Firearms

Browning has always kept a keen eye on the future. Early on that vision came directly from our founder, John M. Browning, the man that to this day continues to be responsible for shaping the design of firearms. Today, we offer an ever growing and evolving selection of firearms that continue to deliver industry-leading reliability, accuracy and performance to legions of customers worldwide.

In addition to firearms, over the years we've offered leading-edge products that enhance the outdoor experience for hunters and shooters. Because our safes, hunting and shooting accessories, knives, lights and apparel offerings have actually outgrown the pages of this catalog, we suggest viewing our entire product line at browning.com.

And when we say our entire product line, we mean just that. At browning.com, you'll see all of our current in-line products plus limited edition firearms and products that don't appear in the pages of any catalog. The online Safe Builder allows you to configure a safe, see a price estimate and have the order sent straight to your Browning safe dealer. Our new Browning Safe Builder smartphone app even lets you build a safe and virtually place it in your home to see how it looks.

Be it in guns, gear, manufacturing or helping you see everything we have to offer to make your hunts more enjoyable and successful, Browning has been and always will be at the forefront of the outdoor industry.

TECHNOLOGY

Eye on the Prize.

For many shooters, the shotgun sports are more than a hobby, they are a lifestyle. These enthusiasts understand that the difference between a 99 and a 100 straight may come down to a comb set a bit too high or a missed pheasant due to an inconsistent shot pattern. Many new shotguns are first sent to a gunsmith where, for a price, they will undergo a transformation with the addition of an adjustable comb, back-bored barrels or lengthened forcing cones — all features that come standard on many Browning shotguns. We add these features, and more, to the guns we manufacture because we know that your satisfaction, performance and experiences reflect on us and we want them all to be the best they can be.

FEATHER TECHNOLOGY

- Browning Feather technology significantly reduces the weight of an over and under shotgun, by about one pound, using a high quality alloy for the receiver rather than steel.
- Steel components are added to high wear areas, ensuring durability.
- A steel breech face is dovetailed into the alloy receiver to ensure strength and long wear.
- The full-width, steel hinge pin provides maximum strength and endurance.

INFLEX RECOIL PAD

- Inflex recoil pads incorporate directional deflection construction that guides the comb down and away from your face, reducing felt recoil for greater shooting comfort and allowing faster, more accurate follow-up shots.
- The Inflex recoil pads are made from a soft material for the best recoil absorbing performance available.

FLOATING RIB

- The floating rib allows the rib and barrel to expand at different rates and move independently of each other.
- The floating rib prevents point of impact shifts caused by the barrel heating.

MICRO AND MICRO MIDAS FIREARMS

- Micro and Micro Midas firearms feature shorter lengths of pull to give younger and smaller shooters a great fitting firearm with the same quality components and attention to detail as all Browning firearms.
- Micro Midas models have the shortest lengths of pull, while Micro models are usually an inch or less longer than Micro Midas models.

BROWNING GROWTH INSURANCE PROGRAM

- Growth Insurance allows Micro and Micro Midas firearms to grow with the shooter to offer a higher rate of return on your firearm investment.
- Micro and Micro Midas models are eligible for the Growth Insurance Program that allows new owners to purchase a full-size stock at 50% off the retail price.
- Visit browning.com for complete details.

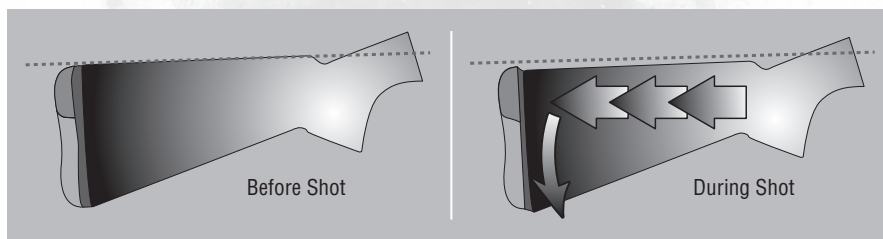

Steel Breech Face

Steel Hinge Pin

Floating Rib

Inflex Technology Recoil Pad

Total Barrel Dynamics

Total Barrel Dynamics is the combination of Vector Pro forcing cone lengthening, Back-Bored Technology and an Invector interchangeable choke tube system working in unison to improve shot pattern performance. Each component of Total Barrel Dynamics plays a part to reduce shot deformation and keep patterns dense, putting more pellets on your target. To ignore any single aspect of the system weakens the overall performance. Look for Total Barrel Dynamics on A5, Maxus, BT-99 and on 12 and 20 gauge Citori 725, Citori and Cynergy models.

VECTOR PRO LENGTHENED FORCING CONE

- The forcing cone is the tapered transition between the chamber and the bore that constricts the shot column. The longer the forcing cone is, the more gradual the constriction. Vector Pro is better than our competitors' forcing cone designs because it has a more gradual constriction.
- The Vector Pro forcing cone reduces stress on the shot column as it moves into the bore, reducing pellet deformation for more uniform patterns and more pellets in the center of the pattern.
- Lengthening forcing cones is a popular and expensive aftermarket practice done to increase shot pattern performance but it comes standard on A5, Maxus, BT-99 and on 12 and 20 gauge Citori 725, Citori and Cynergy models.

BACK-BORED TECHNOLOGY

- Back-boring enlarges the bore to the maximum diameter to increase shot velocity and minimize pellet deformity for more uniform patterns and a reduction in felt recoil.
- Extensive testing has shown that Back-Bored Technology reduces the friction between the shot cup and the bore, but does not allow gases to slip past the shot cup that would result in reduced pellet velocity and blown patterns.
- Back-Bored Technology specifications minimize shot deformation and maximize pattern uniformity, consistency and density. Back-Bored Technology is standard on A5, Maxus, BT-99 and on 12 and 20 gauge Citori 725, Citori, Cynergy, BPS and Silver models.

INVECTOR-DS CHOKE TUBE SYSTEM

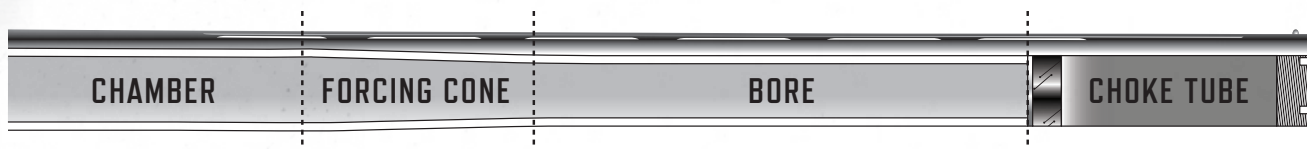

- "DS" stands for double-seal, our proprietary differential-banded brass seal. It compresses against the barrel wall to keep the choke tube threads clean and makes installation and removal easier than any other muzzle thread system.
- Invector-DS choke tubes combine muzzle-end threads and thin-wall construction for a longer, more gradually tapered choke tube that produces extremely consistent, dense shot patterns.
- From Cylinder to Extra Full, Invector-DS shot patterns tighten consistently in reliable, evenly scaled steps.
- Muzzle end threads minimize the flare at the end of the barrel for improved shotgun appearance. A slightly lighter overall barrel weight is achieved for a faster swing and improved balance.
- The more gradual taper of Invector-DS choke tubes reduces shot deformation for fewer flyers and gaps in the pattern and allows higher shot velocities for hard-hitting performance.
- Invector-DS is standard on A5 and Citori 725 models.
- See our full line of Invector-DS choke tubes at browning.com.

INVECTOR-PLUS CHOKE TUBE SYSTEM

- Invector-Plus started the long choke tube revolution. An ever-growing collection of world, national and local championships is proof of its patterning performance.
- The Invector-Plus choke tube system works with Vector Pro and Back-Bored Technology to offer consistent, dense shot patterns with the constriction needed depending on the shooting situation.
- The long choke taper inside an Invector-Plus choke tube produces consistent patterns with more uniform densities and fewer flyers.
- Threads on the breech end of the choke tube help prevent gases from slipping between the choke tube and barrel that could damage the choke tube and the barrel.
- Invector-Plus is standard on 12 and 20 gauge Maxus, Citori, Cynergy, Silver, BPS and BT-99 models.
- See our full line of Invector-Plus choke tubes at browning.com.

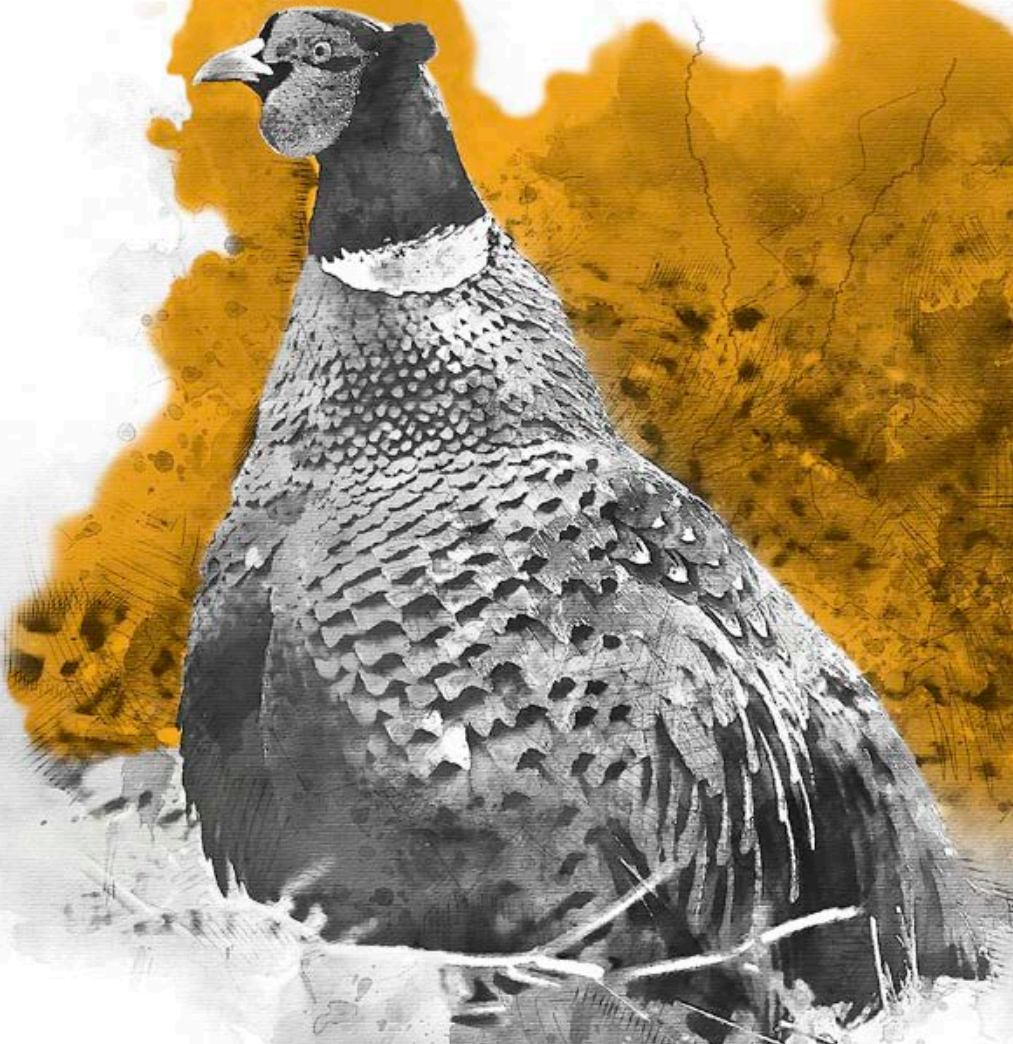

STANDARD INVECTOR CHOKE TUBE SYSTEM

- The Standard Invector interchangeable choke tube system offers consistent, dense shot patterns with the right constriction needed for the shooting situation.
- Threads on the breech end of the choke tube help prevent gases from slipping between the choke tube and barrel that could damage the choke tube and the barrel.
- Standard Invector is standard on 10, 16 and 28 gauge, and .410 bore Citori 725, Citori, Cynergy, and Gold models.
- See our full line of Standard Invector choke tubes at browning.com.

Citori.

*The Browning High Grade Program
Gives You More than Just a Sporting Chance.*

NEW

CITORI FIELD SPORTING GRADE VII

A finely-crafted over and under shotgun radiates class and elicits stares from fellow enthusiasts the moment it's extracted from the confines of its case. For 2020, the Browning High Grade Program offering is just such a firearm. This Citori Field Sporting Grade VII will surely be a highlight of any collection, with extensive engraving and silver accented birds and dogs surrounded by exquisitely-finished and fit walnut. Naturally, with function and performance that exceed the beautiful appearance, it will be difficult to resist bringing this fine shotgun to the range to display its full potential.

Measurements in inches, pounds and ounces.

- Beautiful engraving with silver bird and dog accents
- Gloss oil finish Grade VI/VII walnut stock with name plate inlay for owner's initials
- Inflex recoil pad
- Triple Trigger System with three trigger shoes
- HiViz® Pro Comp sight and ivory mid-bead
- Five extended black Midas Grade choke tubes
- Ideal for sporting clays/skeet/hunting

A John M. Browning Signature leather fitted case is included.

Features and Benefits

LOW PROFILE RECEIVER

- Improved recoil control and less muzzle jump are two of the biggest benefits of a low profile receiver. There is also the “one with the gun” feeling that makes the Citori 725 feel like an extension of your body.
- Places the front hand closer to the bore line for superior hand-eye coordination and pointability.
- Citori 725 receivers are machined from steel for a long life and feature a durable, attractive silver nitride finish. Feather models have a tough electroless nickel-plated finish.
- Feather receivers reduce weight by using a high quality alloy for the receiver rather than steel. Steel components are added to high wear areas, ensuring durability.

TRIPLE TRIGGER SYSTEM

- The adjustable Triple Trigger System lets you set the trigger shoe in one of three positions to fine-tune finger-to-trigger reach.
- Featured on target models.
- Three interchangeable trigger shoes included.

FIRE LITE MECHANICAL TRIGGER

- Exclusive mechanical trigger design.
- Unlike an inertia trigger, Fire Lite does not rely on recoil to set the next shot; instead, it offers immediate second shot capability.
- Features less take-up, a crisp break and shorter overtravel.

ERGO BALANCED

- Incredibly balanced in the hands from pad to muzzle.
- Facilitates a light feel and fast swing.
- Promotes follow through.

HIGH RIB

- Offers increased visibility on target models, meaning the barrels don’t cover up the clay bird.
- Improved cooling helps prevent heat waves from distorting visibility.

FLOATING RIB

- Most target models feature a floating rib that allows the rib and barrel to expand at different rates to eliminate stress.
- Prevents changes to point of impact due to barrel heating and the rib staying cool.
- Ventilated side rib increases air circulation to aid in barrel cooling.

TAPERED LOCKING BOLT

- Unlike other low-profile over and unders, the Citori 725 features a transverse-mounted, full-width tapered locking bolt and full-width hinge pin just like other Citori models for maximum strength and longevity.
- The locking bolt engages a full-width tapered recess in the monoblock. Tapering the bolt and recess allows the bolt to seat deeper over time, accommodating for wear.

FULL-WIDTH HINGE PIN

- The Citori 725 has a full-width hinge pin that provides maximum strength and long-lasting endurance.
- Competitors’ trunnions provide only a fraction of the bearing surface that the full-width hinge pin of the Citori 725 provides.

CHROME CHAMBERS

- For increased durability and corrosion resistance, all Citori 725 shotguns have hard chrome-plated chambers to resist the toll that thousands of shells can take on lesser quality guns.

INTERCHANGEABLE CHOKE TUBES

- To maximize versatility and optimize shot pattern performance, the Citori 725 features Invector interchangeable chokes. 12 and 20 gauge models receive the Invector-DS system and 28 gauge and .410 bore models benefit from the Standard Invector system. See our complete line of choke tubes and wrenches at browning.com.

Features and Benefits

PRO FIT ADJUSTABLE COMB

- The Browning Pro Fit Adjustable Comb makes it easy to find the perfect comb position.
- Pro Fit offers single bolt adjustment for both cast and drop. The revised adjustable comb design allows the stock to be professionally trimmed to shorten the length of pull.
- Easy to read markings allow the shotgun to be dialed-in and the settings easily replicated should the comb be removed.

PRO BALANCE SYSTEM

- The Pro Balance System allows you to fine-tune the balance point for a perfect mount and swing.
- Adding weights to the stock helps balance the shotgun, aids follow-up shots and the additional mass reduces felt recoil.
- Stock weights reduce muzzle jump for more accurate follow-up shots and allow a smoother follow through.
- Pro Balance weights are easy to install.

PALM SWELL

- Optimizes finger-to-trigger placement.
- Provides a comfortable, secure grip.

ABS CASE

- The sturdy, lockable ABS case is perfect for storage and transportation.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

A Shooting Legend.
ROBBIE PURSER

Robbie Purser has earned an impressive list of prestigious skeet and sporting clays titles and was recently inducted into the National Sporting Clay Association Hall of Fame.

725 CITORI

NEW

Line Up for the Challenge.

In practice, crushing clays on the trap range is an exercise in skill and concentration. However, adding competition into the mix requires shooters to step it up a notch. Browning Citori 725 trap guns are built to ensure that your focus stays in the game where it belongs, not on the fit or function of your firearm.

Tearing it Up. **MATT & FOSTER**

Championship trap shooters, the Bartholow brothers have earned multiple Grand American, National and State Championship titles between them.

Citori

Features and Benefits

STEEL RECEIVER

- Citori receivers are machined from steel for a long life and feature a durable, attractive blued or silver nitride finish. Feather models have a tough electroless nickel-plated finish.
- Feather receivers reduce weight by using a high quality alloy for the receiver rather than steel. Steel components are added to high wear areas, ensuring durability.

TRIPLE TRIGGER SYSTEM

- The adjustable Triple Trigger System lets you set the trigger shoe in one of three positions to fine-tune finger-to-trigger reach.
- Includes three interchangeable trigger shoes.
- Featured on target models.

THREE POSITION TRIGGER

- The Three Position Trigger lets you set the trigger shoe in one of three positions to fine-tune finger-to-trigger reach.
- Includes one trigger shoe.
- Featured on CX, CXS and CXT models.

LOCKING BOLT AND HINGE PIN

- The Citori features a heavy-duty, transverse-mounted, full-width tapered locking bolt that engages a full-width tapered recess in the rear barrel lugs. Tapering the bolt and recess allows the bolt to seat deeper, accommodating for wear. The hinge pin extends across the width of the receiver for maximum strength. Engineering like this ensures the Citori wears in, not out.

HAMMERS AND HAMMER EJECTORS

- For positive primer ignition, Citori hammers are driven by powerful coil mainsprings. The convenient barrel selector allows you to choose which barrel fires on the first pull of the single trigger, and the second pull fires the remaining barrel. Ejectors are activated by a sharp hammer blow for more positive ejection than the push imparted by competitors' ejectors. The automatic ejectors eject fired hulls when the breech is opened and elevate unfired shells for easy removal.

POINT OF IMPACT

- A big part of what makes Citori shotguns so versatile are the different points of impact (POI). CXS models feature a 50/50 POI that is preferred when a target presentation can come from anywhere, like a clay target soaring above you or a pheasant erupting from the brush. CX models feature a 60/40 POI that is great for all clay target sports and hunting as it allows you to float the target slightly to improve the sight picture. CXT models feature a 70/30 POI that is more suited to trap, where targets rise. The higher POI allows the target to be visible when the trigger is pulled.

CHROME CHAMBERS

- For increased durability and corrosion resistance, all Citori shotguns have hard chrome-plated chambers to resist the toll that thousands of shells can take on lesser quality guns.

STEEL SHOT PERFORMANCE

- The strength of Browning barrels is legendary, and they are built to handle the punishment of steel shot. Unlike some manufacturers' barrels that show pitting after shooting steel, Browning pioneered construction that maximizes steel shot performance and barrel durability.
- Browning barrels meet the strictest material and construction quality standards. The barrel blanks are made from rolled and tempered steel bars and are stress relieved to offer exceptional mechanical properties. The barrel blanks are then precision drilled, reamed and honed to exacting specifications.

VECTOR PRO™ FORCING CONES

- Browning was the first manufacturer to recognize the performance advantages of a back-bored barrel and to make it a standard feature on shotguns. Longer, tapered Vector Pro forcing cone dimensions minimize shot deformation and maximize pattern uniformity, consistency and density. Back-boring increases bore diameter specifications and decreases friction between the shot cup and the bore to maximize shot pellet velocity and to reduce felt recoil. Reducing constriction from the forcing cone on the shot column results in fewer deformed pellets for more uniform patterns, and keeps more pellets in the central part of the pattern where they're needed to bag more birds and crush clay targets.
- Browning back-bore specifications represent the ideal bore dimensions. A larger bore diameter can let gases slip by the shot cup, resulting in both reduced pellet velocity and blown patterns. A smaller bore diameter means the forcing cone can deform pellets, leading to flyers and poor ballistic performance.

INTERCHANGEABLE CHOKE TUBES

- To maximize versatility and optimize shot pattern performance and versatility, Citori 12 and 20 gauge shotguns feature the Invector-Plus system. 16 and 28 gauge, and 410 bore models include the Standard Invector. See our complete line of choke tubes and wrenches at browning.com.

Citori.

Jacks of All Trades.

Even though Citori CX, CXS and CXT shotguns have been designed to excel in a particular target discipline, they compete perfectly in others. This versatility makes them perfect for those that like to dabble in multiple shooting sports, without the need for multiple guns.

CXS

Citori.

Remember When.

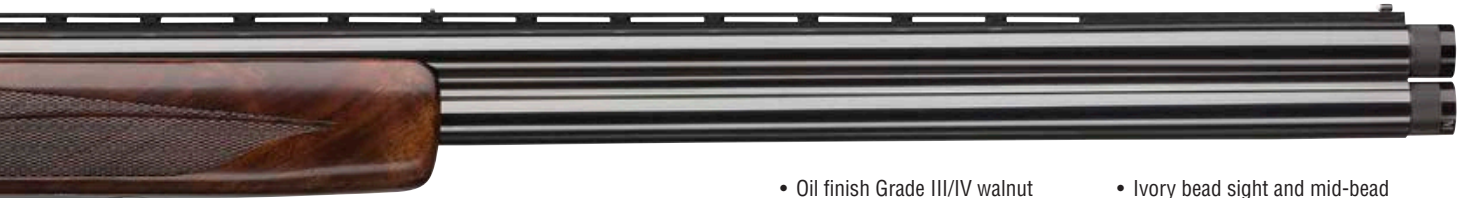

The timeless lines of a Citori over and under are the perfect reminder of the tradition of bird hunting and times spent in the field. Whether your Citori becomes the gun you reach for every season, or is destined to become a memento of a memorable hunting trip, its beauty and performance are sure to serve you well, year after year.

Features and Benefits

LOWEST PROFILE RECEIVER

- Improved recoil control and less muzzle jump are two of the biggest benefits of a low profile receiver.
- Places the front hand closer to the bore line for superior hand-eye coordination and pointability.
- Cynergy receivers are machined from steel for a long life and feature a durable, attractive silver nitride finish.

REVERSE STRIKER MECHANICAL TRIGGER

- The Reverse Striker is a striker-based, mechanical trigger system that does not use the inertia from recoil to set the hammers.
- Reverse Striker offers the benefits of a crisp feel, reduced locktime and less overtravel than other over and under shotguns.
- Because inertia is not needed for the hammers to set, the design eliminates the possibility of the second barrel not firing.

TRIPLE TRIGGER SYSTEM

- The adjustable Triple Trigger System lets you set the trigger shoe in one of three positions to fine-tune finger-to-trigger reach.
- Includes three interchangeable trigger shoes.
- Featured on target models.

THREE POSITION TRIGGER

- The Three Position Trigger lets you set the trigger shoe in one of three positions to fine-tune finger-to-trigger reach.
- Includes one trigger shoe.
- Featured on CX models.

MONOLOCK HINGE

- The strong MonoLock Hinge design is the engineering behind the Cynergy's low profile receiver.
- Integrates the monoblock and the hinge for up to 300% more surface area to pivot on than traditional trunnion-style hinges.
- Rectangular locking pins provide extra strength and feature a "Wear-In Relief" that keeps the action tight.

ADJUSTABLE COMB

- Composite models include an adjustable comb system that allows the fit of the gun to be customized.
- Drop at comb adjustments are made in 1/8" increments.

CHROME CHAMBERS

- Cynergy shotguns feature hard chrome-plated chambers.
- Increased durability and corrosion resistance.
- Camo models have chrome-plated bores.

IMPACT EJECTORS

- Impact Ejectors are aided by the punch of a secondary striker spring for positive, reliable ejection of fired hulls from the chambers.
- Unfired shells are elevated for easy removal.

POINT OF IMPACT

- A big part of what makes the Cynergy CX guns so versatile is the 60/40 point of impact (POI).
- The slight upward bias of the 60/40 POI makes for an excellent general use shotgun that is equally capable both in the field and on the range.
- The higher bias makes rising targets, as encountered in trap, easier to hit.

INTERCHANGEABLE CHOKE TUBES

- To maximize versatility and optimize shot pattern performance, Cynergy shotguns feature the Invector-Plus system. See our complete line of choke tubes and wrenches at browning.com.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

CYNERGY®

Get the Lowdown on the Cynergy.

Light, low and quick to point, the Browning Cynergy is designed to help you perform at your shooting best. Multiple variations are available to match your specific shotgunning needs, each built upon the lowest-profile receiver money can buy.

FIELD

- Satin finish Grade I/II walnut stock
- Game scene engraving
- Inflex recoil pad
- One 1/4" stock spacer
- Ivory front sight and mid-bead
- Three choke tubes
- Ideal for hunting/sporting clays

BT99

Features and Benefits

LOW PROFILE RECEIVER

- BT-99 receivers are machined from steel for a long life and feature a durable, attractive silver nitride or blued finish.

FOREARM

- A beavertail forearm helps control recoil and assists hand-eye coordination.

FLOATING RIB

- The floating rib allows the rib and barrel to expand at different rates and move independently of each other.
- Prevents point of impact shifts caused by the barrel heating.

CHROME CHAMBER

- The chrome-plated chamber resists wear and corrosion.

INTERCHANGEABLE CHOKE TUBES

- To maximize versatility and optimize shot pattern performance and versatility, BT-99 shotguns feature the Invector-Plus system. See our complete line of choke tubes and wrenches at browning.com.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

Beavertail Forearm

Chrome Chamber

MAX HIGH GRADE

- Adjustable, high-post rib offers POI adjustment from 50/50 to 100/0
- Graco adjustable comb makes it easy to dial-in a perfect fit
- Adjustable GraCoil® Recoil Reduction System increases comfort and offers length of pull adjustment
- Graco butt pad plate adjusts for angle and location
- Gloss finish Grade V/VI walnut stock
- Hull ejector
- Pachmayr® Decelerator® XLT recoil pad
- HiViz® Pro Comp fiber-optic front sight with mid-bead
- Three extended Midas Grade choke tubes
- Universal BT Trap fitted case in classic brown included (not shown)
- Ideal for trap

Features and Benefits

KINEMATIC DRIVE SYSTEM

- Kinetic energy is defined as the energy of motion.
- The A5 uses kinetic energy to power the recoil-operated Kinematic Drive System.
- Simplicity of design for consistent, reliable function with any load and under the full extremes of weather, temperature, moisture and grime.
- Kinematic Drive is so reliable that the A5 is the first ever autoloading shotgun to carry a 100,000 round or five-year guarantee.
- Clean operation because gases are sent out the barrel and away from the action.
- Extreme load versatility for reliable performance with virtually all factory ammunition down to one ounce field loads with no adjustments.

ERGO BALANCED

- Balances in the hands from pad to muzzle.
- Facilitates a light feel and fast swing.
- Promotes smoother follow through.
- Places front hand closer to the bore line for superior hand-eye coordination and pointability.

ADDITIONAL PROTECTION

- The bolt slide, shell carrier, bolt release button and bolt handle are Nickel Teflon® coated for added corrosion protection, lubricity and makes cleaning easier. The bolt is hard chrome plated for added resistance to wear.

RECEIVER

- The Humpback Acquisition Advantage extends the sight plane for faster, more natural sight alignment.
- Speeds target acquisition.
- Constructed from rugged, lightweight aluminum alloy.

INFLEX RECOIL PAD

- Inflex recoil pads incorporate directional deflection construction that guides the comb down and away from your face, reducing felt recoil for greater shooting comfort and allowing faster, more accurate follow-up shots.
- The Inflex recoil pads are made from a soft material for the best recoil absorbing performance available.

LENGTH OF PULL ADJUSTMENT

- All A5 shotguns include 1/4" and 1/2" stock spacers for length of pull adjustment.

TURNKEY MAGAZINE PLUG

- The patented TurnKey Magazine Plug is easily removed in seconds using just a door or car key.

SPEED LOAD PLUS

- Patented feeding system sends the first shell loaded into the magazine directly into the chamber.
- Speed Unload feature makes emptying the magazine fast and easy, without chambering and ejecting every shell with the bolt handle.

ERGONOMIC BOLT LATCH

- Conveniently located just ahead of the trigger guard.
- Locks the bolt to the rear when the magazine is unloaded and releases a shell from the magazine when the bolt is closed for faster loading.
- Oversized shape makes the bolt latch easy to locate and operate with or without gloves.

OVERSIZED TRIGGER GUARD

- The trigger guard is large and has carefully rounded edges to accommodate gloved fingers.

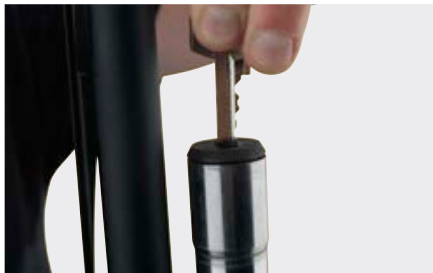

INTERCHANGEABLE CHOKE TUBES

- To maximize versatility and optimize shot pattern performance and versatility, A5 shotguns feature the Invector-DS system. See our complete line of choke tubes and wrenches at browning.com.

ABS CASE

- Sturdy, lockable ABS case is perfect for storing and transporting the A5.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

Come Hell or High Water.

The Browning A5 shares more than the classic humpback receiver profile of the original John M. Browning designed Auto-5, it also offers “come hell or high water” reliability. The recoil operated Kinematic Drive System is designed to work with a variety of ammunition, under any condition, every time you pull the trigger.

WICKED WING MOSSY OAK® SHADOW GRASS BLADES

The Sweet 16.

Back in the day, hunters knew that a “Sweet Sixteen” referred to the Browning Auto-5 shotgun in 16 gauge. Those old Sweet Sixteen models were prized for being lightweight and amazingly versatile for many varieties of upland fowl. Like the original, this A5 Sweet Sixteen features a compact, lightweight receiver that contributes to the sub-six pound weight, making it ideal to carry all day among row after row of cut corn.

ULTIMATE

- Satin nickel receiver finish with brushed accents and scroll engraving pattern that depicts pheasants on the left side and mallards on the right side
- Gloss oil finish Grade III Turkish walnut stock with close radius pistol grip is shim adjustable for length of pull, cast and drop

MAXUS

Features and Benefits

RECEIVER

- Constructed from rugged, lightweight aluminum alloy.

POWER DRIVE GAS SYSTEM

- Extensive research has produced the most reliable gas piston design ever.
- The gas piston features oversized exhaust ports that dump gases faster with heavy loads to reduce recoil.
- 20% longer piston stroke travel increases reliability with light loads.
- An enclosed seal keeps residue out of the action for cleaner operation.
- The Power Drive Gas System works with the Inflex Technology recoil pad to reduce muzzle jump up to 44% compared to the competition.

LIGHTNING TRIGGER

- The Lightning Trigger is the finest fire control system ever offered in an autoloading shotgun.
- Offers a smooth, crisp feel with minimal travel.
- Lock times average .0052 seconds, 24% faster than the nearest competing autoloader.
- Easy to remove for cleaning.

NICKEL TEFLON® PROTECTION

- The bolt, bolt slide, shell carrier, bolt release button and cocking handle of the Maxus are nickel Teflon coated for added corrosion protection, lubricity and makes cleaning easier.

INFLEX RECOIL PAD

- Inflex recoil pads incorporate directional deflection construction that guides the comb down and away from your face, reducing felt recoil for greater shooting comfort and allowing faster, more accurate follow-up shots.
- The Inflex recoil pads are made from a soft material for the best recoil absorbing performance available.

LENGTH OF PULL ADJUSTMENT

- Maxus shotguns include one 1/4" stock spacer (Sporting and Sporting Carbon Fiber include two spacers) for length of pull adjustment.

TURNKEY MAGAZINE PLUG

- The patented TurnKey Magazine Plug is easily removed in seconds using a standard door or car key.

SPEED LOCK FOREARM

- The Speed Lock Forearm replaces the traditional screw-on magazine cap.
- Makes taking down the Maxus for cleaning or storage fast.
- Makes attaching or removing the sling a snap.

SPEED LOAD PLUS

- Patented feeding system sends the first shell loaded into the magazine directly into the chamber.
- Speed Unload feature makes emptying the magazine fast and easy, without chambering and ejecting every shell with the bolt handle.

MAGAZINE CUT-OFF

- The magazine cut-off (not available on Sporting models) allows the chamber to be unloaded to change loads without cycling a shell from the magazine.
- Useful when hunting different bird species and different loads are instantly required.

OVERSIZE TRIGGER GUARD

- The trigger guard is large and has carefully rounded edges to accommodate gloved fingers.

INTERCHANGEABLE CHOKE TUBES

- To maximize versatility and optimize shot pattern performance, Maxus shotguns feature the Invector-Plus system. See our complete line of choke tubes and wrenches at browning.com.

OPTIMAL DIMENSIONS

- The Maxus features a trim forearm and close radius pistol grip to maximize control.
- An externally relieved steel magazine tube reduces weight for a faster swing while retaining durability.
- Drop and cast can be tuned using the included stock shim kit.
- A low rib is in line with the top of the receiver and translates into dead-flat point of impact.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

Less Muzzle Jump

The Softest Shooting Autoloader Ever

MAXUS[®]

Max Speed. Max Reliability.

Few autoloading shotguns can deliver the combination of speed and confidence like the Browning Maxus. The soft-shooting Power Drive Gas System reduces felt recoil with heavy loads, and offers enhanced reliability with a wider variety of loads than the competition.

Silver.

Features and Benefits

RECEIVER

- Semi-humpback design is constructed from rugged, lightweight aluminum alloy.

ACTIVE VALVE GAS SYSTEM

- The self-adjusting Active Valve Gas System in Silver autoloaders diverts gases from fired shells to operate the action instead of adding to recoil.
- When shooting light loads, most of the gases operate the action.
- With magnum loads, only a small amount of gas is necessary to operate the action, while the remaining gases are vented out the top of the forearm and away from the receiver for cleaner, more reliable operation.
- Superior recoil reduction from the Active Valve means faster, more accurate follow-up shots and all-day shooting comfort regardless of the loads being fired.

INTERCHANGEABLE CHOKE TUBES

- To maximize versatility and optimize shot pattern performance, Silver shotguns feature the Invector-Plus system. See our complete line of choke tubes and wrenches at browning.com.

GRIPPING SURFACES

- Composite Silver models feature checkered gripping surfaces for a sure hold and a sleek feel in all climate conditions.

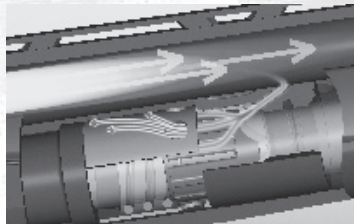

TRIGGER

- The trigger assembly can be removed in just seconds for a thorough cleaning.

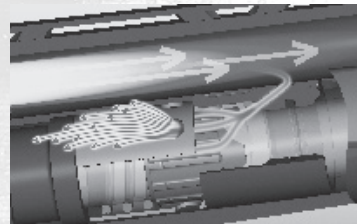

LOAD VERSATILITY

- The Active Valve gas piston efficiently adjusts to reliably fire a wide range of loads. The piston automatically vents less gas with light loads ensuring reliability and more gas with heavy loads to mitigate felt recoil.
- 12 gauge 3" models fire everything from light, 1 oz., 2-3/4" field loads to the heaviest 3" magnums. The 3-1/2" version is built to handle a similar range, from 1-1/8 oz., 2-3/4" field loads up to hard-hitting 3-1/2" magnum loads.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

Pumped Up.

There just isn't a better pump-action shotgun than the Browning BPS. For 2020, the BPS receives a face lift that improves the ergonomics, functionality and looks of these tough, reliable shotguns.

Features and Benefits

BOTTOM EJECTION AND LOADING

- Unique bottom ejection throws empty hulls straight down, out of the line of sight.
- The BPS is the best pump shotgun choice for both right- and left-handed shooters.

RELIABLE PUMP-ACTION

- The proven pump-action features rugged steel components.
- Rigid double action bars are made from heat-treated steel to eliminate twisting and binding for faster, more efficient slide-action operation.
- Reliable in all conditions.
- A convenient serrated slide release is located at the rear of the trigger guard.

RECEIVER

- The receiver is machined from a solid block of forged steel.

TOP-TANG SAFETY

- The thumb-operated, top-tang safety on the BPS can easily be operated with the right or left hand, even with gloves on.

TRIMMABLE COMPOSITE STOCK

- The new composite stock features a straight heel section that makes it easy for a gunsmith to shorten the length of pull 3/4" and refit the recoil pad.

INFLEX RECOIL PAD

- Inflex recoil pads incorporate directional deflection construction that guides the comb down and away from your face, reducing felt recoil for greater shooting comfort and allowing faster, more accurate follow-up shots.
- The Inflex recoil pads are made from a soft material for the best recoil absorbing performance available.

OVERSIZED TRIGGER GUARD

- The trigger guard is large and has carefully rounded edges to accommodate gloved fingers.

FLOATING RIB

- The floating rib allows the rib and barrel to expand at different rates and move independently of each other.
- The floating rib prevents point of impact shifts caused by the barrel heating.

INTERCHANGEABLE CHOKE TUBES

- To maximize versatility and optimize shot pattern performance, the BPS features the Invector-Plus interchangeable choke tube system. See our complete line of choke tubes and wrenches at browning.com.

MAGAZINE CAPACITY

- 2-3/4": Four in the magazine, one in the chamber.
- 3": Three in the magazine, one in the chamber.
- 3-1/2": Three in the magazine, one in the chamber.
- A three-shot magazine adaptor plug is included.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

X-BOLT

NEW

X-BOLT MAX VARMINT/TARGET

Features and Benefits

FEATHER TRIGGER

- The X-Bolt's three-lever Feather Trigger provides a clean, crisp pull with no take-up or creep and minimal overtravel.
- The trigger is screw adjustable from 3 to 5 lbs. and factory pre-set at approximately 3-1/2 to 4 lbs.
- An alloy trigger housing contains hard chromed steel components that are highly polished on all critical contact surfaces.

X-LOCK SCOPE MOUNTING SYSTEM

- X-Lock mounts feature a four screws-per-base design that replaces the traditional two screw system.
- Offers more accurate placement and more secure attachment to the receiver.
- Receiver is drilled and tapped for scope mounts (not included). See our complete line of scope rings and bases for X-Bolt rifles at browning.com.

FREE-FLOATING BARREL

- Every X-Bolt action is individually bedded into the stock for a true free-floating barrel, not bedded using a master receiver like the competition.
- The barrel is free-floated by bedding the front and rear of the action to maintain barrel-to-stock spacing providing consistent accuracy.
- The recessed muzzle crown helps protect the rifling from damage.
- Barrels are triple checked for interior finish, straightness and air-gauged for uniformity.
- Hand-reamed chamber for precision accuracy.

60° BOLT LIFT

- Short 60° bolt lift is fast cycling so the hand easily clears the scope.
- The bolt is machined from solid steel bar stock for strength and custom rifle precision.
- Three locking lugs provide exceptional bolt strength.

BOLT UNLOCK BUTTON

- The bolt unlock button works in conjunction with the top-tang safety to provide an extra margin of safety when checking and unloading the chamber.
- Located on top of the bolt handle, the bolt unlock button allows the bolt to be unlocked and opened with the tang safety in the on safe position.
- The convenient tang safety blocks the trigger sear and features a firing pin block for added security.

INFLEX RECOIL PAD

- The Inflex Technology recoil pad features internal directional ribs that move the comb down and away from the cheek to increase shooting comfort.

ROTARY MAGAZINE

- The unique rotary magazine is removable, durable, easy to load and feeds rounds from the center line, not off to the side like other rifles, for straight to the chamber feeds.
- Unique design holds U.S. patent numbers: 8,156,675; 8,484,875 and 8,745,912.

TOP-TANG SAFETY

- Top-tang safety is easy to reach with the thumb.

RATE OF TWIST

- Select X-Bolt Long Range models incorporate faster rates of twist to better stabilize longer, heavier bullets.
- 6.5 Creedmoor: 1-7", 28 Nosler: 1-8", 300 Win. Mag.: 1-8"

PERSONALIZED ENGRAVING

- The bolt can be personalized with your name. Call (800) 333-3288 for information.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

X-Lock Scope Mounting System

60° Bolt Lift

Measurements in inches, pounds and ounces.

- Composite Max stock offers an adjustable comb to dial-in eye-to-scope alignment
- Gray textured stock finish
- Stainless steel, fluted heavy bull barrel for long-range accuracy
- Muzzle brake with suppressor threads (thread protector included)
- Extended bolt handle
- 1/4" and 2/3" length of pull spacers included
- Picatinny stock rail for bipod mounting
- Two swivel studs

X-BOLT

NEW HUNTER
LONG RANGE

Tradition Marches On.

X-Bolt Hunter models combine sharply checkered walnut with matte blued steel to create a modern take on the traditional bolt-action hunting rifle. The new Hunter Long Range model gives shooters the warm feeling that only wood provides along with a heavier barrel for extra accuracy at extended ranges.

Measurements in inches, pounds and ounces.

- Ambidextrous adjustable comb to dial-in eye-to-scope alignment
- Non-reflective matte blued finish
- Heavy sporter contour barrel for long-range accuracy
- Extended bolt handle
- Muzzle brake with 5/8"-24 TPI suppressor threads (thread protector included)
- Satin finish checkered walnut stock
- Inflex recoil pad

Hunting Pioneers. RALPH, VICKI & RJ

Ralph Cianciarulo

Vicki Cianciarulo

RJ Cianciarulo

The Choice and Archer's Choice

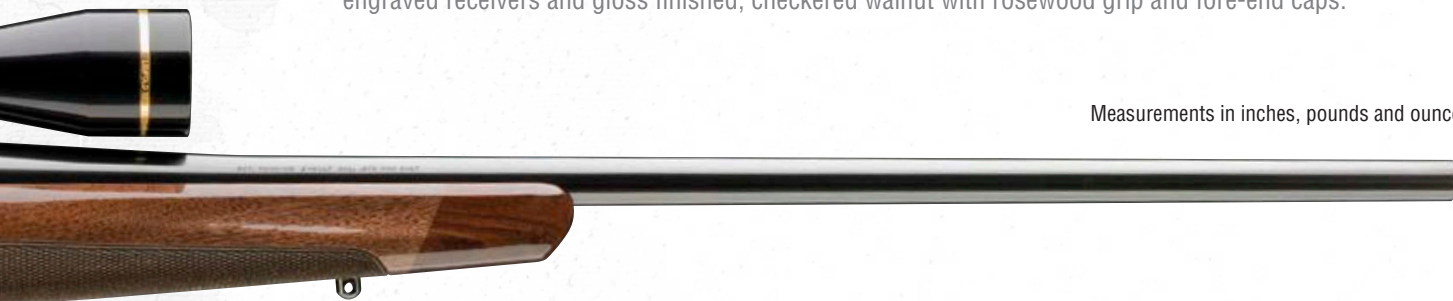

The Cianciarulos have spent over 30 years entertaining and educating bow and rifle hunters as outfitters, video producers and popular TV personalities.

Looking Good.

With many companies reducing or eliminating wood-stocked rifles from their lineups, we double down with the award-winning X-Bolt. The beauty of Browning Medallion rifles is legendary, featuring engraved receivers and gloss finished, checkered walnut with rosewood grip and fore-end caps.

Measurements in inches, pounds and ounces.

On Target.

Get legendary Browning technology, quality and accuracy with the AB3. The bolt-action AB3 shares many of the same features as the award-winning X-Bolt to provide the accuracy and reliability you demand from a Browning.

Features and Benefits

LARGE BOLT SURFACE AREA

- The robust bolt offers additional rigidity.
- The bolt is machined from solid steel bar stock and machined internally to keep weight low.
- Three locking lugs provide exceptional bolt strength.
- Super smooth chrome bolt finish is great looking, quieter and offers smooth cycling.

INFLEX RECOIL PAD

- Inflex recoil pad softens recoil and allows faster, more accurate follow-up shots.
- Internal structure is designed to pull the rifle down and away from the face to reduce felt recoil.

BOLT LOCK OVERRIDE BUTTON

- The bolt lock override button provides an additional margin of safety when checking and unloading the chamber.
- Located behind the bolt handle, the bolt lock override allows the bolt to be unlocked and opened with the tang safety in the on safe position.
- The convenient tang safety blocks the trigger sear and sear.

DETACHABLE MAGAZINE

- Polymer and steel construction is lightweight and extra tough.
- Unique spring and follower design minimizes follower tilt for more reliable feeding.

FREE-FLOATING BARREL

- Free-floating maintains barrel-to-stock spacing for consistent accuracy.
- Recessed muzzle crown helps protect the rifling from damage.
- Precision button-rifled barrel is triple checked for interior finish, straightness and air-gauged for uniformity.
- Hand-reamed chamber for precision accuracy.

60° BOLT LIFT

- Short 60° bolt lift is fast cycling, allowing the hand to easily clear the scope.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

Large Bolt Surface

UNLESS SPECIFICALLY LISTED AS INCLUDED WITH A FIREARM, ACCESSORIES SHOWN SUCH AS SCOPES, OPTICAL SIGHTS, RINGS, RING MOUNTS, OPTIC RAILS, BIPOD RAILS, AMMUNITION, ETC. ARE NOT INCLUDED.

Features and Benefits

RECEIVER

- Lightweight, sturdy machined aircraft-grade aluminum.
- Receiver is drilled and tapped for scope mounts (not included). See our complete line of scope rings and bases for BLR rifles at browning.com.

ACTION

- Lightning fast, glass-smooth rack and pinion lever-action.
- Strong rotating head, multiple-lug breech bolt with a recessed bolt face and side ejection.

HAMMER

- The folding hammer provides an added measure of safety when the hammer is at half-cock.
- The fold-down hammer has four positions: Full-cock, half-cock, the folded hammer position, and the dropped, or fired position. The two positions at half-cock readily indicate the status of the rifle.

DETACHABLE BOX MAGAZINE

- The detachable box magazine provides reliable feeding and allows the use of ammunition with superior pointed bullets.

TAKEDOWN FEATURES

- BLR Takedown models are just as accurate and reliable as their unified counterparts but much easier to transport and store.
- The rifle is easily and quickly assembled by simply sliding the barrel half into the receiver half and locking them together with the flip of a lever. The lever mechanically engages a stout locking lug into a recess in the bottom of the receiver. The system is rugged, precise and blends easily into the styling of the rifle.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

Takedown Features

Today's Lever-Action.

Fast handling and accurate, the Browning BLR is the ultimate lever-action. Cycling the lever drives a tough rack and pinion design that offers smooth, fast cycling and the tight multi-lug bolt aids in accuracy. These excellent rifles are available in a wide range of calibers tailored for game from varmints to moose.

LIGHTWEIGHT '81 STAINLESS TAKEDOWN

- Rifle quickly takes down into two parts for travel or storage
- Non-reflective satin nickel receiver finish
- Matte stainless steel barrel
- Gray laminated, satin finish straight grip stock with cut checkering
- Barrel is drilled and tapped for optional scout-style scope mount
- TRUGLO®/Marble Arms® fiber-optic front sight and adjustable rear sight
- Swivel studs

A Legendary Name.

Autoloading rifles are more popular among hunters now than ever before, but most are available in a limited number of calibers. However, for those looking for an autoloader chambered in a specific hunting cartridge, there's the BAR. Featuring the legendary style and quality of other Browning rifles, and available in a broad selection of calibers and models, the gas-operated BAR is both soft-shooting and accurate.

Features and Benefits

ACTION

- The BAR is a gas-operated autoloader with a high-strength, multiple-lug rotating bolt that locks directly into the barrel.
- The seven-lug bolt and precise breech-to-chamber relationship gives the BAR exceptional accuracy and the strength to handle magnum loads.
- The strong and rigid action bar/inertia block link-up improves accuracy by reducing barrel vibration.
- The buffering system reduces wear and stress on the rifle's mechanism.

THE BOSS DEVICE

- The Ballistic Optimizing Shooting System (BOSS) is designed to maximize accuracy.
- The BOSS device quickly and easily tunes barrel harmonics to precisely match the specific ammunition fired, resulting in amazingly tight groups. The BOSS device is available as an option on the BAR Mark II Safari.

MAGAZINE

- Detachable box magazine with a unique hinged floorplate allows the shooter to lower the floorplate, detach the empty magazine and snap in a full magazine in mere seconds.

RECEIVER

- The BAR Mark II Safari uses a blued one-piece ordnance steel receiver with scroll engraving.
- The BAR MK 3 is built on an aircraft-grade aluminum alloy receiver.
- Most BAR rifles are drilled and tapped for scope mounts (not included). See our complete line of scope rings and bases for BAR rifles at browning.com.
- The bolt release lever is incorporated into the receiver.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

Autoloader Accuracy.

The BAR is available in a variety of traditional calibers for every type of game from varmints up to moose. The reliable gas system reduces recoil to ease the sting of magnum recoil and the tight lock-up of the bolt helps improve accuracy.

MK 3 STALKER

BOSS-CR ACCESSORY

- Offers all the accuracy and tunable advantages of the original BOSS device without the muzzle brake feature.
- By simply replacing the original BOSS forward weight and recoil reduction components with the

one-piece, non-ported BOSS-CR accessory, only the reduced recoil of the original BOSS is sacrificed.

- Is designed to fit only BAR Mark II and A-Bolt centerfire rifles previously factory-fitted with the BOSS.

- GLOSS BLUED for BAR Safari; A-Bolt models: Medallion and Gold Medallion.
- MATTE BLUED for A-Bolt models: Composite Stalker, Hunter, Euro-Bolt, Varmint, Eclipse Hunter and M-1000 Eclipse.

- STAINLESS for A-Bolt models: Stainless Stalker, White Gold, Medallion and M-1000 Eclipse.
- It is important that the correct BOSS-CR be selected for a specific caliber and model of rifle.**

Muzzle Brake BOSS

BOSS-CR

UNLESS SPECIFICALLY LISTED AS INCLUDED WITH A FIREARM, ACCESSORIES SHOWN SUCH AS SCOPES, OPTICAL SIGHTS, RINGS, RING MOUNTS, OPTIC RAILS, BIPOD RAILS, AMMUNITION, ETC. ARE NOT INCLUDED.

T-BOLT

Features and Benefits

STOCK

- Stocks are full-size to more comfortably fit adults.
- Walnut stocked Sporter models feature trim dimensions with a satin finish and cut checkering. Walnut Target/Varmint models feature a Monte Carlo comb and wide fore-end for stability on the bench.
- All models include a bedded action and dual action screws for solid attachment.
- Sling swivel studs included.

TRIGGER

- The three-lever trigger design combined with a short-travel firing pin give a crisp break, quick lock time, no take-up and minimal overtravel.
- Adjustable for pull weight.

ACTION

- Receiver is machined from steel barstock.
- Features crossbolt lockup for strength and smooth operation.
- The mainspring runs directly through the massive pivot pin. Cocking effort is split between opening and closing for ease of operation. The bolt features dual extractors and a red cocking indicator band.
- Right-side ejection on both right- and left-hand models.

TOP-TANG SAFETY

- Top-tang, thumb operated two-position safety can be operated without changing from a shooting grip.

BARREL

- Target/Varmint models feature a 22" medium target profile.
- Sporter models feature a 22" medium sporter profile.
- Barrel is free-floating with a semi-match chamber and target muzzle crown.

OPTICS READY

- Receiver is drilled and tapped for scope mounts (not included). See our complete line of scope rings and bases for T-Bolt rifles at browning.com.

DOUBLE HELIX MAGAZINE

- 10-round capacity.
- The patented Double Helix rotary box magazine uses torsion spring driven interlocking gears for added reliability and easy loading and unloading.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

Trigger

Top-Tang Safety

Double Helix Magazine

Quick and Slick.

Featuring a fast cycling, straight pull bolt-action design, the Browning T-Bolt is unlike any other rimfire rifle on the market today. Easy to handle and capable of impressive accuracy, the T-Bolt is always ready to punch paper or control varmints.

GRAY LAMINATED TARGET/VARMINT STAINLESS

Measurements in inches, pounds and ounces.

- Stainless steel medium target barrel with matte finish
- 1/2"-28 TPI suppressor threads (thread protector included)
- Gray laminated, satin finish stock with Monte Carlo cheekpiece and cut checkering

SA-22

Our Founder's Firearm.

The SA-22 is a glimpse into the mind of John Moses Browning, the greatest firearm inventor in history. The straightforward operating design, the bottom ejection and the unique takedown feature showcase the inventor's innate talent and keen eye for innovation. These well balanced, easy to load and accurate rifles are still expertly crafted from finely-finished and fit walnut and steel.

Features and Benefits

TAKEDOWN FEATURE

- The SA-22 can be quickly taken down to a compact length of only 19-3/8" for storage or packing.

BARREL ADJUSTMENT

- The knurled knob allows play to be adjusted out of the barrel to ensure accuracy.

IN-STOCK MAGAZINE

- The tubular magazine is located in the stock to maintain the trim dimensions of the rifle.
- Cartridges load through a port in the right side of the buttstock.

BOTTOM EJECTION

- Bottom ejection makes the SA-22 ideal for right- or left-handed shooters alike.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

BUCK MARK RIFLE

Features and Benefits

SAFETY AND SLIDE RELEASE

- Large manual thumb safety.
- The convenient manual slide release is easily operated with the shooting or support hand.

SIGHTS

- Sporter model features a TRUGLO®/Marble Arms® fiber-optic sight system.
- The rear sight is adjustable for windage and elevation.

OPTICS RAIL

- All Buck Mark Rifles include an integrated optics rail.

MAGAZINE RELEASE

- Located adjacent to the trigger guard for convenient operation.

ACTION

- The straight blowback design offers enhanced simplicity and reliability.

FRAME

- Machined to exacting tolerances from a solid billet of 7075-T6 aluminum. The stock structure is a part of the pistol frame, reducing weight and the number of parts.
- Tough anodized finish.

BARREL

- Sporter model features a lightweight, tapered sporter-weight barrel. Target models feature a heavy bull barrel.
- The chamber in every Buck Mark Rifle barrel is hand-reamed and the muzzle crown is recessed to protect it from damage that could degrade accuracy.

SLIDE

- Serrated for an improved cocking grip.

MADE IN THE USA

- Buck Mark Rifles are proudly made in the USA.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

Features and Benefits

EASY-TO-REACH CONTROLS

- Large manual thumb safety.
- The convenient manual slide release is easily operated with the shooting or support hand.
- The magazine release is positioned adjacent to the trigger guard for convenient operation.

ACTION

- The straight blowback design offers enhanced simplicity and reliability.

FRAME

- Machined from aircraft grade aluminum alloy.
- Tough black anodized finish.

SIGHTS

- The 16-click per revolution adjustable Pro-Target™ sight is standard on all models.
- This sight provides a finer degree of adjustment over the industry's standard of 12-clicks per revolution.
- Fiber-optic TRUGLO®/Marble Arms® front sights on select models.

ABS CARRY CASE

- The Buck Mark ships in a sturdy ABS case or padded pistol rug.

BARREL

- Most models have bull barrels for improved stability. Lite models have a steel barrel liner inside an ultralight aluminum sleeve.
- The chamber is hand-reamed and the muzzle crown is recessed to protect it from damage that could degrade accuracy.

GRIPS

- Several wood, laminate and composite styles are available. Overmolded Ultragrip FX (UFX), soft nitrile rubber Ultragrip RX® (URX) and wood Ultragrip Deluxe® (UDX) ambidextrous grips have ergonomic finger grooves for enhanced control.

MAGAZINE

- The steel magazine body is heat treated for long-term feeding reliability and long life. The coil spring provides a consistent follower angle. 10-round capacity.

MADE IN THE USA

- Buck Mark pistols are proudly made in the USA.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

Features and Benefits

SAFETY

- Large manual thumb safety and grip safety.

SLIDE

- Vertical serrations provide an improved cocking grip.
- The convenient manual slide release is easily operated with the shooting or support hand.

FRAME

- Aircraft grade aluminum alloy or engineering grade composite.
- Walnut grip panels on select models.

ACTION

- The straight blowback design offers enhanced simplicity and reliability.

MAGAZINE

- The steel magazine body is heat treated for long-term feeding reliability and long life.
- The coil spring provides a consistent follower angle.
- 10-round capacity.

MAGAZINE RELEASE

- Positioned adjacent to the trigger guard for convenient operation.

ABS CARRY CASE

- 1911-22 pistols are shipped in a sturdy ABS case.

MADE IN THE USA

- 1911-22 pistols are proudly made in the USA.

ALL BROWNING FIREARMS ARE SHIPPED WITH A FREE LOCKING DEVICE TO ASSIST IN THE SAFE STORAGE OF FIREARMS.

1911 22 BLACK LABEL

Features and Benefits

EXTENDED AMBIDEXTROUS SAFETY

- Ambidextrous thumb safety is easy to operate for both right- and left-handed shooters.
- Extended design is easier to reach with the strong hand and ensures secure thumb engagement.

BEAVERTAIL GRIP SAFETY

- The beavertail design helps prevent the hand from being pinched between the grip safety and the hammer.
- Raised bump ensures positive operation.

FRAME

- Engineering grade composite.
- Available with 1913 Picatinny-style rail on the dust cover to mount lights or lasers.

FLAT MAINSPRING HOUSING

- Makes the grip more comfortable for a wider range of shooters.

MAGAZINE

- The steel magazine body is heat treated for long-term feeding reliability and long life.
- The coil spring provides a consistent follower angle.
- 10-round capacity.

COMBAT-STYLE SIGHTS

- Combat-style sights offer rapid target acquisition.

STEEL 3-DOT SIGHTS

- Sturdy steel construction.
- Three-dot style for easy alignment.

FIBER-OPTIC SIGHTS

- Speeds target acquisition.
- Sturdy steel construction.
- Three-dot style for easy alignment.
- Adjusts brightness based on surrounding light.

The Right .380.

John M. Browning invented both the Model 1911 pistol and the .380 ACP cartridge. Whether he ever intended to pair them together we will never know, but this combination of two of his most famous innovations feels like a perfect match.

JOHN M. BROWNING

John M. Browning dedicated his life to inventing revolutionary firearms that were destined to shape the future.

Many of his later designs began life in the factories in the Herstal region of Belgium. And it is in Belgium where some of his famous designs live on — including his most lasting legacy: The B25.

First manufactured by Fabrique Nationale d'Herstal in 1925, the B25 was the world's first widely successful over and under shotgun. It was the result of Browning's creative genius and experience combined with more than 400 years of FNH manufacturing expertise.

Often copied, the B25 has never been equalled, and remains an icon for hunters and target shooters everywhere.

John M. Browning was a prolific innovator and a legend in the truest sense; so it's befitting that his name should grace a range of exquisitely crafted firearms.

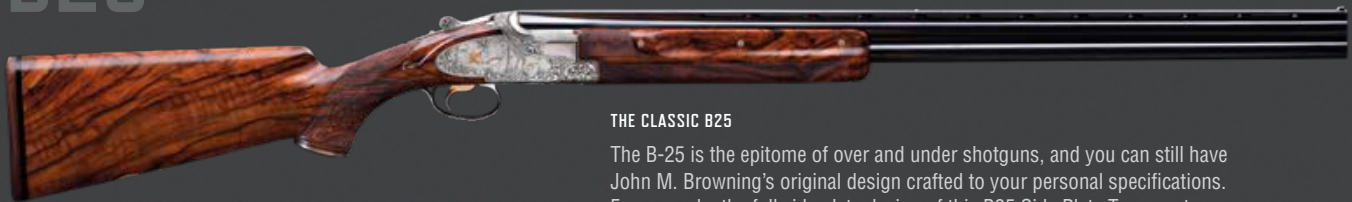

The John M. Browning Collection is the very best of what we do.

For complete ordering information, please contact your nearest Browning dealer or Browning directly at (801) 876-2711.

THE BEST THERE IS®

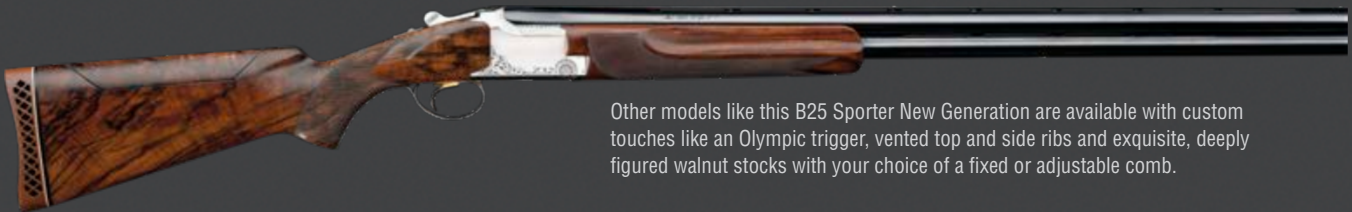

B25

THE CLASSIC B25

The B-25 is the epitome of over and under shotguns, and you can still have John M. Browning's original design crafted to your personal specifications. For example, the full side plate design of this B25 Side Plate Trap creates a stunning canvas for traditional engraving and precious metal inlays.

Other models like this B25 Sporter New Generation are available with custom touches like an Olympic trigger, vented top and side ribs and exquisite, deeply figured walnut stocks with your choice of a fixed or adjustable comb.

A custom B25 is limited only by the imagination of the buyer and the shotguns shown here highlight a small fraction of the options available. For complete ordering information, please contact your Browning dealer or Browning directly at (801) 876-2711.

HERSTAL BELGIUM
1878
JOHN M. BROWNING
COLLECTION

*The B15 Beauchamp
Grade B and Grade C*

**TRADITIONAL BEAUTY COLLIDES
WITH MODERN INNOVATION**

The John M. Browning Collection is honored to present the Grade B and Grade C B15 Beauchamp models. These over and under shotguns showcase the storied reputation of Belgian finish work and the precision of modern design and manufacturing.

Following the traditionally sleek lines of storied field guns of the past, the beauty of the Grade B shines through. The low-profile receiver is replete with full side plates to better showcase the extensive engraving of pheasant and quail scenes. Additional chasing is performed by our artisans and adds dimension to these beautiful firearms.

Moving to the Grade C, the owner will receive an even more extensive and richly engraved acanthus scroll pattern that fills the bottom and sides of the receiver. This engraving also features hand chasing to increase the contrast and depth within the pattern.

Both Grade B and Grade C models feature polished blued barrels with a solid top rib. Checkered Grade V wood is expertly matched to the receiver and barrel set. A rich satin oil finish is the ideal match for a field gun, and ties the bluing of the barrels and silver nitride receiver together perfectly.

815 BEAUCHAMP GRADE B

HERSTAL 18 BELGIUM 78
JOHN M. BROWNING
COLLECTION

*The B15 Beauchamp
Grade D and Grade E*

**YOUR PERFECT OVER AND UNDER
SHOTGUN DOES EXIST**

Walk the fields with the John M. Browning Collection and find the sought-after place where technology and craftsmanship become one. Fancy Grade D and Grade E B15 Beauchamp models incorporate the latest in Browning over and under performance and handling. It culminates with fit and assembly in the old-world style by the skilled hands of legendary Belgian armorers and engravers.

Precision engraving on the full side plate receiver is the standout feature of the smooth-handling Grade D. The additional chasing performed adds contrast and depth to the intricate pheasant and quail scenes, and sets this over and under apart from the crowd.

Traditional Belgian artistry steps to the forefront with the absolutely exquisite Grade E. Extensive chasing to the acanthus scroll engraving adorns the entire receiver and extends to cover every steel surface.

Grade D and Grade E models are fitted with a buttstock carved from highly-configured Grade V wood.

The stock is then finished in a smooth satin oil finish and capped with an engraved grip cap and skeletonized buttplate. The forearm is a mock three-piece style that adds strength to this traditional style.
