

Protection against the unexpected.

Differences among gun safes are difficult to see on a sales floor, but you can be confident that you won't find another brand that lives up to the high standards we set. Our safes combine quality construction, proprietary technology and patented interior designs to elevate them above the rest. In addition to exclusive features, all Browning ProSteel safes carry the UL RSC (Underwriters Laboratories Residential Security Container) rating — the industry standard that defines a home security safe. The UL RSC rating ensures that a safe meets construction specifications and has passed a series of independent laboratory test attacks. Our confidence in Browning ProSteel product leads to the best warranty in the gun safe industry — a lifetime warranty that covers attempted break in, break in, and fire. If one of our safes is involved in one of these situations and your homeowners insurance policy does not cover the damage to the safe, ProSteel will repair or replace the safe. (Safe contents are not covered.)

Strong, rugged bolts set us apart from the competition.

To offer protection from thieves and untrained hands, a gun safe must offer robust protection. Browning ProSteel safes call on industry-standard locks, steel hardplate lock protection and precision-made diversion bar locking systems to guard against pry, punch and drill attacks. Tried and true round bolts are chrome plated for smoothness and attached to the bolt bar with a combination of heavy-duty hardware and strong, professional welds.

PRY-STOP CORNER BOLTS

Pry-Stop Corner Bolts (U.S. patent #8,276,527) provide better protection than other pry defense designs. Innovative long locking bolts extend diagonally from a reinforced support at the corners of the door to protect against pry attack.

PRY-STOP END BOLTS

Pry-Stop End Bolts replace the top and bottom locking bolts on the door side and secure the critical door corners. Pry-Stop End Bolts are over two and one-half times longer than a standard bolt. They attach to high-strength angle steel that prevents the locking bolt support bar from bending in a pry attack.

SAFE BUILDER

BUILD YOUR CUSTOM SAFE ONLINE

Go to browning.com to build the Browning ProSteel safe you want, get a price estimate and send your order straight to your dealer.

Begin by selecting the safe that meets your needs from our wide selection. From tough, budget-friendly models to top-tier safes that maximize protection and finish options, there's a Browning ProSteel safe right for you.

Choose the finish or paint color you want. Most safes are available with either a rugged textured finish or automotive-grade painted finish.

Select the hardware that complements the safe finish and the decor of your home.

Select from dial, electronic or biometric lock models.

Add the extra shelves and interior accessories you need to maximize protection and storage potential inside your safe.

SECURITY

Protection that you can rely on.

Many of the best features of Browning ProSteel safes are those you will never see. While the locking mechanisms incorporated into your safe go unnoticed day to day, foes will certainly find them virtually unassailable. Lock protection systems are designed to divert forces away from the lock. Corner protection is strategically added to these frequently attacked areas and, unlike some of our competition, we still use high-strength steel bolts to secure the door instead of shaped sections of angle iron. All this protection is housed in a sturdy body and door that feature continuous welds to eliminate weak points.

UNI-FORCE™ LOCKING SYSTEM

OMNIBARRIER® LOCK PROTECTION SYSTEM

PRY-STOP CORNER BOLTS

Pry-Stop Corner Bolts (U.S. patent #8,276,527) provide better protection than other pry-defense designs. Innovative long locking bolts extend diagonally from a reinforced support at the corners of the door to protect against pry attack at the corner areas.

PRY-STOP END BOLTS

Pry-Stop End Bolts are over two and one-half times longer and attach to a high strength steel angle iron that prevents the locking bolt support bar from bending in a pry attack. The top and bottom locking bolts on the door side secure the critical door corners.

OMNIBARRIER® LOCK PROTECTION SYSTEM

A carefully engineered structure of steel hard plate and steel components designed to protect the safe lock from drill, punch and push attacks.

UNI-FORCE™ LOCKING SYSTEM

The finest Browning ProSteel safe locking mechanism uses robust cam locks and a large, multiple diversion bar system to prevent bolt or handle pressure from reaching the lock. Forces go to the cams and diversion bars, not the lock, for protection unmatched by other locking systems.

FORCE DEFLECTOR™ LOCKING SYSTEM

The Force Deflector Locking System (U.S. patent #7,665,405) prevents bolt or handle forces from reaching the lock by using a rotating cam device. It prevents energy transfer to the lock better than most systems used in the safe industry.

DUO-FORMED DOOR

The best Browning ProSteel safe door is made from multiple layers of steel formed together to provide superior strength, pry resistance and attack protection. A full second panel offers outstanding strength and rigidity. The door face is 1-11/16" thick.

FORMED DOOR

The Formed Door is engineered with a rugged steel face. Back and reinforcement panels provide excellent strength and attack protection compared to the competition.

REINFORCED DOOR FRAME

The door opening of the safe is strengthened by an integrated return flange to create added pry and attack resistance.

180° HEAVY DUTY HINGES

Rugged exterior hinges allow the door to swing open 180° for unhindered access to the safe interior. Door locking bolts maintain security if the hinges are cut off. External hinges eliminate the need to remove insulation for improved fire protection.

FIRE PROTECTION

2 to 3 times more fire protection with ThermaBlock technology.

When it comes to fire protection and gun safes, the devil truly is in the details. Door hinge style may seem like a small detail, yet it is crucial to fire protection. An internal hinge requires fire protection material be removed where the hinges attach. In a fire, the unprotected hinge areas allow the internal temperature of a safe to rise faster, and to a significantly higher temperature, than in a Browning ProSteel safe with no unprotected areas.

COMPETITIONS' INTERNAL HINGES

Internal hinges allow up to eight times more heat to radiate inside the safe through gaps in the fire insulation.

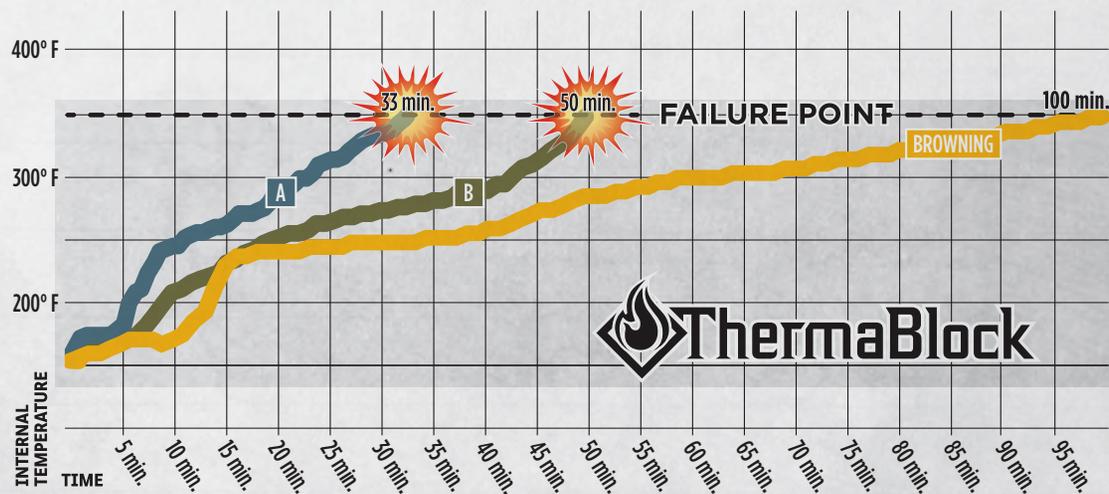

BROWNING PROSTEEL EXTERNAL HINGES

External hinges eliminate gaps in the fire insulation to block heat from entering the safe.

THERMABLOCK INTERLOCKING DESIGN

Browning ProSteel safes use interlocking design to minimize gaps. Fewer gaps means that less heat enters the interior of the safe.

Competitor A safe: Rated 90 minutes at 1650° F **Competitor B safe:** Rated 90 minutes at 1200° F
Browning ProSteel safe: Rated 100 minutes at 1680° F

Browning ProSteel safe after 100 minute fire test.

Competitor's safe after 100 minute fire test.

STORAGE AND CONVENIENCE

The safe industry's smartest storage solutions are now even more versatile.

Browning ProSteel safes offer the most versatile interiors in the industry, allowing for more storage and better organization of your valuables.

To maximize storage and improve organization, a variety of specialized accessories are available for Browning ProSteel safes with Axis Adjustable Shelving and now CMS Adjustable Shelving. All Axis accessories shown are compatible with safes built in 2018 and newer that feature CMS Adjustable Shelving and are greater than 20 cubic feet in size.

CMS Adjustable Shelving

CMS Shelves are built upon a tough steel frame and utilize a wood platform covered in soft carpet. CMS borrows essential components from the patented Axis Adjustable Shelving (U.S. patent #D662341) to retain much of the adjustability of the higher-end system. Like Axis, CMS can be adjusted up and down, side to side, added and removed to fit a wide range of valuables.

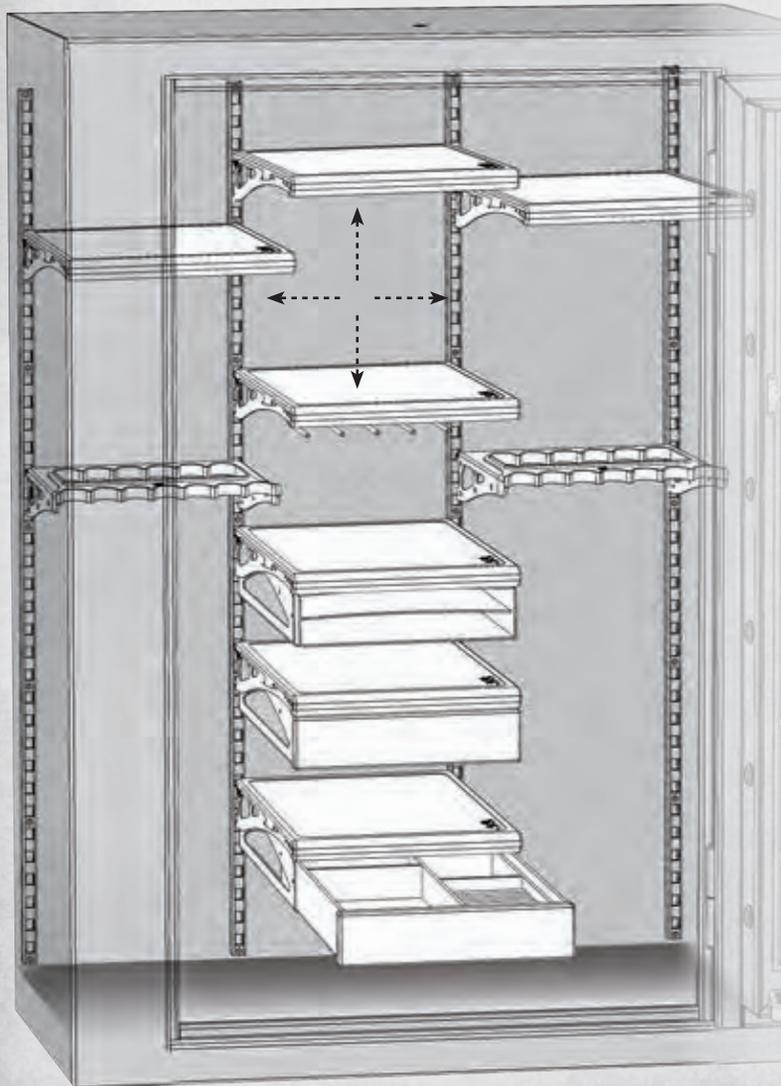

Axis Adjustable Shelving

The exclusive Axis Adjustable Shelving (U.S. patent #D662341) is a completely customizable system with an array of shelves that can be configured to meet virtually every need. The Axis shelf is made from a single piece of sturdy steel covered in a soft, protective silicone rubber that is highly durable and designed to protect guns and valuables. This design also adds a sleek appearance to the safe interior. Axis accessories, featured on the next page, are designed to easily mount to the solid steel shelf or barrel rack. (Compatible with safes that feature Axis Adjustable Shelving built in 2013 or later.)

Patented adjustable shelving creates unmatched convenience and storage solutions.

While a gun safe appears cavernous on the sales floor, the empty space inside vanishes fast the moment you begin filling it with your valuables. Long guns, carbines, handguns, watches, laptops, savings bonds and the list goes on. Adding the accessories shown on this page allows you to explore the full potential of your Axis or CMS interior equipped safe by customizing it specifically to your needs.

SHELF
Made from tough steel with a protective polymer skin that protects your valuables.

DRAWER
The sturdy drawer is perfect for all sorts of goods that need to be separated.

DRAWER WITH FOAM INSERT
Pick and pluck foam is easily customized to fit nearly any item.

DRAWER W/ JEWELRY INSERT
Organizes valuables such as watches, rings, bracelets and necklaces.

DRAWER W/ MULTIPURPOSE INSERT
Keep jewelry and other small items organized, protected and easy to find.

DRAWER W/ MONEY INSERT
Compartments are sized to organize cash, passports and other documentation.

HIGH CAPACITY BARREL RACK
Make room for more long guns with this High Capacity Barrel Rack.

BARREL RACK
The Barrel Rack holds up to 11 guns securely in place.

PISTOL SHELF
Holds up to 12 handguns or long guns. Soft surface protects guns from damage.

FILE BOX
Keep important and valuable documents in this easy to access File Box.

VERTICAL FILE HOLDER
This File Holder makes it easier to locate and organize important documents.

PISTOL RACK
With a five handgun capacity, the Pistol Rack stores pistols under the shelf.

SCOPED PISTOL RACK
With a deeper drop and heavy-gauge rods, handguns with optics are easier to store.

BOW HANGER
Lock up and protect expensive archery equipment while taking up minimal space.

More space and better organization with the best door storage system in the industry.

DPX PISTOL POUCHES

Keep handguns easy to access and isolated from bumps and scratches in the sewn-on pouches on the DPX panel.

DPX QUICK ACCESS BARREL RACK

Flexible polymer wings protect the barrel finish, secure the barrel in place and allow firearms to easily be pushed into or pulled from the rack. (U.S. patent #D643500)

DPX SCOPE SAVER

Store more long guns with optics on the DPX door rack with the patented Scope Saver. This unique recessed panel protects scopes and increases gun capacity.

The patented DPX storage system (U.S. patent #7,409,790) is available exclusively on Browning ProSteel safes. This unequalled organizational tool allows long guns, handguns, shooting gear and valuables to be stored on the back of the safe door. The DPX Quick Access Barrel Rack puts long guns on the door for instant access and the available Scope Saver increases storage and protects optics. DPX pouches and pockets keep valuables and gear where they are easy to find and free up shelf space for even more items.

CAPACITY COMPARISON	COMPETITOR'S SAFE (25-28 cubic feet)	BROWNING PROSTEEL SAFE (26 cubic feet)	RESULT
Gun capacity with half shelf interior	13 Guns	20 Guns	54% More
Gun capacity with all gun interior	27 Guns	33 Guns	22% More
Front row gun capacity with half shelf interior	2 Guns	14 Guns	600% More
Front row gun capacity with all gun interior	7 Guns	21 Guns	200% More

As you browse through this brochure you will see numbers such as 13/26+7 listed under "long gun capacity."

The first number is the long gun capacity in the safe body with a half shelf interior (13 in the example).

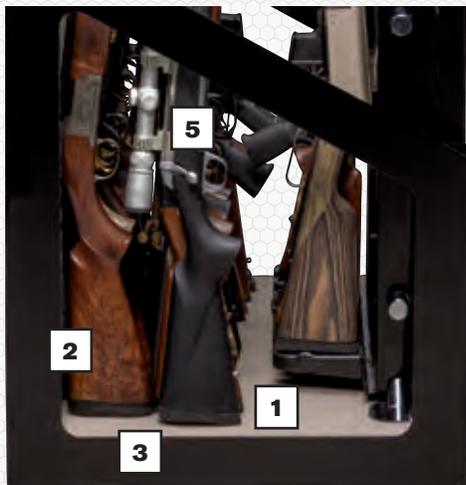

The second number is the long gun capacity in the safe body with an all gun interior (26 in the example).

The "plus" number is the long gun capacity on the back of the door (+7 in the example).

How do Browning ProSteel Safes hold 54% more long guns?

USE THESE HELPFUL HINTS TO MAXIMIZE SPACE:

- 1** Set guns on the toe of the recoil pad and allow them to lean slightly forward. Resting guns on the heel of the stock and tipping them back uses up valuable space on the floor of the safe.
- 2** Place guns without optics on the back row, against the back wall of the safe. This frees up space for scoped firearms on the outer row.
- 3** Place long guns “heel-to-toe” to store the maximum amount of guns. On the back row, be sure the gun’s heel is pressed against the back wall. On the outer row make sure the firearm is touching the toe of the gun on the back row.
- 4** Group similarly-sized firearms together and adjust barrel racks to find the balance point of the firearms to keep them as vertical as possible.
- 5** If the safe is not equipped with a Scope Saver on the DPX Barrel Rack, place often reached for guns without optics on the door to free up space for scoped long guns on the outer row. Firearms with large optics or optics with large adjustment turrets may not fit in the Scope Saver.

“Heel-to-toe” configuration allows door to close without interference and maximizes storage space.

USER-INSTALLED ACCESSORIES

Maximum Potential.

Maximize the potential of your safe with our extensive line of safe accessories. These accessories are designed to help you store more gear and guns, better organize safe interior space, add lighting to make items easier to locate and ensure that your possessions are protected from humidity.

TAKE FULL ADVANTAGE OF THE DPX STORAGE SYSTEM WITH THESE ACCESSORIES:

HANDGUN POUCH

Store more guns without taking up shelf space with DPX Handgun Pouches (sold in sets of two)

BARREL LOOP

Barrel Loops allow shorter firearms to be secured on the DPX Door Panel

STOCK RISER

Store shorter firearms on the DPX Door Panel and keep them easily accessible

DOOR ORGANIZERS

Browning safe door organizers increase gun capacity, free up shelf space and improve organization in the safe by utilizing the inside surface of the door

Frequently used guns and valuables can be stored on the door for fast access

Accommodates a wide range of long guns

Document pouch keeps important papers within easy reach

MOLLE System straps allow for versatile storage options for handguns and is compatible with any MOLLE pouch, holster or strap

SMALL

- ▶ Size: 14" W x 48" H
- ▶ Two handgun pouches
- ▶ One document pouch
- ▶ Two long gun (up to 47" long) storage pouches and barrel straps

MEDIUM

- ▶ Size: 20" W x 48" H
- ▶ Three handgun pouches
- ▶ One large document pouch
- ▶ Three long gun (up to 47" long) storage pouches and barrel straps
- ▶ One multipurpose pouch

LARGE

- ▶ Size: 27" W x 48" H
- ▶ Four handgun pouches
- ▶ Two document pouches
- ▶ Four long gun (up to 47" long) storage pouches and barrel straps
- ▶ Two multipurpose pouches

USER-INSTALLED ACCESSORIES

LED SAFE LIGHTING KIT

- ▶ Browning ProSteel factory-style LED Safe Lighting Kit is easily installed in the door frame
- ▶ Motion sensor activates the lights when the door opens and automatically shuts off after the door closes
- ▶ Includes eight LED light tubes, mounting clips, AC adaptor and motion sensor

LED LIGHT

- ▶ This battery-powered LED Light adds 75 lumens of bright light to the safe interior
- ▶ Motion sensor activated
- ▶ Attaches with hook and loop fasteners
- ▶ Requires 3 AA batteries (not included)

BOLT DOWN HARDWARE KIT

- ▶ Includes four lag screws for anchoring to wood floors and four concrete bolts and concrete anchors for securing to concrete
- ▶ Wood and concrete drill bits are also included

PISTOL RACKS 4-GUN/6-GUN

- ▶ Store handguns more efficiently
- ▶ Increases storage space on shelves
- ▶ Access to handguns is made easier by placing them in an upright position

4-Gun

6-Gun

S&G® ELECTRONIC LOCK RETROFIT KIT

- ▶ The S&G Electronic Lock is an advanced security system manufactured by the leader in the lock industry
- ▶ Includes many technical security features
- ▶ Kit includes lock and installation DVD
- ▶ Available in silver chrome (shown), black chrome and gold
- ▶ Installation by a professional locksmith is recommended

SECURAM™ BIOMETRIC LOCK RETROFIT KIT

- ▶ The SecuRam ScanLogic Biometric Lock uses the uniqueness of an individual fingerprint as the combination in this advanced security solution
- ▶ The lock opens with either a fingerprint or a multi-digit code
- ▶ Highly secure with quick operation
- ▶ Simple programming instructions
- ▶ LCD Screen
- ▶ Available in silver chrome (shown), black chrome and gold
- ▶ Installation by a professional locksmith is recommended

DRY-ZONE MOISTURE REDUCER

- ▶ Absorbs moisture without electricity and is rechargeable in an oven
- ▶ One 500-gram box protects up to 37 cubic feet of enclosed space, about the volume of a standard 30" wide safe
- ▶ Can be reactivated indefinitely

EVERDRY™ ELECTRIC DEHUMIDIFIER

- ▶ The EverDry Electric Dehumidifier removes humidity from the interior of a safe and protects against rust
- ▶ The 18" long EverDry should be used on safes 30" wide and larger
- ▶ Cord is removable for installation

ZERUST VCI PROTECTANT

- ▶ Small capsule emits an invisible vapor that forms a corrosion- and rust-resistant barrier on metal surfaces
- ▶ Vapor Corrosion Inhibitors (VCI) have been used for years to protect metal parts in industrial and commercial applications
- ▶ One capsule protects a standard 30" wide safe (approximately 26 cu. ft.) for one year

FLEXIBLE EVERDRY™ DEHUMIDIFIER

- ▶ Flat and bendable
- ▶ Takes up less space and makes installation easy, especially in small safes
- ▶ Removes humidity from the interior of a safe and protects against rust
- ▶ Plug is removable for installation
- ▶ LED indicates unit is operating

VCI GUN SOCK

- ▶ Vapor Corrosion Inhibitor (VCI) penetrates into the smallest crevices and drives out moisture where oils cannot reach
- ▶ Provides full protection by forming a vapor enclosure around the firearm from muzzle to butt
- ▶ Drawstring closure
- ▶ Gives additional protection to all metal items in an enclosed area such as a gun safe or cabinet
- ▶ Fits rifles and shotguns 48" to 56"

VCI GUN SOCK (TWO-PIECE)

- ▶ Vapor Corrosion Inhibitor (VCI) forms a protective vapor enclosure around the entire firearm
- ▶ Adds protection to all metal items in an enclosed gun safe or cabinet
- ▶ Drawstring closure
- ▶ Two-piece design fits most takedown rifles and shotguns
