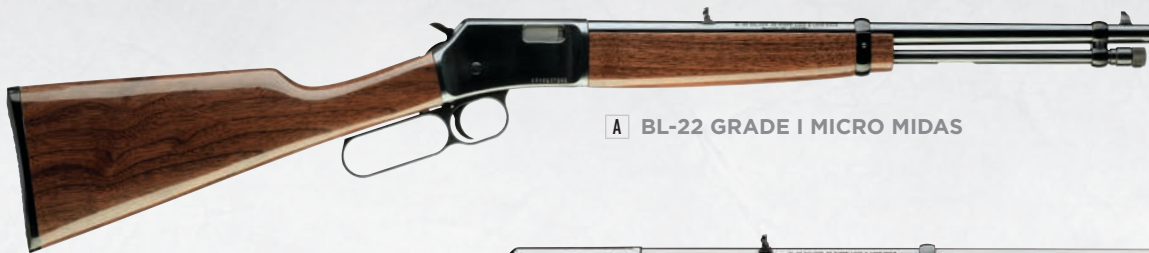

BL-22 FEATURES AND BENEFITS.

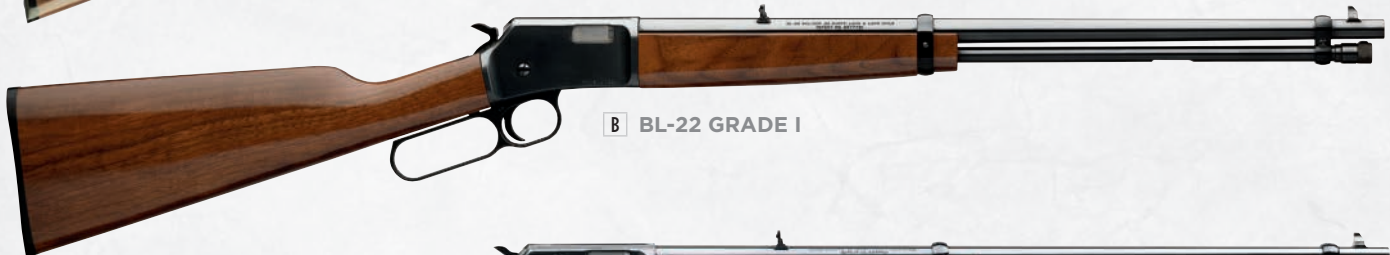

RIMFIRE THOROUGHBREDS.

- The slick, lever-action BL-22 is perfect for new and seasoned shooters alike.
- Quick-cycling 33° lever throw.
- The trigger travels with the lever to prevent finger pinch.
- High-quality construction.
- Fires .22 Short, Long and Long Rifle ammunition.
- Short lever throw is ideal for smaller hands.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

PURE GENIUS FROM THE MAN HIMSELF.

Straight from the workbench of John M. Browning comes the SA-22. One of the famous inventor's most time-honored and cherished designs, these compact takedown rifles are a perfect reminder of the talents of the greatest gun designer in history.

SA-22 FEATURES AND BENEFITS

TAKEDOWN FEATURE

- The Semi-Auto 22 can be quickly taken down to a compact length of only 19-3/8" for storage or packing.

BARREL ADJUSTMENT

- The knurled knob allows play to be adjusted out of the barrel to ensure accuracy.

IN-STOCK MAGAZINE

- The magazine is located in the stock to maintain the trim dimensions of the rifle.

BOTTOM EJECTION

- Bottom ejection makes the Semi-Auto 22 ideal for right- or left-handed shooters alike.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

ON TARGET FOR FUN.

A Buck Mark Rifle is an ideal rimfire for plinking. Lightweight, compact and nimble, the Buck Mark Rifle is simple to operate, easy to load, accurate and fun to shoot.

**BUCK MARK RIFLES FEATURES AND BENEFITS****SAFETY AND SLIDE RELEASE**

- Large manual thumb safety.
- The convenient manual slide release is easily operated with the shooting or support hand.

**SIGHTS**

- Sporter model features a TRUGLO®/Marble Arms® fiber-optic sight system.
- The rear sight is adjustable for windage and elevation.

**MAGAZINE RELEASE**

- Located adjacent to the trigger guard for convenient operation.

**ACTION**

- The straight blowback design offers enhanced simplicity and reliability.

**FRAME**

- Machined to exacting tolerances from a solid billet of 7075-T6 aluminum. The stock structure is a part of the pistol frame, reducing weight and the number of parts.

**BARREL**

- Sporter model features lightweight, tapered sporter-weight barrel. Target models feature a bull barrel.
- The chamber in every Buck Mark Rifle barrel is hand-reamed and the muzzle crown is recessed to protect it from damage that could degrade accuracy.

**SLIDE**

- Serrated for an improved cocking grip.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

**A HISTORY OF
PISTOL PERFECTION.**

Browning is no stranger to handguns. After all, the most famous autoloader of all time, the Model 1911, was invented by our namesake. That pistol, along with the hard-hitting 45 ACP cartridge it was chambered for, are merely two of the many pistol inventions that poured from the genius of John M. Browning.

Today, along with the Buck Mark and Hi Power, reduced scale 1911 variants are among our line of fine firearms. They are as much a testimony to the man as they are to the longevity of his ideas.

HANDGUNS
®

PUT THE SIGHTS ON PERFORMANCE.

Made in the USA on a machined aluminum frame, the Buck Mark features a precision rifled barrel, crisp trigger and fully-adjustable sights. For competition, target shooting or an afternoon plinking with the family, a Buck Mark is always ready to deliver top-notch performance.

BUCK MARK PISTOLS FEATURES AND BENEFITS

EASY TO REACH CONTROLS

- Large manual thumb safety.
- The convenient manual slide release is easily operated with the shooting or support hand.
- The magazine release is positioned adjacent to the trigger guard for convenient operation.

ACTION

- The straight blowback design offers enhanced simplicity and reliability.

ABS CARRY CASE

- Buck Mark pistols are shipped in a sturdy ABS case.

FRAME

- Machined from aircraft grade aluminum alloy.

BARREL

- Most models have bull barrels for improved stability. Lite models have a steel barrel liner inside an ultralight aluminum sleeve.
- The chamber is hand-reamed and the muzzle crown is recessed to protect it from damage that could degrade accuracy.

MAGAZINE

- The steel magazine body is heat treated for long-term feeding reliability and long life. The coil spring provides a consistent follower angle. 10-round capacity.

SIGHTS

- The 16-click per revolution adjustable Pro-Target™ sight is standard on all models.
- This sight provides a finer degree of adjustment over the industry's standard of 12-clicks per revolution.
- Fiber-optic TRUGLO®/Marble Arms® front sights are available on select models.

GRIPS

- Several wood, laminate and composite styles are available. Overmolded Ultragrip FX (UFX), soft nitrile rubber Ultragrip RX® (URX) and wood Ultragrip Deluxe® (UDX) ambidextrous grips have ergonomic finger grooves for enhanced control.

ABS CARRY CASE

- Black Label 1911-22 pistols are shipped in a sturdy ABS case.

BEAVERTAIL GRIP SAFETY

- The beavertail design prevents the hand from being pinched between the grip safety and the hammer.
- Raised bump ensures positive operation.

FLAT MAINSPRING HOUSING

- Makes the grip more comfortable for a wider range of shooters.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

FRAME

- Engineering grade composite.
- Laminated grip panels.

MAGAZINE

- The steel magazine body is heat treated for long-term feeding reliability and long life.
- The coil spring provides a consistent follower angle.
- 10-round capacity.

COMBAT-STYLE SIGHTS

- Combat-style sights offer rapid target acquisition.

STEEL 3-DOT SIGHTS

- Sturdy steel construction.
- Three-dot style for easy alignment.

UNEXPECTED EXTRAS.

All Browning Black Label 1911-22 models include an impressive list of extras. An extended thumb safety and slide stop, and a skeletonized hammer make manipulation easier and more positive. The beavertail grip safety allows a higher hold and prevents hammer bite. The flat mainspring housing ensures more positive operation of the grip safety. Combat-style sights allow for faster target acquisition.

THE RIGHT 380.

Though 15% smaller than the original 45 ACP versions, the single-action 1911-380 still feels familiar in the hands. The precision built composite frame includes extras like extended controls to make operation easier. Easily controllable with light recoil, the 1911-380 is ideal for new shooters, sport shooting and personal protection. The 1911-380 is proudly made in the USA.

A PAIR OF ORIGINALS.

Both the Model 1911-380 and the 380 ACP cartridge are inventions of the legendary John M. Browning. The 380 ACP cartridge perfectly complements the 1911-380 because even with its reduced size, the pistol is slightly larger than the subcompact competition and easily accommodates the snappy caliber to provide manageable recoil and excellent accuracy.

JARED WIHONGI

Jared Wihongi is a specialist in edged weapons and has more than 25 years of international martial arts experience. He also serves as a reserve SWAT officer not far from Browning headquarters in Utah. Jared has been instrumental in the development of the Black Label knife line. Learn more about him on page 310.

STILL THE STANDARD.

Few handguns have the reputation of the single-action Browning Hi Power. The Hi Power has earned its following for performance in the hands of law enforcement, military, special operations forces and law abiding citizens.

HI POWER

HI POWER FEATURES AND BENEFITS

FRAME AND SLIDE

- The frame and slide are built from solid steel to keep recoil light and manageable for accurate firing, even at a rapid rate. The Hi Power's balance in the hand is impeccable.

SIGHTS

- Hi Power pistols are available with fixed, low-profile three-dot sights. The Hi Power Standard is also available with optional low-profile target sights that are adjustable for windage and elevation.

MAGAZINE CAPACITY

- Double-stack magazine design.
- 13-round magazine capacity. 10-round capacity where required by law. Follow state and local laws regarding magazine capacity.

SAFETY

- A large, ambidextrous manual thumb safety is conveniently located on the frame just above the grip.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

CREATE AN EVERLASTING MASTERPIECE.

The Browning Custom Shop strives to meet the expectations of the individual, personalizing each aspect of a firearm from the wood to the engravings desired. Once the options are chosen, it is placed into the expert hands of highly skilled craftsmen that turn the dream of a gun into reality. Building a custom Browning firearm is an endeavor to be cherished.

The Custom Shop range comprises four grades, each of which includes a variety of options.

PRICE

- Pricing for the basic firearm, before custom enhancement, is available from the sales department at Browning in Morgan, Utah by calling (801) 876-2711. All prices are subject to change due to changing world currencies.

HOW TO BUILD A CUSTOM GUN

- Visit browning.com/custom to view or download the Browning Custom Shop brochure. In addition to showcasing the firearms available, this brochure displays and explains the many grades, engraving patterns, checkering patterns, stock and forearm designs and personal touches available.

HOW TO ORDER

- All inquiries for Custom Gun Shop products will be submitted to headquarters in Morgan, Utah. Once the basic specifications have been determined, a written order should be placed with the Morgan office. The specifications will be reviewed with the Custom Shop in Belgium, and a price and delivery date will be determined.

DELIVERY

- Actual production time will be based on the complexity and detail of the custom order. An approximate delivery date will be furnished with the factory cost quotation.

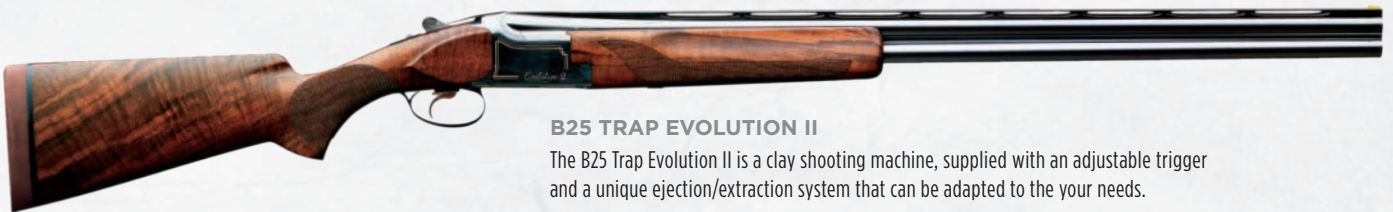

B25 SIDEPLATE TRAP

With a full sideplate design, the B25 Sporter is the epitome of over and under shotguns. This much appreciated model is generally configured with long barrels and a wide ventilated rib fitted with a mid-bead sight.

B25 SPORTER NEW GENERATION

In addition to an Olympic trigger, this model includes a tapered 5/16" - 7/16" top rib and ventilated side ribs. It is available in 30" and 32" barrel length versions. The adjustable stock is optional.

B25 TRAP EVOLUTION II

The B25 Trap Evolution II is a clay shooting machine, supplied with an adjustable trigger and a unique ejection/extraction system that can be adapted to the your needs.

THE EPITOME OF QUALITY.

Browning Custom Shop B25 shotguns are born in the hands of the exceptional craftsmen of Fabrique Nationale d’Herstal in Belgium. These unique models are meticulously made to order and move one step closer to perfection at every stage of the build. The finest assembly techniques, the beauty of detail and the love of firearms make these collections works of exceptional luxury.

B25 SPECIAL BAILLY

The B25 over and under gun is the result of the encounter between John Moses Browning’s creative genius and Liege’s skills in arms-making enhanced by four centuries of tradition.

The B25 is an exceptional firearm, representing the utmost rigour in the search for perfection, and today it is the most refined and most admired over and under gun in the world.

MUCH MORE THAN A 22.

Rare is the rimfire rifle worthy of hand-wrought embellishment. When that rifle is an original design from The Master himself however, exceptions will be made. The John M. Browning designed SA-22 is an excellent foundation for a Custom Shop piece. The Grade III model shown is one of the most popular versions available with beautifully-finished gloss wood and an intricately engraved receiver.

SEMI-AUTO 22 GRADE III

AN ENDURING MASTERPIECE.

A custom Browning Hi Power joins the legendary performance of one of the finest handguns the world has seen with the skill and craftsmanship found among the artisans of the Custom Shop.

BROWNING
PROSTEEL SAFES

**PROTECTION YOU
CAN BELIEVE IN.**

Whether you own a single pistol or a gun collection that could rival a small museum, securing your firearms inside the steel confines of a safe is a wise idea.

While many gun safes will secure your guns from unauthorized hands, a Browning ProSteel safe offers style, security, fire protection and storage solutions for real protection from determined criminals and the ravages of fire. Our unmatched interior configurations are the most versatile on the market, allowing you to store more of your guns and valuables.

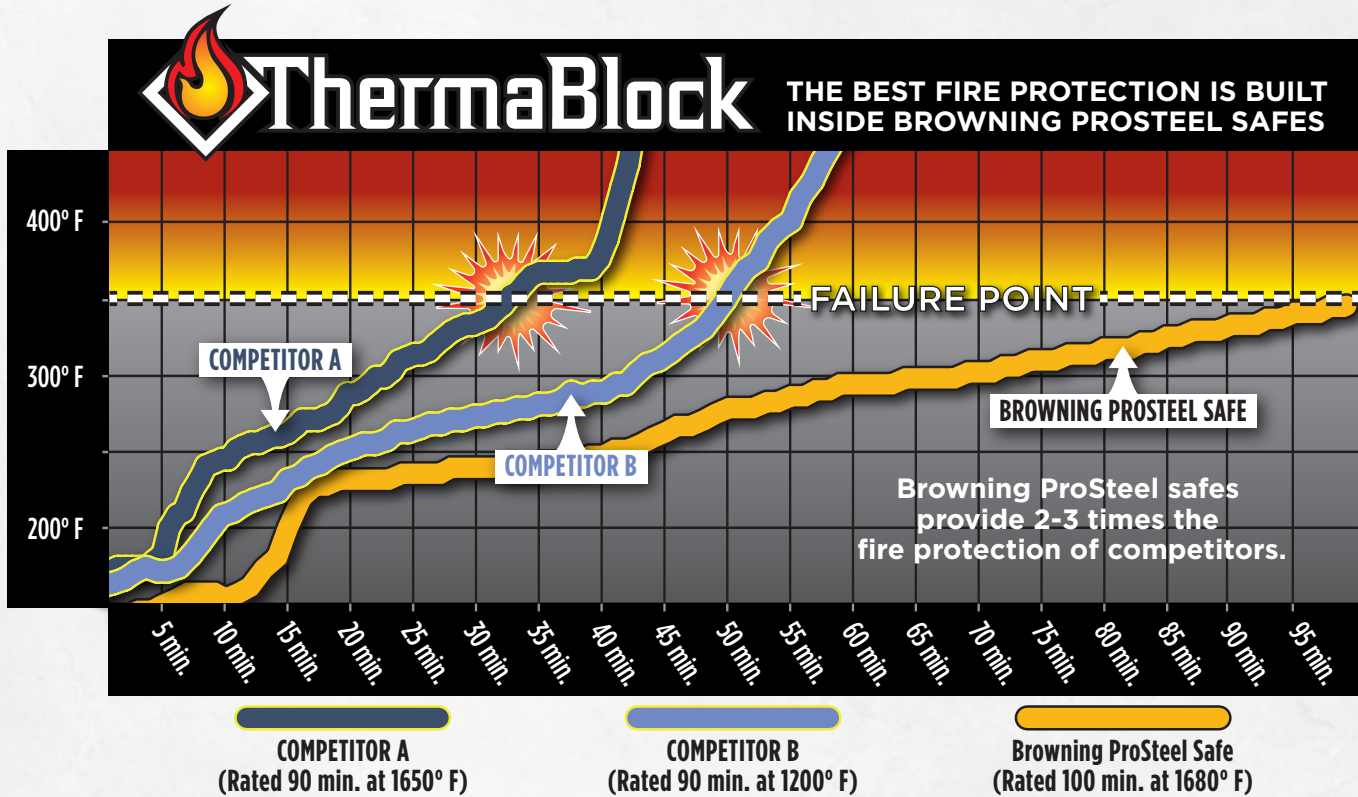

Our wide selection includes safes for nearly every need and budget. Get a Browning ProSteel safe today and put your mind at ease.

SAFES

2-3 TIMES THE FIRE PROTECTION.

We understand that fire protection is more than just adding insulation to a safe, other aspects of safe construction play crucial roles in the total fire protection package. Here, the little details add up to make or break the true fire protection a safe offers. The thickness of the steel used in the body is vital. Heavier gauge steel flexes less when heated, limiting distortion that lets heat in through gaps in broken welds and around the door frame. Speaking of welds, we continuously weld every seam — not merely spot weld like some of the competition — for added resistance to heat-related flex. Even the no-gap external door hinge design matters. All of these little touches add up to big gains in fire and heat resistance, and go a long way towards protecting your most valuable possessions.

This graph compares a Browning ProSteel safe with ThermaBlock and external hinges to a pair of comparable safes from leading competitors with internal hinges.

Browning ProSteel safe with 1-7/8" thick insulation after 100 minutes at 1680°.

Leading U.S. built competitor safe with 1-7/8" thick insulation after 90 minutes at 1680°.

EXTERNAL HINGES MATTER.

External hinges offer several advantages over the internal hinges found on other safes, most notably in fire protection. To accommodate an internal hinge, fire protection material must be removed where the hinges attach. In a fire, these two unprotected areas allow the internal temperature of a safe to rise faster, to a significantly higher temperature than a Browning ProSteel safe with no gaps in the fire insulation.

OUR EXTERNAL HINGES
External hinges eliminate gaps in the fire insulation to block heat from entering the safe.

COMPETITORS' INTERNAL HINGE
Internal hinges allow up to eight times more heat to radiate inside the safe through gaps in the fire insulation.

BE MORE SECURE WITH A BROWNING PROSTEEL SAFE.

Protecting your guns and valuables from theft is one of the driving decisions behind purchasing a safe. Browning ProSteel safes offer industry-leading security measures at every level to protect your valuables from criminals.

PRY-STOP CORNER BOLTS
Pry-Stop Corner Bolts (U.S. patent #8,276,527) provide better protection than other pry-defense designs. Innovative long locking bolts extend diagonally from a reinforced support at the corners of the door to protect against pry attack at the vulnerable corner areas.

PRY-STOP END BOLTS
Superior to other bolt designs which allow the locking bolt support bar to bend. Pry-Stop End Bolts are over two and one-half times longer and attach to a high-strength steel angle iron that prevents the locking bolt support bar from bending in a pry attack. The top and bottom locking bolts on the door side secure the critical door corners.

PRY-STOP TABS
Pry-Stop Tabs are pieces of angled steel added to the top and bottom bolts and inside of the safe door. These reinforcements work together to increase pry resistance.

OMNIBARRIER® LOCK PROTECTION SYSTEM
A carefully engineered structure of steel hard plate and steel components designed to protect the safe lock from drill, punch and push attacks.

DUO-FORMED DOOR
The best Browning ProSteel safe door is made from multiple layers of steel formed together to provide superior strength, pry resistance and attack protection. Full second panel for outstanding strength. The door face is 1-11/16" thick.

1" FORMED DOOR
The 1" Formed Door is engineered with a rugged steel face. Back and reinforcement panels provide excellent strength and attack protection compared to the competition.

REINFORCED DOOR FRAME
The door opening of the safe is strengthened by an integrated return flange to create added pry and attack resistance.

UNI-FORCE™ LOCKING SYSTEM
The finest Browning ProSteel safe locking mechanism uses robust cam locks and a large, multiple diversion bar system to prevent bolt or handle pressure from reaching the lock. Forces go to the cams and diversion bars, not the lock, for protection unmatched by other locking systems.

FORCE DEFLECTOR™ LOCKING SYSTEM
The Force Deflector Locking System (U.S. patent #7,665,405) prevents bolt or handle forces from reaching the lock by using a rotating cam device. It prevents energy transfer to the lock better than most systems used in the safe industry.

180° HEAVY DUTY HINGES
Rugged hinges allow the door to swing open 180° for unhindered access to the safe interior. Door locking bolts maintain security if the hinges are cut off. Fire protection is better than with internal hinges because insulation is not removed to accommodate the hinges.

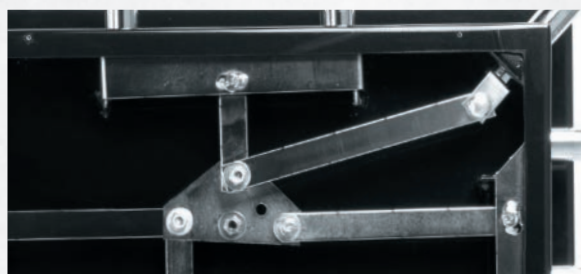

PRY-STOP END BOLTS

OMNIBARRIER® LOCK PROTECTION SYSTEM

PRY-STOP CORNER BOLTS

UNI-FORCE™ LOCKING SYSTEM

BETTER THAN THE REST.

Gun safes all look similar standing on a sales floor, but you won't find another that lives up to the high standards set by Browning. Our safes combine quality construction, proprietary technology and patented interior designs to elevate them above the rest. In addition to ground-breaking features, all Browning ProSteel safes carry the UL RSC (Underwriters Laboratories Residential Security Container) rating — the industry standard that defines a home security safe. The UL RSC rating ensures that a safe meets construction specifications and has passed a series of laboratory test attacks. Confidence in our product is what allows Browning and ProSteel to offer the best warranty in the gun safe industry — a lifetime warranty that covers attempted break in, break in, or fire. If one of our safes is involved in one of these situations and your homeowner's insurance policy does not cover the damage to the safe, ProSteel will repair or replace the safe. (Safe contents are not covered.)

THE BEST THERE IS FOR CONVENIENCE AND STORAGE SOLUTIONS.

A gun safe is more than total long gun capacity. Handguns, cameras, jewelry, documents, even laptops and external hard drives with thousands of digital memories should have a home inside. Browning ProSteel safes have the most versatile interiors in the industry, bar none.

ONE-OF-A-KIND AXIS ADJUSTABLE SHELVING

When it comes to maximizing safe interior storage, Browning ProSteel safes lead the industry with unmatched versatility. The exclusive Axis Adjustable Shelving (U.S. patent #D662341) is a completely customizable system with an array of shelves that can be configured to meet virtually every need. Unlike shelves in the competitors' safes that are either fixed in position or only offer vertical adjustment, Axis shelves can be adjusted up and down, side to side, added and removed to accommodate items over a broad range of sizes. Axis maximizes the interior storage of long guns, handguns and other valuables. Several different shelves and options are available to further customize the interior to meet specific needs. The Axis shelf is made from a single piece of sturdy steel. Shelves are clad in a soft, protective polymer coating that is highly durable and designed to protect guns and valuables. It also adds a sleek appearance to the safe interior. Axis accessories are designed to easily mount to the solid steel shelf or barrel rack. (Compatible with safes that feature Axis Adjustable Shelving built in 2013 or later. See page 134)

CANTILEVERED MODULAR SHELVING

Creative interior storage solutions don't end with Browning ProSteel Custom Collection models. Cantilevered Modular Shelving borrows essential components from the patented Axis Adjustable Shelving (U.S. patent #D662341) to retain much of the adjustability of the higher-end system. Like Axis, Cantilevered Modular shelves can be adjusted up and down, side to side, added and removed to fit a wide range of valuables. The shelves are wood covered in soft carpet and built upon a tough steel frame. Cantilevered Modular Shelving not only demolishes the competitors' offerings in similarly-priced gun safes, this versatile interior outclasses those in models costing thousands more.

UP TO 50% MORE LONG GUN STORAGE.

THE DPX ADVANTAGE

The patented DPX storage system (U.S. patent #7,409,790) is available exclusively on Browning ProSteel safes. This unequalled organizational tool allows long guns, handguns, shooting gear and more to be stored on the back of the safe door. The DPX gun rack creates as much as 50% more long gun capacity inside the safe, and makes the guns on the door easy to access. The Scope Saver increases storage and protects optics. DPX pouches and pockets hold valuables and gear where they are easy to find and free up shelf space for even more items.

CAPACITY COMPARISON	COMPETITOR'S SAFE 25-28 CUBIC FT. SAFE	BROWNING PROSTEEL SAFE 26 CUBIC FT. SAFE	RESULT
TOTAL GUN CAPACITY - HALF SHELF INTERIOR	12 Guns	18 Guns	50% More
TOTAL GUN CAPACITY - ALL GUN INTERIOR	24 Guns	29 Guns	21% More
FAST ACCESS GUNS - HALF SHELF INTERIOR	2 Guns	9 Guns	350% More
FAST ACCESS GUNS - ALL GUN INTERIOR	4 Guns	11 Guns	175% More

HOW DO BROWNING SAFES HOLD 50% MORE GUNS?

The long gun capacity is a series of three numbers, for example 11/22+7 for a 26 Cu. Ft. safe.

- The first number is the long gun capacity in the safe body with a Half Shelf interior (11 in the example).
- The second number is the long gun capacity in the safe body with an All Gun interior (22 in the example).
- The "plus" number is the long gun capacity on the back of the door (+7 in the example).
- Total capacity grows up to 50% in the Half Shelf configuration because there is a full rack of long guns on the door back.
- "Fast Access Guns" increase in both Half Shelf and All Gun configurations. These guns are defined as those that are on the front row of the safe body and the door gun rack and can be quickly accessed.

* Due to the varying sizes of firearms, actual gun capacity may vary.

THE QUICK ACCESS DPX BARREL RACK

Flexible polymer wings protect the barrel finish, secure the barrel in place and allow firearms to easily be pushed into or pulled from the rack. (U.S. patent #D643500)

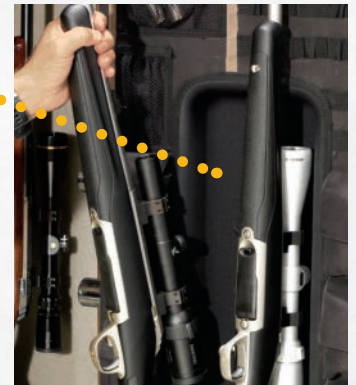

MESH POCKETS

See-through mesh pockets hold smaller items and make valuables fast and easy to visually locate.

DPX HANDGUN POUCHES

The military-style MOLLE system straps on the DPX panel allow handgun pouches and other MOLLE items to be placed virtually anywhere.

DPX SCOPE SAVER

Store long guns with optics on the DPX door rack with the Scope Saver. The recessed panel protects scopes and increases gun capacity.

PLATINUM PLUS SAFES

B

C

WHY STEP UP TO A PLATINUM PLUS SAFE?

Stepping up to a Platinum Plus model gives you the advantage of an exquisite Grade VI Cedar interior for a unique appearance. Thicker 3/16" (7-Gauge) steel adds additional mass and rigidity, while larger (1-1/2") locking bolts and four corner locking bolts offer greater security and protection. A superior ThermoBlock 1750°/120 minute fire rating keeps valuables protected longer. An Axis Drawer with Multipurpose Insert and File Box are included. Platinum Plus safes are made in the USA.

AXIS FILE BOX
Important documents may be irreplaceable and need to be easy to find. Keep track of them in the convenient File Box.

AXIS DRAWER AND MULTIPURPOSE INSERT
The Axis Drawer mounts beneath an Axis steel shelf and includes a Multipurpose Insert that keeps small items organized, easy to locate and protected.

GRADE VI INTERIOR/LED LIGHTING
A fragrant cedar interior adds a rich quality to the safe. Interior LED lighting along the door frame makes locating items inside the safe much easier.

ELECTRICAL OUTLET
The Electrical Outlet allows electrical accessories to be added without taking apart power cords.

MEDALLION SAFES

SECURITY 10-Gauge steel body • 1-11/16" Thick Duo-Formed® Door with full 10-Gauge inner plate • Uni-Force™ Locking System • OmniBarrier® Lock Protection System • Pry-Stop Corner Bolts • 1-1/4" diameter chromed locking bolts on all four sides of door (top/sides/bottom) **FIRE** ThermoBlock 1700° F/110 min. fire protection **APPEARANCE** Automotive grade gloss or rugged textured finish • Pinstripping and choice of graphic • Five-spoke handle in choice of finishes • Beige fabric interior **CONVENIENCE** Premium DPX Storage System with Quick Access Barrel Rack and Scope Saver • Axis Adjustable Steel Shelving with Pistol Rack included • Elevated floor protects gun stocks • Electrical Outlet • Interior Light Package

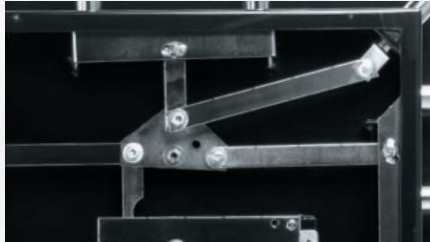

WHY STEP UP TO A MEDALLION SAFE?

Stepping up to a Medallion safe buys extra security with Pry-Stop Corner Bolts, Uni-Force™ Locking System and OmniBarrier® Lock Protection System. Thicker steel (10-Gauge vs. 11-Gauge) means less flex. A higher fire rating (ThermaBlock 1700°/110 min. vs. 1680°/100 min.) is also a benefit. Medallion safes are made in the USA.

INTERIOR LIGHT PACKAGE
LED lighting adds even more value to the Medallion Series. A sensor turns on the lights when the door is opened.

UNI-FORCE LOCKING SYSTEM
Robust cam locks and a multiple diversion bar system divert pressure from reaching the lock.

OMNIBARRIER LOCK PROTECTION
Steel hard plate surrounds the lock and protects it from drill, punch and push attacks.

ELECTRICAL OUTLET
The Electrical Outlet allows electrical accessories to be added without taking apart power cords.

PRY-STOP CORNER BOLTS
Innovative long bolts extend diagonally from the corners of the door to protect against pry attack at the vulnerable corner areas.

WHY STEP UP TO A SILVER SAFE?

Stepping up to the Silver safe provides you with an elegant Five Spoke handle along with a full selection of finishes, colors and options to select from. Security is heightened thanks to the Duo-Formed door which features a full 10-Gauge inner plate. A higher fire rating (ThermaBlock 1680°/100 min. vs. 1680°/90 min.) and locking bolts on all four sides of the door improve protection from disaster. An Interior Light Package is included. Silver safes are made in the USA.

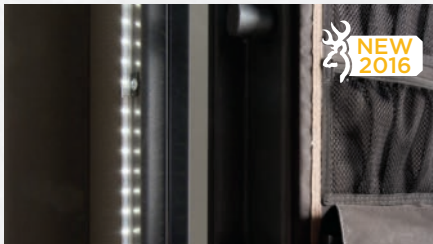

DPX SCOPE SAVER

Store long guns with optics on the DPX door rack with the Scope Saver. The recessed panel protects scopes and increases gun capacity.

AXIS ADJUSTABLE SHELVING

Multiple shelf styles are available and can be moved to allow small and large items to fit in the safe taking up minimum space.

NEW INTERIOR LIGHT PACKAGE INCLUDED

ELECTRICAL OUTLET

The Electrical Outlet allows accessories to be added without taking apart power cords.

EXTRA CAPACITY.

Big gun collections need... you guessed it, a big safe. Add in a lifetime of other treasures and a safe will fill up fast. Browning ProSteel Extra Wide models have the space to secure more of whatever you need to load into one.

B

CANTILEVERED MODULAR SHELVING
Quickly and easily adjust the shelving to meet individual storage needs. Barrel racks can be adjusted at various heights to accommodate long guns, as well as shorter carbine models. The cantilevered design eliminates the need for a vertical shelf support to add extra interior space.

A

A

B

WHY STEP UP TO A HUNTER SAFE?

Stepping up to a Hunter safe adds a heavy 11-Gauge steel body and larger diameter locking bolts for greater security. A ThermaBlock 1680° F/90 min. rating elevates fire protection. Axis Adjustable Shelving adds convenience. These safes are made in the USA.

THE QUICK ACCESS DPX BARREL RACK
Flexible polymer wings protect the barrel finish, secure the barrel in place and allow firearms to easily be pushed into or pulled from the rack. (U.S. patent #D643500)

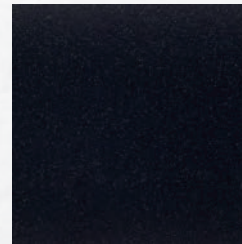

DPX SCOPE SAVER
Store long guns with optics on the DPX door rack with the Scope Saver. The recessed panel protects scopes and increases gun capacity.

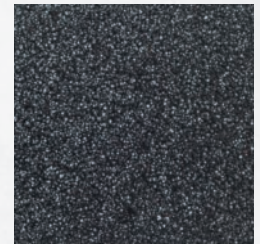

MESH POCKETS
See-through mesh pockets hold smaller items and make contents fast and easy to visually locate.

AXIS ADJUSTABLE SHELVING
Multiple shelf styles are available and can be moved to allow small and large items to fit in the safe taking up minimal space.

C

D

OUT OF SIGHT
The HW16 features trim dimensions that make it ideal for placing into a closet to keep the safe hidden from curious eyes.

WHY STEP UP TO A HEAVYWEIGHT SAFE?

Stepping up to a Heavyweight safe adds a tough 11-Gauge steel body and Pry-Stop End Bolts for improved break-in protection. The excellent 1550° F/80 min. fire rating offers additional protection. A full DPX door storage rack adds storage for valuables, handguns and long guns, while improving access to more long guns. Black chrome hardware adds a rugged appearance.

QUICK ACCESS RACK

Flexible polymer wings secure the barrel and allow firearms to easily be pushed into or pulled from the rack.

PRY-STOP END BOLTS

More than two and one-half times longer than door bolts, they attach to angle iron which prevents the locking bolt support bar from bending in a pry attack. The top and bottom locking bolts on the door secure the critical door corners.

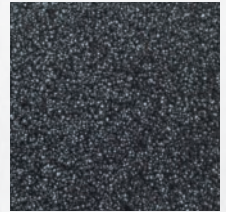

CANTILEVERED MODULAR SHELVING

Quickly and easily adjust the shelving to meet individual storage needs. Barrel racks can be adjusted at various heights to accommodate long guns, as well as shorter carbine models. The cantilevered design eliminates the need for a vertical shelf support to add extra interior space.

WHY CHOOSE A SPORTER SAFE?

Sporter safes offer the quality, security and fire protection features expected from a Browning ProSteel gun safe at a price that is next to impossible to beat. The 1400° F/60 minute fire protection rating affords additional peace of mind. The Cantilevered Modular Interior and DPX door storage provide the most versatile interior found in a safe at this price — and above.

MATTE BLACK

AXIS ADJUSTABLE SHELVING

Multiple shelf styles are available and can be moved to allow small and large items to fit in the safe using the minimum amount of space. Individual shelves can be adjusted to accommodate modern sporting rifles, carbines and shotguns.

EXTERIOR GEAR LOFT

Tactical and hunting gear can be stored within easy reach on top of the safe in the semi enclosed Gear Loft.

AXIS PISTOL RACK

With a five handgun capacity, the pistol rack stores the pistols under the shelf, leaving the shelf available for possessions and gear.

CARBINE BARREL LOOPS

Lower mounted barrel loops secure shorter rifles and shotguns to the DPX door panel.

D

E

MATTE BLACK

CANTILEVERED MODULAR SHELVING
Quickly and easily adjust the shelving to meet individual storage needs. Barrel racks can be adjusted at various heights to accommodate long guns, as well as shorter carbine models. The cantilevered design eliminates the need for a vertical shelf support to add extra interior space.

DPX STORAGE SYSTEM
Includes a rack on the back of the door to store long guns and make them easier to access. Pouches and pockets help organize other valuables.

CARBINE BARREL LOOPS
Lower mounted barrel loops secure shorter rifles and shotguns to the DPX door panel.

Select Series safes are available exclusively from Browning Full Line and Medallion Dealers.

WHY CHOOSE A SELECT SAFE?

A Select safe offers added security with Pry-Stop End Bolts and a big increase in convenience and capacity thanks to the Quick Access Rack with Scope Saver and full DPX Storage System. The factory-installed LED Interior Light package makes locating items inside the safe easy.

CANTILEVERED MODULAR SHELVING

Quickly and easily adjust the shelving to meet individual storage needs. Barrel racks can be adjusted at various heights to accommodate long guns, as well as shorter carbine models. The cantilevered design eliminates the need for a vertical shelf support to add extra interior space.

PRY-STOP END BOLTS

More than two and one-half times longer than standard door bolts, they attach to angle iron which prevents the locking bolt support bar from bending in a pry attack. The top and bottom locking bolts on the door side secure the critical door corners.

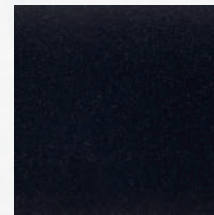

LED INTERIOR LIGHT PACKAGE

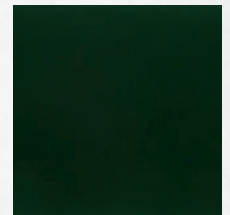

LED lighting around the door frame adds value and makes locating items in the safe easier. A pressure sensor turns on the lights when the door is opened.

TOUGH, SAFE-LIKE SECURITY.

Whether keeping a handgun available for instant protection from bad guys or keeping valuables secure, trust a Browning ProSteel pistol vault. These feature-packed vaults have steel walls that are twice the thickness of most competitors and include safe-like security measures for superior protection from break in.

PISTOL VAULT FEATURES AND BENEFITS

ELECTRONIC 4-BUTTON TOUCH PAD

Easily program a personal code to offer ready access to handguns and small valuables. Uses eight AA batteries. (Not included.)

PICK AND PLUCK FOAM

A pick and pluck foam insert allows the pistol vault to be customized to fit firearms and other valuables. This feature is especially handy if the pistol vault is mounted in a vehicle.

LED LIGHTING

Bright LED lighting illuminates the interior, making it easy to locate the pistol vault's contents at night or in a closet.

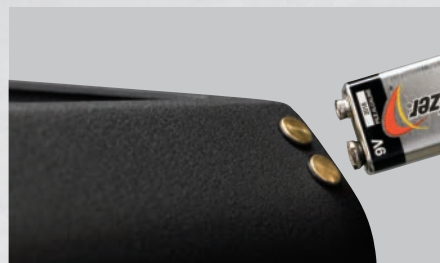

LOCKING BOLTS

A pair of tough 1/2" diameter locking bolts secure the lid.

MANUAL KEY LOCK

Batteries go out? Forget the code? No problem. The pistol vault can still be accessed using the unique four-sided key.

EXTERNAL ELECTRICAL CONTACTS

Should the batteries fail or if the key is lost, pistol vaults include external electrical contacts that power the touch pad. (9V back up battery not included.)

BIOMETRIC PAD

Grants instant access with the touch of a fingertip.

EXCLUSIVE, CUSTOMIZABLE, ADJUSTABLE SHELVING.

When it comes to maximizing safe interior storage, Browning ProSteel safes lead the industry with unmatched versatility. The exclusive Axis Adjustable Shelving (U.S. patent #D662341) uses an array of shelves that can be configured to meet virtually any need imaginable.

AXIS BOW HANGER
Lock up and protect expensive archery equipment while taking up minimal space.

AXIS SCOPED PISTOL RACK
With a deeper drop and heavy-gauge rods, handguns with optics are easier to store.

AXIS VERTICAL FILE HOLDER
This file holder makes it easier to locate and organize important documents.

AXIS DEEP DRAWER
The Deep Drawer is the perfect home for larger or odd shaped items.

AXIS HIGH CAPACITY BARREL RACK
Make room for more long guns with this high capacity barrel rack.

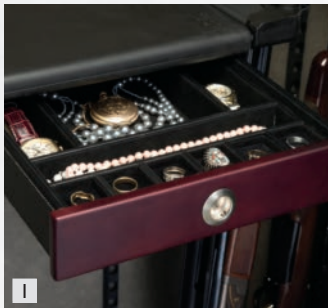

AXIS PISTOL RACK
With a five handgun capacity, the pistol rack stores the pistols under the shelf, leaving the shelf available for possessions and gear.

AXIS BARREL RACK
With 11 slots for long guns, the barrel rack can be raised or lowered to accommodate rifles, shotguns, carbines and modern sporting rifles.

AXIS STEEL SHELF
The most basic shelf is made from tough steel with a protective polymer skin that protects valuables and handguns.

AXIS DRAWER WITH JEWELRY INSERT
This insert protects and organizes valuables such as watches, rings, bracelets and necklaces.

AXIS DRAWER WITH FOAM INSERT
Isolate your most prized possessions from potential damage. Pick and pluck foam is easily customized to fit any shape item.

AXIS DRAWER WITH MULTIPURPOSE INSERT
Keep delicate jewelry and other small items organized, protected and easy to find.

AXIS DRAWER WITH MONEY/PASSPORT INSERT
Compartments are sized to organize cash, passports and other documentation.

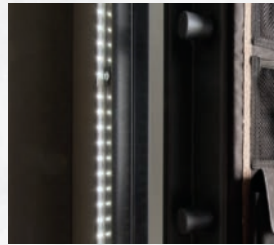

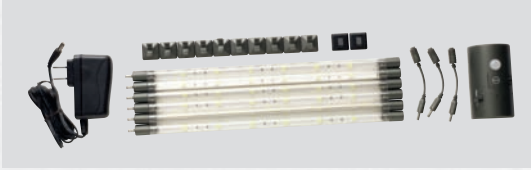

AXIS DRAWER
The sturdy drawer is perfect for all sorts of goods that need to be separated.

AXIS FILE BOX
Important documents may be irreplaceable or valuable or both. Keep them easy to find in this handy file box.

LED SAFE LIGHTING KIT

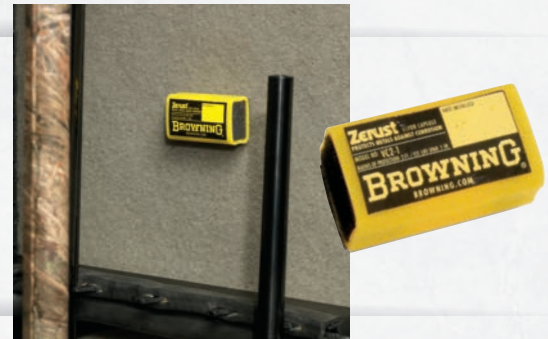

The LED Safe Lighting Kit is the best aftermarket lighting solution available today • The expandable, linear design places bright, long-lasting LED lighting anywhere in the safe • A motion sensor turns on the lights when the door opens and automatically shuts them off after 30 or 60 seconds with no motion or when the door closes • Each kit comes complete with six LED light tubes with six LEDs per tube, three flexible connectors, mounting clips with hook and loop tape, A/C adaptor and a motion sensor power module

CODE NUMBER	SUGGESTED RETAIL
164112	70.00

ZERUST VCI PROTECTANT

Small capsule emits an invisible vapor that forms a corrosion- and rust-resistant barrier on metal surfaces • Volatile Corrosion Inhibitors (VCIs) have been used for years to protect metal parts in industrial and commercial applications • One capsule protects a standard 30" wide safe for one year

CODE NUMBER	SUGGESTED RETAIL
154011	8.00

A

B

C

DPX ACCESSORIES

Take full advantage of the DPX storage system with these accessories • Store more guns without taking up shelf space with DPX Handgun Pouches (sold in sets of two) • Store shorter firearms and make them easily accessible with DPX barrel loops and DPX stock risers

	DESCRIPTION	CODE NUMBER	SUGGESTED RETAIL

B	4-Gun	164134	20.00

A

B

VCI GUN SOCK

VCI (Vapor Corrosion Inhibitor) penetrates into the smallest crevices and drives out moisture where oils cannot reach • Provides full protection by forming a vapor enclosure around the firearm from muzzle to butt • Gives additional protection to all metal items in an enclosed area such as a gun safe or cabinet • Drawstring closure • Fits rifles and shotguns 48" to 56"

CODE NUMBER	SUGGESTED RETAIL
149985	18.00

DRY-ZONE MOISTURE REDUCER

Absorbs moisture without electricity, and is rechargeable in an oven • Can be reactivated indefinitely • One 500-gram box protects up to 37 cubic feet of enclosed space, about the volume of a standard 30" wide safe

CODE NUMBER	SUGGESTED RETAIL
154001	20.00

EVERDRY ELECTRIC DEHUMIDIFIER

The EverDry Electric Dehumidifier removes humidity from the interior of a safe and protects against rust • The 18" long EverDry should be used on safes 30" wide and larger • Cord is removable for installation

CODE NUMBER	SUGGESTED RETAIL
164128	30.00

FLEXIBLE EVERDRY DEHUMIDIFIER

The Flexible EverDry is flat and easily bends • Takes up less space and makes installation easier, especially in small safes • Removes humidity from the interior of a safe and protects against rust • Plug is removable for installation • LED indicates unit is operating

TRADITIONAL, TASTEFUL PROTECTION FOR EVERY CLASSIC BROWNING.

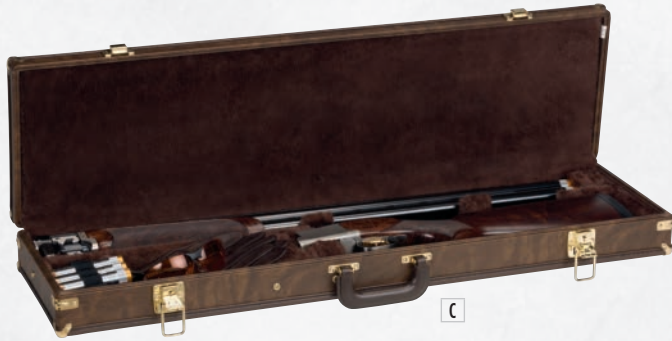

A Browning fitted case speaks eloquently of great traditions and good taste, being constructed of solid wood with brass fittings and the look of aged leather. These cases create the perfect backdrop for showing off a fine Browning firearm. Fitted gun cases provide a place for everything from choke tubes to shooting gloves and are designed to provide decades of tasteful protection for the valuable and classic Browning nested within.

LET'S SLIP THAT FINE BROWNING INTO SOME EXTRA PROTECTION.

Every valuable Browning firearm needs protection from moisture as well as the everyday bumps and scuffs that are part of moving guns into and out of a gun safe or gun rack. Browning VCI Gun Socks are designed to provide that extra layer of protection to keep your favorite Browning looking good for years to come.

VCI GUN SOCK

Vapor Corrosion Inhibitor (VCI) penetrates into the smallest crevices and drives out moisture where oils cannot reach • Provides full protection by forming a vapor enclosure around the firearm from muzzle to butt • Gives additional protection to all metal items in an enclosed area such as a gun safe or cabinet • One- or two-piece models to fit most firearms • Drawstring closure • Fits rifles and shotguns 48" to 56" • Firearms shown not included

The Alfa Tactical Gear Bag instantly converts from a well-balanced hand duffel to a rugged double strap backpack for longer treks across the range with heavier loads.

The Alfa Tactical Gear Bag provides loads of room for guns, ammo and accessories. The wide opening offers quick and easy access to everything inside.

The Alfa Tactical Gear Bag's hidden pistol pocket allows discrete transportation and storage (plus instant access) to a lawfully-carried concealed handgun.

129104	84.99

MOA UTILITY SHOOTING REST

Ballistic nylon construction • Rubberized top and bottom to hold both gun and bag in place while shooting • Polymer pellet fill allows for easy repositioning and provides a solid rest • Perfect for sighting-in rifles or handguns or when patterning shotguns

CODE NUMBER	SUGGESTED RETAIL
129101	44.99

MOA TWO-PIECE SHOOTING REST

Ballistic nylon construction • Rubberized top and bottom to hold both gun and bag in place while shooting • Polymer pellet fill allows for easy repositioning and provides a solid rest • D-ring and snap hook keep bags together while storing • Heel/toe design provides stable shooting platform

CODE NUMBER	SUGGESTED RETAIL
129100	54.99

MOA WINDOW MOUNT

Ballistic nylon construction • Rubberized top and bottom to hold both gun and bag in place while shooting • Polymer pellet fill allows for easy repositioning and provides a solid rest • Polymer filled wings provide a stable position in a shooting house window or over treestand frames • V-frame rest provides a solid platform to support firearm without lateral movement

CODE NUMBER	SUGGESTED RETAIL
129103	44.99

FLEX FOAM CARTRIDGE CASES

Molded Flex Foam is lightweight and durable • Holds eight or 10 centerfire rifle cartridges ready for easy access • Secure elastic cord or hook and loop closure
 • Triple stitched nylon webbed belt loop for easy carry on belt or pack strap
 • Cartridges are not included

	DESCRIPTION	CODE NUMBER	SUGGESTED RETAIL
A	8 Cartridge Case	12180	34.99
B	10 Cartridge Carrier	12191	

LEATHER CARTRIDGE CASES

CRAZY HORSE CARTRIDGE CASE Distressed Crazy Horse leather construction with full edge stitching
LEATHER CARTRIDGE CASE Top-grain leather construction with full edge stitching • Both are folding designs holding 10 centerfire rifle cartridges for easy, quick access • Brass snaps • Belt loops
 • Cartridges are not included

INTEGRATED SCOPE MOUNT SYSTEM

Browning's Integrated Scope Mount System unitizes the ring and base into a single, ultra-rigid unit. Machined from 7000 series aluminum alloy, they eliminate alignment problems and the possibility of a loose connection between the base and ring. They are available in .400" Standard height, .500" Intermediate height and .600" High height versions to fit many popular Browning firearms.

T-BOLT

HEIGHT	SCOPE DIAMETER Inches	FINISH	CODE NUMBER	SUGGESTED RETAIL
Standard	1	Matte	12338	69.99

The height is determined by measuring from the top of the base to the bottom of the scope ring. Barrel contour, optic size and preferred eye relief all affect the fit of the scope on a rifle.

STANDARD HEIGHT (.300")
For scopes with an objective up to 44mm and a standard barrel contour.

INTERMEDIATE HEIGHT (.400")
For scopes with an objective up to 50mm and a standard barrel contour.

HIGH HEIGHT (.500")
For scopes with an objective up to 56mm and a standard barrel contour.

SCOPE BASES

Browning scope bases are machined from solid steel • Double recoil shoulder design holds rings securely, even under magnum recoil • T-Bolt two-piece and SA-22 one-piece bases are alloy and are only compatible with Browning rimfire rings (Code 12365) • These bases are only compatible with Browning scope rings listed at right • Maxus, Gold, Silver, BPS, Buck Mark two-piece bases and BLR Takedown one-piece bases are Weaver-style and not compatible with Browning rings.

FINE TUNE FOR FULL POWER ACCURACY WITH THE BROWNING BOSS.

When you're trying to wring maximum accuracy out of your rifle, often your only choices are to find a factory load that gives acceptable accuracy or to experiment with custom handloads that give great accuracy, but often at the cost of less than maximum velocity. Both are expensive and time consuming endeavors. But if you use the Browning BOSS you can pick the right ammo for your hunt or long-range match and simply dial up maximum accuracy without sacrificing maximum velocity for greater downrange stopping power and improved bullet stability.

BOSS-CR ACCESSORY

The BOSS-CR accessory offers all the accuracy and tunable advantages of the original BOSS device without the muzzle brake feature. By simply replacing the original BOSS forward weight and recoil reduction components with the one-piece, non-ported BOSS-CR accessory, only the reduced recoil of the original BOSS is sacrificed. The BOSS-CR accessory is designed to fit only BAR Mark II and A-Bolt centerfire rifles previously factory-fitted with the BOSS. **GLOSS BLUED** for BAR Safari; A-Bolt models: Medallion and Gold Medallion **MATTE BLUED** for A-Bolt models: Composite Stalker, Hunter, Euro-Bolt, Varmint, Eclipse Hunter and M-1000 Eclipse **STAINLESS** for A-Bolt models: Stainless Stalker, White Gold Medallion and M-1000 Eclipse **IT IS IMPORTANT THAT THE CORRECT BOSS-CR BE SELECTED FOR A SPECIFIC CALIBER AND MODEL OF RIFLE.**

DON'T CHOKE UP WHEN SELECTING THE RIGHT CHOKE TUBE.

You know that the right choke tube constriction for a specific hunting situation or challenging target presentation is the key to making a successful shot. This information will help you make the best choice from the wide selection of Browning choke tubes. Our tubes range from Extra-Full constrictions for turkey, coyote and goose hunters to pattern-spreading Timber n' Teal tubes for close-in flooded timber waterfowling. Remember that every Browning choke tube is made to exacting standards to provide you with a perfect, dense and even shot pattern and many years of dependable service.

INVECTOR-DS

INVECTOR-DS CHOKE SYSTEM

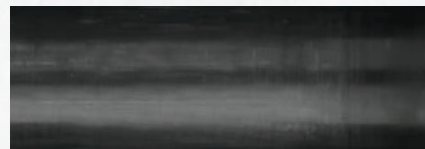

- Invector-DS choke tubes combine muzzle-end threads and thin-wall construction for a longer, more gradual taper that produces extremely consistent, dense shot patterns that tighten consistently in reliable, evenly scaled steps.
- Muzzle threads minimize the flare at the end of the barrel for improved appearance, a faster swing and improved balance.
- A proprietary differential-banded brass seal compresses against the barrel wall when tightened to keep the choke tube threads clean and make installation and removal easier than any other muzzle thread system.
- Invector-DS is standard on A5 and Citori 725 models.
- View the full line of Invector-DS choke tubes on pages 175 and 177.

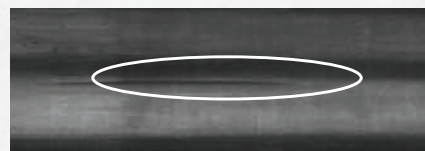

INVECTOR-Plus™

INVECTOR-PLUS CHOKE SYSTEM

- The Invector-Plus interchangeable choke tube system works with Vector Pro and back-boring to offer consistent, dense shot patterns.
- The longer choke taper inside an Invector-Plus choke tube produces consistent patterns and is far more durable than choke systems in competitors' guns, especially with steel shot.
- Invector-Plus eliminates gases slipping between the choke tube and barrel that could damage the choke tube and the barrel.
- Invector-Plus is standard on 12 and 20 gauge Maxus, Citori, Cynergy, Silver, BPS and BT-99 models.
- See pages 175 through 179 for a complete listing of choke tubes and choke tube wrenches.

Browning's Invector choke tube is still flawless after 500 rounds of steel shot.

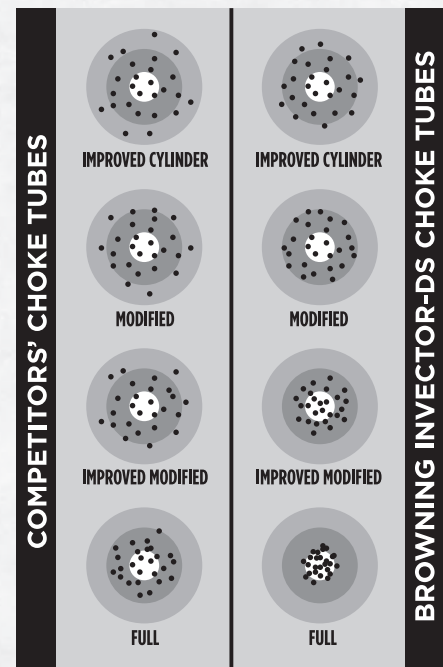

The competitor's choke tube is grooved and pitted after shooting 500 rounds of steel shot.

STANDARD INVECTOR™

STANDARD INVECTOR

- The Standard Invector interchangeable choke tube system is for Browning's non back-bored barrels and offers consistent, dense shot patterns. It's far more durable than the choke systems found in competitors' guns, especially with steel shot.
- Standard Invector eliminates gases slipping between the choke tube and barrel that could damage the choke tube and the barrel and it's standard on 10, 16 and 28 gauge, and .410 bore Citori, Cynergy, Gold and BPS models.
- See pages 175 through 179 for a complete listing of choke tubes and choke tube wrenches.

INVECTOR-DS CHOKE TUBES VS. COMPETITORS' CHOKE TUBES

Invector-DS tubes have even pattern percentage increments, offering just the right pattern for any shooting situation.

Competitors' choke tubes show little pattern difference between choke constrictions.

INVECTOR-DS EXTENDED CHOKE TUBES

Extended length tubes are easy to change and add approximately 3/4" to the overall length of the barrel • Proprietary differential banded brass gas seal eliminates residue build up and makes chokes easy to remove and install • Integrated spring suspension holds the seal tight, yet allows expansion against the barrel wall for a perfect fit and a smooth transition for shot column entering choke • Gas is controlled at the interface between choke and where it seats in the bore • From Skeet to Full choke, patterns tighten consistently and reliably • Choke tube wrenches are listed on page 179 • Flat choke tube wrench is not compatible with Invector-DS choke tubes

INVECTOR-DS

INVECTOR-DS FLUSH CHOKE TUBES

Standard tubes fit flush with the end of the barrel but are longer than competitors' tubes • Proprietary differential banded brass gas seal eliminates residue build up and makes chokes easy to remove and install • Integrated spring suspension holds the seal tight, yet allows expansion against the barrel wall for a perfect fit and a smooth transition for shot column entering choke • Gas is controlled at the interface between choke and where it seats in the bore • From Skeet to Full choke, patterns tighten consistently and reliably • Choke tube wrenches are listed on page 179 • Flat choke tube wrench is not compatible with Invector-DS choke tubes

**THE SHARPEST DESIGNS
COME FROM BROWNING.**

2016's eye-catching examples of the bladesmithing arts are among the finest and most unique that we have ever offered. It's what makes the Browning brand so highly regarded by everyone from the world's most demanding bladesmen to the casual weekend outdoorsman.

Some people will want to own these jewel-like examples for the pure enjoyment of their tasteful design, craftsmanship and quality. Others will want to add them to a growing knife collection. And some need them for their rugged utility as they travel far afield, riding the high range with confidence because they carry a genuine Browning knife on their belt.

Wherever you may roam, you'll want a trusted Browning blade along for the ride. You know that they are knives that will be treasured, enjoyed, and in due time, passed along to the next generation. Because you know that Browning's timeless blades are a cut above the rest.

KNIVES

SPEND SOME OVERTIME IN HELL'S CANYON.

Balance, heft and a smooth sweeping cut are what you can expect from the new Browning Overtime. Laminated G-10 scales offer just enough texture for a firm grip to transmit your precise movements to the high-carbon-steel blade as you cape out and skin game. And the new Hell's Canyon Speed makes quick work of any hellacious cutting chore. When it says Browning on the blade you know it's The Best There Is.

EXPLORING THE ROAD TO DAMASCUS STEEL.

Like the stripes of a wild animal, the laminated bands of a genuine Damascus blade ripple and shimmer in the sunlight, giving true delight to the knowledgeable eye. Produced by hot-forging and folding layer upon layer of high-quality steel, each Damascus blade becomes a unique expression of the knifemaker's art.

**BRILLIANT IDEAS
FROM BROWNING.**

The old hunter's adage "You can't hit what you can't see" also applies to any type of outdoor task that takes place in the gloom of night. From changing a flat tire on a lonely roadside to finding that downed buck just as evening closes in, having a reliable light is often the difference between your hunt being a great success or a total failure, or between having a memorable outing or a truly miserable experience.

Make sure that you have reliable, powerful and affordable Browning flashlights and headlamps readily at hand. A Browning light should be part of your everyday carry (EDC) gear and be standard equipment in your backpack, glove box or purse.

LIGHTS

HOW TO PICK THE RIGHT BROWNING LIGHT

Browning leads the industry in portable battery-powered lighting for hunters and shooters with more than 40 styles in our product line. Here are some bright ideas on picking the best light for your needs.

SIZE, WEIGHT AND POWER

When choosing a light, smaller, brighter and lighter are better. Today's high-output LEDs are so powerful and efficient they achieve the same light output as the old multi-cell C and D lights. The super bright Alpha and Alpha Max flashlights use a single AA battery yet are not much bigger than a shotgun shell.

LED VS. XENON BULBS

LEDs are preferred over Xenon bulbs for most uses, thus all our lights are now LED designs. LEDs use batteries more efficiently, illuminate at greater distances, emit a clean, even beam and will never burn out under normal use. Like most technology, LEDs keep getting better every year. For 2016 many of our lights offer upgraded LEDs with 15% - 300% more output.

HAND-HELD OR HANDS-FREE

Headlamps and cap lights allow the use of both hands for tasks like dressing a deer, fixing a truck or finding a path through the woods. Modern technology makes many headlamps as powerful as larger hand-held flashlights. The MicroBlast headlamp can be worn either as a headlamp, clipped to a shirt pocket or to the brim of a hat.

LONG RUN TIME

By using advanced digital circuitry, highly efficient LEDs and low-resistance switches, we are able to offer extra long run times on many lights. Most Tactical Hunter lights will run for 20-48 hours on the low setting. The High Noon 4C spotlight will run for 4 days at the low setting. These extended run times could be the difference between getting home safely and spending a night in the woods.

WATERPROOF AND SUBMERSIBLE

Because the great outdoors doesn't always have great weather, we have redesigned most flashlights to be waterproof and submersible to 3 feet for 30 minutes (ANSI IPX7). Most of our other lights are O-ring sealed for greater water resistance (IPX4). The High Noon LED spotlight is submersible and it floats.

BATTERIES

Lithium batteries are used in many of our highest-performing lights, such as Blackout and Nitro. Lithium batteries pack twice the power of alkaline batteries for their weight, and operate well at very cold temperatures. Other lights in the line use AA and AAA alkaline batteries because they cost less than lithium and are readily available anywhere in the world. The latest integrated circuit designs in the Browning Alpha and Crossire flashlights allow alkaline batteries to approach the performance of lithium batteries. The latest Lithium Ion (Li-ion) rechargeable batteries in Alpha Max A-TACS AU and FG offer high energy density with no memory effect and minimal power loss during storage.

SWITCH SETTINGS

Multiple switch settings (high, low and in-between) help preserve battery life and allow selection of colors and flashing options. The lock-out switches found on most of our lights keep the light from accidentally turning on in a pack or pocket. A disorienting fast strobe setting is now available on many of our lights, and it has proven useful for self-protection and for signalling during an emergency.

RED, GREEN AND BLUE

Colored LEDs help preserve night vision and are great for map reading. They are less obvious than white light to many types of game animals.

FL-1 FLASHLIGHT PERFORMANCE STANDARDS

We proudly participate in the FL-1 flashlight performance standards for measuring and stating performance claims for all portable lights. This includes Brightness (Lumens), Distance, Run Time, Water Resistance and Impact Resistance. FL-1 provides the only reliable apples-to-apples comparison between models and is used by most major manufacturers. Look for these FL-1 symbols on our light packaging.*

*On lights with multiple settings, the lumens, battery life and distances are stated at the highest setting (100% power), unless indicated otherwise.

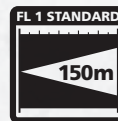

LUMENS = BRIGHTNESS

The output of a traditional 2D cell flashlight is approximately 15 - 20 lumens. The latest LED flashlights can have an output of more than 2000 lumens.

BATTERY LIFE

Battery Life (Run Time) is defined as the time elapsed from when the batteries are new to when the light reaches 10% of the original brightness.

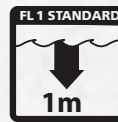

MAXIMUM DISTANCE

Maximum Distance is calculated as the distance from the light source to where it decreases in brightness to 0.25 lux — about the brightness of the full moon on a clear night.

WATER RESISTANCE

Water Resistance (FL-1 Standard IPX4) is tested by spraying water onto the light from multiple directions. This simulates a heavy, all-day rain.

WATERPROOF AND SUBMERSIBLE

Waterproof and Submersible (FL-1 Standard IPX7) assures water cannot get inside the light. This test is conducted for 30 minutes at a water depth of 1 meter (about 39").

IMPACT RESISTANCE

Impact Resistance (FL-1 Standard IM) measures how well the light resists damage when dropped repeatedly from a height of 1 meter (about 39") onto concrete.

IT'S NOT JUST A LIGHT. IT'S THE BROWNING LIGHTING SYSTEM.

Our lights are designed from the ground up to be the most robust and efficient lights on the market. You can choose from a basic flashlight or move up the line to higher-performance lights with expanded lighting capabilities. From small everyday pocket flashlights and headlamps to rail-mounted gun lights and high-output units capable of throwing a blinding beam for hundreds of yards, Browning is the brilliant brand you should always have in your pocket, pack or purse.

MULTIPLE MODE CAPABILITY

- Most of our lights offer a choice of continuous full output, continuous low-output and a rapid strobe mode. Many models also offer multi-color LEDs for specialized tasks and to extend run times for many hours or even days.

MIL-STD 1913 RAIL MOUNT AND REMOTE CABLE SWITCH ENDCAP ACCESSORIES

- Allows many models of our flashlights to be easily attached to any MIL-STD 1913 Picatinny accessory rail that are found on modern sporting rifles, pistols and shotguns.
- Many of our flashlights also accept a remote cable switch endcap accessory that allows the user to activate the light while it is mounted on a long gun.
- The remote switchpad itself may be located on the pistol grip or forearm of a long gun with the included mounting hardware.

PUSH-BUTTON TAILCAP SWITCHES

- The multi-mode push-button tailcap switches allow partial depression giving the user a quick flash for search or identification plus a full depression click to provide a continuous beam for task illumination.
- The textured rubber-covered switch prevents finger slippage during activation.
- The rotating tailcap lock-out prevents accidental activation in a pocket or pack, and a quick twist enables the light.

RUGGED TRAVEL AND STORAGE CASES

- Some of our lights come packaged in rugged polymer cases that provide room for the light and all the necessary power cords, adaptors and other accessories.

INTERCHANGEABLE METAL FRONT BEZEL RINGS

- Several of our lights allow the users to select a smooth bezel for comfortable pocket carry or a strike bezel for self-defense.

MULTIPLE POWER SOURCE CAPABILITY

- Several of our lights utilize the latest generation Lithium Ion (Li-ion) batteries that provide exceptional power density for their size, along with fast recharge times and no memory effect.
- We also have some models that allow battery charging from a standard 110 VAC household wall outlet, a 12 VDC automotive or marine outlet or even a USB port on a laptop or home computer. Users can even recharge from optional portable solar panels that are becoming popular with wilderness adventurers.

INTERCHANGEABLE REAR GLASS-BREAKER POINT

- Many of our tactical lights are equipped with a hardened metal point on the rear bezel that allows the user to break window glass to make an emergency escape from a vehicle or from any glass-enclosed environment.

REMOVABLE ANTI-ROLL METAL FINGER RING

- Several of our flashlights are equipped with a metal anti-roll finger ring to prevent the light from rolling on a sloped surface, and allows the operator to use the "syringe" technique with a defensive handgun.

FL-1 1-METER WATERPROOF CERTIFICATION

- The majority of our lights are certified to meet the latest international FL-1 Standard to operate after being submerged in 1 meter (about 39") of water for 30 minutes. It can be a real lifesaver in a water survival situation.

HELL'S CANYON SPEED ALPHA MAX RECHARGEABLE

LENGTH 4-5/16" **BRIGHTNESS** 155 to 315 lumens **EFFECTIVE DISTANCE** 85 to 150 yards **FEATURES** Advanced digital circuitry uses either a single AA battery or a 14500 Li-ion rechargeable battery • Includes one AA and one 14500 battery and a USB charger • Luxeon® white LED with high and low modes • Single green LED for stealth and night use • Fast strobe mode • Lock-out tailcap switch with momentary and continuous modes • Waterproof • Submersible to 3 feet for 30 minutes • Rugged aircraft grade aluminum construction • Removable Deep Carry Pocket Clip™ • A-TACS AU or FG camo with Dura-Touch Armor Coating

**APPAREL READY
FOR ALL OF
YOUR ADVENTURES.**

2016 is a big year for Browning Apparel. In this section, you'll have the opportunity to view our all new Hell's Canyon Speed — a complete line of the most technologically advanced hunting apparel we have ever produced. If you've followed us for a while, you know that's a bold claim coming from the company that has brought you some of the finest hunting gear in history.

In addition to big game gear, you'll find new products and improvements spanning every category to ensure that when you choose Browning apparel, you're getting The Best There Is.

APPAREL

The Browning logo, featuring a stylized silhouette of a buck's head with large, curved antlers, positioned at the bottom of the vertical text column. A registered trademark symbol (®) is located at the bottom right of the logo.

ADVANTAGE BROWNING.

Every hunter needs something different from their outdoor clothing and our broad spectrum covers them better than anyone. New Hell's Canyon Speed is built to go the distance with a wide selection of top notch gear to keep extreme hunters warm, dry and comfortable. Hell's Canyon and Hell's Belles offer men and women high quality gear built to survive hunt after hunt. Wasatch gives every member of the family the best bang for their buck. Whether you need the best gear or the best value, look to Browning.

HELL'S CANYON SPEED — NEW DESIGNS, FABRICS AND FIT.

To find a trophy buck or bull, you need to be willing to go where other hunters won't — Hell's Canyon Speed will take you there. Hell's Canyon Speed is on point, using the very latest design technology and independent testing to ensure that the fabrics we've developed can endure the rigors hunters put their gear through. HeroFit tailoring trims away excess weight and bulk, while the abrasion resistant, stretchable fabrics maximize freedom of movement for unmatched durability, mobility and comfort. Proprietary A-TACS camo provides superior concealment. Designed as a system, Speed garments are sized to comfortably layer over one another to retain the fit while adding protection from the elements. With Hell's Canyon Speed you can hunt harder, faster and in greater comfort than ever before.

HELL'S CANYON — SEE YOU THERE.

Browning Hell's Canyon and Hell's Belles is the go-to clothing for men and women seeking high quality, performance-oriented gear. This versatile lineup includes everything you need to maximize comfort in the field, from base layers to waterproof, insulated parkas and bibs, all designed to keep you warm and dry. A key feature, especially for bowhunters, is **ADVANCED SCENT CONTROL** that helps keep game from picking up human scent. Harness Access hides a safety harness underneath the jacket to maximize safety and concealment in the treestand. Hell's Canyon and Hell's Belles fabrics offer the tough performance the name implies with high resistance to abrasion without sacrificing quietness. Blended down and PrimaLoft® jackets provide an excellent warmth-to-weight ratio when the mercury falls.

WASATCH — VALUE AND PERFORMANCE UNITE.

For quality gear that offers traditional, loose fitting comfort, welcome to Wasatch. Wasatch offers a wide selection of top quality outdoor clothing in styles for men, women and juniors. The designs place function and value over form to provide tough, long lasting gear that will get you comfortably through season after season. Wasatch includes a wide range of clothing to cover every hunting season and situation including insulated, waterproof gear that is ideal for a snowy day in a treestand. Durable soft shells for multi-season use and even shirts and pants of different weights that allow you to match clothing to the temperature.

HEROFIT

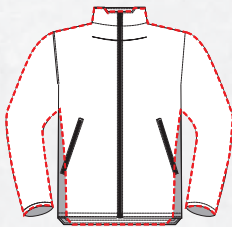

HEROFIT

- HeroFit is designed for hunters that take their sport and gear seriously.
- Light and fast is key with HeroFit. Trim dimensions and tough, stretchable fabrics work together to maximize mobility.
- Jacket fit is taken to the extreme with a narrow shoulder line and downward taper from the shoulders to the hips that adds range of motion in the arms and minimizes fabric bunching.
- Trimmer sleeves eliminate excess bulk that can snag on guns or catch bow strings.
- Pants are carefully tailored to maximize range of motion and comfort when walking and high stepping over obstacles.
- Narrower hip and thigh areas reduce bulk and add comfort when sitting for extended periods of time.

ATHLETIC CUT

- Athletic Cut provides a trim, tailored fit that reduces bulk, fabric bunching and weight.
- Athletic Cut garments move easily with you and snag less on brush.
- The cut is straight, or slightly tapered, from the shoulders to the hips. If you don't exactly fit this body shape, a larger size can be chosen to maximize mobility and comfort.

REGULAR CUT

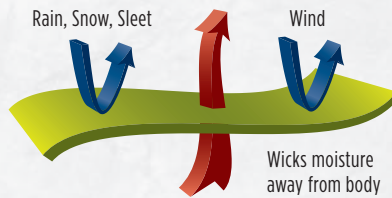

- Regular Cut is a traditional, full cut design that offers maximum freedom of movement.
- Regular Cut is tailored for a wide variety of body shapes with a fuller fit. Larger hunters, or those who just want a little extra room, will prefer this fit.

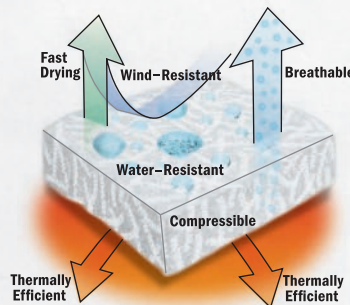

PRE-VENT — SUPERIOR WATERPROOF, WINDPROOF & BREATHABLE FABRICS.

- Pre-Vent is our waterproof, windproof, breathable fabric.
- Pre-Vent keeps out rain, snow and wind while breathing away perspiration to keep you warmer and drier.

PRIMALOFT® IS WARM, WET OR DRY.

- Primaloft is a premium performance insulation engineered for superior warmth, water-resistance, loft and compressibility.
- Primaloft has the best warmth-to-weight ratio in the industry. The fibers are more densely packed and retain heat better than other insulations for improved thermal efficiency.
- Primaloft fibers are permanently treated to repel water and absorb less water, making it more water-resistant and faster drying than other synthetic insulations.
- Primaloft fibers are tightly compressed for improved wind-resistance, less bulk and extreme compression.
- The fine-fiber, high-loft insulation keeps hunters warmer, in extreme conditions, even if it gets wet.
- Primaloft is so good, it was chosen by the U.S. Military. Over 1,000,000 Primaloft military garments are deployed in active service around the world.

KILL CHILL WITH WINDKILL.

- Our windproof, breathable WindKill fabric is 100% windproof, highly breathable and water resistant.
- A lightweight barrier, WindKill prevents chilling winds from penetrating the fabric to keep you warm.

IMPROVED FOR 2016

AN IMPROVED ADVANTAGE AGAINST HUMAN ODOR.

Outwitting the keen noses of easily spooked game in order to close in on a perfect shot is a challenge every hunter faces. To help you combat human odor, we introduced **ADVANCED SCENT CONTROL** and its two-level protection in 2015. Now it's even more effective. New **ADVANCED SCENT CONTROL POWERED BY AGION ACTIVE XL™** is the next generation of odor management technology and again changes this critical aspect of hunting to put the odds in your favor. New **ADVANCED SCENT CONTROL** captures human scent before it escapes into the air. Dual Technology controls odor causing bacteria on the fabric and captures, traps and degrades odor from sweat for complete protection. **ADVANCED SCENT CONTROL** also regenerates with every wash/dry cycle and lasts for the useful life of the garment. And **ADVANCED SCENT CONTROL POWERED BY AGION ACTIVE XL** does this without adding weight or stiffness.

ADVANCED SCENT CONTROL

- Attacks bacteria that causes human odors.
- Captures and degrades human scent before it escapes into the environment.
- Recharges easily.
- Lasts for the life of the garment.

ODORSMART™

CONTROLS ODOR AT THE START.

- Human odor is caused by bacteria that thrive on the skin. The bacteria's waste produces odors that are detected by deer and other big game animals.
- OdorSmart attacks bacteria in the microclimate around the skin, helping to kill the bacteria before odors develop.
- OdorSmart lasts the life of the garment with normal care, and does not require recharging or special cleansers. You need only to wash OdorSmart items as instructed on the care label.

HARNESS ACCESS ON SELECT HELL'S CANYON OUTERWEAR.

- Select Browning Hell's Canyon outerwear now offers Harness Access.
- Allows a treestand safety harness to be comfortably worn underneath a parka or jacket.
- Improves concealment as the harness no longer interferes with the camouflage pattern on the garment.
- Easy access to pockets.

**A-TACS** CAMO™

ADVANCED TACTICAL CONCEALMENT SYSTEM

We are pleased to have A-TACS
as the proprietary camouflage used on
our new Hell's Canyon gear.

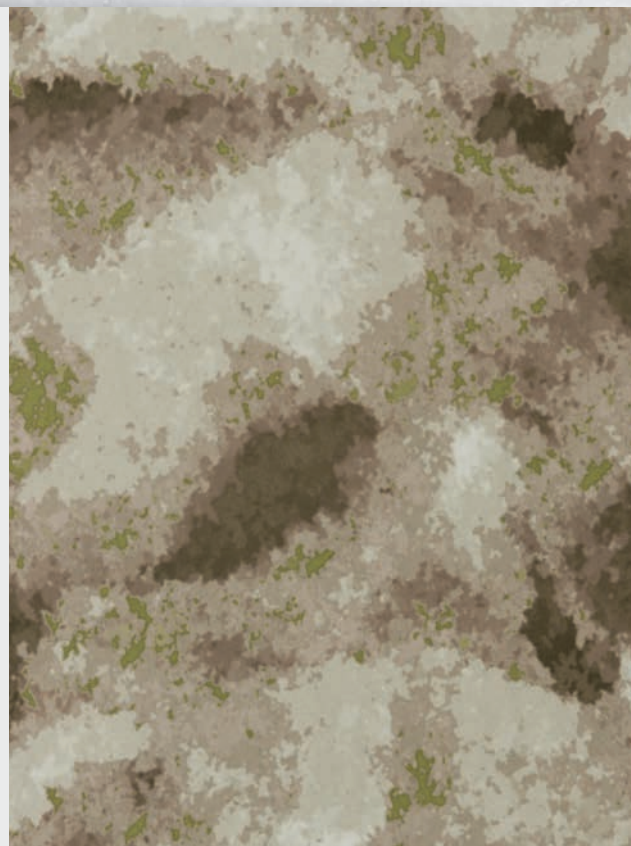

A-TACS CAMOUFLAGE AND THE SCIENCE OF CONCEALMENT.

A-TACS patterns are created utilizing a totally new, patent pending approach to maximize concealment. It starts with a collection of colors taken straight from the outdoors and photographed in carefully controlled lighting. A mathematical algorithm takes the colors and writes "organically-shaped" pixels using the specific color information. The resulting pattern, while still digital is far more organic in appearance than other digital patterns because A-TACS replaces the unnatural angled pixels with organic pixels. The organic pixels are then digitally modified to create real world elements without subscribing to the traditional "limb and leaf" mimicking patterns. The end results are patterns that eliminate the human outline from as close as a few feet and minimizing the "blobbing" effect when viewed from a distance.

Just as nature varies, A-TACS doesn't take a "one-pattern-fits-all" approach. A-TACS camouflage patterns were created to perform in climatic zones containing either arid or timber climates. The arid pattern (AU) is mostly brown with small samplings of green. For temperate, forested climates where green colors dominate, FG (Foliage/Green) is the best choice. These patterns are different not only in color but also in their design. In other words, they are not the same pattern in two different colors, to do so would minimize effectiveness.

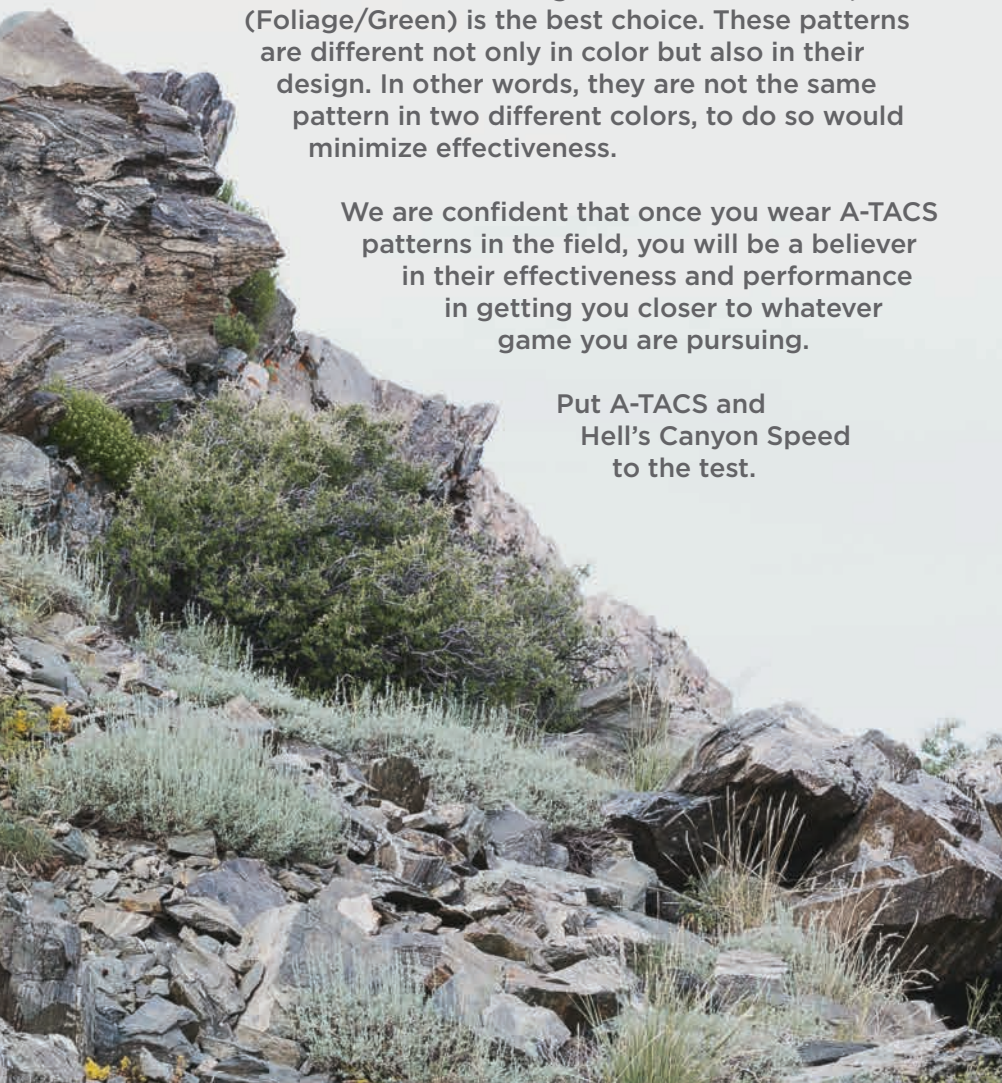

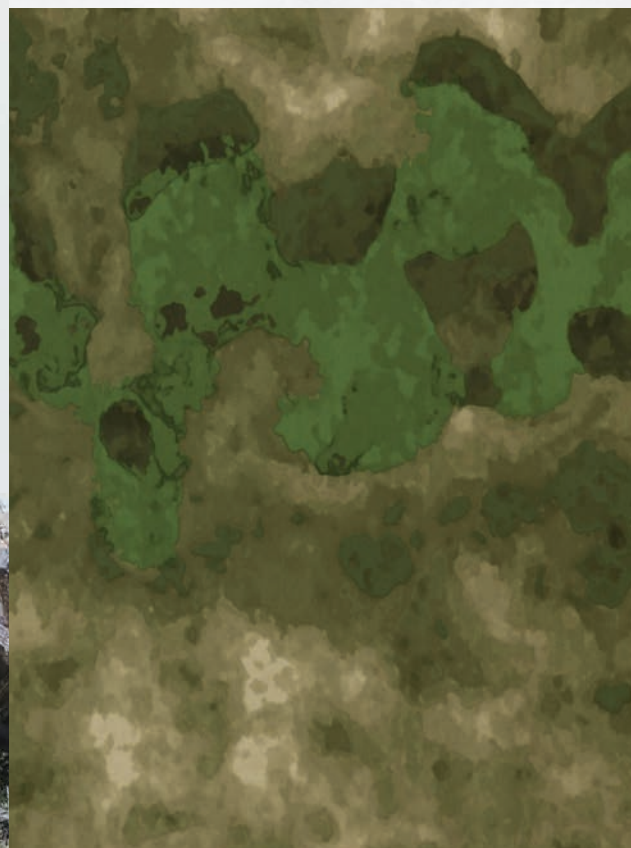

We are confident that once you wear A-TACS patterns in the field, you will be a believer in their effectiveness and performance in getting you closer to whatever game you are pursuing.

Put A-TACS and Hell's Canyon Speed to the test.

LESS IS MORE.

Down is an incredible insulator with one big drawback — the performance suffers once it gets wet. Synthetic insulations do better with water, but usually can't match up to the warmth of down. By combining warm down with water-resistant synthetic insulation, a dynamic new garment is created, one that will keep you warm in a wider variety of climatic conditions.

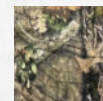

HELL'S CANYON BLENDED DOWN JACKET • HELL'S BELLES BLENDED DOWN JACKET

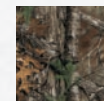

Blended down insulation offers maximum warmth and water-resistance • Highly constructed shell fabric is wind- and water-resistant • Full-length front zipper closure with internal flap to block drafts • Handwarmer pockets with zipper closures • Inside pocket with zipper closure for valuables • Drop back bottom hem and drawcord seals in warm air and keeps out cold • Elasticized cuff closures for added protection from the elements • Stuffs into provided stuff sack for easy storage • Athletic Cut • Hell's Belles has a women's contoured fit

FRED ZINK

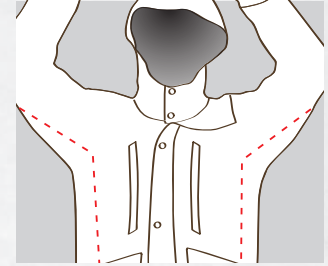

Hosted by Fred Zink, *Avian-X* showcases waterfowl and turkey hunts across North America. You can join Fred and his crew on the Pursuit Channel. Read more about Fred on page 307.

WICKED WING — PERFECT FOR WICKED WEATHER.

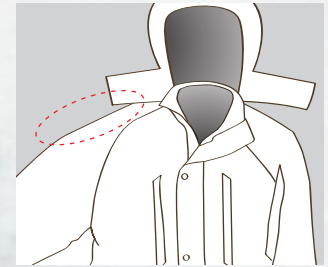

As if walking through a swamp or laying in a snow covered blind isn't enough, duck hunting often includes soaking rain and freezing cold. Wicked Wing waterfowl gear is built to keep you hunting in comfort regardless of the conditions. Browning professionals have spent countless hours testing and re-testing these Wicked Wing products and the evidence shows with fit and features only real-world experience can produce.

**ANGLE-ENTRY POCKETS**

- Angle-Entry pockets are designed around the arm and hand.
- When the hands are above the elbows they naturally point up, and when they are below the elbows they point down.
- The interiors of the chest accessory Angle-Entry pockets and the shell pockets are slanted down to align with hand angles while the two handwarmer Angle-Entry pockets slant up.

**ARROW GUSSETS**

- The Arrow Gusset armpit design has a smooth, tapering shape as it rises along the side to under the sleeve.
- Offers a better fit, enhanced range of movement and no binding.

**RAGLAN SLEEVES**

- Raglan sleeves are cut at a long tapering angle right up to the collar line.
- The top of the sleeve becomes one seamless piece of fabric all along the shoulder with no exposed seams to leak, even in the worst downpours.

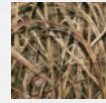

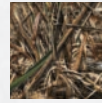

WICKED WING 4-IN-1 PARKA

WICKED TIMBER NEEDS WICKED WING.

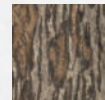

Wicked Wing Timber is ideal for the unique backdrop of flooded timber. Shorter length jacket styles stay above the waterline to keep the gear in your pockets dry. Soft shells include UTW (Under The Wader) Technology with water-resistant uppers and breathable fleece lowers to keep you from overheating. Fleecees are also designed to wear under waders and have the advantage of splash protection panels on the sleeves to help keep you dry when trudging through the muck.

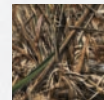

WICKED WING TIMBER WADER JACKET

Pre-Vent waterproof, breathable fabric shell • Shorter wader length with elastic drawcord waist • Angle-Entry pocket design • Two upper Angle-Entry handwarmer pockets • Two lower bellows shell Angle-Entry pockets with magnetic closure and internal pleat • Raglan sleeve design eliminates top shoulder seam for a more waterproof design • Arrow Gusset armpit design and articulated elbow for greater range of motion • Overlay forearm patches to prevent wear • Detachable, adjustable hood • Inside security pocket • External and internal storm flap • Adjustable, watertight laminated cuffs • Molded shoulder strips prevent wear on shoulder areas • Mesh moisture barrier strip between shell and lining • License tab • Regular Cut

PHEASANTS FOREVER® — JOIN THE GOOD FIGHT.

Without the conservation efforts of Pheasants Forever, millions of acres of prime pheasant habitat would be lost. Pheasants Forever chapters all over the United States work to protect, restore and enhance wildlife habitat by establishing and maintaining local and regional projects. From encouraging farmers to leave longer wheat stubble, to the purchase of upland habitat land, Pheasants Forever continues to work to preserve America's favorite game bird. To become a member or volunteer, please call toll free (877) 773-2070. With every Browning Pheasants Forever product sold, we proudly make a contribution to this most worthy conservation organization.

MORE COMFORT, GREATER LOAD CAPACITY.

Walking miles with water, lunch, ammunition and, if you are lucky, a couple of birds becomes a real burden if you are using a traditional upland hunting vest. Hunt harder and stay fresh longer with Browning Bird'n Lite gear. Bird'n Lite is essentially a backpack built into an upland hunting vest. Like a backpack, the integrated load-bearing system evenly distributes weight between the shoulders and hips and stabilizes the load to reduce fatigue and increase comfort.

BIRD'N LITE VEST

Browning Bird'n Lite Technology weight distribution system secures the load • Rugged, lightweight cotton/ polyester shell fabric • Blaze shoulder overlays • Front-loading bloodproof game bag with zip-top opening and load stabilizing strap • Oversized shell pockets with internal shell loops and snap closures • Built-in rucksack with elastic top • Zipper front • Transmitter pocket with antenna loop • REACTAR G2 pad pockets behind each quilted shoulder patch (pad sold separately) • Lined handwarmer pockets behind shell pockets • Water bottle pockets • D-rings for accessories • Available with or without Pheasants Forever embroidery • License tab • Regular Cut

Without Embroidery	30068858	129.99	M/L
		139.99	XL/ZXL

Bird'n Lite®

- Wide nylon shoulder straps transfer the load to the shoulders, yet still allows you to swing through the bird naturally.
- Quick-release sternum strap helps keep the weight centered between your shoulders for improved balance and less fatigue.
- Fully-adjustable load bearing straps place the load's center of gravity where it's most comfortable to carry.

- Ergonomically-contoured, padded adjustable waist belt offers added support to your lower back and allows part of the load to be carried on your hips for greater comfort.
- Quick-release composite buckle allows for quick on and off.

From world-class shooters to the hardest of the hardcore hunters to unique personalities, the members of the Browning Pro Staff all share a love of the outdoors, the shooting sports and the greatest gun brand in the world. Pro Staff members are chosen for their skill, professionalism and enthusiasm in promoting the Browning brand. Look for these faces at major shooting events and on your television screen.

WILLIAM AND McLEAN RUSSELL

BOUNDLESS
HUNTING

William and McLean Russell grew up on the family ranches in Texas and have had a gun in their hands since they could walk. Taking full advantage of the wealth of hunting and shooting possibilities offered in their home state, the brothers have put their passion for the outdoors into *Boundless Hunting TV*.

This exciting show takes the Russell brothers across the globe in search of life-changing hunting adventures. While they may be brothers, the pair are quite different. William prefers to take extreme hunting to the next level with his knowledge of tracking and survival techniques, and McLean uses his interests in photography, cooking and game management to bring a unique twist to the program.

What really sets *Boundless Hunting* apart from other hunting shows is its message of family and the bonds created by being outdoors.

WILLI SCHMIDT

Pt
PUREHUNTING

Once mired in the corporate world, Willi Schmidt took the leap and decided to pursue his passion for the outdoors as a host on outdoor TV. This new pursuit led him on the path to showcase the way he loved to hunt, with the challenge of succeeding and failing on his own.

As the host of *Pure Hunting*, Willi takes you on his Do-it-Yourself adventures and shows that pure hunting opportunities still exist for those willing to put in the effort. *Pure Hunting* explores the training, nutrition and gear that goes into the preparation of a self-sustained hunt. Willi appreciates the journey leading up to the hunt, not just the result and he enjoys the friendships made and camaraderie experienced along the way.

MATT HUGHES

Matt Hughes is a nine-time UFC® World Welterweight Champion who was inducted into the UFC Hall of Fame in 2010. Matt spent a good portion of his younger years hunting and shooting — passions that have never left him.

Matt is now the host of the television show *Uncaged*. This unscripted reality show gives you an inside look at his hunting adventures and gives unprecedented access inside Matt's life beyond the Octagon as a husband, father and hunter.

Uncaged follows Matt as he travels in pursuit of some of the world's most challenging big game species.

FRED ZINK

As host of the popular TV series, *Avian-X*, Fred Zink shares the excitement of waterfowling as he embarks on hunts throughout the U.S. and Canada. Along the way he shares the secrets of his highly successful calling tactics and strategies.

Fred founded Zink Calls™ in 2001 as a way to put exceptional calls into the hands of waterfowlers and professionals who demanded high-end calls. A nationally-recognized goose caller in his own right, Zink's business continues to grow and set new standards in the industry.

Zink's high-octane 24/7 DVD series is designed to speak to hunters with exciting footage that shares his hunting experiences with his viewers.

BOB REDFERN

Bob Redfern's experience as an outdoor TV personality extends back more than 35 years. With his lifelong devotion to promoting hunting, shooting sports, fishing, and conservation efforts, Bob ventured out on his own in 2001 to begin the highly successful outdoor series, *Bob Redfern's Outdoor Magazine*.

Bob enjoys bringing the outdoors and the best it has to offer to the screen each week featuring real life hunting and fishing adventures with featured segments on how to succeed at hunting, shooting, and fishing as well as the award-winning *Sportsman's Table* weekly cooking segment. Each week Bob features hunting and fishing destinations around the country for the sportsman who seeks the best places to enjoy the outdoors year round.

ANDREW VAVRA, BOB ST. PIERRE AND ANTHONY HAUCK

Andrew Vavra, Bob St. Pierre and Anthony Hauck are the hosts of Pheasants Forever's *Rooster Road Trip*, an exciting online program that takes hunters road tripping across the country, hunting exclusively on public land, in pursuit of America's most popular upland game bird.

But their dedication to hunting and conservation goes well beyond the entertainment industry. Andrew is a published writer, accomplished blogger and serves as the Marketing Manager for Pheasants Forever. Bob is also a well-known blogger and spends his non-hunting hours as the Director of Marketing and Public Relations at Pheasants Forever and Quail Forever. Anthony also works at Pheasants Forever as the online editor.

Go to pheasantsforever.org to view episodes of *Rooster Road Trip*. While there, join Pheasants Forever and help ensure the future of the pheasant and its habitat.

CHRIS DENHAM

Chris Denham is one of the hosts of *Western Hunter TV*, a program committed to teaching and entertaining viewers hunting in the vast expanse of the American West.

Chris brings notable credentials to the program. He was the editor of *Western Hunter Magazine* for nearly a decade and has spent the better part of 30 years in the hunting industry. As a passionate hunter and guide, he possesses a great deal of knowledge about the region and its game animals.

One of his most important endeavors is the group Outdoor Experience 4 All, which helps children with terminal or life-limiting illnesses get into the field on a hunting trip of their own.

JESSI JO STANFILL, JESS HULL AND KRISTY LEE COOK

MOST WANTED LIST

Girls will be girls — and hunting and being outdoors shouldn't change that. Country music singer Kristy Lee Cook is a long-time member of the Browning Pro Staff and her new program, *Most Wanted List*, is her latest endeavor.

Kristy brought her amazing voice to the TV screen on the 7th season of *American Idol*®. Now Kristy is a rising country music singer and possesses an infectious passion for everything she does, whether it is singing, hunting or saving horses through the Kristy Lee Horse Heaven Foundation.

Her new show, *Most Wanted List*, takes the bucket list concept up a notch and focuses on Kristy and her friends Jess Hull and Jessi Jo Stanfill as they embark on a series of adventures. These three ladies take to the road and travel across the country on an epic adventure full of dream hunts, friendship, challenges and the satisfaction of achieving their lifelong goals.

ROBBIE PURSER

Robbie started shooting skeet at the age of six. Over the years he has accumulated an impressive list of shooting titles including 1980 World Skeet Champion, 1991 and 1998 NSCA Champion, Zone 4 Champion, Quail Unlimited Champion, four-time Ducks Unlimited Champion, 2002 Sportsman Team Challenge Champion and an ESPN Great Outdoor Games gold medalist. He is also a twelve-time All-American Team member, a member of Team USA and a ten-time Georgia State Champion. All told, Robbie has more than 200 tournament wins to his credit.

RICK AND JULIE KREUTER

Husband and wife hunting duo Rick and Julie Kreuter host *Beyond the Hunt*. This unique program follows this dynamic pair on more than just their hunting adventures, it also focuses on wildlife conservation and land management.

Rick grew up in the outdoors of Wyoming and adventure has been a part of his life from an early age. After graduating from college, Rick received his guide license and soon became an outfitter full time.

Julie has also had a love of the outdoors from her earliest days in Nebraska. She and Rick were married after she received her degree in Physical Therapy.

As their outfitter business grew, so did their success and popularity, and after 16 years of guiding hunters, *Beyond the Hunt* is their own adventure.

JARED WIHONGI

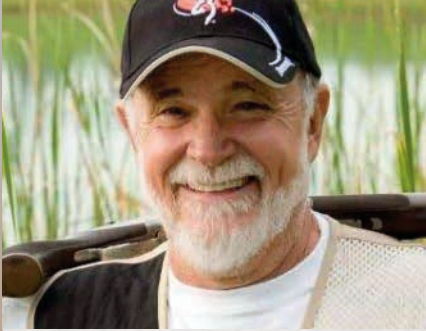

Jared Wihongi has more than 25 years of martial arts experience and is trained in the Filipino blade-fighting system of Pekiti-Tirsia Kali.

As a sought after instructor, Jared has worked with the U.S. Army Special Forces Groups, the DEA, Philippine National Police Academy, Special Action Force commandos, Marine Force Recon and Germany's GSG-9 to name a few.

Originally from New Zealand, home of the legendary Maori warriors, he currently serves as a reserve SWAT officer in a city near the Browning headquarters in Utah.

Jared works closely with Russ Kommer on the development of every Browning Black Label Tactical knife to make sure they are up to our demands and meet the real world needs of discerning users like you.

JOHNNY MEITZEN

Johnny Meitzen has been a Browning Pro Staffer for years and was recently honored when he was inducted into the Texas Sporting Clays Hall of Fame.

Johnny started shooting competitively in 1987 and has shot over 100,000 competitive matches, winning a number of shooting titles including two-time NSCA Nationals Vet Champion and two-time NSCA Nationals FITASC Vet Champion. Johnny is a six-time All-American Sporting Team member, two-time Team USA Sporting member and two-time Team USA FITASC member. He also has many state and zone championship titles to his credit. He is an NSCA Level III instructor and a die-hard Citori man who currently shoots a Citori 725 Sporting.

FOSTER AND MATT BARTHOLOW

Foster and Matt are rising stars on the ATA trapshooting circuit, and both shoot Browning Citori shotguns. The brothers came up through the Scholastic Clay Target Program and have made their mark within the pro ranks. Matt has earned several Grand American Championship titles, holds the 2nd Longest recorded singles run at 1840, achieved his Grand Slam (and Grand American Grand Slam), owns several South Dakota State Champion titles and is a three time All American Team member.

Foster is also a Grand American Champion and set a shoot off record at the Grand with 200 targets in program and 900 in shoot off. He is a two time All American Team member, achieved his Grand Slam (and Grand American Grand Slam) shooting 200 singles, 100 doubles and 100 handicap from the 27 yard line. He too holds multiple South Dakota State Champion titles.

Both Matt and Foster will tell you that the Citori shotgun is a workhorse that just keeps on shooting, round after round, year after year.

RUSS KOMMER

Russ Kommer is the man responsible for most of our lineup of world-class knives.

Russ grew up in the north woods of Minnesota, hunting, fishing, trapping and logging. His career as a guide took him to Idaho in search of big game in the formidable Selway-Bitterroot Mountains and eventually led him to guide hunters in the wilds of Alaska.

Having to dress big game as a hunting guide, Russ learned the meaning of the word quality, and how important it is in a knife. His experiences quickly taught him what he needed in his knives and, when he couldn't find what he wanted, started making his own knives to meet his demanding needs.

Now a world renowned name in the knife industry, Russ spends much of his time on his ranch in North Dakota developing new designs.

TOMMY THACKER

With a nickname like "Tommy Gun," you had better be fast on the trigger — especially if you are competing on the 3-Gun Nation tour.

Tommy Thacker is ranked among the best 3-Gun competitors in the nation, amassing an impressive list of victories and top finishes that includes winning the 3-Gun Nation Pro Series Championship in 2011 and 2012. With his success, Tommy has his pick of autoloading shotguns — he chooses to get it done with his Browning A5.

ALEX WAMPLER

Californian Alex Wampler began shooting sporting clays in 2004 and by 2007 had earned her way onto the All American Team. In addition to winning the 2013 US Open Lady FITASC Championship, she has been National Lady Sub Gauge HOA champion, regional champion and California Ladies Champion each on several occasions.

Her shooting interests also go beyond the range. She is a guide at Birds Landing Hunting Preserve, an NRA Range Safety Officer and attends the University of California Davis with aspirations to become a veterinarian.

GREG JORDAN

What began in 2007 as shooting in a few local USPSA matches has become a full-fledged career for Greg Jordan.

Like many shooters, Greg caught the bug and his new hobby soon turned into a passion. Two short years later he earned the title of USPSA Grand Master and found a new interest, 3-Gun competition.

Greg's hard work and commitment to practice, training and equipment continues to pay off. In 2014 he became 3-Gun Nation Champion with his Browning A5.

TENNILLE CHIDESTER

Hailing from Salt Lake City, Utah, Tennille Chidester began shooting competitively in the USPSA ranks in her mid teens. Now she has found her true passion as a competitor in the 3-Gun Nation Pro Series, with her reliable Browning A5 speeding her through the shotgun events. You may also recognize Tennille as a competitor on season 4 of *Ammo and Attitude*, which she won.

In addition to the fast-paced competition, it is the amazing people and camaraderie that draws Tennille to the exciting sport of 3-Gun shooting. She especially enjoys introducing others to the sport and encouraging their development.

SHILOAH MATTOON

Born in the small town of Kamiah, Idaho, Shiloah Mattoon fondly recalls that firearms have always been a part of his life. His competitive shooting career began in 2011, and his early experiences ignited Shiloah's passion for 3-Gun competition. Now he competes against the best shooters in the 3-Gun Nation tour.

In addition to having a full-time job, Shiloah spends hours practicing and takes an athletic approach to the sport, training daily in the gym.

Shiloah shoots a Browning A5 with absolute faith in its unwavering reliability and Speed Load Plus feature.

As much an emblem of the outdoor lifestyle as it is of the Browning brand, the Buckmark is the most recognizable symbol in the firearm industry. Whether on vehicles, T-shirts, caps, or permanently inked on the body, the Buckmark is a statement about your lifestyle. We have partnered with the companies on the following pages to represent the Browning brand with quality products and to share the Browning commitment to the outdoor industry.

AIRGUNS

High-performance designs like the 800 Series pistols, replica Buck Mark, and under-lever cocking Leverage Air Rifle are cornerstones of this versatile line-up of top-quality airguns.
